## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	20 7 0
Six Months.....	0 13 0
Twelve Months.....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

## Forthcoming Meetings.

- Oct. 7—Bahia and San Francisco Railway (Half-yearly), Winchester-house, at 12.  
 Oct. 7—Recife and Sao Francisco Railway (Half-yearly), Winchester-house, at 12.  
 Oct. 12—Buenos Ayres Western Railway (Annual), City Terminus Hotel, at 12.  
 Oct. 13—Metropolitan District Railway (Adjourned Special).  
 Oct. 13—Grand Trunk Railway of Canada (Half-yearly), City Terminus Hotel, at 2.  
 Oct. 14—Central Uruguay Railway of Montevideo (Annual), City Terminus Hotel, at 2.  
 Oct. 26—Alberta Railway and Coal Company, Limited (Annual).

The transfer books of the preference, ordinary, and deferred shares of the Buenos Ayres Western Railway, Limited, will be closed until October 12th for the purpose of preparing the half-yearly dividend warrants.

**The South Eastern and Chatham Railways.**—Mr. W. R. Stevens, late chief officer of the South Eastern Railway Company, has been elected to a seat on the board, Mr. Alfred Willis taking his place as general manager. On the authority of Mr. Willis, it is stated that the Joint Working Committee of the two companies propose to convert the Maidstone branch of the London Chatham and Dover route into a main line to the coast. With this object in view, a short length of about 2½ miles of new line may be built to couple up the South Eastern Railway at Chelsfield with the London Chatham and Dover at Otford, and a disused piece of line between Otford and Kemsing is to be railed afresh and reopened for traffic, so that fast trains may be run from Victoria to Maidstone, and thence *via* Ashford to the coast without change of carriage. Season-tickets are to be available for either route of the two companies. Ashford station, on the South Eastern line, is to be reconstructed to meet the requirements of the combined traffic. Mr. Willis anticipates further improvements in rolling stock from the economical joint working of the two companies. It should be pointed out that these works involve a capital outlay of only a few thousand pounds at the outside.

## The Railway Times.

Established 1837.

OCTOBER 1, 1898.

## THE DECREASE IN AMERICAN RAILWAY RATES.

We had occasion last week, in reviewing the reports of three leading American railroads, to refer to the universal reduction in the rates received by the companies for the carriage of freight as compared with the remuneration secured for similar service in 1896-7. Thus on the ton-mile basis—by which alone results can be made of value for comparative purposes—the Milwaukee had to be content with an average receipt of 0.972 cent as against 1.008, the Wabash with 0.624 as against 0.661, and the Norfolk and Western netted only 0.404 to show against 0.446 of the previous year. Thus the actual decreases are roughly 3, 6, and 10 per cent. on the results of 1896-7 for these roads in the order named. It is unnecessary to analyse in detail the reasons which have given rise to the differences in the per-centage of reduction. It is sufficient to say that the Milwaukee is a "one-crop" road, the financial condition of which is liable to fluctuate with the one factor, wheat; and that the others are fair examples of all-round goods-carrying lines, dependent upon the general state of the trade of the country. The important point to which we would draw attention is the more general consideration that, despite improving trade conditions, the railways seem to be totally unable to maintain the level of rates which, measured on the average system quoted above, were certainly not unduly high a year ago. The question is, are they unduly low to-day, considered with reference to both parties to the transactions involved—the traders, as well as the carriers. To enable an answer to be given, the statistical division of the U.S. Department of Agriculture has recently made the matter the subject of a special report. The report is officially stated to be based on the figures of not less than one-third of the total railway mileage of the country, and may be thus taken as a fair index of general conditions. From this the following table has been compiled, and is certainly sufficiently striking to justify a wider recognition than is usually conceded to Governmental publications:—

TABLE SHOWING RAILWAY RATES IN CENTS. PER TON MILE, 1867 TO 1896.

Year.	Average cents per ton mile.
1867 .....	1.925
1870 .....	1.889
1875 .....	1.421
1880 .....	1.232
1885 .....	1.011
1890 .....	0.941
1895 .....	0.839
1896 .....	0.806

It will be seen from the above that the decrease in freight rates since 1867 has been fully 60 per cent., while the passenger earnings, though resisting longer the inevitable detritive tendency, have since about 1878 begun to follow the same unfavourable course. Before considering the effect of these changes upon the net income of the companies, it is interesting to note that the same official report draws a suggestive comparison between the relative fall in rates and in the prices of leading commodities. Of these it will serve to quote here the simple instances of wheat and coal. The latter, it is stated, costs to-day to transport from pit to tide-water less than one-half what it did in 1867, while the cost is but 10 per cent. lower; and wheat has actually

declined in price 23 per cent. less than the railway rates. It cannot be said therefore that the "bad times" until lately experienced by the producers of these commodities is in any way to be laid to the door of the railways, and the instances can be extended almost indefinitely. Whether the process, continued to any considerable future extent, would not in time react upon the trade prosperity of the country, is another matter, and a very serious one. It is impossible to dissociate the financial welfare of the transportation agencies from that of the country which they serve, and a crisis in the affairs of the railroads has before now made its influence felt upon the business of the smallest private trader. But we do not desire to pose as alarmists, at any rate unnecessarily, and we pass, therefore, to the net effect upon the companies of the changes chronicled in the report. It may be granted that had the various companies shown the power to maintain rates, a very powerful incentive to economy would have been eliminated or not called into being, while their reduction has without doubt stimulated traffic to an extent which could hardly have been foreseen. The point for the companies, therefore, was to so reduce their working expenses as to maintain a level of net receipts per ton mile not unduly out of proportion to the increased bulk of traffic carried. That is to say, starting from the palmy days of the early seventies, a reduction in the ton-mile receipts had to be faced, but the railways had to work to cause that reduction to figure out more favourably when corrected to show actual profit, and although the profit per ton mile must be lessened, the greater bulk would restore the balance. Though such a desirable consummation has not been achieved in every case, the results speak volumes for the ability displayed in the technical departments of American railroad managers. What has been done is shown in the table below, compiled by a company whose books have been specially designed to afford the information year by year:—

TABLE.—LAKE SHORE AND MICHIGAN SOUTHERN RAILROAD.

Freight Service, Ton Mile.			
	Income, Cts.	Cost, Cts.	Profit, Cts.
1870 .....	1'504	'932	'572
1875 .....	1'010	'737	'273
1880 .....	'750	'435	'315
1885 .....	'553	'399	'154
1890 .....	'626	'458	'168
1895 .....	'561	'410	'151
1897 .....	'545	'356	'189

In the case of this company it thus appears that the danger of working down towards a rapidly approaching vanishing point has been—for the time, at least—averted. On the majority of the great roads managerial reforms and mechanical improvements have effected a similar revolution. Over the whole country it is stated that the average number of tons hauled 1 mile is now 199 per train as against 155 in 1887, 111 in 1877, and 81 in 1867. In other words, the efficiency of a freight train has been doubled in thirty years, and train mileage has been correspondingly reduced. Amalgamations have reduced superintendence and clerical charges, and only a few days ago we read that the Vanderbilt roads have overhauled their time-tables with a view to the future elimination of unprofitable trains. This, then, is the other side of the picture, which appeared so gloomy. The only question is—Will it last? Can reductions in working costs go much further? A limit there must obviously be, while—under present conditions, at any rate—the limit to rate reductions is not so clear. When the responsible head of a great line, President Fink, declares that the rate reduction has become "chronic," it is time for the matter to be taken in hand in a more drastic method

than heretofore. The principal reason for low rates is low prices. Now that trade in the States is prosperous, it is a matter of real reproach to the higher management that the railways should not share equally in the harvest, as—gross increases notwithstanding—we fear they are not.

### RAILWAY WORKING EXPENSES.

The railway shareholder is hardly likely to have overlooked the advance in working expenses during the last few years, for even if he did not discover the existence of this feature by a study of the half-yearly accounts, it has been brought home to him either in the concrete form of reduced dividends or in the halt that has been lately called in the advance of dividends shown from 1895 onwards. What, however, we wish to draw attention to is not merely upward swing of the pendulum in this respect, but the not very cheering fact that working expenses have apparently attained a permanently higher altitude, so that whether gross revenue in the immediate future be advancing or receding a larger ratio must be set aside for working charges than was the case ten or even five years ago. In 1897 the ratio of working expenses to gross receipts for the railways of the United Kingdom was over 57 per cent. This is the highest level recorded in any year except 1893, and that period was entirely abnormal on account of the severe loss in revenue arising from the coal strike on the one hand, and the inability to effect economies because of higher cost of coal, &c., on the other. In 1889, which is the year in the previous cycle of railway prosperity most nearly corresponding to 1897, the ratio of expenses was only 52 per cent. In 1860 it was 47 per cent., in 1870 48 per cent., and in 1880 it was 51 per cent. Whilst in the twenty-nine years from 1860 to 1889 the ratio of expenses only advanced from 47 to 52 per cent., in the eight years 1889 to 1897 it advanced from 52 to 57 per cent. It is to this element that the decline in the percentage of net receipts on capital is mainly due, and the fact that such a high per-centage was reached in a year which witnessed a large growth in gross receipts, does not augur well for the immediate future, when we may witness a period of comparatively stagnant gross revenue. In Scotland and Ireland the ratio of expenses to receipts has not generally been so high as in England, and for 1897 their ratios were 52 and 56 per cent. respectively. We give below the ratio of expenses in each section of the United Kingdom for the past ten years:—

Year.	Ratio of working expenses to gross receipts.		
	England and Wales.	Scotland.	Ireland.
1888 .....	52 per cent. ....	48 per cent. ....	53 per cent.
1889 .....	52 " .....	49 " .....	54 "
1890 .....	54 " .....	52 " .....	56 "
1891 .....	55 " .....	53 " .....	54 "
1892 .....	56 " .....	52 " .....	56 "
1893 .....	57 " .....	52 " .....	55 "
1894 .....	57 " .....	52 " .....	54 "
1895 .....	56 " .....	50 " .....	54 "
1896 .....	56 " .....	51 " .....	55 "
1897 .....	57 " .....	52 " .....	56 "

Thus it appears that neither in Scotland nor Ireland has the advance in expenses been so rapid as in England and Wales. It is further interesting to note that in the United States the advance in the percentage of working expenditure was not nearly so large as in the United Kingdom. This will appear from the subjoined comparison of the ratios since 1888 for the two countries, but it should be pointed out that these American figures are very deceptive, the ratio being much lower ostensibly than it is in reality, owing to the misleading practice of charging to betterments account what English roads include in their expenses of maintenance and repairs:—

Year.	Per-centage of working expenses to gross receipts.	
	United Kingdom.	United States.
1888	52 per cent.	68.72 per cent.
1889	52	67.95
1890	54	68.33
1891	55	68.83
1892	56	70.40
1893	57	70.29
1894	56	70.22
1895	56	70.41
1896	56	70.48
1897	57	69.91

Between 1888 and 1897 there was an advance of less than 1½ per cent. in the ratio of expenses for United States railroads, against 5 per cent. in the United Kingdom. From the results shown by our railways last half-year it is evident that a further marked advance will be witnessed in 1898, and according to all indications it will not be many years before 60 per cent. is reached. Of course the ratio of expenses in the United States has always been much higher than on this side of the Atlantic, though clearly the gap is diminishing. The explanation of the poor dividends, or of their entire absence in the majority, of American railroad junior securities has been found in their high rate of expenses, though, of course, the huge proportion of "water" in American railway capital has a great deal to do with the matter. Clearly the large and continuous advance in the ratio of English railway expenditure is also a matter of great moment to the ordinary stockholders, though the situation is not without its palliatives. To illustrate this we may point to what the position of the ordinary shareholders would be at the present time had expenses in 1897 been no higher than they were in 1888. In the first place, there would have been available for the ordinary shareholders a sum of 4,686,850*l.* more than they actually received, and that is equal to 1*l.* 7*s.* per cent. on the whole ordinary capital of our railways, exclusive of nominal additions. Further, the average return on the whole capital of the railways of the United Kingdom would have been 4.17 per cent. instead of 3.73 per cent., the actual figure. It will be interesting to see how typical companies have fared in the matter of rising working expenses, and, in order to show this, we have chosen the London and North Western, the Caledonian, and the Great Southern and Western companies' results for the years 1882 and 1897-8. Subjoined are the amounts of gross receipts, working expenses, and net revenue together with the ratio of expenses in the three cases named:—

## LONDON AND NORTH WESTERN.

	Year 1882.	Year 1897-8.
Gross receipts	£10,265,788	£12,899,494
Working expenses	5,215,971	7,404,658
Net revenue	5,049,817	5,494,836
Per-centage of working expenses	50.81	57.40

## CALEDONIAN.

Gross receipts	£2,865,483	£3,868,160
Working expenses	1,395,914	1,955,533
Net revenue	1,469,569	1,912,627
Per-centage of working expenses	48.72	50.55

## GREAT SOUTHERN AND WESTERN.

Gross receipts	£727,803	£871,074
Working expenses	396,489	475,145
Net revenue	331,314	395,929
Per-centage of working expenses	54.48	54.55

Whilst in the case of the North Western the proportion of expenses to receipts has advanced by 6.59 per cent., in the case of the Caledonian it has advanced by only 1.83 per cent., and in the instance of the Great Southern and Western Company by only .07 per cent. These results may be regarded as fairly indicative of what has taken place among all the railways in the three countries, the advance in working charges having been decidedly greatest in England. Without attempting a detailed analysis of the figures, we may say that this is primarily due to the fact

that the railways now do much more work than they formerly did for the same money, both as regards passenger and freight traffic; but particularly the former. Some important facts based upon the experience of the North Western Company will make this clear. In 1882 that company earned from all classes of traffic an average revenue per train mile of 5*s.* 7.2*d.*, and paid away in expenses 2*s.* 10*d.* per train mile. But in 1897-8 its average receipt per train mile was 5*s.* 6.5*d.*, and its average expenditure 3*s.* 2.4*d.* per train mile; also for all classes of traffic. Whilst in 1882 the average net profit on each train mile run was thus 2*s.* 9.2*d.*, in 1897-8 it fell to only 2*s.* 4.1*d.* We further find that the average receipt per passenger train mile run in both 1882 and 1897-8 was only about 4*s.* 4*d.*, or considerably less than the average revenue derived from all descriptions of traffic. And as the cost of running passenger trains, arising both from increase in the weight of trains and higher speed, to say nothing of the additional cost of maintenance and the provision of extra safeguards against accident, must have enormously increased, the average net profit per passenger train mile must have sunk to a very low figure. With the ratio of expenses permanently higher, there is, unfortunately, little prospect that ordinary dividends can be maintained whenever the present growth of traffics comes to an end—and it is already on the wane. There is no relief to be found in prior charges, except to the extent that the advance in quotations for the prior stocks has enabled the companies to raise capital for current requirements at lower rates than formerly. In the same way the prices of the ordinary stocks may not suffer in proportion to their reduced dividends in consequence of the lower yield that is now expected from these securities. One effect of the reduced profits which rising expenses has produced has been to deter capitalists from entering upon entirely new railway projects. Nearly all the capital now being provided for new lines has to be raised through the medium of existing well-established companies, and even under these conditions there is a very real danger that in many instances the extra outlays will not prove remunerative.

## THE NORTHERN PACIFIC RAILWAY.

In the American market "Pacific" issues have for some time past been a prominent feature, and in the past account, which was by no means generally favourable as regards the market for American rails, we find that Central Pacific, Northern Pacific, and Union Pacific Common stocks each advanced by about 4 points. In fact, in has been a fine time of late for the reorganisers, who, no doubt, have been able to dispose of a good deal of the new stocks grabbed by them during the process of reconstruction. The Northern Pacific securities have been "boomed" for all they are worth, and probably a good deal more, on the results disclosed in the report for the past year. As this report revealed results equal to a dividend of 3½ per cent. on the common stock, it certainly looked satisfactory enough, especially as the full 4 per cent. had actually been paid on the preferred stock ranking immediately before it. But a comparison of the results for the period to June 30th with former achievements of the old company cannot fail, we think, to throw considerable doubt upon the ability of the company to maintain the 1897-8 figures. The road was reorganised on September 1st, 1896, so that the past year's results from July 1st, 1897, to June 30th, 1898, did not compare with a full year of the new concern. This is unfortunate, because it is made the excuse for omitting all comparisons from the recent report, and it is only by a close study of past records that the startling results of 1897-8 are revealed in their true colours. Going back to only 1894-5, it will be found that the gross earnings of the old company were \$17,434,981, and net

earnings \$6,115,298, the ratio of expenses having been about 65 per cent. Last year the gross earnings were \$23,679,718, and the net earnings \$11,772,639, the rate of expenses having been reduced to 50·28 per cent. And to go still further back, whilst gross earnings last year were practically the same as in 1892-3, the operating expenses were \$2,570,000 less, and the ratio of expenses was thus reduced from 60·50 in 1892-3 to 50·28 per cent. last year. In three years the net profit as shown in the accounts has practically doubled, but to attain this result there has been virtually no addition to expenses. No doubt the past year was a specially favourable one for the Pacific roads. Crops were heavy and prices for cereals were good, whilst the Klondike rush also helped to swell revenue. But what accounts for the reduction in expenses to only about 50 per cent. of the gross receipts? This is fully 20 per cent. below the average rate of American railroads, and the sudden drop from 65 per cent. (the rate in 1894-5) is hardly to be explained by the fact that grade reductions have been effected and the hauling power of locomotives increased. Had the working expenses been only 60 per cent.—which is a comparatively low rate in America—the net earnings for 1897-8 would have been only \$9,600,000—that is to say there would have been a very slender margin over the preferred dividend in spite of the admittedly favourable gross results. The *New York Commercial and Financial Chronicle* in its usual optimistic attitude towards American railroad enterprises says—"There can be nothing mysterious or incomprehensible about the 'lower ratio of expenses to earnings now shown.'" It points out that the Northern Pacific enjoys a better rate than most American roads, and further points to the improved methods of working as explanations of the drop in expenses. But the Northern Pacific rates have always been relatively high, and were as a matter of fact lower last year than in previous years; and to admit that the reduction in the ratio of working charges is a reasonable one is to accuse the management of serious waste in the past. There is no denying that on the particulars supplied in the report improved methods have been introduced, but we venture to suggest that there is another explanation in part, at least, of the reduction in expenses. Under the reorganisation plan provision was made to the extent of \$5,000,000 for betterment and equipment funds, whilst further amounts not exceeding 1½ million dollars per annum were provided for under the reconstruction. The relief to revenue charges thus afforded will be found, we think, to account to a large extent for the phenomenal reduction of expenses. In short, more is being charged to capital and less to revenue than formerly. Though nominally the net earnings were equal to 3½ per cent. on the common stock, nothing is paid on it. Instead of distributing these profits a fund amounting to \$3,000,000 has been created as a reserve available until 1901 for the maintenance of regular quarterly dividends on the preferred stock. This fund—which, by the way, is regarded by some of the American papers merely as a rate-war or fighting fund—is equal to just one year's dividend, and might very easily be wiped away by the first indifferent year that the Northern Pacific encounters. In the report the following remarks on this subject are made:—"In view of the comparatively brief period which has elapsed since the reorganisation of your company, and also in view of the fact that the favourable results of the fiscal year just closed must in prudence be regarded as exceptional, the board has been led to adopt this conservative policy, which, no doubt, will commend itself to all who are interested in the company. Of course, this reserve fund need not be drawn upon if current available earnings shall continue as at present. It may be added that the business prospects of the company were never better than now."

It is to be noted that after 1901 the fund, or so much of it as may be left, may be returned to the general funds of the company. On the strength of the establishment of this fund and the favourable results of the past year, the 4 per cent. preferred stock was carried up to 80—a price which not very long ago would have been considered quite high enough for a fairly good bond of the same denomination. Bearing in mind the enormous advance in receipts, the severe reduction in the ratio of expenses, and the other special considerations to which we have drawn attention, it does not appear to us that the setting aside of a year's dividend on the preferred stock for the space of three years forms any sort of guarantee that the "regular quarterly dividends" will be forthcoming in the future. Neither is the report, when carefully analysed, so cheerful a document as would appear on the surface.

### PASSING NOTES.

The traffic receipts for the week ending September 25th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,806,549*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,760,846*l.*, with 19,034½ miles open. There was thus an increase of 45,703*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for thirteen weeks to date amounted on the same thirty-three lines to 24,286,240*l.*, in comparison with 23,803,025*l.* for the corresponding period last year; increase, 483,215*l.*

The general manager of the London and South Western Railway Company has decided to make arrangements by which those who travel by the 12.20 (midnight) train from Waterloo to Wimbledon may proceed without delay to Kingston. This alteration, which comes into operation on November 1st next, is intended primarily to benefit journalists and other night workers, for whose use the company successfully introduced the 3.45 a.m. train from Waterloo to Kingston recently.

At a meeting of the Dover Rural District Council the surveyor reported on an application of Messrs. Pearson, Admiralty Harbour contractors, as to the light railway from Martin Mill to Langdon Bay Works. It was decided to refuse permission for level crossings at present, and to leave the contractor to apply again.

The London and South Western Railway Company on Saturday offered a reward of 100*l.* for information leading to the conviction of the person or persons who on Thursday week maliciously placed on the down line between Leighbridge and Wimborne Station an iron chair with intent to wreck a passenger train.

The London Brighton and South Coast Railway Company are putting in force reduced rates for parcels from October 1st. These rates compare favourably with the Post-office charges for parcels up to 11lb. in weight, whilst packages weighing 112lb. can be sent under the company's scale.

The receivers and managers of the Charnwood Forest Railway will pay a first dividend of 50 per cent. on the arrears of interest upon debenture stock for the year ending December 31st, 1894, on October 1st and any following Monday, at the offices of Messrs. Jackson, Pixley, and Co.

The Scotch railway traffics for the past week are very good. All the lines report increases, and as these are on increases in the corresponding week of last year, the results can only be regarded as satisfactory.

It is reported that the Lanarkshire and Ayrshire Railway will be extended to Dalry. The company's engineers have surveyed the ground, and the plans will be laid before the directors at an early date.

The Hartlepool are petitioning the North Eastern Railway Company to fill the vacancy in the directorial board caused by the death of Sir William Gray by appointing Sir Christopher Furness.

Mr. C. H. Chapman, goods manager of the London Chatham and Dover Railway Company, is about to retire, after fifty years of railway service.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 3rd inst.; the fortnightly settlement in other Securities commences on the 11th inst.

### CITY, FRIDAY EVENING.

The feature in the MONEY MARKET is the pronounced demand for loans, and  $2\frac{1}{2}$  to  $2\frac{3}{4}$  per cent. is now asked for accommodation of this description. The discount market is, if anything, a trifle easier, the prevailing impression being that, with the turn of the quarter, we shall see cheaper money. The Bank Return issued yesterday shows that the exports of gold, together with the expansion in the coin and note circulation due to the approach of the quarter, have caused a decrease of more than a million in the reserve, which now stands at 22,463,000*l.*; its proportion to the current liabilities is  $3\frac{3}{8}$  per cent. lower at  $47\frac{1}{4}$  per cent. The borrowings of the market from the Bank and of the Bank from the market have caused a net increase of 2,797,000*l.* in the "other securities" and a decrease of 625,000*l.* in the Government securities; while revenue payments have transferred 28,000*l.* to the public deposits, and the private deposits are rather more than a million higher on balance. The Bank yesterday sold 10,000*l.* in sovereigns for Buenos Ayres, and to-day 20,000*l.* in sovereigns were withdrawn for Santos. These are the only bullion operations since the issue of the weekly Return.

Silver bars are now quoted at 28*½*d. per oz., being unaltered on the week. A year ago the price was 26d.

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 29-32*d.*; Calcutta, 1*s.* 3 29-32*d.*; Hong Kong, 1*s.* 11*½*d.; Shanghai, 2*s.* 8*½*d.; Singapore, 1*s.* 11 15-16*d.*

The premium on gold at Buenos Ayres has fallen during the week from 165*·*00 to 151*·*30 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 6*·*96*d.* A year ago the premium was 189 per cent., and the value of the paper dollar 1*s.* 4*·*47*d.*

The Valparaiso 90-day exchange comes over to-day at 12 13 13-16*d.*, a rise of 1*½*d. on the week. A year ago it was 17 9-16*d.*

The Rio de Janeiro exchange on London is 8 5-32*d.*, being 11-32*d.* higher on the week. A year ago it was 7*½*d.

The Bankers' Clearing-house return for the week ending September 28th, 1898, shows a total of 132,029,000*l.*, as compared with 116,422,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Renten, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£33,176,964	£34,366,741
Total Reserve .....	£22,462,764	£23,018,296
Proportion of Reserve to Liabilities...	47 <i>½</i> per cent.	48 <i>½</i> per cent.
Notes in Circulation .....	£27,514,200	£28,148,445
Bank Rate of Discount .....	3 per cent.	2 <i>½</i> per cent.
Open Market ditto .....	2 <i>½</i> per cent.	2 per cent.
Consols (account) .....	109 <i>½</i>	111 <i>½</i>
French Renten (account) .....	102 <i>f.</i> 55 <i>c.</i>	103 <i>f.</i> 42 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 30 <i>c.</i>	25 <i>f.</i> 18 <i>c.</i>
New York 60 days ditto .....	\$481 <i>½</i>	\$482 <i>½</i>

The STOCK MARKETS, after displaying considerable weakness for some days, have shown a rather better tendency during the last twenty-four hours. On the quieter aspect of foreign politics Consols to-day were a shade better, and on the week show an improvement of  $\frac{1}{8}$ . One of the features of the week has been the flatness of South Eastern deferred, a greatly exaggerated importance having been attached to the contemplated outlay of a little money in coupling up the railway with the Chatham Company's line

at Otford, and making a new through route to the Kentish coast via Maidstone and Ashford. Another reason for the weakness of South Eastern stock is found in the fear of loss of season-ticket traffic through the competition of the Waterloo and City line. On the whole, however, South Eastern deferred cannot but be regarded as a promising investment at its present price of 105*½*. Waterloo and City stock has lost 6 points on the week. Hull and Barnsley, after displaying some weakness, recovered to-day on the result of the special meeting. The principal fluctuations of the week are recorded in tabular form below. Yankee Rails were most conspicuous amongst the stocks which recovered to-day, but on balance for the week, as will be seen below, they still show a marked decline. Canadian Rails have been offered on the poor working statement issued by the Canadian Pacific, and the expectation of unsatisfactory weekly and monthly returns by the Grand Trunk. Foreign Rails do not call for much attention. Buenos Ayres Western was rather weak on the issue of the report, but the result is no worse than had long been looked for. Buenos Ayres Great Southern rose to-day on the dividend announcement, which was very satisfactory, the distribution now recommended making 6 per cent. for the year, with 100,000*l.* to reserve and more than 9,000*l.* carried over. Mexican Southern (to which we called attention a fortnight ago at 20) is now 23*½*, being up 3 this week. Costa Rica shares were in demand to-day and recovered  $\frac{1}{4}$ , being the whole of the previous loss of the week. Leopoldina shares have also displayed some activity, and at 4*½* are worth buying to hold. In Nitrate Rails the only change is a fall of  $\frac{1}{8}$  in the preferred ordinary. Midland Uruguay debenture stock is up 3, Recife 2, San Paulo 1*½*, ditto debenture stock 2*½*, Natal and Nova Cruz debentures 10, and various Brazilian railway shares  $\frac{1}{4}$  to  $\frac{1}{2}$ . On the other hand, Cordoba and Rosario preference is down 3, ditto income debenture stock 2, North West Argentine first debenture stock 2, Ottoman 1888, debentures 2, and Western of Havana bonds 1.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>

## General News.

### PORT TALBOT DOCK AND RAILWAYS.

At the invitation of the directors of the Port Talbot Dock and Railway Company, the members of the Bristol Channel centre of the Institute of Marine Engineers have paid a visit to the extensive wet and dry docks in progress at Port Talbot. The visitors were conveyed over the dock lines, the features of the great works being pointed out and explained by the officials. In a paper read later in the day by Mr. A. H. Case, the resident engineer, it was stated that the authorised capital of the present company was 1 $\frac{1}{2}$  million sterling. The most important part of the company's undertaking—which is expected to be practically completed by the middle of October—is the new dock. The entrance channel is 150ft. wide at the bottom, and has a depth of 33ft. at high water ordinary spring tides, and 28ft. 6in. at ordinary neap tides. At low water ordinary neap tides there will be about 15ft. in the channel. The rivers Avon and Ffrwd-Wyllt discharge themselves into the channel, and are expected to help materially in maintaining the depth in the entrance without dredging. Should, however, it be found that silting takes place, Port Talbot will be no worse off than most other ports where dredging has generally to be done to maintain the required depth. On the north side the entrance is sheltered by a pier, or breakwater, 1,470ft. long. As the strongest and most prevalent winds as well as the heaviest seas are from the south-west, the entrance requires more help from this quarter. This is provided for by the old south pier and the new south breakwater. The latter runs almost due west towards the Mumbles Head for a length of 1,000ft., terminating in about 8ft. of water at low water ordinary spring tides. Access to the dock from the channel is gained through a lock 450ft. long between the gates and 60ft. wide. There is also a set back in one of the lock walls, forming a lie-by, 315ft. long, and increasing the width of the body of the lock from 60ft. to 110ft., thus permitting two vessels to be locked in or out of the dock at the same time. It is estimated that a depth of 26ft. will be available for four hours during spring tides and three and a half hours during neap tides, and a relatively longer time for lesser drafts of water. The new dock, excavated in the moorland alongside and including the old entrance cut to the Old Float, is of an area of 24 acres, and has a uniform depth of 27ft. 6in., the water being easily maintained at a level of 3ft. 6in. above high-water ordinary spring tides by means of the fresh water discharged into the dock from the rivers Avon and Ffrwd-Wyllt, the former of which is held up by a weir and by-pass, and the latter flowing direct into the dock. As nothing but traffic from the coal tips has been provided for, no expensive dock walls have been built. There are four modern hydraulic coal tips. These tips, together with two others of the same nature situated in the Old Float, are capable of lifting waggons of coal 20 tons to a height of 45ft. in one instance and 40ft. in the remainder above rail level. It is estimated that 250 tons could be shipped per hour at either tip. Provision has been made for the erection of five additional tips when required. In addition there are about 14 acres in the neighbourhood of the old wharves, which about three years ago were dredged to a uniform depth of 24ft. Here on the north side are two modern hydraulic coal tips by Armstrong and a timber export wharf 190ft. long, provided with two hydraulic 30cwt. Armstrong cranes. On the south side is a timber wharf 500ft. long with sheds of about 12,000 superficial feet area. Hydraulic cranes are to be erected here. The whole of the dock property is provided with a complete system of electric light. The power for working gates, capstans, cranes, tips, &c., is obtained from a central hydraulic pumping station through a system of mains laid around and across the dock and lock, the water providing a pressure of 700lb., and being in all cases returned to the pumps after use. A graving dock is being constructed for a separate company, having an entrance from and situated near the north-west corner of the floating dock of the Port Talbot Company. The graving dock, which is being busily excavated, will be 430ft. long inside the caisson, and 60ft. wide at the entrance. Inside, the dock is widened to 97ft. at the bottom and 114ft. at the top in order to provide for two vessels side by side when required. A complete system of dock railways has been provided. There are about 15 miles of railway sidings around the old and new docks. The dock lines leading to the several tips have been so arranged that trains of coal waggons may be fed by gravity down gradients of 1 in 90 to 1 in 120 to the weighbridges and tables of the tips, and when emptied back over other weighbridges on down gradients of 1 in 53 to 1 in 200 to low level roads, from which the trains of empty waggons will be drawn out by locomotives back to the main line and away to the collieries.

**BRECON AND MERTHYR RAILWAY.**

Messrs. H. J. Pillinger and Co., stockbrokers, Newport, Mon. write to the *Financial Times*:—With reference to the leaderette in your issue of to-day, on the subject of the Brecon and Merthyr Railway Company, the following particulars may be of interest to yourself, and will further confirm your remarks regarding the values of the relative issues:—We have followed very closely the prospects of this line for the past twelve or fifteen years, during which time it has had its share of prosperity and misfortune—prosperity some ten years ago on account of the large amount of coal which was being carried from the Powell Duffryn pits to Newport. At that time to 1889 the revenue was sufficient to pay interest upon the rent-charge, "A" and "B" debenture stocks (4 per cent.), and upon the first and second preference stocks (5 per cent.); in fact, the revenue would have admitted of a payment upon the third preference stock, although it was not done. Following this came a period of depression, caused, in the first place, by a very serious war of rates which took place between the Rhymney, Taff Vale, and Barry railways, the effect of which was a diversion of traffic from the Brecon and Merthyr system to that of the Rhymney. From that time to the present the company by degrees have been increasing their traffics from other sources, and at the last half-yearly meeting the chairman gave a summary of what is about to take place in the future. During the last Parliamentary session a Bill was promoted to enable the company to construct a line from a point on their system to connect with that of the Rhymney to give them an additional outlet for shipment—namely, Cardiff. The projected line would have cost the company about 100,000*l.* The Barry Company were projecting lines similar to their own, and which, in fact, afforded them a direct route to Cardiff, *via* a new connection with the Rhymney Railway. This effected their main object, and on investigation proved to be better laid out than their own for the working of traffic. As he (the chairman) expected, they were soon approached by their Barry friends, and after considerable negotiations they agreed to withdraw their own scheme and support that of the Barry, giving the Barry Company running powers up to Rhymney. In return for this the Barry Company would pay the cost of doubling the single portion of the Brecon and Merthyr Company's line between the points of junction with them and the Rhymney, and of such other works as might be necessary for the full use of the Brecon and Merthyr line by them. An expenditure of some 20,000*l.* would be incurred, of which 9,500*l.* was to be free of all charge to that company; but on any excess over and above that sum they were to pay 3 per cent. per annum, with the option of repaying the sum should they desire to do so. The Barry Company would allow them to run over their line down to its junction with the Rhymney on very favourable terms, and had agreed to provide sufficient siding accommodation both at that point and at the junction with the Brecon and Merthyr line. Having regard to the new pits now being sunk in the Rhymney Valley and the consequent large increase in the output from that valley, this connection, placing the Brecon and Merthyr, as it did, in direct communication with the Barry line and docks, and providing an excellent new route to Cardiff, *via* the connection with the Rhymney Railway, was of the utmost importance. He was sure the shareholders would agree with him that they had good cause to congratulate themselves upon this arrangement. He felt confident that it would prove to be the best investment ever made by the Brecon and Merthyr Company. The Usk Valley Railway Bill had passed both Houses, and before it reached the second House that company came to terms with the promoters, who upon being given access to Talylyn Station, withdrew the running powers as between that place and Brecon. The Brecon and Merthyr have now Newport, Cardiff, and Barry as outlets, without expense of making lines. The chairman then reported the progress made with the new pits in the Rhymney Valley. He said that the Powell Duffryn new pit was sunk 200 yds. and the other 100 yds., and there was no trouble now with water or any other unusual obstruction. The other necessary works were going on well. After these statements a shareholder elicited the fact that 1,000,000 tons per annum extra traffics would be coming over the line, and one of the directors stated that he expected that it would more than double their present income. The chairman further stated that as soon as the connection with the Barry Company was made, and everything was right, there would be about 1,200 tons per day to be carried over the line.

**STATION CABMEN AND PASSENGERS' LUGGAGE.**

The officials of the organisation representing the cabdrivers employed at the various railway termini throughout the metropolis yesterday sent to the general managers and traffic superintendents of the respective railway companies a circular, in which

the men ask for redress of a number of alleged grievances. The circular states that the system introduced by the railway companies for the carrying and delivery of luggage at 6*d.* per package within a radius of 8 miles has "virtually ruined" the railway cab industry. At many of the termini the daily delivery of portmanteaus and personal luggage of passengers averaged close upon six hundred, which meant a loss of about 50*l.* at each station to the cabmen. Passengers who had their luggage delivered travelled to their destination either by bus or the underground railways. The men urge the railway companies to abolish the interchange system throughout the winter months which was inaugurated and worked with great satisfaction during the late cab strike. The circular adds that great dissatisfaction has arisen amongst the men as the result of the interchange system, which has resulted in overcrowding and consequent confusion at the different termini. Owing to the severe competition on the part of the companies' unlicensed and licensed omnibuses, the railway cabman find great difficulty in earning sufficient money to pay for the hire of their cabs. In conclusion, the men appeal to the companies to reduce within reasonable limits the number of privileged cabs plying for hire at the various termini. Several meetings of the men have been called to consider what action shall be taken in the matter. In the event of the railway companies not complying with the men's demands, there is a probability of a withdrawal of cabs from the stations.

**RAILWAY SERVANTS' HOURS OF LABOUR.**

A report has been issued by the Board of Trade respecting the proceedings of the Board of Trade under the Railway Regulation Act, 1893, 56 and 57 Vict., c. 29, during the year ended July 27th, 1898. In presenting the report to the Board of Trade Sir Courtenay Boyle remarks:—"The Board of Trade has again been able to do much in the interests of the men and for the benefit of the travelling public without having to take legal proceedings. It will be observed, however, that in seven cases out of 50 no substantial reduction of hours has been obtained by the representations of the Department. Recourse to the Railway and Canal Commission can only be had if complainants will undertake to support their case by evidence of which a legal tribunal can take cognisance. Servants of companies not unnaturally prefer to rely on the offices of the Department, and to trust to their negotiations rather than to incur the difficulty and responsibility of a formal appearance. Directors and managers of companies have continued to show a marked willingness to help these negotiations; and as long as this is so and the proper scope of the Act is borne in mind, no attempt being made to extend that scope by an effort to increase wages under the plea of shortening hours, it may be expected that the Board of Trade will be able to help the men in their reasonable requirements without either undue interference with the management of the railways on the one hand or the necessity of incurring the friction inseparable from legal proceedings on the other." The report itself, which is signed by Mr. F. J. S. Hopwood, states:—"I have the honour to submit the fifth report on the proceedings which have been taken up to the present date upon representations made to the Board of Trade under section 1, sub-sections 1 and 2, of the Railway Regulation Act, 1893. That section provides that—(1) If it is represented to the Board of Trade, by or on behalf of the servants, or any class of the servants, of a railway company, that the hours of labour of those servants, or of that class, or, in any special case, of any particular servants engaged in working the traffic, on any part of the lines of the company are excessive, or do not provide sufficient intervals of uninterrupted rest between the periods of duty, or sufficient relief in respect of Sunday duty, the Board of Trade shall inquire into the representation. (2) If it appears to the Board of Trade, either on such representation or otherwise, that there is, in the case of any railway company, reasonable ground of complaint with respect to any of the matters aforesaid, the Board of Trade shall order the company to submit to them, within a period specified by the Board, such a schedule of time for the duty of the servants, or of any class of the servants of the company, as will in the opinion of the Board bring the actual hours of work within reasonable limits, regard being had to all the circumstances of the traffic and to the nature of the work. (3) If a railway company fail to comply with any such order, or to enforce the provisions of any schedule submitted to the Board in pursuance of any such order and approved by the Board, the Board may refer the matter to the Railway and Canal Commission, and thereupon the Railway and Canal Commission shall have jurisdiction in the matter, and the Board may appear in support of the reference, and the Commissioners may make an order requiring the railway company to submit to the Commission, within a period specified by the Commission, such a schedule as will, in the opinion of the Commission bring the actual hours of work within reasonable limits.

Prior to dealing with the statement of complaints which have occupied the attention of the Department during the past year, it will be well to repeat the assurance given in former reports, that the board have adhered to the policy of communicating with railway companies upon the subject of the hours of labour of their servants without making known the source of the representation upon which the action of the board is founded. Although the board are not disposed to think that railway companies generally would offer any active opposition to those servants who make representations to the Department, the men have been held to be entitled to an assurance that the communications addressed to the Board will be treated as confidential, unless the complainant's authority is obtained to disclose the origin of the representation. The Board of Trade have, in fact, closely followed the procedure which was minutely described in my former reports. [Here follows a statement showing the proceedings under the Act during the year ending July 27th, 1898, both in the cases arising in previous years, but not completed, and in those arising in the year now dealt with.] The number of cases inquired into since the passing of the Act may be divided as follows:—

Class of servant affected.	Com-plaints to July 27, 1894.	Com-plaints to July 27, 1895.	Com-plaints to July 27, 1896.	Com-plaints to July 27, 1897.	Com-plaints to July 27, 1898.	T'tl.
Signalmen	24	60	33	31	17	165
Drivers and firemen	14	22	12	2	5	55
Staff at stations	14	30	20	20	14	98
Guards and br'k'men	7	25	14	10	7	63
Shunters	6	12	9	10	5	42
Wagon examiners	1	2	5	1	2	11
Gatekeepers	4	2	3	1	—	10
Platelayers	1	—	1	—	—	2
Other grades	1	3	—	1	—	5
Total	72	156	97	76	50	451

It will be observed that there is again a falling off in the number of complaints received. For the year ending July 27th, 1898, they number 50, as against 76 dealt with in the last report. Of these 50 complaints, 17 were made by or on behalf of signalmen, and 14 by or on behalf of the working staff at stations; the balance of the 50 being made up of 5 complaints by drivers and firemen, 7 by guards and brakesmen, 5 by shunters, and 2 by wagon examiners. Of the 50 representations received by the Board, in 10 cases the companies affected removed the ground of complaint in response to a preliminary inquiry by the Board, and without any formal order. In 19 others substantial reductions of hours of duty were obtained for the men. Five representations did not appear to the Board of Trade to contain a sufficient *prima facie* case of hardship to justify action; and nine complaints made during the year still form the subject of inquiry. Seven complaints out of the 50 are left in which no substantial reduction of hours was obtained by the intervention of the Board of Trade. In cases such as these the Department is always ready to give the complainants an opportunity of stating their grievance before the Railway and Canal Commission, in pursuance of the powers conferred by the Act. Up to the present time, however, no case has been submitted to that tribunal. From the commencement of the administration of the Act the largest proportion of complaints have been received from signalmen, especially from men who work in twelve-hour boxes, and it is believed that the policy which has been steadily followed by the Department of setting its face against the twelve-hour shift in all boxes on main lines, and also on branch lines except those of a very unimportant description, has done a great deal to improve the conditions of service of signalmen in most parts of the United Kingdom. There are not so many complaints from shunters as might be expected. The lot of these men is necessarily harder than that of signalmen. They work out of doors day and night in all weather, and under circumstances involving serious danger to life and limb. Yet the Department only received five complaints of their hours of labour during the period under review. The reason may probably be found in the willingness shown by the companies to deal liberally and sympathetically with this class of servant. Soon after the Act passed the Board of Trade received some important complaints as to the periods of duty worked by shunters. The complaints were most carefully investigated by the Department, and a revision of hours was put in force in some busy yards. The principles laid down by the Board would seem to have been adopted elsewhere, with the result that the complaints received from shunters show a marked falling off. The experience of the Department goes to show that the booked hours of shunters are not now excessive, but that

great care is necessary on the part of the companies to prevent the booked hours being exceeded. At certain periods of the year congestion of traffic must lead to some irregularity of working, with the result that shunters, in common with other classes of railway servants, have to work overtime. There is, however, no excuse for a practice to which the attention of the Department has been now and then directed of normally working the men for periods considerably in excess of the booked hours. These observations with regard to overtime apply with equal force to goods guards and drivers, who are dependent on the regular working of traffic to ensure anything like close adhesion to their stated booked hours. Reference is made in the summary of cases to a general complaint made on behalf of servants of the North British Railway. From the complaint it appeared that the men working the goods traffic had been endeavouring to induce the company to reduce their hours, but with slight success. A suggestion by the men that the question of the hours of work should be submitted to arbitration had not been accepted, and the men had therefore decided to apply for the intervention of the Board. It was accordingly represented, on behalf of 500 drivers, 500 firemen, 400 guards, and 100 shunters, that their hours of work were excessive, though no details of them were given beyond a statement that the standard day's work for drivers, firemen, and guards was twelve hours, and for shunters, with some exceptions, ten hours. As stated in the summary, the Board were of opinion that before they could take action they should be put in possession of fuller particulars of the hours deemed excessive, and in consequence details were furnished of the hours of the men working the goods traffic at a large number of places. The Board then communicated with the company, with the results shown in the summary. It must always be borne in mind that the statute was passed with the object of preventing excessive hours of labour for railway servants. No doubt the wellbeing of the men was in the mind of Parliament when the Act was adopted; but one of the chief reasons for the legislation was the safety of the travelling public. In administering the Act the Department watches carefully for cases of hours of labour on railways which may be considered dangerous to travellers, and where such a case is found prompt measures are taken to ensure a reduction of such hours. The Department also uses the powers conferred by the Act to urge railway companies to ameliorate the conditions of service of their servants when, after investigation of the circumstances, it appears that the men are subjected to periods of duty which are, in the opinion of the Department, unfair and unreasonable. On the other hand, the Department feels that it would be exceeding the duties imposed upon the Board of Trade by the statute if it allowed the Act to be set in motion for purposes other than those described. The Act must not be used as a lever to obtain from railway companies alterations in conditions of employment other than those which relate to the legitimate shortening of hours of labour. The question of hours is naturally closely allied to that of wages, and there is always a danger, especially in the case of sweeping complaints couched in such general terms as those against the North British Railway, to which reference has been made, that the Act may be used as a weapon in some dispute between a railway company and their servants for the purpose of obtaining alterations in the terms of service other than the reduction of hours of labour within the meaning of the Act. The Department has been careful to avoid this difficulty. During the five years in which the Act has been in force the railway companies have made large reductions in the hours of labour of railway servants, both at the instance of the Board of Trade and largely on their own initiative. So far as the Department is aware the companies have made these reductions in hours, certainly the reductions made at the instance of the Board of Trade, without adversely affecting the wages of the men. In fact it is probably true to say that during the last five years, while large reductions in hours have been in progress, wages have steadily increased. It will seriously embarrass the administration of the Act and prejudicially affect the men themselves if complaints under the statute are made on their behalf, not for the *bona fide* purpose of obtaining reductions in hours of labour, but really to put pressure upon the companies to increase the rates of pay. Such a course will inevitably be met by the companies with a proposal to reduce the wages in due proportion to the shortening of the hours of work."

#### ALLEGED "VICTIMISATION" OF RAILWAY SERVANTS.

Mr. Bell, general secretary of the Amalgamated Society of Railway Servants, has issued a statement alleging "victimisation" on the part of certain railway companies of some of the members of the society. Mr. Bell says:—"As I have already

had occasion to point out, one of the most noticeable consequences of our adoption of the pacific counsel of Sir Courtenay Boyle, for each grade on each railway to proceed individually in making application for improved conditions of service, has been that the companies have struck at the spokesmen in such individual action. This is, in large part, the reward we have received for pursuing the methods proposed by the Board of Trade instead of pressing our national movement as at first advised to its logical conclusion. I have made ample representation to the Board of Trade, and have waited long for their answer. At length it has come, and is as follows:—'Whitehall.—Sir—With further reference to your letter of the 26th ult., on the subject of the dismissal or reduction of certain railway servants, members of your society, by the railway companies employing them, I am directed by the Board of Trade to transmit to you the enclosed copies of replies received from the companies in the matter.—I am, sir, your obedient servant, T. W. BLOMEFIELD.'—Sir Thomas Blomefield encloses a volume of correspondence between the various railway companies and the Board of Trade on points of detail, but so far as the matter at issue is concerned there are explicit replies, and of these the following from the Great Central Company may be taken as typical:—'General Manager's Office, Manchester, July 13th, 1898.—Sir—I duly received your letter of the 27th ult., and have submitted it to my directors at their meeting to-day. I am instructed to inform you in reply that whilst my board is at all times willing, as a matter of courtesy, to give every information to the Board of Trade, they do not think that on questions affecting the discipline of the staff they should be called upon to justify their action to the officials of the Amalgamated Society of Railway Servants. The statements made by the Amalgamated Society are altogether incorrect. The men were dealt with for good and sufficient reason apart from their connection with any society, and the same course would have been adopted under similar circumstances whether they were members of the society or not.—Yours, &c., WILLIAM POLLITT, General Manager. The Assistant-Secretary, Railway Department, Board of Trade.' The London and North Western correspondence is particularly bulky. It is evident from a perusal of it that a misunderstanding has taken place with regard to the formulation of specific complaints. But in order that the company may have no excuse for refusing to discuss the matter with the Government Department I will make a point of supplying the Board of Trade with information which can be forwarded to the company. And the Taff Vale Company, in their letter, go so far as to say that the directors have no knowledge of the two men mentioned as having been victimised—viz., J. Taylor, of Cardiff, and R. Parr, of Ferndale—having been connected with the A.S.R.S. or any other society. This is tantamount to a declaration on the part of Mr. Beasley, the general manager of the company, that he does not know of my connection with the society. It will be remembered that on this question of victimisation of members of our organisation who had taken a prominent part in the society's work, or who had represented the men in the recent interviews which have taken place with the directors, I prepared a statement which was laid before the Board of Trade. To this statement the companies have, as I have stated, in some instances replied, such replies, as I have also pointed out, consisting of denials. It was, therefore, felt necessary to ask for an impartial inquiry, and with this view the executive passed the following resolution:—'As the replies re victimisation received imply that the railway companies are unaware of the exact circumstances under which their servants have been dismissed, and the gross injustice inflicted by such dismissal without adequate cause, upon men who have been contributors to pension and other benefit funds, and seeing that the Board of Trade has expressed the opinion that railwaymen have deserved well of the State, we appeal to the Right Hon. C. T. Ritchie to institute a full inquiry, by special commission, into specific cases of dismissal. We will furnish the evidence of which we are in possession, and which goes to show that such dismissals have been the result of the men being active members of the A.S.R.S. We are desirous, in the public interest, that the truth shall be served, and the only independent tribunal we can appeal to is the Board of Trade.' Mr. Bell adds that he should be content with an inquiry by any authority which the Board of Trade might think fit to nominate, so long as they accorded him the privilege of submitting evidence. Such an inquiry, he thinks, would remove the scales from the eyes of a great many people. "All we ask," he adds, "is that an impartial inquiry should be granted, when I will undertake to prove my case up to the hilt, and to show that, although slight concessions have been made, the policy of conciliation recommended by the Government last Christmas, and loyally acquiesced in by our association, has so far proved a failure owing to the victimising tactics of the railway companies and the unfair way in which the concessions have been distributed."

#### NORTH WESTERN PASSENGER TRAIN SERVICE.

Notwithstanding the usual reduction of train mileage which takes place at the end of the tourist season, numerous improvements are being made for the winter in the train services on the London and North Western Railway, commencing on October 1st, prominent amongst these being the following:—New morning express at 8 a.m. from Liverpool, Lime-street, to London, calling at Edge-hill, Stafford, and Willesden Junction only, and performing the journey to Euston in four-and-a-half hours. Breakfast-cars for first, second, and third class passengers will be attached to this train, which it is expected will be largely patronised by business men who wish to make the journey to London and back in the day, the return journey being made by either the 4.15 or 5.30 p.m. train from Euston, on both of which dining-cars are provided. An additional morning service will be provided for passengers from London to Manchester by the 8.30 a.m. mail train from Euston, a new train being put on from Crewe, reaching Manchester, London-road, at 12.40 p.m. Manchester passengers will be able to obtain breakfast between London and Crewe in the cars which run to Holyhead by the mail train. The express service of trains between the north and west of England *via* Severn Tunnel has been increased by the running of an additional train from Bristol at 2.20 p.m. and from Crewe at 8.5 p.m., the latter train affording an entirely new through connection from all parts of Scotland, the north of England, and also from Ireland to Cardiff, Bristol, and the west of England generally. Passengers from Ireland breaking the journey at Holyhead and resuming it by the 8 a.m. train, are, by means of a new express leaving Chester at 11.22 a.m. for Shrewsbury, now enabled to reach Cardiff at 3.23 and Bristol at 3.35 p.m. An improved service to and from North Wales, Llandrindod, and other watering-places in Central Wales, and also to and from the Windermere Lake district will be continued during the winter.

#### RAILWAY MEN FOR PARLIAMENT.

Mr. Richard Bell, the general secretary of the Amalgamated Society of Railway Servants, has issued the following statement:—"The executive committee of our association, at their recent meeting, passed the following resolution:—'That the annual general meeting of this association, at Newport, in 1894, having declared in favour of our society being directly represented in Parliament, and having made provision for the payment of elective expenses, this committee decides that the general secretary and the president would be justified in allowing themselves to be nominated as candidates for Parliament as the society's nominees, providing they carry out the conditions laid down in the decision arrived at by our governing body in 1894.' This resolution means that ere long the two chief officials of our great organisation will have seats in the House of Commons, and that continuous, direct, organised endeavours will be made by constitutional means to obtain the redress of our grievances. We hope by this means to secure the ear, not only of the Board of Trade and other Departments of the Government, but also of the House of Commons. We have been too long either misunderstood or ignored. The members we return to the House of Commons, according to the resolution of our governing body at Newport, will not be tied to any political party. They will enter the House of Commons neither as 'Tory' nor 'Radical,' nor 'Labour Unionist,' nor 'Independent Labour;' they will enter as Independent members representing our organisation and labour generally. It will be a condition of the nomination of a candidate that he shall have the support of the branch or branches of our organisation in the constituency to be represented, and the approval of the Trades Council of the division."

#### ENGINE-DRIVERS AND THE PUBLIC SAFETY.

A conference of representatives of the drivers and firemen from all the seventeen locomotive districts on the North Eastern Railway system took place at Darlington on Sunday. Mr. R. Bell, general secretary of the Amalgamated Society of Railway Servants, was present. Among the questions considered during a six hours' sitting was that of express engine-drivers not being allowed, as formerly, to prepare their engines, the work being done by men of a lower grade, and the drivers having to trust to the examination of some other person for an assurance that the engines were in thorough working order. Mr. R. BELL said that this was a matter of vital importance both to the drivers (who were responsible for the safety of the train) as well as to the travelling public. Men had complained to him that they felt very nervous under these circumstances, so much so that they did not thoroughly understand what they were doing during the "run." The conference also discussed the questions of men being laid off during the week to make up for Sunday duty, of delay in promotion when vacancies occurred, and the subject of

gauge glass protectors, the glasses frequently breaking in consequence of increased pressure on the more powerful locomotives. The general secretary was instructed to arrange for an interview with the directors of the North Eastern Railway Company and lay the grievances before them.

### NITRATE NOTES.

A correspondent—anonymous, of course, but evidently a bit of a wag—writes to us asking what we think of "Buenos Ayres Nitrates" at their present price. The best advice we can give is that they should be exchanged for Iceland Snakes.

Most of our financial contemporaries are just now trying to say something or other about the "nitrate boom," but they are all of them more or less at sea on the subject. One of the weeklies says:—"We do not see any benefit to Nitrate Rails out of a limitation of production, unless it means that improved prices for nitrate will enable higher freights to be charged." There is much virtue in that little word "unless." It is about on a par with the *Statist's* memorable suggestion that the Nitrate Railways Company should build branches with a view to developing its passenger traffic!

The following paragraph has gone the round of the financial press during the past week:—"It is reported that the Primitiva Gas Company is to be registered in England, which will enable its shares to be quoted on the London market." This reminds us of the Primitiva "gas" emitted by the late Colonel North in his great oration of 1889—"Gentlemen, I tell you Primitiva Nitrate will pay cent. per cent. yearly on its original capital."

With the subjoined table before him, the would-be investor in Nitrate shares should have little difficulty in making a selection:—

Name of Company.	Deben- ture Debt.	Stock Exchange Valuation of Share Capital.	Trading Profit.	Deben- ture Service.	Last Div. on Ordinary Shares.
Colorado .....	£	£	£	£	Dec., 1895
Consolidated .....	—	24,000	6,674	—	May, 1897
Lagunas Nitrate .....	—	180,000	47,853	—	March, 1897
Lagunas Syndic. ....	127,500	330,000	44,331	23,062	Dec., 1897
Lantaro .....	80,000	495,000	58,959	9,907	July, 1898
Liverpool .....	—	126,500	1,221	—	April, 1898
London .....	30,000	89,500a	13,722	—	Oct., 1889
Tamarugal .....	179,150	60,937b	10,291	23,400	Dec., 1894
Paccha and Jaz .....	—	9,000	3,995	—	May, 1895
Rosario .....	332,700	480,000	68,019	72,292c	Sept., 1898
Primitiva .....	—	—d	—f	—	—g
Salar del Carmen .....	80,000	88,000	—h	9,450	Sept., 1898

San Jorge .....	—	337,500	30,360	—	April, 1898
S. Sebastian .....	—	21,562	2,469	—	July, 1896
Santa Elena .....	—	5,500	561	—	Nov., 1893
Santa Rita .....	31,500	60,000	8,128	5860	May, 1896
San Pablo .....	—	32,000	1,689	—	Oct., 1895

a 10,000 ordinary at 25s. and 22,000 preference at 70s. b 125,000 ordinary at 1s. 10d. and 195,000 preference at 4s. 4d. c Not quoted. d Not quoted. e Interest 27,692*l.*, redemption of bonds 44,600*l.* f Loss 8,183*l.* g No dividend paid by present company. h No results yet published. i Loss 2,960*l.*

The Amelia Nitrate Company is left out of the list, as only its debentures are quoted. The Anglo-Chilian Nitrate and Railway Company is not included, because its mixed business admits of no comparison with the other companies. New Julia is not priced in the list, being in process of winding up.

We understand that the Lagunas Syndicate has appointed Mr. Charles Fearn to be manager of its two oficinas. Although as a rule the management of a nitrate factory requires all the time and care that one man can devote to it, yet perhaps in this instance, as the two works are close together and belong to the same owners, this may not apply, especially as Mr. Fearn is very energetic, and is a *persona grata* with the Chilian workmen. Under the new and more economical régime which will now be the order of the day at the works, nitrate should be manufactured at a lower price than hitherto.

The *Daily Chronicle* will be glad to learn that we have succeeded in establishing the identity of M. Louis de Rougemont. He is no other than the Nitrate Company director, who so mysteriously disappeared from this country some time ago.

Already several oficinas—among them Carolina and Santa Rita (both the property of the Santa Rita Company), the Puntunchara (London Company), the Mercedes, and the Aguada—have re-started working on the strength of the rise which has taken place in the price of nitrate during the past six months.

The Nitrate Propaganda Committee will, it is to be hoped, utilise the able speech of the President of the British Association to the utmost. There are probably many farmers in England who are still in ignorance of the great assistance that nitrate might be to them, and by means of pamphlets and lectures in market towns during the winter a good work could be done to assist British agriculture. In this direction the dissemination of quotations from the speech of Sir William Crookes might be of great avail.

It is to be hoped that the new nitrate combination—i.e., if we get it—will make arrangements for placing the sale of its entire output in the hands of one firm or company. There is said to be a general feeling in the trade that a paid board, composed of the members of the Permanent Nitrate Committee, should be instituted to control all questions of price, chartering, &c., so that every interest may be fairly represented.

The following table shows the nationality of the various nitrate producers in Chili and the per-centage of their productive capacity in the years 1895 and 1897:—

	1895.	1897.
English companies .....	59½ per cent.	42½ per cent.
Chilian do. ....	12½ "	15½ "
German do. ....	8½ "	13½ "
Spanish do. ....	5½ "	9½ "
French do. ....	2 "	8½ "
Peruvian do. ....	8½ "	5½ "
Italian do. ....	4 "	4½ "
Austrian do. ....	0 "	½ "
	100 per cent.	100 per cent.

### NITRATE "COMBINATIONS" TO RESTRICT OUTPUT.

At a time when so much is being said about the prospects of a new combination amongst nitrate producers, it may not be out of place to briefly review what has been attempted in a similar way in the past. In the early eighties enormous advances were made by certain banks in Chili to finance new nitrate concerns. The result of all this was over-production, a heavy fall in prices, the ruin of many firms, the entanglement of others, and a threatened commercial and financial crisis in the country. One bank alone was involved to the extent of \$5,000,000, and, as a means of saving itself and its clients, devised a scheme for the restriction of the nitrate output and an increase in the price of the commodity. This was the "combination" of 1884, which gave rise to such extravagant hopes of what it would do for owners of nitrate properties and for producers that confidence in the industry was temporarily restored, and the objects of those who engineered the movement were in great measure achieved. In reality the combination merely proved that the supply had been far in excess of the demand, for notwithstanding a reduction of the exports (which had been 13 million quintals in 1883) to less than 9½ million quintals in 1884, and but little more than this in 1885, the price was only raised from an average of 9s. 9d. in 1884 to 10s. 1½d. in 1885, and in 1886 it again fell to the previous level of 9s. 9d. At the same time the curtailment of the output diminished considerably the national revenues, caused a heavy fall in the international exchanges, and threw out of employment large numbers of workmen who had been attracted to Tarapaca from the south. Another and somewhat unexpected result of the combination and the threat of high prices for nitrate of soda was to give birth in Europe—principally in Germany, which absorbed about two-thirds of the total output—to various artificial manures in competition with nitrate, the principal of these being sulphate of ammonia, which contains about 25 per cent. of nitrogen, as against the 20 per cent. of nitrogen which is contained in nitrate of soda. Needless to say, the great expectations formed of the combination encouraged the establishment of new nitrate factories (oficinas), and acted as an incentive to those already in existence to enlarge their productive capacity, the consequence being that even before the final breakup of the combination in 1887, the output was greater and the price lower than ever before. The position was aptly summed up at the time by a well-known journalist in these words:—"The coalition was powerless to sustain the price of nitrate at a high level beyond the short time necessary to save the banks and financiers from their otherwise inevitable loss, but it had served its purpose in doing this much. The combination of 1884 had practically no effect on the price beyond the first few months. . . . Rings and coalitions in the long run are useless to the industry they are supposed to serve, and nitrate is no exception to the rule. The fittest must survive, and the companies that can produce cheapest and have caliche to hold out longest must prosper most; the others must go to the wall." However, in 1891, another combination was brought about on

similar lines to the former one, and this lasted until December 31st, 1893.

The question has often been raised, What would be the effect on the nitrate industry were the Chilean Government to decree as illegal all combinations on restraint of trade? It may, therefore, serve a useful purpose to reproduce here some of the views expressed from time to time on this subject by some of the public authorities in Chili. Thus the Minister of Finance, on November 30th, 1893, in a letter to the Chilean Minister in Paris, said:—"It must be borne in mind that from March 31st, 1894, the production will be free, and each producer will be at liberty to produce as much as he can; that from the same date the Lagunas works, with a capacity of production equal to 10,000 quintals daily, will commence operations, as will also other works belonging to Sloman and Dohn, and Folsch and Martin; that many of the Government properties to be sold will be in a position to produce shortly after the sale, especially those which are situated alongside works actually in operation, or those possessing machinery, which with little trouble can be put in running order; and, finally, that the production in the current year will not be under 21,000,000 quintals, which production has been very limited, and has caused a considerable diminution in the stocks of nitrate in Europe." And in November, 1894, prior to the second sale of Government nitrate grounds, the Fiscal Delegate of the Nitrate Fields, in his report to the Ministry of Finance, wrote:—"The question is sure to arise of forming a new combination, which, by limiting the production, would keep up the market price of the article; but this will not be so easy a matter, seeing that those who have bought new grounds must pay for the same within two years, and will, therefore, have to work them actively. The object of the combination is notoriously to limit the production to such an extent as to prevent large stocks in the European markets, so that the selling price may be kept sufficiently high to make the manufacture remunerative to all the producers. As, however, all the nitrate oficinas are not on the same footing as regards facilities of production, it naturally follows that whilst one oficina in a semi-exhausted condition makes a profit of, say 20 cents per quintal, another (possessing good grounds and machinery) will be making \$1 20c. or more. Under this system of enabling profits to be made by oficinas which ought rather to be shut down, injury is done to the nitrate trade in general, as, although the article could be sold to advantage at lower prices, by the well-situated oficinas, restriction of output involves excessive prices, and consequently prejudice to the nitrate market, since there are other similar fertilisers to which buyers will give preference, if the results obtainable are, more or less, the same, and at less cost."

Notwithstanding the lack of success attending their previous efforts, and these somewhat ominous warnings respecting the future, the nitrate producers of Chili on February 29th, 1896, agreed upon a third attempt to restrict the output and raise the price of that commodity. Under this agreement, which was to be in force as from January 1st, 1896, to March 31st, 1899, the total exports were not to exceed 49,000,000 Spanish quintals between April 1st, 1895, and March 31st, 1897; but in the event of 95 per cent. nitrate, at the coast rising to over 6s. per quintal, the committee might increase the exports during the following year to any quantity it might consider expedient. But in no case could the committee, after March 31st, 1897, limit the export to less than 23,500,000 quintals in any one year. The quota of production allotted to each oficina was to be determined by a *prueba*, or trial of ninety days, to take place at the latest by June 30th, 1896, and, as a result of this trial, each oficina was bound to limit its production to 31 per cent. of its capacity, the only exception being in the case of the Lautaro Company, which was allowed special terms without any trial. This method of arriving at the quotas turned out to be most unfortunate, and may be regarded as the primary cause of the subsequent premature collapse of the combination. During the "trial" every oficina worked at the highest pressure, and consequently the quotas to be allotted were far in excess of anything that had been anticipated. Not only so, but as the outcome of the special efforts made during the *prueba*, together with the exploitation of new grounds, large stocks of nitrate were made at the very outset, and for these there was no immediate sale. Equally disappointing was the effect on prices. Thus, the quotation, which on December 31st, 1895, was 7s. 6d. per cwt. in England, only ranged from 7s. 3d. to 8s. 1½d. during 1896, and at the close of that year stood no better than 7s. 9d. During the following year the quotations ranged from 7s. 1½d. to 8s. 3d., the closing price being only 7s. 6d. Not only had the year 1897 opened with embarrassingly heavy stocks and low prices, but the combination was soon confronted with the question of increasing the output for this, the second, year, to 23½ million quintals, from which step many of the old producers had been looking for

an increase in their quota, regardless of the fact that nearly every month a new claimant was coming into the field. A proposal to restrict the output for the second year to 21½ millions was not accepted, and matters reached a deadlock. At a meeting of the association early in 1897 forty-one producers agreed to certain alterations in the agreement. These alterations gave to producers the option of having their quotas for the next year determined by a commissions of experts, or by trial of the productive capacity of their works. It was also agreed that the same privilege should be allowed to the new works in course of construction. Subsequently, however, these alterations were adhered to by a small number only of producers, and on September 30th, 1897, the executive declared them rejected. To add to the difficulties of the situation the Santa Lucia oficina (the property of the Salar del Carmen Syndicate, Limited) came into operation, and demanded a quota of 720,000 Spanish quintals, which the Association refused. Later on the Salar del Carmen Syndicate agreed to join the Association on the following conditions:—(1) That it should be allowed a yearly quota of 660,000 Spanish quintals until such time as the trial of the productive capacity of its works was effected; (2) that the trial should be effected so soon as the Alianza Company should give its unconditional consent to the agreement, and that the combination should be prolonged for three years, to count from May 31st, 1899; and (3) that it reserved the right to make the trial within the term of one year, to be counted from the date of the resolution to prolong the agreement. These conditions, being contrary to the stipulations of the agreement, were rejected, and a general meeting, to take into consideration the state of affairs, was called for October 1st. At that meeting forty of the fifty-eight signatories of the agreement were represented. Of the forty, twenty-one voted for the rupture of the combination, 5 against, and 14 abstained. The twenty-one votes represented 40 per cent. of the total productive capacity, the 5 votes 4 per cent., the 14 votes 30 per cent., whilst the 18 absentees represented 26 per cent. Persistent efforts were still made to effect an arrangement; but they failed, and on October 12th the directory announced that they would declare the combination to be at an end the moment the Salar del Carmen Company commenced producing without having signed the agreement. On October 16th, 1897, at 5 p.m., information was received in Iquique that the Santa Lucia had commenced operations; at 6.10 p.m. the executive met and declared the combination at an end, and at 6.15 p.m. the news was wired to the Permanent Nitrate Committee in London.

#### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents may be had gratuitously.]

19,341. Maxwell Hedderwick, 96, Buchanan-street, Glasgow—A new or improved device for supporting and securing bicycles in railway vehicles, and for other analogous purposes. September 12th, 1898.

19,354. William Thomas Fisher and William Smith, 3, Trinity-terrace, Radford-road, Coventry—Improvements for luggage and other trolleys for railway platforms and other purposes. September 12th, 1898.

19,384. Robert Brash Wheeler, 44, Bow-lane, London—Shoe brake for trolleys (or other vehicles), as used on railway platforms. September 12th, 1898.

19,407. Gustave Humbert, 18, Buckingham-street, Strand, London—Improved means for signalling between to and from trains in motion. September 12th, 1898.

19,488. William James Burton, 6, Lord-street, Liverpool—Improvements in and connected with window louvres and doors of railway and other carriages. September 13th, 1898.

19,505. Rufus Morton, Bank-buildings, George-street, Sheffield—Improvements relating to the construction of railway wagon brakes. September 14th, 1898.

19,514. David Peter Young, 17, St. Ann's-square, Manchester—Improvements in railway and tram rails. September 14th, 1898.

19,657. David Downie and Harry Downie, 96, Buchanan-street, Glasgow—Improvements in and relating to the permanent way of railways. September 16th, 1898.

19,680. John Smith and Walter Joyce, 35, South John-street, Liverpool—An improved railway spike. September 16th.

19,756. Jeremiah Parker Staniland Pearson, 111, Hatton-garden, London—Improvements in or relating to railroad locomotives. September 17th, 1898.

**LIGHT RAILWAYS.**

The Board of Trade have confirmed the Amesbury and Military Camp Light Railway Order, 1898, authorising the construction of a light railway in the county of Wilts from the London and South Western Railway between Grately and Porton to Amesbury and Shrewton.

The Board of Trade have recently confirmed the North Holderness Light Railway Order, 1898, authorising the construction of light railways between Beverley and Befford, in the East Riding of the county of York.

The Maidens and Dunure Light Railway, promoted by the Glasgow and South Western Railway Company, has received the approval of the Light Railway Commissioners.

The Light Railway Commissioners, having considered the evidence given at their inquiry into an application for an order authorising the North Lindsey Light Railway, have come to the conclusion that the scheme requires further consideration and modifications before it can be approved by them. The application, therefore, fails, and the project remains in abeyance. This was a line projected to run from Frodingham to Wintringham, Winterton, Alkborough, and Whitton.

An application from the Lancashire Light Railways Company for an order to construct a light railway from the boundary of the city of Liverpool to the township of West Derby, Huyton-with-Roby, and Knowsley was favourably received on Saturday by the Light Railway Commissioners, who will recommend the Board of Trade to grant an order.

The proposal for a light railway from Lincoln to Brigg, connected with the Great Central Railway, near the Spa Crossing, Lincoln, and running through the villages of Nettleham, Welton, Spridlington, Saxby, Normandy, Glenham, Bishop Norton, Snitterby, Waddingham, and Hibaldstow, is being rapidly matured. The finished survey has been made, and it is understood that the project will assume practical shape at an early date. This is a scheme which will confer immense advantages upon the district, as the proposed railway will be in connection with the Great Central at each end, and will traverse a country now without any railway facilities. The scheme also contemplates a branch northwards, from Brigg to Barton-on-Humber.

**FOREIGN AND COLONIAL ITEMS.**

The dividend of the Tournay to Jurbise and Landan to Hasselt Railway Company for the first half-year of 1898 is fixed at 8s. 5d. per ordinary share and 6s. per preference share.

The net receipts of the Paraguay Central Railway for the month of July amounted to \$26,974, against \$1,609 for the same month last year. For three months to July 31st the net receipts this year amounted to \$67,225, against \$5,765 for the corresponding period last year.

The Ceylon Government recently sent a Commissioner to examine the working of the Barsi and Morvi Light Railways, and as the result of the inspection the Commissioner strongly recommends the adoption of the 2ft. 6in. in preference to the metre gauge for the Kelani Valley Railway in Ceylon.

The directors of the British South Africa Company are now offering for sale to their shareholders the whole of the 5 per cent. debentures of the Bechuanaland Railway Company held by the company, which took the unallotted balance of the 2,000,000*l.* authorised. The price asked is 93 per cent., payable in full on November 1st next, and the amount is 420,800*l.*

In the South Australian House of Assembly the Minister of Works has moved the second reading of a Bill authorising the construction of a railway to connect the Great Northern line with the Queensland border. The object is to develop the mineral fields and tap the rich pastoral country of Queensland and New South Wales. The proposed length of the line is 263 miles, and the estimated cost is 1,250,000*l.*

The Public Works statement made in the New Zealand Parliament shows an estimated total expenditure for the year of 1,127,000*l.* Railway extension is set down at 417,000*l.*; the principal railway votes being: North Island Trunk Railway, 40,000*l.*; Midland Railway, 30,000*l.*; Otago Central Railway, 30,000*l.*; Thames Railway, 25,000*l.*; permanent way materials, 45,000*l.*; additions to lines already opened, 200,000*l.*

It is reported that an English syndicate, associated with Mr.

W. A. Moffatt, has contracted with the Mexican Government for the construction of the Durango Western and Pacific Railway. This line will have a length of about 300 miles, and is to be completed within three years. The promoters are stated to have secured a subsidy from the Mexican Government of \$12,000 per kilometre for mountain railway and \$7,000 per kilometre where the line crosses tableland.

At the Blackburn Chamber of Commerce, on Wednesday, the Secretary was instructed to write asking Lord Curzon, the Viceroy of India, to receive a deputation with the object of urging the importance of railway extensions in India. The president (Mr. Harrison) said he was sure Lord Curzon would derive support in this matter from the voice of commercial Lancashire, which had long advocated the development of the Indian railways.

At the annual general meeting of the North Eastern of Uruguay Railway Company, Limited, on Tuesday, the chairman (Mr. Loftus FitzWygram) said the past year had been an anxious one for all connected with Uruguay. It included a revolutionary period; but he was glad to say that it also included a decided recovery, and they now looked forward to a time for peace and improvement. The traffic since the commencement of the year had been increasing.

**ARGENTINE RAILWAY ITEMS.**

The settlement of the Cordoba Central Railway guarantee question is expected to give rise to considerable discussion in the Argentine Congress.

The Western of Santa Fé Railway Company has petitioned the Argentine Congress to have the line declared a national railway, and to be allowed to import its material duty-free.

Mr. Wingate, resident engineer of the Central Uruguay Railway of Montevideo, will arrive in England by the R.M.S. *Danube* on leave of absence to recruit his health.

The rescission of the guarantee accorded the Cordoba Central Railway Company is giving rise to considerable discussion in the Argentine Senate, and the case has been already referred back to the committee.

The board of the Buenos Ayres Western Railway, Limited, have decided to recommend the payment of 4s. 6d. per share on the ordinary shares, making, with the interim dividend paid in April last, 4 per cent. for the year on the ordinary share capital, carrying forward a balance of 4,680*l.*

The directors of the City of Buenos Ayres Tramways Company, Limited, have declared an interim dividend for the half-year ended June 30th last of 3s. 9d. upon the fully paid up shares and a dividend of 2s. 3d. upon the shares of the eighth issue. The sum of 7,500*l.* is added to the reserve fund and 4,378*l.* is carried forward.

Representatives of the Central Argentine and Buenos Ayres and Rosario railway companies, together with the President of the National Railway Board, have had an interview with the Minister of the Interior in connection with the construction of a station at Retiro, and there is now a probability of this question soon being definitely settled.

On September 6th the Senate had under discussion the application of Sr. Victor Pechieu, for a concession for a railway from the ports of Rosario and Santa Fé, joining up the cities of Cordoba, Mendoza and San Juan, and connecting with the Transandine and Central Cordoba railways. The total length of the line is 1,174 kilometres. It was finally resolved to allow the question to stand over for a fortnight.

The Buenos Ayres Great Southern Railway Company, Limited, announces that after providing for the interim dividend and interest upon the debenture and preference stock, there remains a balance of 401,817*l.*, from which the board propose to transfer to the general reserve fund the sum of 100,000*l.*, and to pay a balance dividend of 3½ per cent. on the ordinary stock of the company, making, with the interim dividend paid in April last, 6 per cent. for the whole year, free of income-tax, carrying forward a balance of 9,317*l.*

The Minister of Public Works of the province of Buenos Ayres has resolved to fix a date by which all the applicants for concessions for economic railways must comply with the law, failing which their petitions will be sent to the archives. The following are the applicants:—Tomás Agostini, Bohmer, Baya

and Co., J. Berg and Co., Lorenzo Basabe, R. Dayrel, Christoffe and Co., J. Guerrero, Guillermo Morana, Bernardino Pareja, Millot and Co., Tomás Paruit and Co., Palengreen and Co., Roldan and Kiernan, Alberto Vanhilion.

Reuter's agent at Buenos Ayres, telegraphing on the 26th ult., says:—"Herr Schiffner, a German subject, has secured from the Argentine Government a concession for the construction of a complete network of railways, having a total length of 2,000 miles, which, when complete, will serve the whole southern portion of the province of Buenos Ayres as far as Bahia Blanca. It is proposed to form a Belgian-German syndicate for the purpose." It may be as well to point out that there is a vast difference between getting a concession, and finding the money with which to carry it out. We are not likely to hear much more of this project.

## American & Canadian Railways.

### NORTHERN PACIFIC.

The following figures, taken from the second annual report, show the result of operations for the fiscal year ending June 30th, 1898. It has not been attempted to make comparison with the results of operation in the fiscal year ending June 30th, 1897, for upon that day the company had been in possession of the property for only ten months:—

Freight earnings .....	\$17,432,755
Passenger earnings .....	4,853,799
Mail, express, &c. ....	1,393,164
<b>Total gross earnings .....</b>	<b>\$23,679,718</b>
Operating expenses .....	11,095,371
<b>Net earnings .....</b>	<b>\$12,584,347</b>
Additions and improvements charged to income .....	\$811,709
Taxes .....	682,800
	<b>1,494,509</b>
<b>Leaving .....</b>	<b>\$11,089,838</b>
Add dividends and interest received .....	887,196
<b>Revenue available for interest and dividends .....</b>	<b>\$11,977,034</b>
Interest on bonds .....	\$6,079,160
Dividends on preferred stock (including dividend payable Sept. 6th, 1898) .....	3,000,000
	<b>9,079,160</b>
<b>Surplus for the year .....</b>	<b>\$2,897,874</b>
Surplus June 30th, 1897 .....	489,829
<b>Aggregate surplus income to June 30th, 1898 .....</b>	<b>\$3,387,703</b>
From which has been appropriated as a reserve for the continuity of dividends upon the preferred stock .....	3,000,000

Leaving surplus income carried forward as balance profit and loss to June 30th, 1898 .....

Of the deductions from income \$515,709 represents amounts expended for additions and improvements. \$296,000 represents additions to equipment. In the opinion of the board these are not distinctly new property, and are, therefore, not charged to capital account.

The length of railway operated, June 30th, 1898, was 4,350 miles; the number of passengers carried during the year was 1,583,632; the average rate per passenger per mile 2.22 cents; the quantity of freight carried 4,951,183 tons; the average rate per ton per mile 1.065 cent; the ratio of expenses to earnings, 46.90 per cent.

The balance-sheet shows stocks, bonds, &c., outstanding:—Common stock, \$80,000,000; preferred stock, \$75,000,000; general lien bonds, \$56,000,000; prior lien bonds, \$86,131,400; bonds issued by other companies, assumed by the Northern Pacific Railway Company, \$17,612,000; prior lien bonds reserved for issue, in connection with conversion of general first mortgage bonds, \$2,756,600.

President Charles S. Mellen, in his report, dated September 2nd, 1898, says:—"As above stated, the board of directors has directed to be set aside out of surplus income \$3,000,000 as a reserve to be available, as may be found necessary, until the end of 1901, toward maintaining regular 1 per cent. quarterly dividends on the preferred stock of the company, if, at any time prior to that date, the current net earnings shall prove insufficient for that purpose. So far as not so used by that date, the fund may then, by vote of the directors, be returned to the general funds of the company. In view of the comparatively brief period which has elapsed since the organisation of your company, and also in view of the fact that the favourable results of the fiscal year just closed must in prudence be regarded as exceptional, the board has been led to adopt this conservative policy, which, no doubt, will commend itself to all who are interested in

the company. Of course, this reserve fund need not be drawn upon if current available earnings shall continue as at present. It may be added that the business prospects of the company were never better than now.

"A fund of \$500,000 in cash and securities has been set aside out of the assets of the company to enable the company to assume for itself all risk of loss and damage by fire. This fund became available July 1st, 1898, since which time the company has been carrying its own insurance. A report of the condition of this fund, and the results of this policy, will be included in future annual reports of the company.

"During the greater portion of the fiscal year, in connection with the Pacific Coast passenger business, in which this company is largely interested, a bitter war of rates was waged which has seriously affected its revenue from this branch of its traffic. In no way can responsibility for this deplorable condition be attributed to the officials of your company, who have made every effort in their power to bring about an adjustment.

"In the territory tributary to the lines of the company prosperity has been evidenced by the increased sales of lands, the company having disposed of a greater acreage (nearly 50 per cent. more) and to a number of individuals greater than in any previous year in the history of the property. The prospects for the coming year are equally promising.

"It is hoped that the interest of the company in the lands of the old Northern Pacific Railroad Company east of the Missouri River, now held by the sequestration receivers of the old company, may be realised before the end of the calendar year, for upon August 25th, 1898, the special master reported against the claim of the preferred stockholders of the old company to such lands in preference to creditors. This company asserts against these lands about 95 per cent. of the indebtedness represented by such creditors.

"In many particulars the year ending June 30th, 1898, has been exceptional. While there have been others in which the gross receipts have been larger, there has been none in which the results have been so satisfactory, both as to the condition of the property and the net revenues derived therefrom. The favourable winter of 1897-98 (and consequent freedom from accident and blockade) has helped materially to produce this result, but more than all else the economies accomplished by grade reductions, by substitution of permanent for temporary structures in the roadway and by the employment of modern power in place of that previously available.

"The very satisfactory result of the year's work may be attributed largely to the marked increase in train load and car load, and to the consequent decrease in cost per ton mile."

### NEW YORK CENTRAL.

In our last issue we gave a summary of this company's accounts for the year ending June 30th. President C. M. Depew, in his report dated August 25th, says:—

"The gross earnings from the operation of the system east of Buffalo, excluding income from investments, were \$45,774,240, exceeding those of any previous year, with the exception of 1892-3, the 'World's Fair' year, when they were \$512,127 greater. The net earnings from operation, \$16,263,226, were, however, \$608,591 in excess of those of the year 1892-3. The expenses of operation, all taxes being excluded, were \$29,511,013, an increase of \$1,911,102 over those of the previous year. This was caused largely by the greater volume of traffic handled during the year. It was also due to the inclusion of \$1,345,948 representing extraordinary outlays for equipment and miscellaneous additions to the property, thereby continuing the long-established policy of the company in this regard. The profit for the past year was \$4,654,471, and the surplus, after payment of 4 per cent. in dividends, \$654,471, as against \$51,866 one year ago.

"During the period covered by this report, financial transactions of unusual importance have been undertaken. At a meeting held April 14th, 1897, the board of directors adopted resolutions authorising the execution of a mortgage to be dated July 1st, 1897 (the beginning of the fiscal year just closed), to secure an issue of \$100,000,000 bonds, the principal to become due and payable in gold on July 1st, 1907, and the interest, at 3½ per cent. per annum, to be paid semi-annually on the first days of January and July. This action was ratified at the stockholders' meeting held May 26th, 1897. Of the \$100,000,000 authorised, \$70,377,333 is reserved for the purpose of retiring a like amount of obligations outstanding on June 30th, 1897, composed of six different classes of bonds, varying in nature, rates of interest, and dates of maturity; \$14,622,667 is reserved for the premiums necessary to retire the old bonds before their maturity, and for such other uses as the board of directors may approve; and the remaining \$15,000,000 is to be held until December 31st, 1903, after which time it is to be available for construction, equipment, or other purposes. During the past year \$23,499,600

of the new bonds have been issued in exchange for \$21,480,985 of bonds of the old forms, and a saving in interest has been effected amounting to \$197,710. New bonds to the amount of \$2,019,000 have also been issued and sold for cash—\$19,000 in connection with the exchange of old bonds for new, and \$2,000,000 for the general purposes of the company.

"On February 4th, 1898, the Board of Directors authorised the purchase of the capital stock of the Lake Shore and Michigan Southern Railway Company, aggregating \$50,000,000, and agreed to issue, in payment therefor, \$100,000,000 in gold bonds of the New York Central and Hudson River Railroad Company, maturing February 1st, 1998, with interest at  $\frac{3}{4}$  per cent. per annum, payable semi-annually on the first days of February and August; and also provided for the deposit with the Guaranty Trust Company of New York, trustee, of all stock thus acquired, as collateral security for the payment of the principal and interest of the bonds; the basis for this purchase being one \$1,000 bond for five shares of stock at \$100 each. Up to June 30th, 1898, \$89,938,625 of Lake Shore collateral bonds had been issued in exchange for \$44,969,312 in stock.

"On April 13th, 1898, resolutions were adopted by the Board of Directors, providing for the purchase of the capital stock of the Michigan Central Railroad Company, at present \$18,738,000, and agreeing to issue, in payment therefor, gold bonds of the New York Central and Hudson River Railroad Company, to the amount of \$21,550,000, maturing February 1st, 1998, with interest at  $\frac{3}{4}$  per cent. per annum, payable semi-annually on the first days of February and August; and further agreeing to deposit with the Guaranty Trust Company of New York, trustee, all stock thus acquired, as collateral security for the payment of the principal and interest of the bonds; the basis of purchase being \$115 in bonds for \$100 in stock. Up to June 30th, 1898, \$17,137,415 of Michigan Central collateral bonds had been issued in exchange for \$14,902,100 in stock.

"The action of the board in obtaining control of these two properties was taken with the view of establishing, on a permanent basis, the unity of interests of the three companies. The acquisition of these important roads makes a notable increase in the mileage controlled by this company. In 1869 it operated 837.67 miles of single track; in 1878, 1,104.20 miles; in 1898, 1,544.12 miles; and on June 30th, 1898, the mileage of single track under its control is 6,309.77 miles.

"The directors announce, with deep regret, the death of two of their associates in the board—Mr. Erastus Corning on August 30th, 1897, and Mr. George C. Buell on January 24th, 1898. On February 4th, 1898, Messrs. Ashbel Green and George C. Bowdoin were chosen by the board of directors to fill the vacancies created by the deaths of Messrs. Corning and Buell. At the stockholders' annual meeting, held April 20th, 1898, Mr. Samuel R. Callaway was elected a director in place of Mr. Ashbel Green, resigned.

"The year has also been marked by a number of important changes in the executive force. Mr. Cornelius Vanderbilt, for fifteen years the chairman of the board of directors, was compelled to retire on account of ill health. Mr. Chauncey M. Depew, after a service of thirteen years as president, succeeded Mr. Vanderbilt on April 27th, 1898. Mr. Samuel R. Callaway, president of the Lake Shore and Michigan Southern Railway Company, was chosen to succeed Mr. Depew as president, and took office on April 27th, 1898. Mr. H. Walter Webb, for eight years the third vice-president of the company, also resigned during the year, because of illness; and Mr. John M. Toucey, after a valuable and extended service of forty-three years, retired from the office of general manager."

#### ILLINOIS CENTRAL.

The full pamphlet report of this company for the year ending June 30th is now to hand, and (including the Iowa leased lands) shows fiscal result as follows:—

	1896-7.	1897-8.
Passenger earnings .....	\$4,214,461	\$5,103,812
Freight earnings .....	15,162,019	18,918,729
Mail, express, and miscellaneous .....	2,734,458	3,295,279
<b>Total gross earnings .....</b>	<b>\$22,110,938</b>	<b>\$27,317,820</b>
Operating expenses and taxes .....	15,735,884	18,655,470
<b>Net earnings .....</b>	<b>\$6,375,054</b>	<b>\$8,662,350</b>
Other income .....	2,164,196	2,236,369
<b>Total net income .....</b>	<b>\$8,539,250</b>	<b>\$10,898,719</b>
Interest on Illinois Central bonds ..	\$3,189,972	\$2,993,545

New Orleans bonds .....	1,648,905	—
Rental Dubuque and Sioux City Ry.	531,193	793,453
Net rent St. Louis Alton and Terre		
Haute .....	340,627	533,406
<b>Dividends on Illinois Central stock</b>		
5 per cent. ....	2,625,000	2,625,000

Added to insurance fund .....	—	501,452
Fund for air-brakes and couplers .....	—	396,000
Betterments .....	150,000	829,000
Miscellaneous .....	50,000	50,000

<b>Total disbursements .....</b>	<b>\$8,525,697</b>	<b>\$10,861,516</b>
<b>Balance surplus .....</b>	<b>\$113,553</b>	<b>\$37,203</b>

The length of line operated (including Iowa lines) was 2,808 miles (against 3,130 miles); the number of passengers carried, 13,772,221 (against 12,827,205); the average rate per passenger per mile, 1.938 cent (against 1.979 cent); the freight carried, 12,694,058 tons (against 9,948,367 tons); the average rate per ton per mile 0.695 cent (against 0.671 cent); the ratio of expenses to receipts 68.29 per cent. (against 71.16 per cent.).

The balance-sheet shows an authorised share capital of \$60,000,000, of which \$52,500,000 has been issued; funded debt, \$104,047,925; leased lines stock, \$10,000,000; funded debt of Chicago St. Louis and New Orleans \$16,234,000. On the other hand, the company owns \$6,119,376 stocks, and \$39,114,467 bonds of other companies.

The President of the Illinois Central Railroad Company, in his report for the year ended June 30th, 1898, states:—"The fact that the St. Louis Division and the Louisville Division, considered locally by themselves, have each earned during the year somewhat in excess of the charges incurred in respect to them, while in itself gratifying, by no means measures their value to this company, which is more clearly reflected in the increased earnings of the property taken as a whole. Your directors are more than ever convinced that the profit of the business lies in reaching in the large cities the vast traffic originated in and distributed through them, for which your railway affords the natural outlet to the Gulf of Mexico. The possibilities of the trade with Cuba and the West Indies are now engaging so much public attention as to call for no comment in this report."

#### ERIE.

The full pamphlet report for the fiscal year ending June 30th, 1898, the second report covering the operations of an entire year, issued by the new company—is now to hand. The following is a statement of the earnings, expenses, &c., for the year, covering the entire system (excepting the New Jersey and New York Railroad, and the coal companies), including the Union Steamboat Line, Union Dry Dock, dining-cars and restaurants.

	1896-7.	1897-8.
Freight earnings .....	\$16,609,449	\$18,081,023
Coal .....	6,867,135	7,359,881
Passenger earnings .....	5,742,807	5,957,704
Mail, express, &c. ....	2,277,640	2,342,253
<b>Total earnings .....</b>	<b>\$31,497,031</b>	<b>\$33,740,861</b>
Operating expenses and taxes .....	23,332,243	25,438,039
<b>Net income from operation .....</b>	<b>\$8,164,788</b>	<b>\$8,302,822</b>
Income from securities owned, &c. ....	313,514	413,367
<b>Total income .....</b>	<b>\$8,478,302</b>	<b>\$8,716,189</b>
Interest on bonds .....	\$6,533,616	\$6,465,831
Rentals of leased line .....	1,067,095	1,077,857
Proportions due leased lines .....	244,270	304,443
Interest on car and equipment trusts	261,100	213,193
Interest on mortgages .....	20,202	20,947
<b>Total charges .....</b>	<b>\$8,126,283</b>	<b>\$8,082,271</b>
<b>Balance, surplus .....</b>	<b>\$352,019</b>	<b>\$633,918</b>

The length of line operated in the past year was 2,271 miles (against 2,124 miles in the previous year); the number of passengers carried was 15,001,653 (against 14,763,343); the average rate per passenger per mile, 1.554 cent (against 1.552 cent); the quantity of freight carried was 23,643,425 tons (against 20,122,086 tons); the average rate per ton per mile, 0.558 cent (against 0.596 cent); the ratio of expenses to receipts, 75.39 per cent. (against 74.08 per cent.). The balance-sheet shows the following stocks, bonds, &c., outstanding:—First preference non-cumulative stock, \$42,844,000; second preference non-cumulative stock, \$16,000,000; common stock, \$112,246,300. Bonded debt, Erie Railroad Company, \$100,783,600; bonded debt, leased lines, \$23,960,500; bonded debt, Chicago and Erie Railroad Company, \$12,300,000. Redeemed bonds held for exchange, \$660,000. Consolidated notes, New York Lake Erie and Western Railroad Company, \$96,000. Mortgages on real estate, \$443,500. Equipment trusts, New Erie Railroad, \$990,000; equipment trusts, New York Lake Erie and Western Railroad, \$1,945,340; equipment trusts, New York Pennsylvania and Ohio Railroad, \$1,588,970.

#### ATCHISON TOPEKA AND SANTA FE.

The report of this company for the year ending June 30th has now been issued, and enables the following comparison to be made with the previous year's working:—

	1896-7.	1897-8.
Passenger earnings.....	\$22,067,687	\$23,588,717
Freight earnings.....	5,574,288	7,347,362
Miscellaneous.....	2,979,255	3,278,022
<b>Total earnings.....</b>	<b>\$30,621,230</b>	<b>\$39,214,101</b>
Total expenses.....	22,867,189	28,506,336
<b>Net earnings.....</b>	<b>\$7,754,041</b>	<b>\$10,707,765</b>
Sundry credits.....	254,499	182,028
<b>Total net income.....</b>	<b>\$8,008,540</b>	<b>\$10,889,793</b>
Rental of tracks and terminals.....	\$282,021	\$295,541
Rental of Mojave division.....	232,430	—
Taxes.....	1,363,533	1,420,123
Interest on bonds.....	4,608,858	4,992,148
Sundry items chargeable to operating accounts in readjustment.....	36,295	236,200
Miscellaneous.....	32,957	55,353
<b>Total.....</b>	<b>\$6,556,094</b>	<b>\$6,909,365</b>
<b>Balance, surplus.....</b>	<b>\$1,452,446</b>	<b>\$3,890,428</b>

The length of road in operation was 6,946 miles (against 6,479 miles in the previous year); the number of passengers carried, 4,001,078 (against 3,536,968 in the previous year); the average rate per passenger per mile, 2.256 cents (against 2.293 cents); the quantity of freight moved, 9,979,510 tons (against 8,207,325 tons); the average rate per ton per mile, 1.029 cents (against 1.070 cents); the ratio of operating expenses to receipts, 72.69 (against 74.68) per cent.

### LATEST EARNINGS.

Third week of September.—Chicago Milwaukee and St. Paul, \$839,000—increase, \$118,000; Kansas City Pittsburg and Gulf, \$70,000—increase, \$9,000; Baltimore and Ohio South Western, \$143,000—increase, \$5,000; Chesapeake and Ohio, \$234,000—increase, \$18,000; Chicago Great Western, \$142,000—increase, \$27,000; Denver and Rio Grande, \$188,000—increase \$24,000; Louisville and Nashville, \$460,000—increase, \$31,000; Mexican Central, \$194,000—increase \$13,000; Missouri Kansas and Texas, \$298,000—increase, \$19,000—Missouri Pacific, \$519,000—decrease, \$10,000; New York Ontario and Western, \$75,000—same as last year; St. Louis and San Francisco, \$139,000—decrease, \$3,000; Texas and Pacific, \$149,000—decrease \$16,000; Wabash, \$311,000—increase, \$39,000; St. Louis South Western, \$131,000—increase, \$14,000; Southern Railway, \$515,000—increase, \$60,000; Cleveland Cincinnati Chicago and St. Louis, \$301,000—increase, \$15,000; Norfolk and Western, \$240,000—increase, \$11,000; Oregon Railroad and Navigation, \$196,000—increase, \$15,000.

The gross earnings of eighty-one roads in the first week of September show an increase of 6.31 per cent., and the gross earnings of seventy-eight roads in the second week of September show an increase of 2.93 per cent.

Month of August.—Chicago St. Paul Minneapolis and Omaha, gross, \$882,000—increase, \$132,000. Northern Central, gross, \$561,000—decrease, \$74,000; net, \$189,000—decrease, \$60,000. Chicago Milwaukee and St. Paul, gross, \$3,020,000—increase, \$239,000; net, \$1,112,000—increase, \$20,000. Southern Railway, gross, \$1,993,000—increase, \$246,000; net, \$599,000—increase, \$98,000. Mexican National, gross, \$500,800—increase, \$700; net, \$110,500—decrease, \$8,900. Atchison Topeka and Santa Fé, gross, \$3,004,000—decrease, \$210,000; net, \$482,000—decrease, \$439,000; net operating income, \$339,000—decrease, \$437,000; Chesapeake and Ohio, gross, \$1,038,000—increase, \$32,000; net, \$366,000—increase, \$20,000. Northern Pacific, gross, \$2,181,000—increase, \$352,000; net, \$1,165,000—increase, \$350,000; net operating income, \$918,000—increase, \$218,000. St. Louis and San Francisco, gross, \$601,000—decrease, \$14,000; net, \$241,000—decrease, \$59,000. Wabash, gross, \$1,283,000—increase, \$65,000; net, \$382,000—decrease, \$66,000. Chicago Burlington and Quincy, gross, \$3,854,000—increase, \$201,000; net, \$1,763,000—increase, \$84,000. New York Ontario and Western, gross, \$386,000—decrease, \$1,000; net, \$129,000—increase, \$7,000. Oregon Railroad and Navigation, gross, \$582,000—increase, \$14,000; net, \$237,000—decrease, \$32,000. Pennsylvania Railroad.—For the lines east of Pittsburg and Erie (directly operated), gross decrease, \$135,900; net decrease, \$23,200. For the lines west of Pittsburg and Erie (directly operated).—Gross increase, \$55,300; net decrease, \$225,300. Reading Company.—For the Railroad.—Gross, \$1,909,540—increase, \$21,003; net, \$839,840—decrease, \$13,615. For the Coal and Iron Company.—Gross receipts, \$1,659,537—decrease, \$468,558; net receipts, \$101,234—decrease, \$7,161.

Month of July.—Baltimore and Ohio, gross, \$2,315,000—increase, \$70,000; net, \$461,000—decrease, \$94,000. Pacific Coast Company, gross, \$420,000—increase, \$40,000; net, \$99,000—decrease, \$9,000.

The net of 129 railroads for the month of July amounted to \$20,576,918, representing a decrease of \$20,576,918, representing

a decrease of \$947,991, or 4.40 per cent. This is the first decrease in the monthly averages of net earnings since January, 1897.

### RAILROAD NOTES.

The New York Ontario and Western has sold to Messrs. Kuhn, Loeb, and Co., a sufficient amount of its refunding mortgage 4 per cent. bonds to pay off the \$5,600,000 first mortgage five which, under the terms of that mortgage, may be called June 1st, 1899, at 105. By this operation the company will effect an annual interest saving of about \$40,000, and the refunding bonds running until 1992 become an absolute first mortgage. These bonds cover all the property of the company, including equipment. The last car-trust payment will be made in February, 1899, and there is now outstanding only \$17,500.

The reorganisation managers of the Baltimore and Ohio Railroad Company inform holders of certificates of deposit or receipts for first preferred stock, second preferred stock, and common stock of the company, that they now call for payment of the final instalment, being 25 per cent. of the cash payment of \$2 per share of the first preferred stock deposited, and for 25 per cent. of the cash payment of \$20 per share of the second preferred and common stock deposited, which must be made on or before October 10th.

The Board of Arbitration of the Joint Traffic Association has dismissed the appeal by the Pennsylvania and the New York Central and their Chicago connections against the passenger differentials granted to the Erie and other longer lines. The committee decided that the matter could only be acted upon by the Board of Control, so that the agitation for the abolition of differential fares will subside until the Supreme Court renders its decision on the legality of the Joint Traffic Association.

In our summary last week of the Chicago Milwaukee and St. Paul accounts for the year ending June 30th, 1898, some slight inaccuracies occurred which the subjoined figures will correct:—Number of passengers carried, 7,095,641; average rate per passenger per mile, 2.362 cents; quantity of freight moved, 14,230,742 tons; average rate per ton per mile 0.972 cent.

East-bound rates on provisions from Chicago have been cut to an average extent of 8 cents per 100lbs. The roads took 34,000,000lbs. of meats from Chicago to the east and south last week, and provision rates are demoralised to all points. It is also said that serious cutting of west-bound rates is going on.

Last week's eastbound all-rail freight tonnage from Chicago amounted to 54,000 tons, the Panhandle road leading with 9,000 tons. Last year in the corresponding week 52,000 tons were forwarded.

President Edward P. Ripley, of the Atchison Topeka and Santa Fé, states that the present heavy operating expenses of the road will cease in December.

At the annual meeting of the Illinois Central Railroad Mr. William M. Grimmell was elected a director in place of Mr. S. Van Rensselaer Cruger.

The engineers of the Illinois Central Railroad are perfecting plans for extending the Dubuque and Onawa branch of the system to Omaha.

President Spencer, of the Southern Railway, says that his company is not acquiring the Louisville Evansville and St. Louis Railroad.

Copies of the second annual report of the Northern Pacific Railway Company can be obtained at the London offices of the Deutsche Bank.

### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS of RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Rail way Carriages and Wagons built for cash, or upon deferred payment, extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

### CONTRACTS FOR STORES.

The Directors are prepared to receive TENDERS for the supply of the Company's ordinary requirements of the following ARTICLES during the twelve months ending 31st October, 1899:—

No.	No.
1 Brake Blocks.	20 Iron Castings (Hydraulic Pipes).
2 Candles.	21 Iron Castings (Water Pipes).
3 Canvas.	22 Iron Hinges.
4 Carpeting and Rugs.	23 Ironmongery.
5 Cement.	24 Small wares, Trimmings, &c.
6 Cloth (Bunting).	25 Soap.
7 " (Cord, Moleskin, &c.).	26 Sponge Cloths.
8 Coach Fittings.	27 Steel and Files.
9 " Trimmings.	28 Sundry Tools.
10 Coke (Best Foundry).	29 Timber (English or Welsh).
11 " (Gas).	30 Transfers.
12 Copper.	31 Tubes, Copper, for Boilers.
13 Copper Tubing.	32 Wickings.
14 Creosote.	Way Materials.
15 Drysaltery.	33 Fence Rails (Larch).
16 Fire Bricks and Clay.	34 Spikes.
17 Fire Hose.	
18 Glass (Plate and Sheet).	
19 Indiarubber.	

Further particulars and Forms of Tender may be obtained on application at the Stores Department, Osborne-street, Manchester, where parties are requested to call and examine the samples before tendering. The Sample-room will be open for this purpose from the 26th September to the 8th October, inclusive, between 10.0 a.m. and 4.0 p.m. Saturday, 10.0 a.m. to 12.0 noon. Contractors cannot be allowed to tender to their own patterns, nor can the Company's patterns be sent away for inspection, all being sealed and exhibited at Osborne-street.

Tenders, properly endorsed and addressed to the Directors, must be lodged with the Secretary not later than Ten o'clock on the morning of Monday, the 10th day of October next; any received after that date will not be considered.

Separate Forms of Tender will be provided for each Contract: parties applying are therefore requested to state the particular Contract for which they propose to submit Tenders.

The Directors do not bind themselves to accept the lowest or any Tender.

C. W. BAYLEY, Secretary.  
Hunt's Bank, Manchester, 23rd September, 1898.

**NORTH BRITISH and MERCANTILE INSURANCE COMPANY.**  
INCORPORATED BY ROYAL CHARTER AND ACTS OF PARLIAMENT.

### FIRE DEPARTMENT.

Policies falling due at MICHAELMAS should be renewed within 15 days from the 29th inst. Receipts may be had at the various Agencies and Branches and at the Head Office.

London: 61, Threadneedle-street, E.C.  
West-end Office: 8, Waterloo-place, S.W.

Sept., 1898.

## GREAT CENTRAL RAILWAY.

### SAILINGS TO AND FROM THE CONTINENT VIA GRIMSBY.

Weather and other circumstances permitting, the Company's vessels sail DAILY TO and FROM HAMBURG (Sundays excepted).

To ROTTERDAM EVERY WEDNESDAY and SATURDAY.

Returning every Tuesday and Saturday.

To ANTWERP EVERY MONDAY, WEDNESDAY, and SATURDAY.

Returning every Tuesday, Thursday, and Saturday. Trains run in connection with the above steamers at convenient times from all important centres in Lancashire and Yorkshire and the Midland Counties.

Every information as to goods rates, &c., will be given on application to the Shipping Agents, Messrs. John Sutcliffe and Son, Grimsby; or to Mr. C. T. Smith, Goods Manager, Great Central Railway, Manchester. Particulars as to fares, &c., can be obtained from Mr. R. Haig Brown, Superintendent of the Line, Manchester.

WILLIAM POLLITT, General Manager.

London-road Station, Manchester.

**WANTED, an ASSISTANT-CIVIL ENGINEER**, for a Railway in Central America. Salary £400 per annum. Three years' engagement. Address "Railway," c/o J. W. Vickers, 5, Nicholas-lane, E.C.

### BEESTON CYCLES.

Ride one of these celebrated Machines and your troubles will cease.

No other makes approach them for elegance, rigidity, and ease of running.

The Beeston Cycle Co., Ltd.,  
COVENTRY.

## ARGENTINE GOVERNMENT 6 per CENT. FUNDING LOAN, 1891.

### DEFERRED INTEREST CERTIFICATES.

Messrs. J. S. MORGAN and CO. hereby give notice that the DEFERRED INTEREST CERTIFICATES of the Argentine Government Six per Cent. Funding Loan of 1891 will be CASHED by them on and after 1st November next, at the rate of 283 per cent., less Income-tax.

Owing to the large amount of detail involved, ten clear days will be required for examination previous to payment.

Lists for depositing the Certificates can be had on application, and will be received any day, Saturdays excepted, on and after 17th October, between the hours of 11 and 2 o'clock.

22, Old Broad-street, E.C., London.  
28th September, 1898.

## BURMA RAILWAYS COMPANY, Limited.

The Board of Directors of the Burma Railways Company, Limited, is prepared to receive TENDERS for:—

- (a) FAIRLIE ENGINES.
- (b) FLEXIBLE BUFFERS and SCREW COUPLINGS.

Specifications and Forms of Tender can be obtained at the Company's Offices, 76, Gresham-house, Old Broad-street, E.C.

For each Specification (a) a fee of 20s. will be charged and for each Specification (b) a fee of 10s., which will not be returned.

Tenders to be delivered not later than Noon on 31st October.

The Directors do not bind themselves to accept the lowest or any Tender.

By order of the Board.

A. G. BEGBIE, Managing Director.

30th September, 1898.

## TICKET DATING PRESSES, RIBBONS, AND TYPES.

Best quality at lowest rates.

Prompt deliveries.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purpose. \* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4671, Session 1888.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 samples including Blaenavon	7.140	850 Specimens. 23,257	546 Specimens. 7,102	273 Specimens. 61,061
Average of 5 samples of Blaenavon only	7.175	63 Specimens. 25,688	46 Specimens. 7,468	21 Specimens. 108,251

Prices and any further information as to quality suitable for special purposes may be obtained from

**THE TORBAY and DART PAINT COMPANY, Ltd.****Directors' Reports.****GRAND TRUNK RAILWAY OF CANADA.****CAPITAL.**

The total expenditure on capital account to June 30th, 1898, amounted to 65,503,773/-. The receipts to same date were:—Terminable bonds, 2,972,700/; Grand Trunk 5 per cent. debenture stock, 4,270,375/; Great Western 5 per cent. debenture stock, 2,723,080/; Grand Trunk 4 per cent. debenture stock, 12,515,678/; Northern 4 per cent. debenture stock, 3,47,900/; share capital (40,813,834/., less 5,454/., calls in arrear), 40,808,380/; Canadian Government advances, 3,111,500/; total, 66,749,703/-. Credit balance, 1,245,930/-. The following is a detailed statement of the share capital:—

Four per cent. guaranteed stock .....	£5,219,794
First preference stock .....	3,420,000
Second preference stock .....	2,530,000
Third preference stock .....	7,168,055 = 18,337,849
Ordinary stock .....	22,475,985

**£40,813,834**

The charges to capital account for the half-year amounted, less credits, to 93,944/., the chief items of expenditure being 53,194/., charged on account of the reconstruction of the Victoria Jubilee-bridge, and 39,158/., for the further equipment of engines and freight-cars with air-brakes and automatic couplers, in compliance with the Safety Appliance Act.

Bonds of the company (Hamilton and North Western), amounting to 409,400/., bearing 6 per cent. interest, matured on June 1st last, of which 399,500/., had been presented for payment, or exchanged for 4 per cent. debenture stock at the end of the half-year. The substitution of 4 per cent. debenture stock for these 6 per cent. bonds will effect a saving in interest charges from June 1st, 1898, of upwards of 8,000/., per annum.

**REVENUE.**

The revenue receipts for the half-year ending June 30th have been as follows:—

	1897.	1898.
Passengers (less tolls) .....	£167,915	£142,259
Mails and express .....	88,913	90,665
Freight and live stock (less cartage, &c.) .....	1,186,549	1,285,819
Miscellaneous .....	13,188	52,991

Total gross revenue .....

The expenditure on revenue account during the same period was as follows:—

Maintenance of way and structures .....	£162,155	£186,986
"    of equipment .....	209,477	224,187
Conducting transportation .....	758,325	769,678
General expenses .....	51,184	50,717

Total working expenses .....

Taxes .....

Total revenue expenditure .....

Net traffic receipts .....

Amount received from the International Bridge Company .....

Interest on Toledo Saginaw and Muskegon Bonds .....

Interest on bonds, &c., of Central Vermont Railway .....

Interest on securities of controlled lines acquired by the issue of Grand Trunk 4 per cent. debenture stock .....

Balance of general interest account .....

Net revenue receipts .....

The following are the net revenue charges for the half-year:—

Rents (leased lines) .....

Interest on debenture stocks and bonds of the company .....

Interest on debenture stock and bonds of lines consolidated with the Grand Trunk Company .....

Interest on Michigan Air Line bonds .....

Amount advanced to the Chicago and Grand Trunk Company under traffic agreements towards the payment of interest on its bonds, half-year to June 30th, for which interest coupons are held .....

Amount advanced to the Detroit Grand Haven and Milwaukee Company towards the payment of interest on its bonds, under agreements, half-year to June 30th .....

Leaving a surplus of .....

The report states:—

"There was a balance at the credit of net revenue account on December 31st, 1897, of 10,289/., of which \$50,000, or 10,274/., has been appropriated as the contribution for that half-year towards the revenue proportion of the expenditure for the reconstruction of the Victoria Jubilee-bridge, leaving a balance of 15/-. This amount, added to the above surplus, for the past half-year of 106,652/., makes a total amount available for dividend of 106,667/-. The directors recommend the payment of the

full half-year's payment on the 4 per cent. guaranteed stock, which will absorb 104,896*l.*, leaving a balance of 2,271*l.* to be carried forward to the next half-year's accounts. The net revenue surplus for the half-year ended June 30th, 1897, amounted to 2,709*l.* The result of the past half-year's operations shows, therefore, an improvement of 103,943*l.*

"The increase of 39,802*l.* in miscellaneous receipts arises from rentals received from the Canadian Pacific Company for use of the Grand Trunk line between Hamilton and Toronto, from the Wabash Company in respect of the running arrangements between Windsor and the Niagara frontier; and from the Intercolonial Railway for the use of the line between Ste. Rosalie and Montreal. The decrease of 25,656*l.* in the passenger receipts is partly attributable to the running arrangements above mentioned, for which, however, a set-off is obtained in the rentals paid by the several companies; while some portion of the decrease is the result of the reduction in local rates during the greater part of the half-year.

"The charge for taxes amounted to 12,315*l.* compared with 15,500*l.*, a diminution of 3,185*l.*, in consequence of the appropriation of 3,082*l.* in the corresponding half-year on account of the "State of Maine Tax Suspense Account" being now unnecessary, that account having been finally closed on December 31st, 1897.

"The Grand Trunk gross receipts for the half-year show an increase of 115,168*l.*, or 6·56 per cent.; the working expenses, including taxes, an increase of 47,240*l.*, or 3·95, and the train mileage an increase of 430,171, or 5·17 per cent.

"The working expenses, including taxes, amounted in the half-year to 1,243,883*l.*, or 66·46 per cent. of the gross receipts, as compared with 1,196,643*l.*, or 68·12 per cent.; an increase in amount of 47,240*l.*, but a decrease in the proportion to the gross receipts of 1·66 per cent.

"No additions to the stock have been made at the expense of capital during the half-year. Sixteen engines have been sold or broken up, and twenty new engines of modern type and increased capacity have been purchased on revenue account during the half-year. There remained at June 30th, 1898, sixteen engines in excess of the official stock. Three passenger cars, 500 thirty-ton box freight cars, and ten refrigerator cars have been provided at the expense of revenue, in part replacement of cars broken up. There remained out of service at June 30th, 1898, a balance of twenty-three cars in the passenger and four cars in the freight equipment. At the end of the half-year there was an amount of 27,440*l.* at the credit of the locomotive renewal fund, and of 58,103*l.* at the credit of the car renewal fund."

#### TRAFFIC.

Half-year ended June 30th.	1897.	1898.
Number of passengers carried .....	2,948,309	3,009,641
Average receipt per passenger .....	3s. 2d.	2s. 11½d.
Tons of freight and live stock .....	4,049,878	4,437,449
Average rate per ton .....	5s. 10½d.	5s. 9½d.
Average rate per ton per mile .....	0·65 cent	0·66 cent
Earnings per train mile .....	50·65d.	51·32d.
Expenditure per train mile .....	34·06d.	33·76d.
Mileage—Lines owned .....	2,986½	2,986½
Do. Lines leased or partly owned .....	511	511
Do. Lines leased or rented .....	14½	14½
Do. Total .....	3,512	3,512
Train mileage—Passenger trains .....	2,984,677	3,069,188
Do. Freight trains .....	4,409,397	5,127,515
Do. Mixed trains .....	929,578	557,120
Do. Total .....	8,323,652	8,753,823
P. centage of working expenses (ex taxes) .....	67·24	65·80

The report states:—

#### RENEWAL OF BRIDGES.

"The president reported to the proprietors, at the last general meeting, that in addition to the reconstruction of the Victoria-bridge at Montreal, it had been deemed necessary for the more efficient and economical conduct of the traffic to authorise the renewal during the next two or three years of the bridges on the section of the line between Montreal and Portland, and it has also been determined to renew certain bridges on the southern division used jointly by the Wabash Company. The proportion of the expenditure for reconstruction of the Victoria-bridge properly chargeable to revenue has been fixed at 110,000*l.*, which, together with the cost of renewing the bridges between Montreal and Portland, and on the southern division, it is proposed to charge to revenue account, spread over a period of at least five years, so as to obviate any undue increase in the maintenance charges in any one year. There had been expended to June 30th, 1898, on account of these renewals, an amount of 57,816*l.*, of which 10,274*l.* has been, as already announced, charged against the net revenue balance at December 31st, 1897, and 15,102*l.* is included in the maintenance charges for the past half-year, leaving an amount of 32,440*l.* at the debit of "Bridge Renewal Suspense Account" on June 30th, 1898. The International Bridge at Buffalo it is also intended to renew at an early date, the cost of which will be charged against the revenue of the International Bridge Company. The reconstruction of the Victoria Jubilee Bridge has progressed satisfactorily, and it is expected that the new double track will be available for traffic by January 1st next. Meanwhile the traffic is being conducted over the single track as heretofore.

#### CHICAGO AND GRAND TRUNK RAILWAY.

"The gross receipts of the Chicago and Grand Trunk Railway Company for the half-year to June 30th, 1898, amounted to 376,387*l.*, against 301,436*l.* in 1897, an increase of 74,951*l.* The working expenses were 291,541*l.*, against 262,591*l.*, an increase of 31,950*l.*; the net profit being 81,846*l.*, against 38,845*l.*, an increase of 43,001*l.* The net revenue charges for the half-year were 90,238*l.*, against 88,919*l.* in 1897. There was, therefore, a deficiency in meeting the net revenue charges in 1898 of

8,392*l.*, as compared with a deficiency for 1897 of 50,074*l.*, being an improvement of 41,682*l.* The above deficiency of 8,392*l.* is payable by the Grand Trunk Company, under traffic agreements, and is debited in Account No. 8 for the past half-year. The number of passengers carried during the half-year was 539,084, against 529,177, an increase of 9,907, or 1·87 per cent.; and the passenger train receipts, including mails and express receipts, were 84,806*l.*, against 79,795*l.*, an increase of 5,011*l.*, or 6·28 per cent. The quantity of freight moved during the half-year was 1,122,161 tons, against 809,368 tons in 1897, an increase of 312,793 tons, or 38·64 per cent., and the receipts from this traffic were 291,205*l.*, against 221,404*l.* in 1897, an increase of 69,801*l.*, or 31·53 per cent.

#### DETROIT GRAND HAVEN AND MILWAUKEE.

"The gross receipts of the Detroit Grand Haven and Milwaukee Railway for the half-year to June 30th, 1898, were 86,470*l.*, against 96,220*l.* in 1897, a decrease of 9,750*l.*; the working expenses were 71,379*l.*, against 78,634*l.*, a decrease of 7,255*l.*; thus leaving a balance of 15,091*l.*, against 17,586*l.*, a decrease of net revenue of 2,495*l.*, compared with the corresponding half-year of 1897. The net revenue charges for the half-year were 37,373*l.*, against 37,670*l.* in 1897, so that there was a deficiency in meeting the net revenue charges of 22,282*l.*, as compared with a deficiency of 20,084*l.* for the corresponding period of 1897. The above deficiency of 22,282*l.* is debited in Account No. 8 for the past half-year. The number of passengers carried during the half-year was 228,832, against 242,963, a decrease of 14,131, or 5·82 per cent.; and the passenger receipts, including mails and express receipts, were 34,993*l.*, against 37,203*l.*, a decrease of 2,210*l.*, or 5·94 per cent. The quantity of freight moved was 309,930 tons, against 288,394 tons in 1897, an increase of 21,536 tons, or 7·47 per cent.; and the receipts from freight traffic were 47,581*l.*, against 52,606*l.* in 1897, a decrease of 5,025*l.*, or 9·55 per cent.

#### GENERAL.

"The president and vice-president have recently returned from a visit to Canada and the United States, in the course of which they inspected various portions of the system and conferred with the general manager and the other chief officers on many matters of interest to the company.

"They also had conferences with the Canadian Pacific authorities for the discussion of the differences existing between the two companies. Pending, however, a settlement of the transcontinental rate war between the Canadian Pacific and the American lines, no agreement could be reached. That controversy being now happily terminated, there would appear to be no valid reason why the local passenger fares reduced by the Canadian Pacific Company should not be restored, and all other points of difference in connection with the North Bay route be adjusted. Negotiations with these objects in view are still in progress, which it is hoped may result in a settlement on a mutually satisfactory basis or in an agreement to submit all points of difference between the two companies to arbitration."

#### SANTA FE AND CORDOVA GREAT SOUTHERN RAILWAY.

##### CAPITAL.

This account to June 30th, 1898, shows an aggregate expenditure of 1,602,970*l.*, whilst the receipts were 1,644,888*l.*—viz., shares, 492,000*l.*; 6 per cent. first debenture stock, 660,000*l.*; 5 per cent. second debenture stock, 250,000*l.*; 4 per cent. lien bonds, 100,000*l.*; first debenture stock funded certificates, 82,500*l.*; second debenture stock funded certificates, 59,488*l.*; sundries, 900*l.*

##### REVENUE.

The gross receipts for the year ending June 30th, 1898, amounted to 91,547*l.* (against 89,486*l.*), the working expenses to 54,182*l.* (against 49,335*l.*), and the net profit to 37,365*l.* (against 40,151*l.*). Interest on prior lien bonds required 4,000*l.*, interest on first debenture stock 39,600*l.*, and interest on first debenture stock funding certificates 3,300*l.*, leaving a deficiency of 9,534*l.* The balance at debit of net revenue account is now 26,758*l.* In addition to this, deferred warrants have been issued to second debenture-holders to the extent of 18,645*l.*, and to second debenture funding coupon-holders to the extent of 5,325*l.* payable out of future profits.

##### TRAFFIC, &c.

The number of passengers carried during the year was 93,371 (against 92,447 in the previous year); the quantity of freight carried, 132,570 tons (against 150,380 tons); the number of animals carried 16,431 (against 18,173); the train miles run, 185,158 (against 167,840); the receipts per train mile, 9s. 10½d. (against 10s. 8d.); expenses per train mile, 5s. 10½d. (against 5s. 10½d.); the ratio of working expenses to receipts, 59·18 per cent. (against 55·13 per cent.). The report states:—

"The increase in working expenses is to a certain extent attributable to the fall in the gold premium, the average for the past year being 173·78 as compared with 189·50 for the year 1896-97. The increased expenditure in other respects is due to an increase in the cost of repairs and renewals to the line and buildings. In the year 1897-98 the maize and linseed crops were practically failures. The linseed was destroyed by frosts and the maize by locusts, besides which the wheat crop was greatly damaged by the frosts in November. Nevertheless, the tonnage of wheat carried by the railway has been fairly maintained, and the area of land under cultivation continues to increase steadily year by year. The net decrease in the number of tons of goods, &c., carried was 17,810, and is attributable to the failure of the maize and linseed crops and the consequent falling off in the amount of grain carried.

##### GENERAL.

"The negotiations for a concession for a railway from Venado Tuerto on our line to Rufino on the Buenos Ayres and Pacific Railway have

during the past year been completed, and a new company, the Santa Fé and Cordova Southern Extension Railway, Limited, has been formed to carry out the construction of the line. The capital of the new company is: Share capital, 230,000*l.*; 6 per cent. debenture stock, 230,000*l.* The line will be worked and maintained by the old company for 50 per cent. of the gross receipts, and the directors of the two companies are identical. In payment for the concession and the agreement to work the new railway the old company will receive half the share capital of the new company—viz., 115,000*l.*—and a sum of 5,000*l.* in cash. The other moiety of share capital and all the debenture stock will be made over by the new company to the contractors, who have undertaken to build the line for this consideration, and in addition they will, if necessary, for two years after the opening of the line supplement the net earnings to an extent sufficient to meet the debenture interest and management expenses. After the expiry of the above mentioned two years the old company have agreed, if requisite, to allow to the Extension Company a rebate on all traffic passing to or from the extension line over the system of the old company, to an amount sufficient to make up the net revenue of the Extension Company to 14,800*l.* a year, it being provided that the rebate shall not exceed 50 per cent. of the total gross receipts from such traffic. The rails are now laid through to Rufino, and it is expected that the line will be opened for traffic next month. The directors have arranged that when the debenture stock of the new company is issued, applications from existing stockholders in the old company shall receive special consideration. During the past year Mr. H. D. Robinson has retired, and the board are pleased to report that they have secured the services of Mr. R. I. Runciman as their representative at Buenos Ayres."

### ENTRE RIOS RAILWAYS.

#### CAPITAL.

The amount of share capital issued (representing surrendered bonds of the Provincial Government of the Entre Rios) is 3,205,835*l.*—viz., 1,647,930*l.* cumulative 5 per cent. preference 5*l.* shares, and 1,557,905*l.* ordinary 5*l.* shares. There are now only 2,500*l.* of bonds outstanding out of the whole original issue of 3,276,400*l.*

#### REVENUE.

The report for the year ending June 30th, 1898, states that the gross receipts amounted to 82,429*l.* (against 55,764*l.*), the working expenditure to 67,506*l.* (against 56,680*l.*), and the net profit to 14,922*l.* (against a loss of 916*l.*). There was brought forward from previous account a credit balance of 7,283*l.*; there was received as interest on Argentine funding bonds 7,250*l.*, sundry credits 537*l.*, and sale of deferred coupons on Argentine funding bonds 5,815*l.*; together, 35,807*l.*. Deducting sundries 11*l.*, there remains a balance of 35,796*l.*, out of which the directors have decided to recommend a dividend of 2 per cent. on the preference shares. This payment will absorb 32,967*l.*, leaving a balance of 2,829*l.* to be carried forward.

#### TRAFFIC, &c.

The number of passengers carried was 142,698 (against 128,536); the quantity of freight carried, 221,496 tons (against 139,534 tons); number of animals carried, 17,987 (against 15,115); ratio of working expenses to receipts, 81.90 per cent. (against 101.64 per cent.); number of train miles run, 242,378 (against 221,818); receipts per train mile, 6s. 9*d.* (against 5s. 0*d.*); expenses per train mile, 5s. 6*d.* (against 5s. 1*d.*); length of line open, 386 miles (against 386 miles). The report states:—

"The improved results of the past year were foreshadowed in the half-yearly report issued last April, when the prospects were described as being much more encouraging. A good wheat harvest means prosperity in every direction and a consequent increase of traffic to the railway, and this has had the effect of improving the gross receipts by 26,665*l.* at an additional cost of 10,826*l.*, giving a net profit of 14,922*l.*, instead of a loss on working of 916*l.*, as was the case last year. It is a satisfactory feature that the per-centage of working expenses has been reduced from 101.64 per cent. to 81.90 per cent. The net revenue account has this year been benefited to the extent of 5,815*l.*, being the amount realised on the sale of the deferred coupons received from the Government for the difference between the original and reduced interest on the Argentine funding bonds, under the Rothschild-Romero agreement of 1893. These securities, which were alluded to by the chairman at the last general meeting as an available asset, have hitherto figured as a suspense account in the balance-sheet at their nominal value pending realisation.

"The receipts from the actual working of the railway have been higher this year than at any other period, and although the harvest has not been equal to that of 1894, when 102,000 tons of wheat were carried out of a total yield of 330,000 tons, the receipts from other sources of traffic show considerable improvement, and it is decidedly satisfactory, and reflects credit on the management that this year 79,000 tons of wheat were carried out of a total produced in the province of 174,000 tons.

#### GENERAL.

"The average value of the paper dollar has been approximately 1s. 5*d.*, as compared with 1s. 4*d.* a year ago, and has consequently favourably affected the receipts of the railways as reckoned in sterling; conversely the expenses have been unfavourably affected—but not to the same extent.

"The position of affairs in regard to the provincial loans remains unaltered; the arrears of interest due to the company on the 289,900*l.* Entre Rios bonds now amount to 65,227*l.*. The interest for the past year on the National bonds held by the company has been punctually paid, but the amount due by the nation for the conveyance of Government troops still remains unpaid.

"It is proposed at the forthcoming general meeting to submit a resolution for the conversion of the 5*l.* 5 per cent. preference shares (cumulative)

and ordinary shares into 5 per cent. preference stock (cumulative) and ordinary stock. If approved, the exchange of certificates will be carried out with as little delay as possible, and due notice will be given when the stock certificates are ready."

### BUENOS AYRES GREAT SOUTHERN RAILWAY.

#### CAPITAL.

The expenditure on capital account to June 30th, 1898 (including 873,778*l.* expended during the past year), amounted to 17,348,669*l.*, whilst the receipts to same date had been 17,657,368*l.*—viz., ordinary stock, 9,000,000*l.*; Extension shares, 1892, 624,438*l.*; 5 per cent. preference stock, 3,000,000*l.*; debenture stock, 4 per cent., 4,000,000*l.*; ditto 4½ per cent. (Saladillo), 1,032,930*l.*

#### REVENUE.

The accounts for the year ending June 30th show the receipts to have been as follows:—

	1896-7.	1897-8.
Passengers .....	£338,978	£366,665
Parcels, special trains, &c. ....	76,394	83,568
Goods .....	790,332	864,637
Live stock .....	149,722	152,892
Sundry receipts .....	45,251	51,269
<b>Total receipts .....</b>	<b>£1,400,677</b>	<b>£1,519,032</b>
<b>Total expenditure .....</b>	<b>534,078</b>	<b>584,634</b>
<b>Depreciation of currency balances .....</b>	<b>£866,599</b>	<b>£934,398</b>
	<b>Dr. 4,794</b>	<b>Cr. 1,693</b>
<b>Net earnings .....</b>	<b>£861,805</b>	<b>£936,091</b>
Balance from last year .....	4,486	1,817
Interest on reserve fund .....	11,142	11,735
Miscellaneous receipts .....	6,927	6,669
Profit on remittances .....	3,037	3,000
Sundries .....	431	527
<b>Total .....</b>	<b>£887,828</b>	<b>£959,839</b>
Interest on debenture stock .....	£146,482	£146,482
Interest on preference stock .....	150,000	150,000
Transfer to reserve fund .....	60,157	100,000
Dividend .....	*517,500	†540,000
Sundries .....	11,872	14,040
Balance to next account .....	1,817	9,317
<b>Total .....</b>	<b>£887,828</b>	<b>£959,839</b>

\* 5½ per cent. + 6 per cent., of which 2½ per cent. was paid in April, 1898.

The reserve fund now stands at 475,000*l.*; the maintenance and casualty fund at 29,705*l.*; the fire insurance fund at 40,000*l.*; the coal steamers depreciation fund at 73,341*l.*

#### TRAFFIC, &c.

The number of passengers carried in the year was 3,281,174 (against 3,088,490 in the previous year); the quantity of freight carried, 1,105,648 tons (against 1,059,963 tons); the number of animals carried, 3,323,758 (against 2,999,731); the train miles run, 2,507,169 (against 2,332,865); the receipts per train mile, 12s. 1*d.* (against 12s. 0*d.*); expenses per train mile, 4s. 7*d.* (against 4s. 6*d.*); net profit per train mile, 7s. 5*d.* (against 7s. 5*d.*); receipts per passenger, 2s. 3*d.* (against 2s. 2*d.*); the receipts per ton of goods, 18s. 8*d.* (against 16s. 6*d.*); length of line worked, 1,491 miles (against 1,436 miles); the ratio of working expenses to receipts, 38.49 per cent. (against 38.13 per cent.).

The increase in the gross receipts for the year is 118,355*l.*, equal to 8.45 per cent., and the increase in the net profits 67,799*l.*, or 7.82 per cent. The receipts from passenger traffic show an increase of 27,686*l.*, or 8.17 per cent., and from luggage and parcels an increase of 6,283*l.*. The receipts from goods traffic show an increase of 74,304*l.*, equal to 9.40 per cent., and from an imbalan increase of 3,171*l.*, or 2.12 per cent. The report states:—

"The results obtained from the working of the line as fully detailed in the foregoing report of the general manager, establish a further record and afford ample evidence, were such wanting, of the continual development of the district served by the railway; for, notwithstanding the partial failure of the wheat crop and the small quantity of maize passed over the line up to the closing of the accounts for the financial year, the gross earnings of the company are 118,355*l.* in excess of the corresponding period last year, which it will be remembered was, up to that time, the record year. The board have special pleasure in drawing attention to the steady development of the trade at the Bahia Blanca terminus of the railway, as detailed on page 8 of this report. Studies for the enlargement of the port works owned by the company are now occupying the attention of the board, and no time will be lost in providing the additional facilities that may be necessary for dealing with the increasing requirements of this port.

"The cost of working the line during the past year compares very favourably with that of the corresponding period, the increase only amounting to 50,556*l.*, of which 18,665*l.* is directly due to the higher value of the paper dollar, leaving 31,891*l.* as the actual increased cost of working the extra mileage and additional traffic handled, while the ratio of working expenditure has been kept down to the low figure of 38.49, as against 38.13.

#### GENERAL.

"The board have pleasure in reporting the satisfactory conclusion of their negotiations with the Buenos Ayres and Ensenada Port Railway Company for the purchase of their property, together with the transfer of the agreement for working the Buenos Ayres Ensenada and South Coast

Railway Company, in accordance with the powers granted by the special resolutions passed at the general meetings of the company of April 20th and May 5th, 1898. The property was duly handed over to the company on July 1st last; but until the necessary legal formalities are completed the railway will be worked under a provisional arrangement, the accounts and traffic earnings being, in the meantime, kept distinct from those of the working company.

"The board have also pleasure in stating that, acting in accordance with No. VIII. of the special resolutions referred to in the foregoing paragraph, a company has been registered under the title of the 'Buenos Ayres Southern Dock Company, Limited,' for the purpose of carrying out Senor Alfredo Demarchi's concession for a dock on the south bank of the Riachuelo, the particulars of which were fully described in the report for the half-year ended December 31st last. The new company has been duly registered in Buenos Ayres and recognised by the Government, and definitive studies and plans are now being made with a view to proceeding with the construction of the docks immediately the transfer of the titles is effected and other legal formalities are complied with."

"It is gratifying to note that the results obtained from the working of the first and second sections of the Neuquen extension are considerably in excess of the original estimates, and that this line promises to develop into a valuable portion of the company's system. The new mileage brought into the general traffic working during the year is as follows:—Lobos to 25 de Mayo, 66 miles, as from January 1st, 1898; Saladillo to Alvear, 30 miles, as from January 1st, 1898; Lobos to Navarro, 15 miles, as from January 1st, 1898. In addition to the above the extension from 25 de Mayo to San Carlos de Bolivar (77 miles) was worked on general revenue account as from July 1st last. The sections of the Neuquen extension opened on October 1st, 1897, and July 1st, 1898, respectively, are being worked on capital account until the line is completed throughout.

"In pursuance of the remarks made in the report for the year ended June 30th, 1897, a new steamer, the *Azul*, has been added to the company's small fleet in place of the *Salado*, which was wrecked off Lundy Island in March, 1897. The *Azul* is a fine steamer of 5,000 tons dead weight capacity, and while in every way adapted for the economical transport of coal, has been specially designed with a view to efficiently dealing with the carrying of live stock from the River Plate, the builders having conformed to all the requirements at present ruling, in both the Argentine Republic and on this side, for the regulation of cattle traffic. The cost of construction has been defrayed by the amount recovered from the underwriters, supplemented by the amount standing to the credit of the S.S. *Salado*, in the reserve fund set aside for the steamship depreciation. The board are glad to be able to report that the results obtained from the working of the company's coal steamers during the past year have been in every way satisfactory, and fully justify this latest addition to the fleet.

"With a view to meeting the increased requirements of the company, as also to provide more suitable London office accommodation, the board have succeeded, after somewhat protracted negotiations, in acquiring, on satisfactory terms, a ninety-nine years' building lease of Nos. 7, 8, and 9, Finsbury-circus. The building is now in course of construction and making good progress, and it is expected that it will be ready for occupation by Lady-day next. The new premises, which will be known as 'River Plate-buildings,' will not only contain a large hall for the general meetings of the company, but will also afford accommodation for certain other South American railway companies, and thus establish a convenient head centre for many of the principal Argentine undertakings, some of whom have already intimated their desire to become tenants of the company.

"Notice has been given by a shareholder that he will, at the coming meeting, move that the remuneration of the directors be increased from 3,000*l.* to 5,000*l.*, and a resolution to this effect will accordingly be submitted.

"In view of the highly favourable results obtained from the working of the line during the past year, and taking into consideration the present magnitude of the company's system, as also the absolute necessity for placing the general reserve fund in a sufficiently substantial position to meet all possible contingencies, the board strongly recommend the transfer to that fund of the sum of 100,000*l.*, thereby bringing it up to 475,000*l.*"

#### NEW LINES AND WORKS.

Mr. Barrow, the general manager, in his report, dated August 18th, 1898, says:—"Bahia Blanca to Neuquen—350 miles.—175 miles of railway have been completed during the year, and at June 30th the point of the rails was at kilometre 376.500 (235 miles), leaving 115 miles to finish. We are now working between Chelforó and Chinchinales; there is a good deal of rock cutting in this length of 13 miles, and progress will be necessarily slow until we get through it, but we expect to have the line completed to the confluence about March next. We opened 172 kilometres (106 miles) of line to Rio Colorado for public traffic on October 1st, 1897, and to Choele-Choele, 350 kilometres (217 miles) on July 1st this year. 25 de Mayo to Saavedra—256 miles.—The rail laying of the first section from 25 de Mayo has reached kilometre 201.600 (125 miles), and we opened to Bolivar for public traffic (77 miles) on July 1st last. The works at the Saavedra end have been delayed by the difficulty in obtaining possession of the land required for the line. We have also had to get through some heavy cuttings in toasca. The rail laying had only reached kilometre 24 (15 miles) on June 30th, but once the earthworks have been carried to about midway between Puan and Carhué, the most difficult work will be through, and

\* The board were advised by cable on September 26th that all titles had been duly transferred to the new company on that date.

we shall be able to get on faster. We expect to be open provisionally for public traffic both to Carhué and Guaminí in time for next season's produce. Extension from Grünbein Station to the Naval Port—13 miles.—The contract for this line was signed on June 8rd, and we were urged by the Government to have it finished by August 1st. The rails were laid by that date excepting a short length at the terminus which was delayed waiting for the Government Engineer to fix the position. Saladillo to Alvear—30 miles.—This line was brought into public service provisionally on October 1st, 1897, and opened permanently on November 1st. Lobos to Navarro—15 miles.—This line was brought into public service provisionally on January 1st, 1898, and opened definitely on February 8th. Extension of Branch Line from Hinojo to Sierra Baya—3½ miles.—This line was brought into public service provisionally on July 23rd of this year. Extension of Bahia Blanca Port.—The surveys for the improved entrance channel and increased pier accommodation have been completed, and plans and estimates are now under consideration."

#### RECIFE AND SAO FRANCISCO RAILWAY.

##### CAPITAL.

The expenditure on capital account to June 30th, 1898 (including 54,828*l.* for working stock), amounted to 1,842,157*l.*, the receipts being 1,867,870*l.*, as follows:—Stock, 1,200,000*l.*; Brazilian Government, 400,000*l.*; debentures, 101,270*l.*; appropriated from revenue, 157,400*l.*

The debenture debt on December 31st, 1897, was 115,970*l.*, and has since been further reduced by 14,800*l.*

##### REVENUE.

The accounts for the half-year ending June 30th, 1898, show gross earnings of 126,960*l.* (against 105,959*l.*), an expenditure of 125,928*l.* (against 100,222*l.*), and net earnings of 1,032*l.*, payable to the Brazilian Government in reduction of guaranteed interest. With the balance brought forward from previous account, 1,245*l.*, the total net revenue is 41,387*l.*, which is appropriated as follows:—Interest on debentures, &c., 2,641*l.*; loss on realisation of 40,141*l.* Brazilian funding bonds, 8,198*l.*; reduction of debenture debt, 5,500*l.*; dividend at the rate of 4 per cent. per annum (against 5 per cent. per annum for the corresponding period), 30,000*l.*; balance to next account, 1,048*l.*

##### TRAFFIC, &c.

The number of passengers carried in the half-year was 248,451 (against 233,492); the quantity of freight, 85,818 tons (against 66,697 tons); the number of live stock, 1,290 (against 1,076); the train miles run, 152,668 (against 153,401); the length of line worked (in each half-year), 77½ miles. The report states:—

"The total receipts for the half-year under review are, with the exception of 1896, the highest ever recorded for any similar corresponding period, giving the satisfactory increase over the first half of 1897 of 19.81 per cent. The merchandise traffic contributed largely to this result, showing an increase of 19,121 tons, or 28.66 per cent. The passenger traffic also shows an improvement.

"The directors beg to call the attention of the proprietors to the provisions of the United States of Brazil funding scheme, announced in June last, under which the guaranteed interest during three years will be paid in bonds instead of sterling as heretofore. In order to provide funds it is necessary to realise these bonds at market rates, and, owing to the loss which this has entailed, the directors regret that the usual rate of dividend cannot be maintained."

#### NEWHAVEN HARBOUR.

The report for the half-year ended June 30th states that the capital expenditure incidental to new works for the improvement of the harbour, including purchases of property, now amounts to 607,397*l.*, of which 574*l.* was incurred during the past half-year, mainly for the enlargement of the oil store, and the provision of a new fog-horn. The sale of certain old plant and materials during the half-year realised 342*l.* The harbour has been well maintained and dredging operations have been carried on continuously during the half-year, so that vessels drawing 11ft. of water can now enter and leave it at low water. The debt to the Public Works Loan Board has been reduced to 15,345*l.*, instalments to the amount of 420*l.* having been paid off during the half-year. The company's Bill referred to in the last half-yearly report received the Royal Assent on July 25th last, and the directors have, in pursuance of its powers, nominated the Hon. Arthur Brand, Sir Philip Rose, and Mr. John Francis Sykes Gooday to be the three commissioners to represent the company in the body of commissioners thereby incorporated. The commissioners have already held their first meeting, and taken measures to proceed as quickly as possible with the sea defence works authorised by the Act, but it is not anticipated that these can actually be commenced until the spring of next year, when the question of raising additional capital will have to be considered. The cost of constructing the sea-walls between Newhaven and Seaford (estimated at 50,000*l.*) is to be contributed in the following proportions—namely, three-eighths by this company, two-eighths by the London Brighton and South Coast Railway Company, and three-eighths by landowners and local authorities. The Act also includes powers for increasing this company's capital by 100,000*l.*

The Turkish Government has arranged with the Imperial Ottoman Bank for a loan of 150,000*l.*, a third of which will go to defray the expenses of military transport undertaken by the railway companies on the occasion of the return of Ottoman troops from Thessaly.

### HULL AND BARNSELY PROGRESS.

Apropos of the recent discussion of Hull and Barnsley affairs, the following table of revenue results since 1885 may not be without interest:—

Half-year.	Gross Receipts.	Expenses.	Net Revenue.	Interest Charges.
December, 1885.....	£54,848	£48,138	£6,709	£58,819
June, 1886.....	66,935	59,737	7,193	70,200
December, 1886.....	92,062	65,583	26,478	70,200
June, 1887.....	100,238	68,959	31,278	71,200
December, 1887.....	116,408	74,847	41,561	71,400
June, 1888.....	109,033	72,851	36,381	71,400
December, 1888.....	127,689	78,749	48,940	70,500
June, 1889.....	122,077	80,372	41,705	70,400
December, 1889.....	142,241	85,665	56,576	63,000
June, 1890.....	127,408	81,633	45,775	55,800
December, 1890.....	147,697	88,755	58,941	60,200
June, 1891.....	141,600	87,325	54,275	54,700
December, 1891.....	166,433	97,784	68,649	60,500
June, 1892.....	150,809	95,170	55,639	54,200
December, 1892.....	154,334	99,436	54,897	54,200
June, 1893.....	125,795	86,812	38,983	54,700
December, 1893.....	137,969	92,519	45,450	65,605
June, 1894.....	141,864	91,161	50,703	65,100
December, 1894.....	159,968	95,732	64,200	65,100
June, 1895.....	146,810	90,745	56,065	56,700
December, 1895.....	177,058	101,721	75,336	56,700
June, 1896.....	167,503	96,902	70,600	58,400
December, 1896.....	197,537	109,666	87,871	64,900
June, 1897.....	177,481	108,644	68,837	54,600
December, 1897.....	197,270	114,831	82,439	64,600
June, 1898.....	197,869	112,000	85,865	68,600

### WORKMEN'S COMPENSATION ACT.

The first cases that have arisen in Crewe under the Workmen's Compensation Act occupied the Deputy-Judge of the County Court for several hours on Monday. The cases were in connection with two employes of the London and North Western Railway Company, who were killed just after the Act came into operation. The first case was that of Margaret Hood, widow of Ernest Hood, a carter. Mr. Solley, of Euston, represented the railway company, and Mr. Latham appeared for the widow and family. Mr. LATHAM explained the facts, which were to the effect that Hood was returning with an empty lorry to the goods-shed at Crewe on the evening of July 14th, and as he was riding in the front he fell off and the wheels of the vehicle passed over him, inflicting injuries from which he shortly afterwards died at the Railway Hospital. The railway company admitted their liability, and paid 10*l.* to the widow to relieve her immediate needs, and had since paid 166*l.* 1*s.* 11*d.* into court, making in all 176*l.* 1*s.* 11*d.* The Deputy-Judge was now asked to say how that money should be distributed. There were two children, one of four years and the other of two years. Mr. LATHAM suggested that the widow should receive 25*l.* at once, and that the balance should be invested in the Post-office Savings-bank and paid to her through the court at the rate of 3*l.* a month. The DEPUTY-JUDGE thought the suggestion a wise one, but asked about the children. He thought something should be set aside for the children. Mr. LATHAM pointed out that the children were very young and the mother would have to keep them a long time before they were able to earn anything. If the balance of the money was paid to the widow in monthly instalments it would benefit the children equally with the mother. Mr. Latham also raised the question of costs. Mr. SOLLEY said he must ask that the costs should not be given against the company, as they had admitted their liability at once and had done everything they possibly could. There had been no necessity for the widow to obtain legal advice, as she had not got one penny more from the company than she could have obtained without legal assistance. There was another application coming before the court that day, and in that case the widow had not sought legal advice, but the company had made out the necessary forms for the application to the court, and had assisted the widow all that they possibly could.—The DEPUTY-JUDGE pointed out that this was a new Act of Parliament, and it was very difficult indeed for people to understand the filling up of the requisite forms for application to the court without the aid of a solicitor. At the same time he considered that the company had done everything they possibly could and had behaved handsomely.—Mr. LATHAM said that the applicant's husband met with his death fourteen days after the Act came into operation. It was impossible to expect the widow to be conversant with the terms of the Act and she naturally sought legal advice.—The DEPUTY-

JUDGE said he would reserve his decision on the question of the costs.—Mr. SOLLEY added that if the costs were given against the company it would be necessary for them to alter their position in other cases. They would have to compel the taking out of letters of administration, and as soon as that was done they would pay the whole of the money over to the widow. That was a course they did not wish to take, but they were willing rather to help the relatives of persons who met with fatal accidents in every way they could to obtain a final settlement.—The DEPUTY-JUDGE directed that of the 166*l.* 1*s.* 11*d.* paid into court, a sum of 25*l.* should be paid out to the widow at once, and 25*l.* set aside for each of the two dependents to receive on obtaining their majority or before, if on application to the court it was found necessary. The balance of 91*l.* 1*s.* 11*d.* would be paid to the widow by instalments of 3*l.* a month. An application was next made by Ellen Shaw, of Buxton-avenue, for an award as to the distribution of 300*l.*, paid by the London and North Western Railway Company under the new Act.—Mr. SOLLEY, for the company, said the applicant was the widow of the late Thomas Shaw, an inspector, who met with a fatal accident while on duty at Crewe Station. The company had admitted their liability in this case, and had agreed to pay 300*l.*, which was the full amount allowed by the Act. They had already advanced 10*l.* to the widow and had paid 290*l.* into court. There were four children dependent upon the widow, and it was suggested that a further sum of 20*l.* should be paid to her at once, that 70*l.* should be set aside for the four children, and that the remaining 200*l.* should be paid to the widow at the rate of 40*l.* per annum for five years, the money to be paid by monthly instalments of 3*l.* 6*s.* 8*d.*—Mrs. SHAW was called, and said she quite agreed with this, and the Deputy-Judge made his award in the terms stated.

### BAKER-STREET AND WATERLOO RAILWAY.

Apropos of Lord Dufferin's remarks concerning this scheme at the recent annual meeting of the London and Globe Finance Corporation, Limited (reported in THE RAILWAY TIMES of September 24th), a correspondent of the *Investors' Review* writes:—"At the meeting on the 21st inst. of the London and Globe Corporation, Lord Dufferin stated that the London and Globe Corporation was engaged in building the electric railway from Baker-street to Waterloo, and he added: 'At present the London and Globe Corporation is furnishing all the money for construction, and we may decide to complete the works ourselves, devoting several hundred thousands a year for that purpose for three years, by which time we hope the road will be finished, when the London and Globe Corporation would possess for all time a very valuable asset indeed; or we may, on the other hand, float it as a separate undertaking.' The Baker-street and Waterloo Railway Company was constituted by the Baker-street and Waterloo Railway Act, 1893. An Act was passed (August 7th, 1896), for increasing the capital, and extending the time for completion of the railway. The total authorised capital (being the estimated amount for construction) is 1,275,000*l.* in shares and 441,000*l.* in debentures, together amounting to 1,716,000*l.* No share in the company can vest in any person unless and until one-fifth of the amount (10*l.*) of such share has been paid in respect thereof. No part of the debentures can be issued until the whole of the share capital has been issued and one-half the amount of such shares has been paid up. There is no office of the Baker-street and Waterloo Railway Company shown in the London Directory. Messrs. Perry and Co. are the contractors actually carrying out the work of construction. It is evident, from Lord Dufferin's speech, that the London and Globe Corporation is finding the money for constructing the railway, and that about 1,700,000*l.* of the moneys of the shareholders of the London and Globe Corporation must be expended in such construction. What possible security can the London and Globe shareholders have for this money? The following questions arise:—(1) Has the Baker-street and Waterloo Railway Company an office? if so, at what address? (2) Who are the present directors of the railway company? (3) Has the railway company a secretary, and what is his name? (4) Have any shares in the railway company been issued? (5) Has the London and Globe Corporation entered into a contract direct with the Baker-street and Waterloo Railway Company for the construction of the railway, or is or are there any intermediate contractor or contractors, and if so who is or are such contractor or contractors, and in any case what are the terms under which the London and Globe Corporation is providing the money for the construction of the railway?"

### RAILWAYS IN CHINA.

American journals publish complete details of the great Chinese railway projected by American capitalists. The new line will run from Canton to Hankow, a distance of 900 miles

through the Yangtse-Kiang Valley, with branches to such important provincial capitals as lie in the immediate neighbourhood, and with such equipment, docks, and facilities as may be required for the operation of the railroad. The bonds are to be purchased by an American company, and the application of the proceeds and the construction of the work will be under the direction and supervision of this company. The cost of the line is estimated at a minimum of 4,000,000*l.* and a maximum of 8,000,000*l.*, according to the standard adopted and the amount of extra expenditure required. The syndicate will control the road for a period of four or five years, during which it is subject to negotiations which may change its character. The provinces through which the road will pass are stated to be the most populous in China, having a population of 300,000,000. Two of the provinces through which it passes have a population greater than that of the United States. All the men engaged in the enterprise are Americans. The material and rolling stock will be of American manufacture. General Parsons, representing the Chinese Railway Syndicate and the American-China Development Company, sails from San Francisco to China on October 10th. He will be preceded by a large party of engineers. The preliminary work will be commenced immediately. Mr. Calvin Brice, the head of the Development Company, carried the enterprise through, the concession being obtained through Wing-Tung-Fang, the Chinese Minister at Washington. Among the shareholders of the syndicate are the Standard Oil Company, the American Sugar Refining Company, the Carnegie Iron and Steel Company, and other great manufacturing and banking corporations. The *New York Tribune*, commenting on the enterprise, mentions that "the railroad will, by having its northern terminal at Han-Kow, create a direct line from Peking to Hong Kong by means of the new road, which is to be built by Belgian-French capital, and concerning which so much has been said in connection with the recent Anglo-Russian troubles in China. It will be remembered that the charge was made that Russia was furnishing all the money for the road, and was using the Belgians simply as a figure-head. The road runs through what is called the English sphere of influence. It was also hinted by those in close touch with the affairs of the American syndicate that it was not improbable that the latter might own the proposed road from Tien-Tsin to Han-Kow in the end."

#### RUSSO-CHINESE RAIL AND STEAMBOAT SERVICES.

The Moscow correspondent of the *Standard* writes:—"The Russo-Chinese Railway Company will very shortly place orders for 6 fast ocean steamers to run between the ports of Talienwan, Port Arthur, Shanghai, and Nagasaki, in connection with the trains on the Manchurian Railway. The boats are to be of between 3,000 and 4,000 tons actual carrying capacity, and will have a speed of 15 knots. Two will be ordered in Newcastle, one in Greenock, one in Holland, and the remaining two in Germany. Though, of course, carrying cargo, this little fleet will be primarily adapted for the passenger traffic, and will provide accommodation for 50 first-class, 35 second, 150 third, and 200 deck or fourth class passengers. The service is intended to be a fortnightly one, to correspond to the arrival and departure of the through trains from St. Petersburg, *via* Moscow and the Great Siberian Railway, to Port Arthur. I am told that when the trains and steamers are running, which, it is expected, will not be later than 1903, the journey between London and, say, Shanghai, will be reduced to about 21 days, while the cost will be only one-half what it is now. The carrying trade between the above Far Eastern ports is at present almost entirely done by small steamers of antiquated build, and largely manned by Chinese, but sailing under the German flag. Their cheapness is said to be their only recommendation. The Manchurian line is being pushed on with all possible speed. Within a few days 77 locomotives will reach Port Arthur, Talienwan, and Newchwang from the United States for use on this line. The Great Siberian Railway is expected to reach Stretensk, on the Amur River, by the middle of next summer, when the journey can be quickly and easily continued by steamboat to the northern terminus of the Chinese Eastern Railway, as it is officially called, though better known in England as the Russo-Chinese or Manchurian Railway. It is now almost certain that the opening year of the twentieth century will see the inauguration of a combined rail and steamboat through route between the Baltic and the Pacific, though it will probably not have much commercial significance till several years later."

#### NEWPORT AND PONTYPRIDD TRAIN SERVICE.

It is formally announced that the passenger train service between Newport and Pontypridd, by way of the Newport Pontypridd and Caerphilly Railway, will be discontinued after the end of the present year. The reason assigned is the unremunerative character of the service. The Alexandra Docks and Railway Company are now the owners of the railway, which was con-

structed by the late Sir George Elliot, Bart., to divert mineral traffic from the Rhondda to Newport Docks. The passenger service has been in existence seven or eight years, but the service is limited to four trains each way per day. When the Alexandra Docks Company were applying for Parliamentary powers to absorb the Pontypridd and Caerphilly Railway a rumour got abroad that it was intended to seek powers to discontinue the train service, but this rumour was then contradicted. "The effect of the notice," says the *South Wales Daily News*, "is somewhat minimised in well-informed circles at Newport by what will probably be the action of the Taff Vale Railway Company. It is rumoured that this company, as some sort of compensation for the disappointment to Usksiders over the 'coming to Newport' project of last session, are not at all disinclined to step in and establish a new service for passengers over the Newport Pontypridd and Caerphilly Railway, and the Brecon and Merthyr between Pontypridd and Newport. It is hoped that this service, if arranged, may be an improvement on the one it will supplant. The chief difficulty seems to be at Newport Station, where there are 350 to 370 mineral and passenger trains passing daily. Any increase in the number of passenger trains would tend to augment the difficulties at the station, already almost gorged with traffic. No doubt, following the quadrupling of the lines between Newport and Cardiff, additional accommodation will be provided in no long time at Newport Station by dealing with the Gaer Tunnel and the bridge over the Usk, but until those improvements are carried out it is not an unreasonable attitude that the Great Western Railway should be averse to any additional trains being run to the four trains each way per day which now traverse the shorter route for Newport people between Uskside and Pontypridd."

#### THE NEW RAILWAY IN CONGO STATE.

The new limited liability company constituted at Brussels, to which we briefly referred in our issue of the 24th ult., is to be known as the "Société Anonyme des Chemins de Fer Vicinaux de Mayumbe." The company's objects are: The construction and exploitation of railways in the district of Mayumbe, the agricultural development of the country, commercial and industrial development and the development of the mines of the Lower Congo. The concessions given by the Government are as follows:—The use of all the territory necessary for the establishment of the line and its dependencies. Absolute ownership of one thousand hectares of land for every working kilometre of the line. The right to exploit for thirty years the forests of the State. A thirty years' concession of the mines which the company has or may discover in the districts of the Lower Congo. Referring to this scheme, a Liverpool correspondent writes:—"I had recently the opportunity of conversing with Mr. Cocu, the managing director of the new railway line in the Congo. Mr. Cocu estimates that the line (which starts from Boma and terminates on the left bank of the Chiloango River) will take two years to build. It appears that one of the reasons for the line is the great development of the timber trade in the Lower Congo, a trade which, from all accounts, has great possibilities. Immense quantities of timber are to be found in the districts watered by the Chiloango, and the only possible means of exportation consists in floating the logs down the Chiloango to Landana on the sea coast. Landana is blessed with a particular heavy surf, and the consequence is that a large number of logs are annually lost in the process. A railway by enabling the logs to be brought down to Boma for shipment will obviate this difficulty, and still further develop the trade, besides opening up the richest palm oil and kernel-producing districts of the Lower Congo. The railway will strike the Chiloango near Chambete, traversing the Mayumbe and Ioundo districts. The eastern branch line will not be started until the main is completed. Brilliant results are predicted for this new enterprise on the part of the Belgians."

#### BUENOS AYRES AND ENSENADA PORT RAILWAY.

A circular has been issued to members of the Buenos Ayres and Ensenada Port Railway Company, Limited, convening an extraordinary general meeting to be held at Winchester House, E.C., on 8th inst., at which the following resolutions will be submitted:—(1) That the company sell and transfer their undertaking, railway, and property referred to in the agreement dated July 25th, 1898, made between the company of the one part and the Buenos Ayres Great Southern Railway Company, Limited, of the other part, upon the terms and conditions therein contained." (2) "That the company be wound up voluntarily, and that John Winterbotham Batten, of 15, Airlie-gardens, Kensington, W., chairman, and Frederick Neild, 37, Tavistock-square, W.C., deputy-chairman of the company, be and they are hereby appointed liquidators for the purpose of such

winding-up." (3) "That the liquidators be and they are hereby authorised to distribute in specie amongst the members of the company in proportion to their respective rights and interests in the company, and in accordance with the special resolution passed on June 23rd, 1898, and confirmed on July 13th, 1898, the fully paid preference and ordinary shares in the Buenos Ayres Great Southern Railway Company, Limited, to which the company is or will become entitled under the said agreement dated July 25th, 1898, being an agreement for the sale and transfer of the undertaking of this company to the Buenos Ayres Great Southern Railway Company, Limited, and that the said liquidators be and they are hereby authorised for the purpose of such distribution to vest any of the said fully paid shares, which but for this provision would be distributable in fractions, in any trustees upon any trusts which in the opinion of the said liquidators will facilitate the said distribution, and be for the benefit of the members, and to issue fractional certificates in respect of any such shares, and generally to make such arrangements as the said liquidators may think fit for the purpose of distributing the same shares or any of them."

#### LLANELLY AND PONTARDULAIS RAILWAY.

A special meeting was held at the Llanelly Harbour Commissioners on Monday, Mr. E. Trubshaw presiding. Consideration was given to the request from the promoters of the Llanelly and Pontardulais Railway Bill that they should contribute 1,000*l.* towards the cost of the new Bill to be brought up during the next session. The CHAIRMAN suggested that if the Commissioners thought it desirable to give the money any resolution passed would be subject to reservations, such as the approval of details, a report from Sir Alexander Rendel, the consulting engineer, and Mr. Fowler, the harbour engineer, that the Commissioners' interests would be protected at the dock, and subject to the counsel's opinion being that they had the power to subscribe. If they contributed to the scheme they would be recouped in the form of stock. Mr. A. E. DAVIES said if it were desirable to give part shares with the railway it would surely be advisable to promote one of their own. He preferred that they should do that rather than take part in joint promotion. Mr. W. H. LUDFORD, representing the Great Western Railway Company, said he did not think the Commissioners had power to subscribe anything, except to their own works. Mr. HARRY D. EVANS, representing the firm of Messrs. Neville, Druce, and Co., took a similar stand. Finally, the following resolution was passed:—"That this Commission, on the approval of the meeting of ratepayers, subscribe the sum of 1,000*l.* towards the costs of the promotion of the Bill of the Llanelly and Pontardulais Railway, subject to the details of the scheme being provided to the Commissioners, and also to a report to be made by the engineer upon the scheme so far as the Commissioners were concerned, and also subject to the counsel advising that such contribution is within the power of this Commission." A public meeting is to be held on Monday evening next.

#### "THE GOOD OLD HUMDRUM STYLE."

People will almost begin to entertain hopes of Mr. Forbes, the well-known chairman of the London Chatham and Dover and the Metropolitan District railway companies. They will almost begin to entertain hopes because there are signs that even Mr. Forbes can profit by the teaching of events. . . . It is only a few weeks ago [see articles "The Good Old Humdrum Style" reproduced in THE RAILWAY TIMES of April 16th and June 4th] that we were commenting upon Mr. Forbes's evident unwillingness to entertain the question of electric traction upon the "District" line. If he was not unwilling, he was certainly remarkably slow, his words on that previous occasion implying that nothing can be done yet, that nothing must be done in a hurry, and that the District Company must watch and wait an indefinite period for the results of the experiments which are contemplated by other companies and in other quarters. Now, however, he finds himself prodded into somewhat quicker action. On September 29th his remarks ran thus:—"In connection with this new extension the question again came to the front as to the use of electrical traction. They had, no doubt, seen what had taken place in the last few months. The extraordinarily fine weather and the coal strike in Wales had terribly punished their traffic, as the tunnels had been abnormally disagreeable. "Abnormally disagreeable" is a very moderate phrase to use in regard to the underground atmosphere. But mark what Mr. Forbes says now:—"The adoption of electrical traction would get rid of these disadvantages. He thought the salvation of the District Company, and of the Metropolitan Company too, depended to a certain extent on the substitution of electricity for steam. They had powers to adopt the electrical system, and one of the objects of

the resolutions before them was to put that into effect. It would involve an outlay of 600,000*l.* in the case of the District Railway." These be pretty strong words. We are now told that the "salvation" of both the underground companies "depends to a certain extent on the substitution of electricity for steam." One would think that, this being so, the two companies concerned would be anxious to work out their salvation as quickly as possible; but Mr. Forbes, it would seem, still finds it impossible to shake himself clear of those old traditions which make, and for so many weary years have made, for delay. Accordingly, he adds, "The directors did not desire to ask the shareholders to incur that cost until they had before them the report of such eminent electrical authorities as Sir Wolfe Barry and Mr. Preece, the electrician of the Post-office." No proprietor or any one else wishes to hurry the Metropolitan District Company or the other underground line into premature expenditure in connection with this matter; but, surely, the inhabitants of London have waited long enough for the obvious and most necessary improvement implied in the superseding of steam by electricity in these "abnormally disagreeable" tunnels. How much longer are they to wait for "investigations" and "experiments"? The present generation of travellers are tired of being partially asphyxiated. And, after all, it would seem that they will be indebted for such progress as may presently be made to the abnormal heat of the summer. This abnormal heat thus proves a blessing in disguise in more than one respect. But it is not until he sees his customers fleeing from his "abnormally disagreeable" tunnels to the omnibuses and the traffic of his line daily falling away that Mr. Forbes can bring himself to take one single step in advance.—*Financier*.

#### STOCK EXCHANGE VALUES.

According to the *Bankers' Magazine* the Stock Exchange value of 325 representative securities on September 20th was 3,227,190,000*l.*, an increase of 2,412,000*l.* since August 20th. Our contemporary remarks:—"The past month on the Stock Exchange has been mainly characterised by what may be termed professional operations for the rise; that is to say, the public has refrained almost entirely from dealing; but, owing to a clearer political outlook, professional operators have endeavoured to initiate an upward movement, believing that with the close of the holiday season public buying would commence. Such gains as have taken place may be generally traced to operations of this nature, and, with a few exceptions, the declines which have occurred are due to the reaction which has followed in consequence of the absence, so far, of any buying on the part of the public. The keynote of markets was given at the commencement of the month by the Czar's manifesto of peace, and a further stimulus was derived a little later from the British victory at Khartoum. To some extent these favourable influences have been checked by the political situation in France; but, on the whole, there has been nothing in politics adverse to an upward movement in Stock Exchange values. The movement in prices during the month has been of so irregular a nature that our list of representative securities shows merely a total net increase of 2,412,000*l.* Consols have fallen slightly owing to anticipations of dearer money, and for the same reason the prior charge stocks of English railway companies have also declined. English railway stocks, which have been almost neglected, were adversely affected by the disappointing dividends announced by the Scotch companies. American railroad shares, which were especially strong a month ago, have reacted to a slight extent; but the bond issues of various companies show a further advance, in consequence of a steady absorption for New York."

**EPPS'S COCOA.**—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homoeopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months.....	0 13 0
Twelve Months.....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Oct. 12—Buenos Ayres Western Railway (Annual), City Terminus Hotel, at 12.  
Oct. 13—Metropolitan District Railway (Adjourned Special).  
Oct. 13—Grand Trunk Railway of Canada (Half-yearly), City Terminus Hotel, at 2.  
Oct. 14—Central Uruguay Railway of Montevideo (Annual), City Terminus Hotel, at 2.  
Oct. 14—Santa Fe and Cordova Great Southern Railway (Annual), Winchester-house, at 12.  
Oct. 18—Recife and Sao Francisco Railway (Half-yearly), City Terminus Hotel, at 1.  
Oct. 19—Entre Rios Railways (Annual), Winchester-house, at 12.  
Oct. 20—Buenos Ayres Great Southern Railway (Half-yearly), City Terminus Hotel, at 12.  
Oct. 26—Alberta Railway and Coal Company, Limited (Annual), 37, Old Jewry, E.C., at 12.  
Oct. 26—Highland Railway (Half-yearly), Inverness, at 1.

The Pretoria-Pietersburg Railway Company's resident engineer, in his report for the month of September, says:—"The earthworks are finished for a length of 270 kilometres, leaving only 14 kilometres to be made, which will probably be ready by the middle of October. The earthworks for the junction with the Netherlands South African Railway on that company's ground are proceeding well. The masonry has been finished over a length of 236 kilometres, which includes most of the large bridges and culverts. The bridges over the Groot and Klein-Nijl are nearing completion and the one over Potgieters-street at Pretoria is making good progress."

## AMERICAN PASSENGER FARES.

Last week we were able to examine, by the aid of official statistics, the average extent to which goods rates have been cut by the American railroads as a whole in the last thirty years. The position revealed as regards this branch of railway business is now supplemented by the corresponding figures bearing upon passenger traffic. Adopting the basis of passenger mileage, the apparently irresistible contraction in the sums received per passenger mile is well exhibited by the following table, compiled from the data of the report of the U.S. Board of Agriculture:—

TABLE SHOWING FARES IN CENTS.

Year.	Average fare per passenger mile.
1867 .....	1 994
1870 .....	2 392
1875 .....	2 378
1880 .....	2 442
1885 .....	2 216
1890 .....	2 167
1895 .....	2 040
1896 .....	2 019

Those who will take the trouble to compare this table with the parallel information on goods rates given in our issue of the 1st inst., will not fail to be struck with the fact that while the latter show a practically unbroken decline dating from the earliest year of the series, passenger fares not only longer resisted the tendency, but until 1880 were actually moving in the opposite direction. Even in 1896 the average fare was but 15 per cent. below the high-water mark of 1880, while goods rates, as will be remembered, had fallen no less than 60 per cent. within the period dealt with by the tables. Unfortunately the satisfactory nature of the comparison ends here, for while the cost of working goods traffic has been, and is still being, reduced, the passenger business seems to grow more costly year by year. Nor is this surprising. Economies possible with goods traffic, due to the improvements in locomotives, rolling stock, and appliances, are clearly inapplicable in anything like the same degree to passenger trains; while in place of the lessened "dead" load hauled for every ton of "paying" goods, it is certain that passenger rolling stock becomes yearly heavier and more costly to build and to work, but with less and less seating capacity. To lessen the expenses of passenger working there are only reductions in superintendence and office charges to look to, and these are small compared with the regularly increasing outlay upon a higher standard of luxury and safety. To turn from generalities to facts, the following table shows what actually has been done by a company selected as best avoiding extreme conditions:—

TABLE.—LAKE SHORE AND MICHIGAN SOUTHERN RAILROAD.

Year.	Passenger Service.		Passenger Mile.
	Cost, Cts.	Revenue, Cts.	Profit, Cts.
1870 .....	2 612	1 708	0 904
1875 .....	2 378	1 824	0 554
1880 .....	2 135	1 086	1 049
1885 .....	2 058	1 250	0 808
1890 .....	2 246	1 492	0 754
1895 .....	2 139	1 368	0 771
1897 .....	2 018	1 407	0 611

The most striking feature about this table is the drop in profits, amounting to, roughly, 40 per cent., while the average fares paid by the travelling public have been reduced by so little as a bare fourth of that amount. In fact the actual cost of carrying a passenger 1 mile in 1897 was 32 cents more than it was seventeen years before. It

is almost incredible to think that so large a difference is entirely due to the growth of working expenses as these are understood in this country. Unfortunately, any one with a slight acquaintance of American methods of advertisement and agency must perceive at once that a very considerable fraction will have gone to the scalpers, or has been otherwise dissipated in rate wars and the sink of unbridled competition. The curse of such a system is that practically no one benefits—the average fares very hardly at all—and yet the railway is simply sweating dollars at every turn. In booming years this may be successfully concealed, but no organisation can long support the army of parasites which lives by sucking its life blood, and whose rapacity is only equalled by the extraordinary power of rapid multiplication which nature has paradoxically given to vermin in every degree of life, and never more so than when outwardly all is fairest. What, then, do we find as the broad conclusion of our survey? Goods rates still coming down, but a large traffic being stimulated by the fall, while economies in working have not yet reached their limits. Passenger fares falling, slowly yet unquestionably, the passenger profits rushing headlong to irrecoverable depths. It will not be this year, it may not be next year, but the time must come when the canker which is at the root of the mischief will destroy the organism or be itself destroyed.

### THE GRAND TRUNK REPORT.

In view of the extremely disappointing preliminary statement issued by the Grand Trunk in August last the half-yearly accounts published this week will be examined with more than ordinary interest. It will be remembered that the market was about 25,000*l.* out in its reckoning as to the amount available for dividend, and as the discrepancy was on the wrong side a slump extending from 5½ points on the first preference to ½ on "little" Trunks hailed the appearance of the dividend announcement. It would appear that the 25,000*l.* is accounted for by special charges made against revenue on account of bridge renewals; in fact, the dreaded "suspense" accounts, with all their evil possibilities, are again imported into the Grand Trunk accounts. Sir C. Rivers Wilson, at the general meeting in April, referred to the fact that 110,000*l.* would be charged against revenue, and this amount, together with the cost of renewing bridges between Montreal and Portland, and on other sections of the line is to be spread over "at least five years, so as to obviate any undue increase in the "maintenance charges in any one year." To begin with, 10,274*l.* was deducted from the balance remaining at December 31st last for this purpose, and it appears that 15,402*l.* further was included in the maintenance charges for last half-year. These two amounts represent 25,676*l.*, and probably account for the disappointing character of the preliminary statement. As 57,816*l.* has been actually expended on bridge renewals, there remained a debit balance of 32,140*l.* not yet charged to revenue, which appears in the balance-sheet under the head of "bridge "renewal suspense account." What amount will be charged this half-year on the same account is not stated, and it is clear that the whole 32,140*l.*, plus any further outlay during the current period, may be charged if the directors so determine. Obviously, the monthly working statements, which appear to make no allowance for this new element, are rendered extremely misleading, as the half-yearly result must depend after all upon what the board thinks is a fair sum to charge against revenue on account of these renewals. Either the amount should be deducted month by month from the working statement, or the outlay should be spread equally over a period of five or more years,

and in any event it is undesirable that large charges of this character should be sprung upon the shareholders and the market in the way it was last half-year. Both the July and the August working statements have been satisfactory so far as they go; for in spite of a reduction in gross earnings of 48,000*l.*, the decline in net profit for the two months was only 10,512*l.*, owing to a large reduction in expenses. But if, at the end of the half-year, 25,000*l.*, or possibly a good deal more, is deducted in order to reduce the new "suspense" account, the position is decidedly uncertain. Turning to the actual results of the past half-year, we have again to enter a protest against the new classification of expenses which was first introduced in the accounts for the second half of 1897. The corresponding figures in the first half of 1897 have been adjusted in the present accounts, and on this footing the gross revenue shows an increase in the case of the Grand Trunk proper of 115,168*l.* In passengers there was a decline of 25,656*l.*, however—a result which may be attributed to rate-cutting, for the number of passengers carried increased by 61,332, and the passenger mileage run increased by 84,511 miles. The average fare per passenger last half-year was 2*s.* 11½*d.*, against 3*s.* 2*d.* in the first half of 1897. In miscellaneous receipts there was an increase of 39,802*l.*, due to additional rentals received from the Wabash and the Canadian Pacific. It is satisfactory to note that, as we suggested at the time, the settlement of the transcontinental rate-war between the Canadian Pacific and the American lines has paved the way for a settlement of the more local dispute with the Canadian Pacific Railway, and negotiations are now in progress which it is hoped will lead to a settlement, or to arbitration on the disputed points. Expenses rose last half-year by 47,240*l.*, leaving the increase in net revenue from the Grand Trunk proper as 67,928*l.* This is reduced to 64,460*l.* on passing through the net revenue account, the net surplus from the Grand Trunk proper last half-year having been 137,326*l.*, against 72,866*l.* in 1897. The Chicago and Grand Trunk made rapid progress in the half-year, the net profit of that section having advanced from 38,845*l.* to 81,846*l.* This bears out what we have before suggested—namely, that the Grand Trunk was reaping considerable advantage on its Chicago section from its alliance with the American roads in the war against the Canadian Pacific. As a consequence the deficit on this section was reduced from 50,073*l.* to 8,392*l.* On the other hand, the Detroit section continues to show poorer and poorer results, and entailed a charge last half-year of 22,282*l.*, against 20,084*l.* in 1897. After meeting the deficits on its subsidiary sections amounting to 30,674*l.*, the balance remaining for Grand Trunk stockholders is 106,652*l.*, which enabled the company to pay the full dividend on its guaranteed stock with 2,272*l.* forward. For the second half of 1897 the net profit earned was 275,264*l.* The position to date, always subject to the "suspense account" operations referred to, is as follows:—

Net profit first half 1898 .....	=	£106,600
Net profit second half 1897 .....	=	£275,264
Less decline in July and August,		
1898 .....	10,512 ...	264,752
Total profit for year .....		£371,352

The full year's dividend on the guaranteed stocks would absorb 208,800*l.*, leaving about 162,500*l.* available for the first preference—only a few thousands short of its full dividend. But there are several points to be observed before assuming that this result will be attained. First of all, it rests upon the assumption that the net results of September to December, 1898, inclusive, will be at least equal to those of the same months of 1897. In the next place, it is subject to whatever provision is made for the aforesaid "suspense

"account;" and, in the third place, it depends upon the distribution of all the available net revenue in dividends. Whether the board will feel justified in distributing in dividends the whole surplus profit, bearing in mind that only two years ago it was failing to earn its fixed charges by a considerable sum, is doubtful. Prudence, at any rate, would suggest that some provision should be made against the recurrence of such a contingency. The market received the report with favour, though the good traffic return for the last nine days of September, showing an increase of 2,753*l.*, which appeared simultaneously, assisted to produce the better tone. This was the first increase shown for some months past.

### DOVER "A."

It is not many weeks ago that speculators and investors were tumbling over one another in order to "get into" South Eastern deferred when that stock stood at 117. Then followed a reaction; the quotation fell to 105; and now the view expressed last week in these columns to the effect that the stock could not but be regarded as a promising investment at about that figure has found support, and an improvement to 107 has taken place. When the arrangement with the Chatham Company was first mooted, and the stocks of both lines were being run up at a reckless rate, we pointed out that the pace was rather fast, and that estimates of benefits to accrue from the joint working of the competitive traffic were probably pitched too high. Since then the usual revulsion of feeling has come about, and the sentiment regarding Dover A has veered round from the extremely "bullish" to the extremely "bearish" quarter. The truth will in all likelihood be found somewhere between these two extremes. It must be confessed that during the last two months the stock has had to face a good many adverse influences. The dividend for the first half of 1898 was poor— $\frac{3}{4}$  per cent. lower than in 1897, and that means that the dividend on the A stock is reduced from  $3\frac{3}{4}$  to  $3\frac{1}{4}$  for the year. Then heavy capital requirements have been disclosed, though the form in which the stock is being issued (namely, preference with postponed dividend) minimises the effect of the new burdens upon the balance available for distribution. The opening of the Waterloo and City Railway, and the suggested expenditure of money in order to make the most of the forthcoming joint administration of the two Southern systems under one management, have been advanced as bear points. The possible adverse effect of these two features has been greatly exaggerated, and the essential points in the outlook of the South Eastern Company have been disregarded. First, in respect to the disappointing dividend, it is to be borne in mind that, as we pointed out at the time, the reason was largely to be found in the extra charges made against revenue for maintenance and renewals of the road and rolling stock—in fact, nearly half of the additional expenditure was directly accounted for in that way. The condition of this line is certainly much improved compared with what it was in the "Watkin" days, and under Mr. Willis's able administration this is likely to continue. Then, as that gentleman will have charge of the joint operation of the competitive traffic of the South Eastern and Chatham companies under the new arrangement arrived at, which is to be brought into operation from the beginning of 1898, he will have still wider scope to effect improvements with benefit to the shareholders of both companies. Whilst the economies to be effected in this way were probably over-estimated, we still think they will be considerable, and though the current dividend on "Dover A" is only  $3\frac{1}{4}$  per cent., it only takes 50,000*l.* per annum to pay an extra 1 per cent. on the deferred stock.

### A MONUMENT OF WATKIN FOLLY.

We print in another column an announcement regarding the ill-fated "Watkin" Tower in Wembley Park. The owning company, the Metropolitan Tower Construction Company, has passed into voluntary liquidation owing to its "inability to complete the structure or to pay any part of the rent due to the ground landlords of Wembley Park." Apparently 100,000*l.* has been sunk in this hare-brained scheme, and nearly 10,000*l.* is overdue on account of ground rent. The ground landlords, the Tower Company, "have felt some diffidence in foreclosing on the tower." No wonder; there would not be much satisfaction in seizing a straddling conglomeration of ironware merely for what it might realise on the scrap heap; for it would cost a good deal to pull it down. So it has been arranged that the Tower Company, which owns the ground, shall purchase the unfinished tower for 49,360*l.*, to be paid in deferred shares of the former. These shares will rank after a cumulative dividend of 5 per cent. has been paid on the ordinary shares and the overdue rent has been recouped. It was hardly necessary to add there is "no intention of completing the tower." As it stands it is a sufficiently conspicuous monument to the folly of one of the greatest administrative failures of the age. The only consolation to be found over this sorry business is in a statement made by Sir Edward Watkin at one of the Tower meetings—that he had found most of the money himself.

### HOW THE SMALL OPERATOR LOSES HIS MONEY.

A correspondent, whose name we forbear from publishing, though not enjoined to do so, sends us the following letter, which is a fair sample of the tantalising balderdash frequently hurled at the heads of financial writers:—

"Mexican Southern.—I bought 20 of these in response to your hint, but had to pay 22 $\frac{3}{4}$ . I called at the company's office to-day and the only information I could get was that the yearly accounts would be issued about the 20th or so. I tried to sell again yesterday at 22 $\frac{3}{4}$ , but the broker's reply was it would have his careful attention. Anything fresh that may have transpired since your last issue, and that you may think worth publishing would, I am sure, be appreciated by those who have recently bought. Of course my object is quite a selfish one in writing you, and I will carefully read over your next issue in the hope of finding a guiding hand."

What our correspondent means by "20 of these," we do not know, as Mexican Southern ordinary is not divided into shares. On what date he made his purchase he does not say, but the "hint" to which he refers was given in our issue of September 17th, at which time Mexican Southern ordinary stock was quoted 19-21, and could, as a matter of fact, be bought at middle price (20) or under. But he tells us the price he paid was 22 $\frac{3}{4}$ —i.e., nearly 15 per cent. in excess of what we recommended it at. Most wise men would have been sellers rather than buyers on such an advance, which is quite a respectable profit to pick up in the space of a few days. Then we are told that after buying the stock he calls at the company's office for information, and is told that the accounts will be out about the 20th. As much might have been gathered from any one of the numerous Stock Exchange manuals, and surely our correspondent (whose name would not yet be on the register) did not expect to be let into the board's secrets or to be furnished with an advance copy of the report in manuscript. He seeks information, and what more natural than to be told that in a few days he will get all that he is legitimately entitled to in the forthcoming report? We need not emphasise the absurdity of buying stock first and making inquiries

afterwards. And what are we to think of an operator who buys at  $22\frac{3}{4}$ , and then tries to sell at  $22\frac{3}{4}$ , and that, too, *before* making his inquiries? Even with his broker he is not satisfied, because he is told that his instructions will have "careful attention." What more does he want? How can an investor or speculator expect to make money when he acts on such insane lines as these, and how on earth is any one to lend "a guiding hand" to such an erratic individual? But, as we have already suggested, our correspondent is only a fair sample of the stuff that his class are made of, and probably he wonders why the Stock Exchange fraternity wax fat, whilst their clients fritter away their money in differences and commissions through failing to exercise a modicum of common sense.

### RAILWAY HOURS.

The report of the Board of Trade upon its proceedings under the Railway Regulation Act, 1893, an extract from which we gave in our last issue, is a most interesting document in the light it throws on the relations of the railway companies with their men. It carries all the weight of an independent report on the hours of railway servants; for even the A.S.R.S., in a recent resolution of its executive, is reported to have admitted with unusual frankness that "the only independent tribunal we can appeal to is the Board of Trade." This conviction should lend additional importance to the conclusions which are arrived at in the report, and should still further open the eyes of the public to the real character of the late attempts to stir up agitation amongst railway men. In the first place there is evidence in the report of the thoroughness with which every complaint as to hours is followed up by the Department. In the next place there is abundant testimony to the desire of the companies to comply with reasonable demands made directly by their men, or through the intervention of the Board of Trade; and, finally, the decline in the number of complaints may be readily accepted as evidence that the conditions have undergone vast improvement, and that all causes for dissatisfaction are being steadily removed. The report covers complaints made for the year to July 27th last and represents the fifth year of the operation of the Act. The number of complaints received by the Board of Trade was 50, against 156 in 1894-5—a decline of over 66 per cent. compared with three years ago. It further appears that five cases of complaint did not appear to the Board of Trade "to contain a sufficient *prima facie* case of hardship to justify action." Of the total complaints received one-third were in respect of signalmen's hours. Only in seven cases did the representations made by the Board of Trade fail to produce any result. In each of these cases the complainants were offered the assistance of the Board of Trade for putting into operation the machinery provided by the Act of 1893, by bringing their grievances before the Railway and Canal Commission. The Act of 1893 provides that if any company fail to comply with the order of the Board of Trade for reducing hours the Board "may refer the matter to the Railway and Canal Commission, and thereupon the Railway and Canal Commission shall have jurisdiction in the matter and the Board may appear in support of the reference, and the Commissioners may make an order requiring the railway company to submit to the Commissioners within a period specified by the Commission, such a schedule as will, in the opinion of the Commission, bring the actual hours of work within reasonable limits." In spite of the fact that the Act has been in operation for five years, no single case has been submitted to the Railway Commission. In some respects this is to be regretted, as it would have disclosed the views of the final authority on this subject as to what are "reasonable limits" to working hours.

Nevertheless, the mere fact that no appeal to the Commission has been made is remarkable testimony to the absence of any very glaring cases remaining undressed, especially as in these days there would have been plenty of union leaders ready to champion any cause which appeared to offer only a remote prospect of success. After their repeated defeats and discouragement of their efforts by the Board of Trade, the professional agitators among railway servants have doubtless become more chary about tilting at windmills. The Act certainly seems to have been administered with discretion and without, as Sir Courtenay Boyle says, "either undue interference with the management of the railways, on the one hand, or the necessity of incurring the friction inseparable from legal proceedings, on the other." In the case of complaints made of the hours of goods porters on the South Western and Great Eastern systems, the Board of Trade took no action, as they were "advised that the Act did not apply to the servants in question." An interesting point cropped up in the case of the North Eastern Company. Complaints were made of the hours of signalmen near Blyth, and an inquiry was made by the Board of Trade. No alteration in hours resulted, however, as the company very significantly pointed out that they were in accordance with an award made by Lord James of Hereford, to whose arbitration the question of the hours and wages of the company's signalmen was submitted. A general complaint was also made on behalf of the drivers, firemen, guards, and shunters on the North British, which has resulted in slight success. It appears that the complaint in this instance is tantamount to a demand for higher wages. The Board of Trade rightly consider that it would be "exceeding the duties imposed upon the Board of Trade by the statute if it allowed the Act to be set in motion" for purposes other than the matters concerned with the periods of duty. As the report before us points out, the two questions of hours and wages are closely allied, and "there is always a danger that the Act may be used as a weapon in some dispute between a railway company and their servants for the purpose of obtaining alterations in the terms of service other than the reduction of hours of labour within the meaning of the Act." In fact, the report admits what is obviously true—namely, that the reductions of hours effected have been made without adversely affecting wages, and that "during the last five years, while large reductions in hours have been in progress, wages have steadily increased." On no other thesis is the extraordinary advance in wages paid by our railways capable of explanation. Parliament never intended to set in motion such an economic experiment as the State regulation of wages in so important an industry as that of our railways. What it desired to do, and what the Board of Trade is now doing in pursuance of the Act, is to prevent excessive hours among railway servants, not only on behalf of the men themselves, but in the interests of the public safety. But, as the concluding sentence of the report fitly points out, any attempt to make the Act a lever for extorting higher wages would "inevitably be met by the companies with a proposal to reduce the wages in due proportion to the shortening of the hours of work."

### PASSING NOTES.

The traffic receipts for the week ending October 2nd, on thirty-three of the principal lines of the United Kingdom, amounted to 1,837,595*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,778,864*l.*, with 19,034½ miles open. There was thus an increase of 58,731*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for fourteen weeks to date amounted on the same thirty-three lines to 22,123,835*l.*, in com-

parison with 25,581,889*l.* for the corresponding period last year; increase, 541,946*l.*

One of the *Daily Telegraph's* hacks has been turned on to interview Mr. J. S. Forbes about railways, old china, steamboats, pictures, the arrest of criminals, and what not. The one substantial fact elicited from Mr. Forbes in the course of a "long and interesting chat" is that under the new working agreement with the South Eastern "return tickets will be valid on both railways. The man, say, who lives at Sevenoaks will find that he will have Victoria, Holborn, Ludgate-hill, and St. Paul's, as well as London Bridge, Cannon-street, and Charing-cross, open to him—his train services will be doubled, and he will pay no more money for it." This may be perfectly true, but we can say emphatically that it is anything but new. The rule has been in force many more years than we care to remember, and it has been applicable to at least a dozen of the most important stations throughout the two systems.

The directors of the London and South Western Railway Company have resolved to celebrate, on Wednesday, the 12th inst., the sixtieth anniversary of the ceremony of laying the foundation-stone of the first dock at Southampton, performed with full Masonic rites on October 12th, 1838, by Admiral Sir Lucius Curtis, who was at the time provincial grand master of Hampshire. Mr. W. W. B. Beach, M.P., the present provincial grand master, who is also a director of the South Western Company, has undertaken to conduct the commemoration proceedings, and all the Masonic lodges in the county will be invited. The chairman and directors of the company will be present as a matter of course, and they will welcome the Mayor and Corporation, members of public bodies, and the Consuls at the port as representing foreign countries.

It has now been definitely decided that there will be no official opening of the new dock at Barry. The hydraulic machinery is being prepared for use, and the old wooden bridge that has served to carry the railway across the waterway during the construction of the dock has been entirely removed. A sufficient water space has been cleared at the junction with the old dock to allow a vessel to enter, and it is now intended to use the five tips that are completed if the necessity should arise for this through any pressure of work at the present dock. Trade at the present time is exceptionally brisk, and recently a record was established in the fact that no fewer than twenty-two vessels entered the dock during one tide by means of the Lady Windsor Lock.

The trade and navigation returns for the month of September, issued yesterday, show that the imports for the month amounted to 35,605,281*l.*, an increase, as compared with September, 1897, of 425,648*l.*, chiefly caused by an increase of 618,600*l.* in the imports of raw material for textile manufacturers. Altogether the imports for the first nine months of this year show an increase of 14,902,477*l.* as compared with 1897. The exports for September amounted to 19,945,085*l.*, an increase, as compared with 1897, of 1,639,810*l.*, chiefly due to large increase in raw materials, textile fabrics, and machinery exported. On the first nine months of the year there is a decrease, as compared with 1897, of 3,262,018*l.*

Writing on the Northern Pacific last week, we alluded to the charges made to capital instead of revenue as affording explanation of the low rate of working expenses. It is now suggested that the company will charge \$100,000 a month extra for betterments. At this rate it would only take two-and-a-half years to exhaust the new reserve fund of \$3,000,000 for maintaining preferred dividends. In fact, it is simply putting money in one pocket and taking it out of another. It is not surprising that, as reported by a New York cable, there are dissensions on the board regarding the financial policy of the company.

According to the *South Western Gazette* the projected light railway from Lyme Regis to Chard Junction has been abandoned, on account of considerable natural difficulties in the formation of the ground and of the likelihood of the district proposed to be opened up being of an unremunerative character from the point of view of traffic. However, it would seem there is a good chance of Lyme being connected, by means of a light railway, with Axminster, a distance of about 5 miles, as compared with nearly

double the distance, which must have been the length of the Chard Junction line.

At the Oldham Police-court on Wednesday, the Lancashire and Yorkshire Railway Company were fined 5*l.* and costs for having caused unnecessary suffering to animals. Four cattle, one sheep, and thirty lambs were conveyed in what is known as a "small wagon" from Fleetwood to Oldham, and one of the lambs on arrival at the latter station was found to have been trampled to death. The chairman said the bench would be glad if the Board of Agriculture would issue an order that in such cases the larger animals should be separated from the smaller by partitions.

The gush displayed in one or two quarters over the Brighton Company's "important departure in railway travelling"—as the sixty-minute run from London to Brighton has been termed—is rather a left-handed compliment to the management. It does not say much for the general passenger service of the line, because one solitary train per week can run 51 miles in an hour at the quietest time on Sunday, when there is very little other traffic about. And, after all, it is only repeating what was done on the same line fifty years ago.

At Dorking Police-court on Saturday Mr. J. L. Paice, living at Ockley, near Dorking, was fined the full maximum penalty of 5*l.* and costs for using the electric communication of an express on the London and Brighton Railway without reasonable cause. The defendant stopped the train when it was passing the station at which he wished to alight, and at which it was not timed to stop. When spoken to the defendant's only excuse was that they stopped for other people, and they would have to do so for him.

Pekin Syndicate shares, once quoted at 18 and over, have been unsaleable this week at 8, which will not surprise readers of our article of August 13th. The *Financial News* says that "dealers consider that sellers at the present price are throwing away their shares." In our experience dealers are generally ready enough to take advantage of the "throwing away" process. Perhaps in this instance they have "had some;" or, in Stock Exchange slang, they have got "stuck" with too many Pekin shares already.

The Light Railway Commissioners have held a public inquiry with reference to the application made for a light railway from Portmadoc to Beddgelert and Rhyd-ddu. The proceedings came to an abrupt termination by the statement of the chairman that they had not the power to authorise the sale and transfer of a railway which had obtained powers under a Parliamentary Act, a portion of which it was said was essential to the scheme. It was stated that the promoters will now consider an alternative scheme.

An issue of 90,000*l.* 4 per cent first mortgage debenture stock is being made at 105 per cent. by the London Road Car Company, Limited, redeemable at the company's option on or at any time after January 1st, 1907, at 110 per cent. The prospectus points out that the directors have already issued 60,000*l.* 4 per cent. redeemable stock, the present issue to rank *pari passu*, and that at no time is the debenture stock issued to exceed one-half of the paid-up capital.

The South Eastern and London Chatham and Dover companies announce that, for the convenience of passengers desiring to travel to Vienna by the short sea route, *via* Dover and Calais, a sleeping car will run through from Calais to Vienna, in connection with the 9 a.m. train from Charing-cross and Victoria stations, on and from October 1st.

Mr. H. Cosmo Bonsor, M.P., chairman of the South Eastern Railway Company, Mr. Alfred Willis, manager of the South Eastern Railway, and Mr. J. F. S. Gooday, manager of the Brighton Railway, have accepted invitations to be present at the annual dinner of the Hastings and St. Leonards Borough Association on October 12th.

The Board of Trade have issued modified rules with respect to applications to the Light Railway Commissioners under the Light Railways Act, 1896. Copies of these rules can be

purchased, either directly or through the usual agents, from Messrs. Eyre and Spottiswoode, East Harding-street, Fleet-street, London, E.C.

At the board of the Highland Railway Company on Wednesday, the chairman stated that he had passed over the whole of the new deviation line from Aviemore to Inverness, and, pending the inspection by the Board of Trade representatives, it had been provisionally arranged to bring the new route into operation on November 1st.

The North British Railway Company's general offices at Edinburgh, which have taken two years to build, were completed last week, and the various departments removed to their new locations. Accommodation has been provided for a staff of 400. A start will be made in November with the new offices at Glasgow.

At a meeting of the Windsor Corporation on Tuesday it was decided that the negotiations for the sale of a portion of the Goswells Field to the Great Western Railway Company for an extension of their goods yard should be continued.

It is stated by a Cardiff paper that the promoters of the Windsor Dock will make another attempt to get their Bill next session. It will be remembered the Bill was passed by the Commons' Committee, but rejected by the Lords.

Mr. John A. Carter, chief clerk in the district goods manager's office of the Great Western Railway at Gloucester, has been appointed traffic manager of the Severn and Wye and Severn Bridge Joint Railway, vice Mr. Petrie, resigned.

The directors of the Glasgow and South Western Railway have appointed Mr. George Russell (who has acted as interim telegraph superintendent for the last twelve months) to be telegraph superintendent of the company.

An extension of the Vale of Glamorgan Railway to the mouth of the river Ogmore is said to be under consideration. Nothing has transpired as to the terms on which the company will be taken over by the Barry Company.

The Great Northern (Ireland) Railway Company, finding that its dining-cars do not pay, has discontinued running them. The pity is that some of our English companies have not courage enough to follow its example.

The public is by this time pretty well accustomed to the belated ways of the Board of Trade, but this year that department is surpassing itself in the delay in getting out its report upon the Railway Returns of 1897.

Under its guarantee on the capital of the Newhaven Harbour Company, the London Brighton and South Coast Railway Company had to provide 6,168*l.* for the half-year ending June 30th, 1898.

Councillor W. Cresswell Gray, of West Hartlepool, has been appointed a director of the North Eastern Railway Company, in succession to his father, the late Sir William Gray, shipbuilder.

It is understood that the proposed railway from Turriff to Brucklay has been again under the consideration of the Great North of Scotland Railway directors.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 4th inst.; the fortnightly settlement in other Securities commences on the 11th inst.*

CITY, FRIDAY EVENING.

In anticipation of an advance in the German Bank Rate on Monday, the outside discount rate in Berlin has moved up to 4 per cent., and this has had a sympathetic effect here, causing holders to ask as much as 2½ per cent. for three months' and 2⅞ per cent. for six months' paper. Money, however, is in plentiful supply, and 1½ per cent. for

call loans and 1¾ per cent. for short fixtures. The Bank Return issued yesterday shows a considerable diminution in the immediate resources of that institution. The cause of this is the payment of the dividends and the shiftings of money which attended it. Practically the only head under which the Bank received cash during the week was the "Other Securities," the repayment of advances on these representing 1,687,402*l.* On the other hand, the Government balance has fallen 1,173,464*l.*, while there is an increase of 1,878,047*l.* in the Government securities—a movement which may probably reflect temporary borrowings by the Chancellor of the Exchequer. The decrease of 664,711*l.* in the "rest" represents the dividend on Bank of England stock. On balance the reserve has fallen fully 2,000,000*l.*, and is now reduced to 20,386,537*l.*, while its proportion to the liabilities presents the somewhat important reduction of 3½ per cent. to 44⅓. Most of these changes are, however, of a temporary nature, and will soon right themselves. The only bullion movement since the issue of the Bank Return was the withdrawal to-day of 170,000*l.* in sovereigns, of which 150,000*l.* was for Egypt.

Silver bars are now quoted at 27½*d.* per oz., being ¾*d.* lower on the week. A year ago the price was 27*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 15-16*d.*; Calcutta, 1*s.* 3 15-16*d.*; Hong Kong, 1*s.* 11½*d.*; Shanghai, 2*s.* 7½*d.*; Singapore, 1*s.* 11½*d.*

The premium on gold at Buenos Ayres has fallen during the week from 151 30 to 150 20 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 7 03*d.* A year ago the premium was 188 per cent., and the value of the paper dollar 1*s.* 4 53*d.*

The Valparaiso 90-day exchange comes over to-day at 13 11-16*d.*, a rise of ¼*d.* on the week. A year ago it was 17 9-16*d.*

The Rio de Janeiro exchange on London is 8 9-16*d.*, being 13-32*d.* higher on the week. A year ago it was 7½*d.*

The Bankers' Clearing-house return for the week ending October 5th, 1898, shows a total of 197,542,000*l.*, as compared with 189,247,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£31,746,942	£33,196,108
Total Reserve .....	£20,386,537	£21,582,828
Proportion of Reserve to Liabilities...	44½ per cent.	43½ per cent.
Notes in Circulation .....	£28,160,405	£28,413,280
Bank Rate of Discount .....	3 per cent.	2½ per cent.
Open Market ditto .....	2½ per cent.	2½ per cent.
Consols (account) .....	109½	111½
French Rentes (account) .....	102 <i>f.</i> 27 <i>c.</i>	103 <i>f.</i> 02 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 29½ <i>c.</i>	25 <i>f.</i> 18 <i>c.</i>
New York 60 days ditto .....	\$4 81½	\$4 82½

The past week has certainly not been notable for any excess of business in the STOCK MARKETS, nor do the incidents of the week call for lengthy comment. There is a little talk of "political uneasiness" and an attempt to work up the Fashoda business, but a feeling of apathy is really the prevailing influence of the moment. Consols are easier on the stiffening of the money market, and to-day fell ⅛. Foreign Government bonds mark scarcely any alteration at all, and as regards British railway stocks, it is mostly the out-of-the-way issues which are moving more than fractionally. Amongst the exceptions are South Western ordinary, which has fallen 2, and Brighton deferred, Metropolitan, South Eastern A, and Great Northern A, which are up from 1 to 2 points. Barry is up 5, ditto deferred 5, Furness 2, North Staffordshire 1, and Taff Vale 3½; whilst Highland is 2 lower, and Waterloo and City has lost another 3 points. As regards the latter stock, the market does not at all like the policy adopted by the company of concealing its traffic returns, and it is, perhaps, only natural that this course should be interpreted unfavour-

ably. Yankee Rails are nearly all weak. The public are beginning to realise that the big houses have been turning on the tap, and stand aloof. By and by they will forget this, will begin buying again, and when prices have been lifted sufficiently the unloading process will recommence. Canadian Rails—or at all events Grand Trunks—have had quite a little boom on their own account, and not improbably prices will hold until after the meeting. Indian and Colonial Rails call for no particular mention, but there have been a good many movements amongst Foreign Rails, many of them more of a "sympathetic" nature than the reflex of actual business done. For some reason or other Argentines develop no vitality, though traffic returns are good, and no fault can be found with the reports now daily making their appearance. Leopoldina shares by a rise of  $\frac{1}{4}$  to  $4\frac{3}{4}$  have already justified our recommendation last week to buy them at  $4\frac{1}{4}$ . Possibly no material rise may take place just yet, but in the long run buyers (for investment) at  $4\frac{1}{2}$  will find they have done very well for themselves. The directors have adopted a bold and spirited policy in securing the services of Mr. Barrow, general manager of the Buenos Ayres Great Southern, but they should be richly rewarded as Mr. Barrow will have ample scope for bringing his splendid abilities to bear in the administration of this great undertaking. The shares of some of the Brazilian guaranteed lines have been marked up during the week, but there is little or no business doing in them. Manila 6 per cent. debentures mark a further rise of 3 points. Strange to say this is about the most "political" stock in the entire Official List, for nobody can gauge its possibilities in the event of the Philippines being annexed to the United States. But even under existing conditions it is not much over-valued, all things considered. Piræus and Athens second debentures are up 3, Royal Trans-African bonds 7, Midland Uruguay debenture stock 3, Central Bahia debenture stock 3, Brazil Great Southern debenture stock 2, Southern Brazilian debenture stock 2, and Ituana debentures  $1\frac{1}{2}$ ; whilst Buenos Ayres and Pacific second debenture stock has fallen 2, Campos and Carangola bonds 4, Cordoba Central first preference  $2\frac{1}{2}$ , ditto income debenture stock  $2\frac{1}{2}$ , Cordoba and Rosario preferred 2, ditto 6 per cent. debenture stock  $3\frac{1}{2}$ , and Natal and Nova Cruz debentures 5. Nitrate Rails are steady, and a little gamble in these at an early date is not at all improbable. Mexican Rails remain steady at last week's prices, but an improvement in them is looked for after the account.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>			<i>Colonial Railways.</i>		
Consols, 2½ per cent.	—	—	Canadian Pacific	—	$1\frac{1}{4}$

Application has been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Great Northern Railway Company (U.S.A.)—\$25,000,000 additional preferred stock.

Messrs. Thackeray and Co., of Cardiff, under date October 6th, report as follows:—Barry Railway undivided, 264½ (a rise of  $7\frac{1}{2}$ ); Barry preferred, 123 (unchanged); Barry deferred, 143 (a rise of  $7\frac{1}{2}$ ); Cardiff preferred, 114 (unchanged); Port Talbot 9½ (ditto); Rhondda and Swansea Bay, 4½ (a rise of  $\frac{3}{4}$ ); Rhymney undivided, 267½ (unchanged); Rhymney preferred, 121 (unchanged); Rhymney deferred, 148 (unchanged); Taff Vale, 76 (a rise of  $1\frac{1}{2}$ ); Vale of Glamorgan, 127½ (a fall of  $\frac{1}{2}$ ). The improved tone noted last week has been more than maintained, and there has been a considerable increase in the volume of business. Chief interest has been centred on Barry allotments and deferred, which show an important advance.

## Meetings.

### BAHIA AND SAN FRANCISCO RAILWAY.

The half-yearly general meeting was held yesterday, at Winchester-house, E.C.; Lord STRATHEDEN and CAMPBELL presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said that for the first time since the railway was inaugurated—forty years ago—the Brazilian Government had failed to meet their engagement, and instead of paying the company in gold the guaranteed interest, they had been compelled, no doubt very unwillingly, to pay them in funded bonds. Whereas the company received each half-year 63,000*l.* for guaranteed interest, they had on this occasion received funded bonds which only realised 47,250*l.* This meant a loss of 25 per cent., or 15,750*l.* for the six months. The funding scheme was to be in operation for three years, which meant that there would be a loss to the shareholders of somewhere about 95,000*l.* After the three years had expired it was hoped that the Brazilian Government would be able to resume their payments in gold. The directors relied with confidence on the assurance of the president-elect that during his term of office he would do all in his power to place the finances of Brazil on a sound basis, and to restore the credit of his country. When the funding scheme was first published, the board were in doubt as to whether they would be able to distribute the bonds themselves to the shareholders, but on taking legal advice it was found that, owing to the statutes and articles of the company, they had no power to distribute the bonds, and they were therefore compelled to sell them and to pay the cash in dividends. Latterly these bonds had risen in value, and the directors trusted that at the end of the next six months they would be able to realise a better price for them. The province of Bahia had been suffering for a long time from a drought, which had inflicted great damage both upon cattle and crops, and the natives in the interior were undergoing severe privation from the scarcity and dearness of all the necessaries of life. This had caused so much dissatisfaction among the company's workmen that the directors had found it absolutely necessary in some instances to raise the wages in order to avoid a general strike. Owing to the improved receipts they were enabled to pay the same dividend as before, notwithstanding the very serious loss entailed by the funding scheme.

Mr. S. GRENFELL seconded the motion, which was carried.

**A Lincolnshire Railway Project.**—Surveys are being made for a new railway from Lincoln to Barton-on-Humber. The line is to join the Great Central Railway near Lincoln, and use that company's stations and terminus at that end. From Lincoln the trains will run three-quarters of a mile on the existing line, and then they will branch off to the north, passing through various townships to a junction to be effected with the Great Central Railway at Scawby station. Running powers are to be asked for over the Great Central Railway through to Brigg, where the light railway proceeds again in a northerly direction to South Ferriby, from whence it travels along the bank of the river Humber to Barton, joining the Great Central Railway again at Barton station. At Barton the line will be carried down to Waterside, where it is proposed to construct a pier or jetty into the river. When the line is in working order, goods will be taken direct from Hull in small steamers to the proposed pier, and from thence despatched to any part of North Lincolnshire, or transhipped on the Great Central Railway to any part of the country. Messrs. Wellstead and Easten, Hull, are the engineers for the undertaking.

## American & Canadian Railways.

### ERIE.

President E. B. Thomas, in his report for the year ended June 30th, 1898, says:—"The unsatisfactory feature of the year's work is the rate received for the service performed. From year to year the unit of revenue grows less, while the character of the service, forced by competition and the modern requirements of trade, grows more and more expensive. Apparently, neither of these conditions can be improved under existing circumstances, legislative and otherwise, surrounding the transportation industry. The only remaining effort, therefore, that can be made to stop the diminishing margin between revenue and cost is in the direction of reducing the latter. This necessarily requires heavy work, large expenditures, and long time, and the results obtained appear slowly. To the efforts of the management towards the accomplishment of this object is due the large cost of operation for the year. Heavy expenditures, with which capital account could not legitimately be charged, were necessary upon locomotives, cars, tracks, &c., in order to meet the requirements needed to enable the company to do business on a parity with its competitors. These requirements must be met, and while the cost is large and will continue so for the present, yet the ultimate result is certain to be beneficial, and materially reduce the cost per unit of service. The results obtained in this direction for the year show as follows:—The cost of handling a ton of freight 1 mile was reduced to 4 mills, a reduction of 6·54 per cent. over 1897; the cost per freight train mile increased 1·49 per cent., but the tonnage handled increased 17·5 per cent.; the ton miles increased 15·65 per cent.; the train load increased 8·64 per cent., and the car loads increased 6·46 per cent. The decrease from the previous year of 38·100th of a mill in the average freight rate per ton per mile, equalling only 7¼ cents per ton, resulted in a net loss of revenue of \$1,714,938. The large sum of \$681,450 was paid to the owners of private cars for mileage thereon, the loading of which was controlled by the shipper. Your company has no remedy against this abuse, which has grown into the transportation system of the country. The board again calls attention to the very heavy burden imposed upon the company by taxation. 2·6-10 per cent. of the gross revenue, or the large sum of \$877,920, went to the tax-gatherers. This forced contribution to the public funds is seriously felt and is out of all proportion to the company's income. It was deemed wise by the board to strengthen the traffic relations of the company with the Philadelphia and Reading system, and to this end a trackage contract was made with the Fall Brook Railroad Company, under the terms of which your company has the use of that road for freight traffic between Corning, New York, and Williamsport, connecting at that point with the Philadelphia and Reading road, upon advantageous terms, thus giving it a through line under its own control to and from the West to the Reading territory. This arrangement has been in operation for some months, and is entirely satisfactory. In order more efficiently to handle the company's anthracite coal traffic, the board considered it necessary that it should have direct access to its own coal collieries as well as those of its shippers, enabling it to transact business without an intermediary. A trackage contract upon satisfactory terms has, therefore, been made with the Erie and Wyoming Valley Railroad Company from Hawley, on the Honesdale branch, to the company's Moosic Mountain Road and several other points from which it draws coal tonnage. A glance at the map of the anthracite coal region and this company's property therein will at once show the advantage of trackage rights over the above road, and your interests in that locality will, in the opinion of your board, be materially advanced by this arrangement. The agreement was made late in the year, and these rights were not used during the fiscal year just ended. The agreement between the Erie Railroad Company and the Delaware and Hudson Canal Company, under which the latter company uses your tracks between Jefferson Junction, near Susquehanna, and Carbondale, has been renewed upon mutually satisfactory terms. The lease of the Lockport Branch to the Buffalo and Lockport Railway Company, as approved at your special meeting held in July, 1898, has been executed, and the operation of the branch by electricity was commenced in August. So far the result has been quite satisfactory and your board will watch the further operation with much interest. Heretofore your live stock traffic has been handled by an outside company under a contract. The general conditions surrounding this class of traffic have materially changed in the last few years, and as a result the arrangement was not working satisfactorily, and the board has considered that the company's interests require that it should have a closer control over the business. A corporation known as Weehawken Stock Yard

Company has been organised and the Erie live stock traffic is now handled by that company, the entire capital stock of which is in your treasury. The Wabash Railroad Company having determined to secure an entrance into the City of Buffalo, negotiations were opened with the officials of this company for the use of its tracks by that road from the Bridges to Buffalo, including terminal facilities at the latter place. These negotiations have resulted in a satisfactory agreement, and the Wabash Company is now using this company's tracks and terminals as above stated. The operation of the New Jersey and New York Railroad Company (not included herein) has resulted in a profit for the year. The general conditions surrounding the transportation industry during the year have not been entirely satisfactory, yet the results obtained by the company are encouraging and give some idea of the inherent strength of the property."

### ST. LOUIS AND SAN FRANCISCO.

The result of operations for the year ending June 30th is shown below:—

	1896-7.	1897-8.
Passenger earnings.....	\$1,026,603 ...	\$1,248,491
Freight earnings.....	4,477,019 ...	5,121,683
Mail express, &c.....	489,714 ...	516,293
<b>Total gross earnings .....</b>	<b>\$5,993,336 ...</b>	<b>\$6,886,467</b>
<b>Total operating expenses.....</b>	<b>3,483,628 ...</b>	<b>4,030,109</b>
<b>Net earnings.....</b>	<b>\$2,509,708 ...</b>	<b>\$2,856,358</b>
<b>Sundry credits.....</b>	<b>7,065 ...</b>	<b>69,760</b>
<b>Total net income.....</b>	<b>\$2,516,773 ...</b>	<b>\$2,926,118</b>
Interest on funded debt .....	\$1,994,524 ...	\$2,037,997
Taxes .....	171,256 ...	188,404
Miscellaneous .....	19,926 ...	13,272
Dividends .....	*100,000 ...	+350,000
<b>Total disbursements .....</b>	<b>\$2,285,706 ...</b>	<b>\$2,599,673</b>
<b>Balance, surplus .....</b>	<b>\$231,067 ...</b>	<b>\$326,445</b>

\* 2 per cent. on first preferred stock + 4 per cent. on first preferred and 1 per cent. on second preferred.

The length of line operated at June 30th was 1,282 miles (against 1,162 miles at the same time in the previous year); the number of passengers carried was 1,367,318 (against 990,591); the average rate per passenger per mile, 2·188 cent (against 2·362 cent); the quantity of freight carried was 2,526,001 tons (against 2,098,829 tons); the average rate per ton per mile, 1·055 cent (against 1·111 cent); the ratio of expenses to receipts, 58·52 per cent. (against 58·13 per cent.).

The balance-sheet shows the capital to be as follows:—Common stock, \$29,000,000; second preferred, \$16,000,000; first preferred, \$5,000,000; funded debt, \$39,437,100. There was an increase in the funded debt of the company during the year of \$1,891,250, consisting of \$1,500,000 South Western division 5 per cent. gold bonds, and \$391,250 4 per cent. consolidated mortgage bonds; \$300,000 of the latter were issued against the cash payment on account of the purchase price of the South Western division, and \$91,250 were issued in accordance with the provisions of the consolidated mortgage, against \$73,000 underlying 6 per cent. bonds, which had been redeemed and cancelled through the operation of sinking funds. The following bonds were so redeemed:—\$48,000 second mortgage, 6 per cent. B bonds; \$5,000 Missouri and Western division, first mortgage, 6 per cent. bonds; \$9,000 trust mortgage of 1880, 6 per cent. bonds; \$11,000 Fort Smith and Van Buren Bridge first mortgage, 6 per cent. bonds. These changes make a net increase in the bonded indebtedness of the company during the year of \$1,818,250, of which, however, only the \$1,500,000 South Western division bonds have been disposed of. Since the organisation of this company on July 1st, 1896, no 4 per cent. consolidated bonds have been sold, all those issued being held in the treasury.

### ATCHISON TOPEKA AND SANTA FE.

In our last issue we gave a summary of the accounts of this company for the year ending June 30th, 1898. The annual report, signed by Mr. Aldace F. Walker, chairman, and Mr. E. P. Ripley, president, states:—

"The large increase in gross earnings of the Atchison system is chiefly due to bountiful crops in Texas, Kansas, and California, to the development of mining interests, and to the general improvement in business conditions throughout the West. The wheat crop of Kansas, the cotton crop of Texas, and the fruit crop of California were all larger than for several years past, and the last was larger than ever before. It has seemed wise to your directors to take advantage of this year of large gross income to prepare for the possibility of less favourable conditions in the future by continuing the work of putting the property in condition to be operated with the maximum of economy. It will be noticed that the large expenditure made has been chiefly for betterments under the accounts, 'Maintenance of Road and

Structures,' and 'Maintenance of Equipment.' It will doubtless be found desirable to continue the replacement of wooden bridges with permanent work, but in other respects the extraordinary betterment expenses paid out of earnings may be expected to largely decline after the present calendar year.

"The return of prosperous conditions throughout the country at large has revived many railway projects which, if carried through, would be in some instances competitors and in other instances connections and feeders of the Atchison system. Some of these projects have present merit, but most of them are in advance of any real demand, and if built would have a hard struggle for some years, even though ultimately profitable. Your directors have not felt that it was necessary or desirable at present to assume largely increased obligations, and with few exceptions have declined to render assistance to the construction of roads which in time might possibly become of considerable value as auxiliaries. It is, of course, true that the policy of inaction in such matters may have to be modified in order to protect your existing property. During the year a few projects of this character have received the sanction of the board, as follows:—'The Pecos Valley and North Eastern Railway is now being built from Amarillo, Texas, to Roswell, New Mexico, approximately 200 miles. Amarillo is distant 31 miles from Panhandle, the former terminus of your Panhandle branch; and in order to connect with the Pecos Valley and North Eastern road your directors have arranged to buy a branch of the Fort Worth and Denver City Railway from Panhandle to Washburn, 1472 miles, and to acquire trackage rights from Washburn to Amarillo. The road under construction from Amarillo to Roswell will connect at the latter point with the Pecos Valley road now in operation from Roswell to Pecos, 168 miles, making a total mileage of 368 miles from Amarillo to Pecos. Your directors have made a traffic contract for the exchange of business with the new line, and have subscribed the sum of \$750,000 to a loan, repayable in 1899, secured by a pledge of bonds and stock of the consolidated Pecos Valley and North Eastern Railway Company, upon terms which in the opinion of the board render the transaction eminently safe. When completed the road will pass through the great cattle-breeding territory of North Eastern Texas and Eastern New Mexico, as well as the rich agricultural valley of the Pecos River, and should add largely to the business of the Atchison system.

"Arrangements have been made with the California and Oriental Steamship Company for the establishment at an early date of a steamship line with regular sailings between San Diego and Asiatic ports, *via* Honolulu and Yokohama. It seems reasonable to expect a steady and perhaps a large growth in Trans-Pacific trade, in which this company should share.

"In the month of April, 1897, your directors leased the Silver City and Northern Railway, extending from Whitewater, New Mexico, to San José, New Mexico, a distance of 15 miles, for \$3,040 per year, with option to purchase at \$60,000. Copper and iron developments at Santa Rita seemed to make an extension of our line to that point clearly desirable. The directors have therefore expended to date the sum of \$56,000 in the purchase of the Silver City and Northern Railway, which is now being extended 4½ miles to the Santa Rita iron mines, from which considerable shipments of ore are made to smelters at Pueblo, El Paso, and Denver.

"The plan adopted in 1896 and explained in the last annual report, under which the coal properties of the Atchison system are leased, has proved satisfactory in its workings. All mines except those at Cerrillos are leased to outside parties. The comparative net earnings of the various coal companies are as follows:—Year ending June 30th, 1898, \$133,455; year ending June 30th, 1897, \$59,699; increase \$73,756. The above statement shows a material increase in net earnings for the year just closed, and the present outlook is good for further increases during the coming year. The mines and properties, whether leased or operated by ourselves, are in good condition, and the workings have been carefully examined by disinterested parties. Comparatively little will be needed in the way of construction work during the ensuing year. The Atchison Topeka and Santa Fé Company now owns all outstanding bonds of both the Cerrillos and Trinidad Companies. The other coal companies have no bonded debt and no obligations to other parties. There were used by engines on the Atchison Topeka and Santa Fé proper 1,038,943 tons of coal bought at an average cost of \$1.208 per ton, against 942,642 tons the year previous at an average cost of \$1.23. The average price of coal was somewhat enhanced by a sympathetic strike in the Illinois fields, lasting two months. The increase of coal used on locomotives was about 10 per cent., while the total number of tons carried one mile in freight trains increased about 20 per cent."

### GRAND TRUNK OF CANADA.

The Grand Trunk Railway Company of Canada has issued the following statement of revenue receipts and expenditure for the month of August:—

#### Grand Trunk Railway Company of Canada.

	Month of August, 1898.	Inc. 1897.	or dec.	July 1 to Aug. 31, 1898.	Inc. 1897.	or dec.
Gross receipts .....	\$338,542	\$351,802	-\$13,260	\$642,023	\$692,573	-\$50,550
Working expenses .....	218,588	232,319	-13,731	426,161	456,290	-30,119
Net earnings .....	\$119,954	\$119,483	+\$471	\$215,862	\$236,283	-\$20,421

#### Chicago and Grand Trunk Railway Company.

	Month of August, 1898.	Inc. 1897.	or dec.	July 1 to Aug. 31, 1898.	Inc. 1897.	or dec.
Gross receipts .....	\$55,482	\$57,540	-\$2,058	\$113,112	\$110,144	+\$2,968
Working expenses .....	46,045	50,588	-4,543	92,850	99,223	-6,373
Net earnings .....	\$9,437	\$6,952	+\$2,485	\$20,262	\$10,921	+\$9,341

#### Detroit Grand Haven and Milwaukee Railway Company.

	Month of August, 1898.	Inc. 1897.	or dec.	July 1 to Aug. 31, 1898.	Inc. 1897.	or dec.
Gross receipts .....	\$20,454	\$20,655	-\$201	\$36,715	\$37,072	-\$357
Working expenses .....	13,068	13,550	-482	25,965	26,700	-735
Net earnings .....	\$7,386	\$7,105	+\$281	\$10,750	\$10,372	+\$378

N.B.—There was one working day more in August this year than in August last year.

### WHEELING AND LAKE ERIE.

Messrs. Brown, Shipley, and Co. have received information that the February, 1898, and August, 1898, coupons in default on the above railroad company's extension and improvement mortgage 5 per cent. bonds are now being paid in New York, together with interest at the rate of 6 per cent. per annum from the respective due dates up to 1st inst., say, in the sum of \$26 for each February, 1898, coupon and \$25 25 cents for each August, 1898, coupon. Messrs. Brown, Shipley are accordingly prepared to purchase these coupons at current rates, and holders of that firm's certificates of deposit for the bonds are requested to lodge the same without delay, in order that cheques for the interest may be prepared and payment thereof stamped upon the certificates, after which they will be returned to the holders. Messrs. Brown, Shipley are further advised that the July 1st, 1898, coupon of the Wheeling and Lake Erie first mortgage (Wheeling division) 5 per cent. gold bonds are now being paid in New York with interest, say, \$25 37c. per coupon, and they are prepared to purchase the same at current rates. The English Association of American Bond and Share Holders also announce that the July, 1898, coupon on the Wheeling division 5 per cent. gold bonds being now paid with interest at the rate of 6 per cent per annum from the due date, say \$25 37c. per coupon, the association is prepared to purchase the coupons at the current rate. Holders who have deposited their bonds with the association will receive their interest upon presentation of their deposit receipts.

### MISSOURI KANSAS AND TEXAS.

The full accounts for the fiscal year ending June 30th are now to hand, and from them we take the following figures:—

	1896-7.	1897-8.
Passenger earnings .....	\$1,818,188	\$1,919,556
Freight earnings .....	9,107,207	9,559,000
Mail, express, &c. ....	552,919	568,680
Total gross earnings .....	\$11,478,314	\$12,047,237
Operating expenses and taxes .....	8,337,399	8,182,388
Net earnings .....	\$3,140,915	\$3,864,849
Other income .....	137,000	69,090
Total net income .....	\$3,277,915	\$3,933,939
Interest on bonds .....	\$3,061,760	\$3,061,760
Rentals .....	365,507	365,409
Miscellaneous .....	—	32,013
Total disbursements .....	\$3,427,267	\$3,459,182
Balance .....	Dr. \$149,352	Cr. \$174,758

The balance-sheet shows a funded debt of \$70,850,477, and a share capital of \$68,462,500.

The number of passengers carried was 1,457,548 (against 1,347,528); the average rate per passenger per mile 2.144 cents (against 2.319 cents); the quantity of freight carried 3,568,825 tons (against 3,236,906 tons); the average rate per ton per mile 0.918 cents (against 0.895 cents); the average length of line operated 2,197 (against 2,197 miles); and the ratio of expenses to receipts 68 (against 73 per cent.). President H. C. Rouse, in his report for the year ending June 30th, 1898, says:—

"The business of the past year was subject to two sources of interruption, the first being yellow fever in the summer of 1897 and the second an unprecedented flood in the Indian Territory, resulting in the total interruption for nine days of the handling of freight over the main line. The increase in business has been well distributed over all the principal sources of traffic, without any signal increase of any particular movement. The reduction

in expenses has been effected without any impairment of the condition of the property and simply reflects the improved condition of the plant and organisation. The general traffic conditions are much brighter for the current year, and it is expected that some demoralisation in rates existing in the past will be corrected. The crop outlook is of the most encouraging character, and, if realised, will afford a volume of traffic that will tax the facilities of the railway to their utmost. The company is free from floating debt and there has been no increase in its outstanding stocks or bonds. On June 23rd, 1898, the Congress of the United States passed an Act providing for the division and allotment of the lands of the Indian nations in the Indian territory to the individual Indian citizens. This Act marks an era in the history of the territory and will lead to its early opening to settlement and a consequent development of commerce which will be highly beneficial to the company. This Act of Congress contains no affirmative recognition of the land grant of the company, but expressly provides that it shall not in any way affect any vested legal rights heretofore granted."

### BALTIMORE AND OHIO.

It is expected that the holders of the old preferred stock of the Baltimore and Ohio Company will bring a suit with a view to delaying the reorganisation of the property.

A plan for the reorganisation of the Central Ohio, the Sandusky Mansfield and Newark, the Columbus and Cincinnati Midland, the Newark Somerset and Straitsville, and the Pittsburgh Junction railroad companies has been prepared by the Baltimore and Ohio reorganisation advisory committee. The Baltimore and Ohio reorganisation managers have undertaken the consummation of the plan.

Messrs. J. S. Morgan and Co. notify that the receipts for bonds of the Baltimore and Ohio Railroad Company's 5 per cent. sterling loan of 1877 (Chicago division), Baltimore and Ohio Railroad Company's 6 per cent. sterling loan of 1874, and Pittsburgh and Connellsville Railroad Company's 6 per cent. consolidated mortgage loan (duly endorsed, dated, and witnessed) may now be left with them for the purpose of being exchanged for reorganisation certificates of the Mercantile Trust Company of New York issued under the plan of reorganisation dated June 22nd, 1898.

### RAILROAD NOTES.

It is officially denied that the Mexican Central has made arrangements for the building of a branch line to Tequila. The company has already in hand a line from Jimenez to Parral known as the "Parral Extension." It is about 55 miles in length, and is expected to be finished next month. The company has acquired the Michoacan and Pacific concession for a line south from Yurecuaro, and about 28 miles has been authorised by the board and is now under construction. The line will run in a southerly direction from Yurecuaro, which is on the Guadalupe Extension between Patti and La Barca.

The reorganisation plan of the Union Pacific Denver and Gulf Railroad makes an assessment on the common stock of 10 per cent. It gives to the stock an equal amount of new common stock, 2½ per cent. of new first 4 per cent. bonds, 5 per cent. of new first preferred stock, and 5 per cent. of new second preferred stock. The company consolidated bonds are to get 80 per cent. of new 4 per cent. bonds, 30 per cent. of first preferred, and 30 per cent. of new second preferred stock.

The complete report of the Union Pacific Railroad Company for the six months to June 30th shows the company's income as cabled last week. The company's treasury holds net cash assets of \$3,129,628, and the company has also \$5,000,000 of 4 per cent. bonds in the treasury. The surplus of the income accounts stands at \$1,796,685. The Union Pacific owns the Union Pacific Land Company with \$100,000 of stock and \$10,000,000 of bonds, whose lands are valued at \$14,881,994.

Although the directors held proxies for 75 per cent. of the stock in favour of the division between the New York Central and the New York and Harlem Roads of the saving arising from the Harlem's refunding operation, it has been decided to allow the courts to decide upon the merits of the case. Only 2,000 shares of Harlem stock voted in opposition to the refunding plan as officially proposed.

At a public meeting held at St. John's, Newfoundland, on Tuesday, to petition the Government to disallow the Reid railway contract Bishop Howley and the Hon. A. W. Harvey said they

had the authority of Sir H. H. Murray, the Governor, for declaring that the contract had not yet received the Royal Assent, and, if the agitation were sustained, the contract might be disallowed.

The American transcontinental railroad companies and the Canadian Pacific Railway Company have agreed to the arbitration of the question whether the latter be allowed the differential on freight between the Atlantic and certain Pacific coast points, and, if so, how much. The arbitrators will meet at Chicago on December 10th.

After the meeting of the board of the Atchison Topeka and Santa Fé on Wednesday, Chairman Walker said that the question of the preferred dividend had not been considered, as on account of the date of the principal bond interest it was the sense of the board that the period for dividends should be made January and July.

Copies of the report of the Missouri Kansas and Texas Railway for the fiscal year ended June 30th, 1898, may be obtained on application at the offices of the London agent of the company, the English Association of American Bond and Share Holders, Limited, 5, Great Winchester-street, London, E.C.

The report for the year ended June 30th of the St. Louis and South Western Railway shows:—Gross earnings, \$5,279,000—increase, \$535,000; net earnings, \$1,106,000—increase, \$218,000; net income, \$1,115,000—increase, \$224,000; surplus after charges, \$161,000, against a deficit of \$63,000.

The annual report of the Louisville and Nashville shows a surplus at the credit of the profit and loss account amounting to \$2,846,760. The report states that this amount will not be used for dividends in any case; but that future surpluses will be religiously divided.

Mr. George J. Baker has been elected to a seat at the board of directors of the Northern Pacific Railway Company at the annual meeting of stockholders, in succession to Mr. J. L. Stelson.

Last week's eastbound all-rail freight tonnage from Chicago amounted to 54,000 tons, the Panhandle system again leading with 8,000 tons. The tonnage last year was 52,000 tons.

The Nashville Chattanooga and St. Louis annual report shows a surplus over dividends and improvements of \$61,000, being an increase of \$58,000 over the year 1896-97.

The directors of the Delaware Lackawanna and Western have declared the usual quarterly dividend of 1½ per cent.

The Central of New Jersey Railroad Company has declared the usual quarterly dividend of 1 per cent.

**Return Tickets.**—At the Liverpool County-court, on Wednesday, the Cheshire Lines Committee sued Mr. Hinton Spalding, a merchant residing at Aigburth, near Liverpool, to recover 6d., the fare from Mersey-road Station, Aigburth, to the Central Station, Liverpool. The ordinary single fare is 6d., and the day return ticket 9d., being a rebate on the return of 3d. On August 11th last the defendant took a return ticket, but failed to use the return half that day, and endeavoured to make use of it for a second journey to town on the following day. The plaintiffs took exception to this, and on the defendant persisting in his right to use the ticket in that way brought their action. The defendant then paid 3d. into court, with 1s., the cost of the claim, and now contended that in paying back the third rebate he had satisfied the plaintiffs' claim, adding that what he had done was a common practice. His Honour held that the defendant's proposition as to the use of a return half could not be sustained. He had never heard such a suggestion before. He gave judgment for the plaintiffs for 3d., in addition to the amount paid into court, and refused to grant an appeal.

Reuter's agency is informed that there is little likelihood of an immediate decision in the case of the Delagoa Bay Railway award. The position of the question is that the parties have yet to file a *résumé* of their respective cases, and the next phase of the arbitration will be the receipt of the necessary order of the court for the preparation of this *résumé*. This order will, no doubt, fix the period within which the *résumé* must be lodged. Some delay in the proceedings has been occasioned by the severe illness of M. Heusler, one of the arbitrators, who is now, however, recovering.

## General News.

### RAILWAY STATION CABS AND PASSENGERS' LUGGAGE.

Railway passengers who have experienced the convenience and economy of having their luggage delivered at their homes by the companies should be interested in perusing the following communication which is said to have been sent by the Railway Cabdrivers' Protection Society to the chairmen of all the trunk line railway companies having termini in London:—"Railway Cabdrivers' Protection Society, 13, Goldington-street, N.W., 1st October, 1898.—"My Lord—I am instructed by the Executive Council of the above society to approach you with reference to certain grievances that the cabdrivers employed at your station, and other termini in London, desire to have redressed. I have to state that the introduction by the railway companies of the system of carrying and delivery of passengers' luggage has seriously depleted the earnings of the cabmen to such an extent that with the present high rate (12s. per day plus the privilege fee) for the hire of a cab, they find it practically an impossibility to earn a livelihood. The executive instruct me to urge the abolition of the interchange system during the winter months, which was inaugurated during the late cab strike for the convenience of the railway companies. The men have found the system detrimental to their interests, inasmuch as it has a tendency to overcrowd the stations with vehicles. This being the case, the busier stations have a platform of cabs, and others are entirely neglected. The men find that at many of the stations, owing to the laxity on the part of the officials, there is much unnecessary confusion and disorder, and, as a consequence, street drivers who pay no privilege money, and whose hire of a cab is less than a railway driver, are allowed to enter the station and pick up fares. My executive instruct me to ask for some modification of the system of the carrying and delivery of passengers' luggage; a reduction in the privilege money, which brings in a revenue to the railway companies of close upon 12,000l. per annum; the abolition of the interchange system during the winter months; and the limitation of the number of cabs permitted to ply for hire at the various termini. Failing any reasonable concessions, the men will be compelled to seek from the cab proprietors a reduction in the price of the hire of a cab from 12s. to 10s. per day.—I am, my Lord, yours obediently, FRED. WHITE, Secretary."

### AMALGAMATED SOCIETY OF RAILWAY SERVANTS.

The annual congress of the Amalgamated Society of Railway Servants has been held in Leeds during the past week. On Wednesday the congress resolved itself into committee, in order to consider in private a charge against Mr. Tevenan, the Irish secretary of the society. A Special Committee which had investigated the charge recommended that Mr. Tevenan be asked to send in his resignation. After two hours' discussion this recommendation was adopted, and accordingly Mr. Tevenan resigned.

The following, amongst other resolutions, have been passed by the congress:—

"That this congress views with satisfaction the reduction in the hours of labour on railways, but, from information received from branches, is convinced that excessive hours of duty are still prevalent on some of our railways, and, with the view of getting the hours rectified, asks all the branches to use their best endeavours to bring to the notice of the Board of Trade any cases of long hours in their respective districts."

"That this congress considers the present reading of the Truck Act detrimental to the freedom of the workmen employed in the railway service, and is of opinion that it should be made illegal for employers to compel their workmen to become members of sick, superannuation, or pension funds, and that it should not be a condition of service that workmen should become members of such funds. The congress recommends its branches to use their influence with their representatives in Parliament with a view to the suggested new Act becoming law."

"That this congress strongly condemns the victimisation of the society's members by the several railway companies, and asserts that no satisfactory reasons have been given, through the Board of Trade, to justify the wholesale dismissals which have been going on; it is further of opinion that every effort should be made by the society's members to bring pressure to bear upon their representatives in Parliament to insist upon the appointment of a Select Committee by the House of Commons to consider every case of victimisation upon its merits, feeling sure of being in a position to satisfy such a committee that the statements made by the society are in no way exaggerated."

"Realising, from recent bitter experience of victimisation of our active members, the danger and futility of endeavouring to

secure, by voluntary efforts, reasonable hours of labour for railway men, this congress affirms its conviction that the most expedient and effectual method of obtaining this end is by legislative enactment, and hereby instructs the executive committee to proceed, by every means in its power, to effect the passing of an Eight Hours Bill for railway men."

"That the time has now arrived when the Amalgamated Society of Railway Servants should be directly represented in Parliament by the general secretary, who shall be independent of either political party, and if necessary the election expenses to be paid from the funds of the society, assisted by voluntary subscriptions."

"The trade and labour councils of the Rotherham division having expressed their desire to adopt a society candidate for the Parliamentary vacancy, this annual general meeting gives sanction to the general secretary to place himself in the hands of the local councils with a view of contesting the seat at the anticipated election."

"That this congress decide to affiliate with the Nationalisation League, and to elect the general secretary as its representative."

"That, in view of the meagre support given to the Federal Congress schemes of federation by other trade unions, as evidenced by the replies received by our general secretary to the circular issued by him on the subject, and having in mind the fact that the putting into operation of this scheme will entail on our society an initial expenditure of some 100,000l. to provide the requisite guarantee fund, which, as we have no funds where it can be legally drawn from, can only be raised by a levy on our members, this branch requests the annual general meeting to direct that no further steps be taken to support the scheme."

"That this congress is gratified to find that the railway companies have so largely adopted continuous brakes on their stock, but regret that there is yet a large number of locomotives that have only the hand brakes to their tenders, and trust that the companies will as early as possible supply their engines with either a steam or automatic brake, as we believe this would be to the interest of the railway companies and their workers, and would conduce to the safety of the travelling public."

"That this congress regrets the unfortunate dispute which has recently occurred in South Wales, and has been the means of throwing a large number of railwaymen either out of work or on short time, costing the society some 12,000l. This proves conclusively the necessity for men making provision for such emergencies, and also the uselessness of the Conciliation Act. We therefore call upon all branches to press this view upon their representatives in the House of Commons with the object of making conciliation compulsory."

"That this congress regrets the continuous high rate of fatal and non-fatal accidents that have occurred to our fellow-workers on the railways as shown by the Board of Trade returns for 1897, and desires to impress on the Board of Trade the necessity of pressing the companies to adopt the various recommendations made from time to time by the inspecting officers and sub-inspectors of the Board of Trade with the view of reducing those accidents to the least possible minimum."

"That no railway employée over eighteen years of age shall receive less than sixpence per hour for week-day labour, and that effect be given to this resolution."

It was further resolved that a committee be appointed "to consider the advisability of making a grant to members adversely affected by reductions caused through the South Wales miners' dispute that do not come within the scope of the special donation benefit allowed to members working short time."

It was agreed that the society should amalgamate with the General Railway Workers' Union, on the basis of the members of the latter being taken over by the Amalgamated Society as benefit members at their present rate of contribution and benefit, and that sufficient time be allowed for transference to either the A or B scale of the Amalgamated Society.

The congress also passed a resolution in favour of a Bill to so amend the Workmen's Compensation Act as to include the trades now excluded; to take counsel's opinion respecting the application of the Act to railwaymen on duty off railway premises; to make efforts to obtain the necessary leave of absence to railwaymen appointed to representative duties by fellow-workmen; and to make grants to certain South Wales employées.

### ANOTHER WATKIN FIASCO.

The Metropolitan Tower Construction Company, Limited, which has partly constructed the "Watkin" Tower in Wembley Park, has passed into voluntary liquidation, owing to its inability to complete the structure, or to pay any part of the rent due to the ground landlords of Wembley Park. The sum already expended upon the uncompleted tower is somewhere about 100,000l., and the ground landlords of Wembley Park, the Tower Company, Limited, have felt some diffidence in foreclosing on

the tower, in order to secure the payment of the comparatively small sum due to them for a few years' ground rent. After lengthy negotiations, an agreement has, therefore, been entered into between the liquidator of the Metropolitan Tower Construction Company and the directors of the Tower Company, Limited, under which the uncompleted erection is to be practically sold to the Tower Company for 49,360*l*. This sum is to be paid to the Construction Company by issuing to its liquidator deferred shares of 1*l*. each in the Tower Company, Limited. These shares are to rank for a dividend after the ordinary shareholders in that company have received a cumulative dividend of 5 per cent. from 14th ult., and have recouped themselves to the extent of 9,885*l*., which represents mainly the present indebtedness of the bankrupt concern to the Tower Company. The agreement also provides that after the payment of 5 per cent. on the deferred shares, both ordinary and deferred shares are to receive proportionately the residue of any available profits, and, in the event of the winding up of the ground landlords' company, the deferred shareholders are to share in the residue of any surplus assets after the ordinary shareholders have received the amount paid up on their shares. It is understood that there is no intention of completing the tower, so that the arrangement made with the ground landlords' company appears to be in every way beneficial to the shareholders in the Construction Company.

### NITRATE NOTES.

The traffic return of the Nitrate Railways for the second half of September was quite up to expectations, showing, as it did, an increase of 4,131*l*. A similar rate of increase for the remaining six fortnights of the year would just about bring up the gross receipts for the whole year to the level of those for 1897. Any economies which may have been effected in working expenses (and we do not anticipate that they will be very important—say 10,000*l*., at the outside) would then be so much to the good, and would make the net earnings equal to about 1*s*. per share, or  $\frac{1}{4}$  per cent., better than those of last year. We do not see how, with such a prospect in view, the adjustment of capital account can be much longer delayed by the board.

The Permanent Nitrate Committee have issued the following statistical circular for October:—"Total exports to Europe, September, 1,929,000 quintals; loading for Europe, October 1st, 3,075,000 quintals; imports, Europe, September, 42,680 tons; deliveries, Europe, September, 45,830 tons; visible supply, Europe, October 1st—stocks and afloat—297,090 tons." The following is from the fortnightly circular of Messrs. Henry Bath and Son, dated October 3rd:—"Floating Cargoes.—The business for the fortnight has been very limited. Among the few transactions reported are a due cargo and a near cargo, of ordinary quality, both at 6*s*. 9*d*. cost and freight; an October-November sailing at 6*s*. 10*d*. cost and freight, less  $\frac{1}{4}$ *d*. direct port, and a small cargo of the same sailing at 7*s*. 8*d*. delivered. The number of cargoes offering out of first hands is still limited, and holders are very firm. A rather better inquiry is to be noted, especially for shipments in the early months of 1899."

The directors of the Santa Rita Nitrate Company, Limited, have declared an interim dividend for the current year of 2*s*. 6*d*. per share, less income-tax, payable on October 15th.

The *Pall-Mall Gazette*, always well informed on nitrate affairs, refers to the late boomlet in the producing companies' shares, and doubts the synonymity of dealings and tape prices. "For the life of us," it says, "we fail to see any justification for the movement, save, perchance, in the case of the Lagunas litigants. Intending investors in the 'Syndicate' will do well to bear in mind that the debenture service of 22,000*l*. per annum absorbs the greater part of the profit obtainable at present selling prices. It is in order to meet this obligation that the oficina shipped, in the first seven months of the current year, 700,000 quintals, against 630,000 in the whole of 1897. For the same reason the 'Salar del Carmen,' with a debenture service of 14,000*l*., is obliged to push its production, making 600,000 quintals to July 31st at a minute profit. That company and the 'San Jorge' have been able to declare interim dividends of 2*½* per cent. (not 5 per cent., as stated by the contemporary which claims the 'boom' as its very own), only by adopting the policy so often deprecated by their directors, and the more suicidal in the case of 'San Jorge' since its grounds are by no means virgin. The dividend prospects of 'Lautaro,' another favourite 'tip,' can be gauged by the circumstance that the margin of profit is barely 4*d*. per quintal, equal on 1,400,000 quintals to 23,000*l*., or 2*½* per cent. on 550,000*l*. share capital after payment of 9,500*l*. on debentures. The Rosario Company is

literally eating its heart out in the attempt to meet interest on and amortisation of its bonded debt requiring 45,000*l*. per annum. The Liverpool company, after mysteriously lying low for six months on end, is going great guns, and, 'bar accidents,' should keep near the top of the tree. Two or three other concerns are still working at a loss to pay off private advances. As to the quotation of prices for such derelicts as Paochas, San Pablos, and San Donatos, the less said the better."

The so-called boom in nitrate shares has already completely fizzled out, and when we find the public being drawn into a debenture-laden concern like Lagunas Syndicate on a Stock Exchange valuation of 457,500*l*., or into such a hopeless wreck as New Tamarugal on a valuation of 240,000*l*. (see THE RAILWAY TIMES of October 1st), whilst an important and financially strong concern like Lagunas Nitrate remains neglected at 180,000*l*., it is perhaps as well that the movement should be nipped in the bud at the outset. The following table shows the current prices compared with the highest touched this year:—

	Highest.	Present.		Highest.	Present.
Colorado .....	$\frac{1}{2}$	$\frac{1}{2}$	Paochas and J. ....	$\frac{1}{2}$	$\frac{1}{2}$
Lagunas Nitrate .....	2 <i>½</i>	1	Rosario .....	4	4
Lagunas Syndicate .....	1 <i>½</i>	1 <i>½</i>	Sal. del Carmen .....	3 <i>½</i>	3 <i>½</i>
Lautaro .....	6 <i>½</i>	4 <i>½</i>	San Donato .....	$\frac{1}{2}$	$\frac{1}{2}$
London ordinary .....	$\frac{1}{2}$	1 <i>½</i>	San Jorge .....	4 <i>½</i>	4 <i>½</i>
Ditto preferred .....	3 <i>½</i>	3 <i>½</i>	San Pablo .....	1	1
N. Tamarugal .....	—	—	San Sebastian .....	$\frac{1}{2}$	$\frac{1}{2}$
Ditto preferred .....	$\frac{1}{2}$	$\frac{1}{2}$	Santa Rita .....	3	2 <i>½</i>

The report of the Bank of Tarapaca due this month is awaited with considerable interest, some doubt existing as to whether a call may not be made in connection with the Chilean Government Treasury bills, a considerable amount of which is supposed to remain on hand.

A correspondent writes us as follows:—"With reference to the highly interesting 'Nitrate Notes' in last week's issue of THE RAILWAY TIMES, I take leave to point out that three at least out of the five oficinas mentioned as having restarted working have for several months past been working at high pressure, as proved by the following official returns:—

Production January to July.

	1898.	1897.
	Quintals.	Quintals.
Santa Rita .....	291,000	199,000
Puntunchara .....	477,000	320,000
Aguada .....	298,000	377,000
Mercedes .....	74,000	57,000

The Carolina oficina, belonging to the Santa Rita Company, has not appeared in the list of producers since the acquisition of the property was announced two years ago with a great flourish of trumpets as destined to treble the company's output. The London Nitrate Company's Puntunchara oficina has been forcing its production throughout the period of low prices with a view to meeting debentures falling due at an early date. Mercedes is an altogether unimportant concern, having last year made only 92,000 quintals. The owner of Aguada, Señor Perfetti, is at present concentrating his forces on his other oficina, Tres Marias, which produced 543,000 quintals in the first seven months of 1898, against nil in the corresponding period of 1897. The Lagunas syndicate had not restarted its 'South' oficina up to July 31st."

Mr. A. Morgan Richardson, Cardigan, writes:—"Once more we have before us nitrate statistics for the month, and they are distinctly encouraging to holders of Nitrate securities. The stocks on October 1st are estimated at 57,000 tons, and the quantity afloat at 230,000 tons. Total visible supply, therefore, for Europe, 287,000 tons only, as against 414,000 tons a year ago and 476,000 tons in 1896. The deficiency of 120,000 tons must be made up somehow between October 1st and April 1st next, and this will mean increased traffics for the different railway companies. The results to the Nitrate Railways Company, Limited, have been a little disappointing, but they are explained by the fact that shipments during the month fell considerably short of the estimates. If the expectation of a despatch of 140,000 tons from the coast during the month of October is realised, there must be a very substantial increase in the two next returns. In your issue of September 24th, you refer to a recent article in the *Financial News* as inspired. I could have believed it to be so, too, but for the blunder made as to the dividend on the debentures redeemed. The writer suggests that the accounts will show a gain of 2,160*l*. interest on 43,000*l*. mortgage debentures, redeemed in 1897. Shareholders who read their annual statement will know that the sum of 130,000*l*. is provided annually for the service of these bonds, until the total issue has been redeemed, and that the net revenue account cannot, in the meantime, be affected by any reduction in the amount of interest actually paid. This process of reduction is, nevertheless, a great

gain to the ordinary shareholder, as it is increasing gradually the value of his property. Last year it was a payment of 43,200*l.* This year it should be nearly 46,000*l.*, and in 1900 over 50,000*l.* But is it impossible for the company to obtain power to buy its required quantity of bonds in open market? Last year the bonds were for sale at 70, and were being drawn at 105. Had the directors only the power at that time to redeem by purchase, it was possible for them either to have reduced the capital by 58,000*l.*, instead of 43,000*l.*, or to have carried over 15,000*l.* to the net revenue account." [We hope our correspondent has not overlooked the fact that just about the time the Nitrate Railways Company has paid off all its debentures, the line will revert to the Chilean Government, without compensation of any kind.]

### PASSENGER TRANSPORT IN SIAM.

The half-yearly reports are to hand of the two public companies engaged in the carrying of passengers in Siam—namely, the Bangkok Tramways Company, Limited, and the Paknam Railway Company, Limited. The former of these undertakings has a line about 5 miles in length, worked by electric traction on the overhead principle. The line is divided into three sections, the charge for carriage over each of which is 4 atts, a sum equal to a little under 1*d.* The system, which has been worked by eight trams, is a single line, with switches at the necessary intervals. The popularity of the company with the natives, who are the principal patrons to an overwhelming degree, has called for an increase in the number of cars. Extensive works are, therefore, in hand, both in the rearranging of the switches to suit double the number of cars and in the building of a large new power station. The shares of the company were originally issued at 80 ticals, equivalent at present exchange to something like 4*l.* 10*s.* Their present value is close on 160 ticals, an advance of 30 ticals on a year ago. The company is a Danish one, but the shares are held by the King and a number of nobles, besides people of every nationality represented in Siam. The report of the last half-year's working shows receipts 96,670 ticals, with expenses 49,844 ticals, and a consequent profit of 46,826 ticals. Of this 19,248 ticals is placed to the depreciation and redemption funds, and 11,290 to the reserve. Even with these large deductions there still remains sufficient to pay an interim dividend at the rate of 12 per cent. per annum. The Paknam Railway is a metre gauge undertaking of only 15 miles length. Although only some six years old, and the first example of steam traction in the country, it already pays a fair dividend. Under the Articles the directors were to receive no remuneration until the dividend reached 7 per cent. This consummation was attained a year ago, and the dividend now declared for the half-year is at the rate of 9 per cent. per annum. It is a much smaller affair than the tramways as regards receipts, these only amounting to 43,806 ticals, with expenses 16,835. Depreciation and contingencies absorb 7,600 ticals, and 1,365 is carried forward. The larger proportion of the depreciation fund is to be devoted to erecting further shops on the platforms at the two termini, which are found to yield a very good return on the capital sunk in them. Most of the company's funds are invested in the tramway debentures. There is also the Korat Railway now in operation, but this is a Government department and so issues no public report. We are in a position to state on the best authority that the report drawn up last April for presentation to the King at the end of the fiscal year told of a profit of some 5 per cent. on the portion of the line now working. As this represented only a portion of a year's working, and over the short section from Bangkok to Ayuthia, it is full of promise for the further sections when opened. It should also appear sufficiently promising to railway investors in England, as there are many stretches of country which only await similar opening up to yield quite as good results.

### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, &c., may be had gratuitously]

19,851. Robert Hyde and James Leigh Hodgkinson, Derbyshire House, Darnall, Sheffield—Improvement in railway and other wheels, and their mode of manufacture. September 19th, 1898.

19,884. James Livingston, 30, Great St. Helens, London—Improvements in or relating to railway platform luggage trolleys, bogies, trucks, perambulators, and other wheeled vehicles. September 26th, 1898.

19,886. Henry Martyn Ryder, 54, Charlotte-road, Edgbaston, Birmingham—Improvements in means for controlling railway trolleys, lorries, and other vehicles. September 20th, 1898.

19,949. Hohn Swinburne, 151, Strand, London—Improvements in railway signalling. September 20th, 1898.

19,960. Reginald Belfield, 322, High Holborn, London—Improvements in or relating to electric railways. (The Foreign Electric Traction Company, United States.) September 20th, 1898.

20,062. Aaron Burr Allen, 1, Church-court, Old Jewry, London—Improvements in sleepers and rail fastenings. September 21st, 1898.

20,073. William Lang Rogers, 115, St. Vincent-street, Glasgow—Spittoons for railway carriages and other places. September 22nd, 1898.

20,128. Frederick Ainslie Perry, Fairfield, Kingston-on-Thames—Improvements in automatic brakes for use on railways. September 23rd, 1898.

20,131. Justin H. Fink and Vincent Bexfa, Fairfield, Kingston-on-Thames—Improvements in automatic switches for railways. September 23rd, 1898.

20,212. Richard Pughsley, Lloyds' Bank-buildings, Bristol—Improvements in securing rails in railway chairs. September 24th, 1898.

### DIVIDEND ANNOUNCEMENTS.

For the half-year ended August 31st, the directors of the Highland Railway Company recommend a dividend at the rate of 1 per cent. per annum, carrying forward 21,038*l.* For the corresponding half of last year, 2 per cent. per annum was paid, and 10,477*l.* was carried forward.

The directors of the Isle of Man Railway Company have declared an interim dividend for the half-year ended September 30th, at the rate of 4 per cent. per annum. The company's traffic receipts for the current year are slightly down as compared with last year.

The net revenue account of the Central Argentine Railway Company to June 30th, 1898, shows approximately a credit balance (including 10,158*l.* brought forward from 1897) of 193,507*l.*, and the board of directors at their meeting on Thursday declared an interim dividend on the paid-up capital of 1*l.* 15*s.* per cent. for the six months (being at the rate of 3½ per cent. per annum), free of income-tax, carrying forward a balance of 75,992*l.*

The directors of the Central Bahia Railway Company, Limited, have declared an interim dividend for the half-year ended June 30th at the rate of 4 per cent. per annum.

The directors of the Rio Claro Sao Paulo Railway Company, Limited, have declared an interim dividend at the rate of 14 per cent. per annum, payable on 17th inst., in respect of the income of the company for the six months ended September 30th.

For the year ended June 30th, 1898, the directors of the Entre Rios Railways Company, Limited, recommend a dividend of 2 per cent. on the preference shares, carrying forward 2,830*l.*

The directors of the Buenos Ayres and Ensenada Port Railway Company, Limited, have declared a dividend in respect of the half-year ended June 30th last of 2½ per cent., being at the rate of 5 per cent. per annum, on the 5 per cent. cumulative first preference stock.

Messrs. R. Raphael and Sons notify that the dividend due 15th inst. on the first mortgage bonds of the Piræus Athens and Peloponnesus Railway Company will be paid at the rate of 2*l.* 10*s.* for each coupon of 3*l.*

The directors of the East Indian Railway Company recommend the payment of a dividend of 1*l.* 10*s.* 6*d.* on the deferred annuity capital, and the deferred annuity capital class D of the company, in addition to the guaranteed interest of 2*l.* per cent. for the half-year ending June 30th.

### LATEST EARNINGS.

For the fourth week of September.—Denver and Rio Grande, \$249,000—increase, \$33,000; Mexican Central, \$255,000—decrease, \$14,000; Chicago Milwaukee and St. Paul, \$1,222,000—increase, \$193,000; Kansas City Pittsburg and Gulf, \$94,000—increase, \$24,000; Wabash, \$398,000—increase, \$19,000; Baltimore and Ohio South Western, \$204,000—increase, \$18,000; Chesapeake and Ohio, \$318,000—increase, \$31,000; Chicago Great Western, \$171,000—increase, \$6,000; Louisville and Nashville, \$617,000—increase, \$31,000; Missouri Kansas and Texas, \$449,000—increase, \$35,000; Missouri Pacific, \$906,000—increase, \$25,000; New York Ontario and Western, \$109,000—decrease, \$6,000; St. Louis and San Francisco, \$179,000—decrease, \$41,000; St. Louis and South Western, \$184,000—increase, \$9,000; Southern Railway, \$687,000—increase, \$75,000; Texas and Pacific, \$249,000—increase, \$8,000; Norfolk and Western, \$232,000—increase, \$3,000.

Month of September.—Oregon Railroad and Navigation, gross, \$700,000—decrease, \$3,000.

Third week of September.—Northern Pacific, \$663,000—

increase, \$55,000. The gross earnings of seventy-one roads in the third week of September show an increase of 7·20 per cent.

Month of August.—Southern Pacific Company, gross, \$4,551,000—decrease, \$18,000; net, \$1,738,000—decrease, \$257,000. Lehigh Valley Railroad, gross, \$1,773,000—decrease, \$238,000; net, \$577,000—decrease, \$117,000. Lehigh Valley Coal Company, gross, \$1,415,000—decrease, \$166,000; net loss, \$222,000—increase, \$187,000. Union Pacific, gross, \$1,535,000—decrease, \$43,000; net, \$706,000—increase, \$122,000. Denver and Rio Grande, gross, \$784,000—increase, \$99,000; net, \$330,000—increase, \$45,000. Erie, gross, \$2,978,000—decrease, \$204,000; net, \$953,000—decrease, \$10,000. Louisville and Nashville, gross, \$1,866,000—increase, \$88,000; net, 564,000—decrease, \$30,000. Central of New Jersey, gross, \$1,146,000—decrease, \$129,000; net, 507,000—decrease, \$85,000. Mexican Central, gross, \$1,075,000—increase, \$70,000; net, \$265,000—increase, \$94,000. Union Pacific Denver and Gulf, gross, \$297,000—increase, \$31,000; net, \$85,000—increase, \$63,000. Cleveland Cincinnati Chicago and St. Louis, gross, \$1,309,000—increase, \$60,000; net, \$363,000—increase, \$67,000; surplus over charges, \$123,000—increase, \$67,000. Norfolk and Western, gross, \$945,000—decrease, \$66,000; net, \$311,000—decrease, \$38,000. Southern Pacific, gross, \$4,845,000—decrease, \$44,000; net, \$1,830,000—decrease, \$277,000. Chicago Rock Island and Pacific, gross, \$2,051,000—increase, \$91,000; net, \$969,000—increase, \$58,000; net surplus, \$647,000—increase \$77,000.

#### FOREIGN AND COLONIAL ITEMS.

The *Times* yesterday commenced a series of articles upon "The Railway Question in China," No. 1 of the series dealing with the railway projects of the northern zone.

It is rumoured that Mr. Barrow, general manager of the Buenos Ayres Great Southern Railway, has resigned his appointment, and that he has been appointed managing director of the Leopoldina Railway.

With reference to the coupons due July 1st, 1898, on the Ituana Railway debentures, the Council of Foreign Bondholders have received a telegram from Rio stating that the railway company will pay in full on November 10th.

A telegram from Buenos Ayres states that the Argentine Government has forwarded a Bill to Congress providing that the proposed central railway station at Retiro shall be built by the Central Argentine Railway Company, Limited.

The Pretoria-Pietersburg Railway Company have received notification by cablegram of the opening for public traffic of a further section from Nylstroom to Piet Potgietersrust (56 miles) on October 1st, making a total of 139 miles open.

At the forthcoming general meeting of the Entre Rios Railways Company, Limited, a resolution to sanction the conversion of the existing 5l. 5 per cent. preference shares (cumulative) and ordinary shares into 5 per cent. preference stock (cumulative) and ordinary stock will also be submitted.

By a contract concluded with the Grenada Railway Company, Limited, the South of Spain Railway Company becomes proprietor of a line from Moreda to Grenada. This arrangement has the effect of increasing to 193 miles the length of line which is now in operation on the South of Spain system.

A rumour comes from Valparaiso to the effect that the Chilean Government has received notice from Antofagasta that the railway bridge over the river Soa, leading to Oruro, has been cut, presumably by Bolivians. The only approach is from Bolivia, and an attempt to cut the bridge has been made before.

A Vienna correspondent telegraphs that it has now been definitely decided to postpone the financial transactions relating

to the Lombard Railway, including the conversion of the 5 per cent. preference as well as the issue of the remaining investment loan. The operations, owing to the state of the market, will not be carried out before next spring.

The Secretary of State for Foreign Affairs has received a despatch from her Majesty's Consul-General at Christiania stating that tenders are invited by the Norwegian State Railways Administration for the delivery of 375,800 railway sleeper-plates. A copy of the conditions of contract may be examined at the commercial department of the Foreign-office any day between the hours of 11 a.m. and 6 p.m.

A body of 2,000 railway strikers on Wednesday broke into the railway yards at the Champs de Mars, Paris, drove out all the men at work, cut the electric wires, and then dispersed before any police assistance could be called. No arrests have yet been made. The strikers at a meeting in the afternoon decided to send a deputation to the Railway Servants' Union to urge the necessity of a general strike of all the railwaymen throughout France "as a protest against the exactions of the capitalists."

**Illustrated Lectures upon Holiday Resorts.**—The Great Eastern Railway Company have prepared a series of lantern slides to illustrate the principal holiday resorts and places of historic interest in East Anglia. The series has been arranged for six separate lectures illustrating respectively:—(1) A trip from London to Yarmouth and back; (2) the Rivers and Broadlands of Norfolk and Suffolk; (3) a trip on a Norfolk River; (4 and 5) the story of East Anglia (in two parts); and (6) the Church in East Anglia. The last three are not yet ready. A list of slides in each lecture, and conditions of loan, can be obtained from the general manager of the company. Descriptive notes by Mr. W. R. Richmond have been prepared for the use of lecturers. An endeavour will be made to send a lecturer to describe the scene illustrated by the lantern slides when a special application is made for his services.

**State Railways in France.**—The balance-sheet of the French State Railways for 1897 has just been issued to the public. The expenses of management are shown to be 72½ per cent. of the receipts, as against 45 per cent. to 59 per cent. elsewhere. The State has doubled the permanent way between Chartres and Bordeaux, except as regards 85 kilometres, which have yet to be laid. The rolling stock includes 566 locomotives, 1,786 passenger carriages, and 13,527 goods trucks. The length of line exploited is 2,791 kilometres. Travellers last year numbered 11,511,031, or 313,300 more than in 1896. The total receipts amounted to 44,588,298fr., and expenses to 32,308,989fr. Not to go too deeply into details, the net profit amounted to 9,331,540fr., the capital engaged being 600,000,000fr. Certainly the results improve gradually every year, but this only amounts to a little over 1½ per cent.

**A Railway to Khiva.**—The St. Petersburg correspondent of the *Times* writes:—"Of all the new railway projects now being brought forward almost daily, one of the most interesting is a proposed line to Khiva. According to the *Novosti*, certain Russian engineers and a Danish company have laid a scheme for building this railway before the Russian Government, and have also secured the support of the Khan of Khiva. No guarantee or subvention is required from the Government, as it is calculated that the transport of Khivan cotton and other produce will make the line pay. The starting-point of the new railway is to be at or near Krasnovodsk, on the Caspian, whence it will run through the great Ust-Urt desert to the town of New Urgenj, on the Lower Amu Daria. This is in fact the revival of an old project which was once favoured by the late General Tcherniaieff in opposition to General Annenkoff's railway to Samarkand."

ESTABLISHED 1774.

**JESSOP'S  
STEEL**

**WILLIAM JESSOP & SONS, LIM<sup>d</sup>.**  
BRIGHTSIDE WORKS, SHEFFIELD.

**GREAT WESTERN RAILWAY.**

The Directors of this Company are prepared to receive TENDERS for the supply of the undermentioned STORES from the 1st of December next to the 30th of November, 1899:—

1. Bricks and Tiles.
2. Lime, Plaster of Paris, and Cement.
3. Stone, Slate, Drain Pipes, Crucibles, &c.
4. Fire Bricks and Fire Clay.
5. Glass—Plate and Sheet.
6. Lamp Glasses, Globes, Tubes, &c.
- 7 & 8. Drysalteries, Emery, Soap, &c.
9. Acids, Alkalies, &c.
10. Oils, Turpentine, &c.
11. Colours, Paints, &c.
12. Varnishes.
13. Brooms and Brushes.
14. Baskets, Sponge, &c.
15. Rope and Cordage.
16. Leather.
17. India Rubber Goods.
18. Telegraph Instruments.
19. Telegraph Apparatus.
20. Copper Wire, G.P. Wire, &c.
21. Telegraph Ironwork and Tools.
22. Telegraph Drysalteries.
23. Electric Light Carbons.
24. Electric Lamps, Incandescent.
25. Zinc, Tin, Antimony, Copper Pipes, Brass, &c.
26. Tin Plates.
27. Tin Ware and Lamp Work.
28. Wire—Iron and Steel.
29. Fish Plates and Bolts, Iron Rivets, Bolts and Nuts, &c.
30. Nails, Screws, &c.
31. Cast-Iron Pipes and Rain Water Goods.
32. Locks.
33. Steel Tools (Files, Saws, Shovels, &c.).
- 34, 35, 36. Ironmongery, General.
37. Brasswork and Pressure Gauges.
38. Gas Fittings, Brass.
39. Galvanised Goods.
40. Sanitary Fittings, &c.
41. Waste and Lamp Cottons.
42. Canvas, Floorcloth, &c.
43. Carpets, Cloths, Calico, &c.
44. Carriage Trimmings & Horse Hair.
45. Handles, Spraggs, &c.
46. Fencing.
47. Telegraph Poles and Yellow Pine.
48. Horse Harness Fittings.
49. Leather for Horse Department.
50. Mineral Oils.
51. Sundries.

Samples and Patterns may be seen at Swindon, from Wednesday, the 12th, to Friday, the 21st instant, on application at the Office of the Stores Superintendent, Swindon.

Specifications with Forms of Tender (upon which alone Tenders can be received) may be obtained at the Office of the Stores Superintendent at Swindon.

Tenders, addressed to the undersigned, and marked outside "Tender for Stores," will be received on or before Monday, the 24th instant.

The Directors do not bind themselves to accept the lowest or any Tender.

G. K. MILLS, Secretary.

Paddington Station, London, 1st October, 1898.

**THE CENTRAL URUGUAY RAILWAY COMPANY of MONTE VIDEO, Limited.****NOTICE.**

NOTICE is hereby given, that the next ORDINARY GENERAL MEETING of the Central Uruguay Railway Company of Monte Video, Limited, will be held at the City Terminus Hotel, Cannon-street, in the City of London, on FRIDAY, the 14th day of October, 1898, at Two o'clock in the Afternoon precisely, to receive the Directors' Report and an Audited Statement of Accounts for the year ended 30th June, 1898, and to transact the ordinary business of the Company. The Transfer Books and Register of Members of the Company will be closed from the 30th day of September to the 14th day of October, both days inclusive. Dated this 30th day of September, 1898.

By order,

H. C. ALLEN, Secretary.  
Offices of the Company,  
6, Finsbury-circus, London, E.C.

**THE BUENOS AYRES GREAT SOUTHERN RAILWAY COMPANY, Limited.****NOTICE.**

The Board of Directors of the Buenos Ayres Great Southern Railway Company, Limited, hereby give Notice that the ORDINARY GENERAL MEETING of the Company will be held at the Terminus Hotel, Cannon-street, in the City of London, on THURSDAY, the 20th day of October, 1898, at Twelve o'clock Noon, when the Directors' Report and an Audited Statement of Accounts for the year ended the 30th June, 1898, will be presented, and the ordinary business of the Company transacted.

And Notice is hereby further given, that one of the Shareholders has informed the Board of his intention to propose at the said Meeting a resolution increasing the remuneration of the Directors to £5,000 a year, and that a resolution for that purpose will accordingly be proposed by him at the Meeting.

The Transfer Books and Register of Members of the Company will be closed from the 7th to the 21st of October, 1898, both days inclusive.

Dated this 7th October, 1898.

By order of the Board,

H. C. ALLEN, Secretary.  
Offices of the Company:  
6, Finsbury-circus, London, E.C.

**TO THE HOLDERS of Messrs. J. P. MORGAN and CO.'S RECEIPTS for BONDS of the**

Baltimore and Ohio Railroad Company's 5 per Cent. Sterling Loan of 1877 (Chicago Division), Baltimore and Ohio Railroad Company's 6 per Cent. Sterling Loan of 1874,

and Pittsburgh and Connellsville Railroad Company's 6 per Cent. Consolidated Mortgage Loan.

Messrs. J. S. MORGAN and CO. beg to give Notice that the above-named Receipts (duly endorsed, dated, and witnessed) may now be left with them for the purpose of being exchanged for Reorganisation Certificates of the Mercantile Trust Company of New York, issued under Plan of Reorganisation dated 22nd June, 1898.

Forms for listing the Receipts may be obtained at their Counting-house, 23, Old Broad-street, E.C. London, 3rd October, 1898.

**BLAENAVON COLD BLAST PIG IRON**

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

**No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.

**No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.

**No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.

**No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.

**No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and BB. Merchant Bars.

**No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purpose

\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4671, Session 1898.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 samples including Blaenavon	7.140	850 Specimens. 23,257	546 Specimens. 7,102	273 Specimens. 91,061
Average of 5 samples of Blaenavon only	7.175	63 Specimens. 25,588	46 Specimens. 7,488	21 Specimens. 108,281

Prices and any further information as to quality suitable for special purposes may be obtained from

**Meetings.****BUENOS AYRES WESTERN RAILWAY.**

The ninth general meeting was held on Wednesday, at the Cannon-  
 street Hotel, E.C.; Mr. REGINALD J. NEILD presiding.

The SECRETARY (Mr. F. Eustace Faithfull) read the notice convening  
 the meeting. The report and accounts (an analysis of which has already  
 appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN said—If you will refer to the report, gentlemen, you  
 will find that clause 10 refers to the death of our first manager, Mr.  
 Roberts, which sad event took place in London on May 6th this year.  
 A year ago, when we met in this room, Mr. Roberts was present, and  
 heard the proceedings at the then general meeting, and I cannot let this  
 occasion pass without saying a few words in order that you may know the  
 worth and value of the servant who has been lost to you. You may remember  
 that in the year 1890 the Buenos Ayres Western Railway was formed, to  
 purchase the undertakings of the Provincial Railways of Buenos Ayres,  
 and Mr. Roberts, who was at that time general manager of the Central  
 Uruguay Railway, was selected for the difficult task of taking over these  
 Government lines and reorganising them on the basis of the English  
 method of working. He found the lines run down and, to our  
 way of thinking, requiring complete reorganisation, and he devoted  
 his time and his energy unsparringly and unstintingly to carry out  
 a most difficult and onerous task. The result was that in the course  
 of three or four years he brought the railway to the present state  
 of perfection, if I may say so, that it has attained; but that task was not  
 accomplished, as you can well understand, without a very great mental  
 and physical strain. Nevertheless he was compensated by the gratifica-  
 tion that was afforded to him of seeing the railway gradually creep up in  
 its results, so that in the year 1896, after some vicissitudes, we were able  
 to show the result of 6 per cent. on the ordinary shares, 6 per cent. on the  
 deferred shares, and something like 40,000*l.* placed to reserve. It is needless  
 to say that it was a terrible blow and disappointment to this anxious and  
 indefatigable worker to find the loss that resulted to the railway by the  
 terrible locust visitation at the end of the year 1898. He saw the proba-  
 bility of maintaining his good results disappearing, and there is no ques-  
 tion that the disappointment that this caused him was the commencement  
 of the illness which eventually carried him off. In September of last  
 year by the doctor's advice he returned from Buenos Ayres to see whether  
 a voyage home would do him good, and that was the reason why he was  
 present here at our last general meeting. We hoped and believed that  
 the journey had really been a benefit to him, but no sooner had he  
 returned to the Plate than his malady increased, and he was obliged,  
 after a very short time there, to come back to England again, and  
 in a very few weeks he succumbed to his illness. There is no question  
 whatever, I think, from all the information I had from the doctors who  
 attended him, that his life was sacrificed to his energy and devotion to the  
 cause of this railway, and the board of directors unanimously and without  
 hesitation, in order to prove their appreciation of the services which he  
 had rendered to this company, voted to his widow the sum of 1,000*l.*,  
 which you will see noted in the report. ("Hear, hear," and applause.)  
 Gentlemen, it is possible that in the future we may have managers as  
 competent as the late Mr. Roberts; but I say, without fear of con-  
 tradiction, that neither this company nor any other company will  
 ever possess a more faithful or devoted servant, nor will any board of  
 directors have a more sympathetic fellow-worker. We all deplore his  
 loss very much, and I assure you I speak of it with the greatest feeling.  
 (Applause.) The task fell upon us, on the news of his death reaching us,  
 of providing his successor, and I may tell you that some few years ago,  
 on the acceptance by Mr. Adams of the post of engineer to the Works  
 Committee of the London County Council, we appointed as chief engineer  
 of the Western Railway Mr. David Simson, a gentleman well known to  
 several members of the board as experienced in railway management in  
 Havana, and also with considerable experience of railway construction,  
 both in this country and in Buenos Ayres. Hardly had Mr. Simson  
 assumed his duties as resident engineer than the illness of Mr. Roberts  
 forced him to accept the post of acting-manager. He has been carrying  
 these duties on for the last twelve months with entire satisfaction of the  
 board, and in such a manner as to secure the complete confidence of the  
 directors, and the board had no hesitation in appointing him to the post  
 of general manager, fully believing the interests of the Western Railway  
 were confided to thoroughly good hands.

Now, gentlemen, I will not detain you further on personal matters,  
 but I will refer you to the report, and I will tell you at the outset  
 for your satisfaction that when you have read that report you will  
 know the worst of our position. There is absolutely nothing kept back,  
 there is nothing glossed over, but there is a plain statement of the position  
 of affairs as on June 30th of this year, and I think that a closer examina-  
 tion of the report, with such hints as I am able to supply to you, will show  
 you that although we have been unfortunate, although it is not possible  
 to pay a dividend as large as we were able to do last year and in  
 the year previous, that nevertheless there is much in the position and  
 progress of the Western Railway to satisfy and cheer the proprietors.  
 I will first run hastily through the balance-sheet, which you will  
 find on page 17. On the debit side of the balance-sheet there are  
 only two amounts that call for any explanation. The one is "Sundry  
 Credits, London, 7,108*l.*" which is almost entirely income-tax, the  
 other is "Sundry Credits, Buenos Ayres, 53,132*l.*" which consists  
 of 29,500*l.* of wages, about 10,000*l.* kept in suspense against Government  
 accounts on the other side, 5,400*l.* due to the Railway Clearing-house,  
 and sundry small suspense accounts. On the other side of the account

the only amounts calling for explanation, I think, is the 22,864*l.* 19*s.* 10*d.* standing against the National and Provincial Government's traffic account, and the following item, 15,402*l.* Provincial Government Land Suspense Account. The former amount of 22,864*l.* represents the indebtedness of the National and Provincial Government to us for traffic; but I should tell you that since the year 1895 we have not been in the habit of including in our traffic returns any accounts due by the Government until such time as they were collected and coming in cash into the company's coffers, so that the amount of 10,000*l.* which stands in the account on the other side—sundry credits in Buenos Ayres—is a set off against this amount. We are in treaty, as you will see in the report, with the Provincial Government for the settlement of their account by Government bonds bearing 4 per cent. interest and 10 per cent. amortisation, which, if we can get it, will be a satisfactory way of turning this asset into an interest-bearing one. We are also endeavouring to treat the National Government account in the same way, and we hope we shall be successful. The Provincial Government Land Suspense Account is an old account. When we took over the railway the Government were under the obligation to furnish us with title-deeds and possession of certain lands, and this is an account which will gradually go out as we get that matter settled with them. The other amount is sundry debits—the last account in the balance-sheet, 9,208*l.* Those are all small accounts for wagon sheets, clothing, and other things. There is nothing over 1,000*l.* in any of them. I will now proceed to the report, which you will see allows of the payment of a dividend for the whole year at the rate of 4 per cent., slightly better than what we were able to do in the half-yearly account when we paid at the rate of 3½ per cent. In the half-year there was a decrease in net profit of 60,000*l.*; in the whole year there is a decrease of net profit of 75,000*l.*, as compared with last year. Well, that as a bald statement is very unsatisfactory, as we have stated in the report in several places, and we do not attempt to disguise it; but let us go into explanation of it, and we shall find that the whole of that and more is accounted for by the failure of the maize. We have carried this year 296,000 tons of maize less than in the previous year, representing a freight of 85,000*l.*, or 10,000*l.* more than the total deficit we have to account for. In addition to that there is 24,000*l.* less in company's material, which of course affects the gross receipts, though it does not affect the net profits very much, because we carry it for c at price, or very nearly so. On the other hand, the encouraging feature

that we have an increase of nearly 6 per cent. in passengers—and that in spite of the fact that the whole of the country which we serve suffered from depression in consequence of the agricultural failure in the maize crop, to which I have just alluded. Naturally, when the farmers are poor, they travel much less, yet in spite of that we can show a satisfactory increase of 6 per cent. in the passenger traffic. Luggage and parcels, as a rule, follows passengers, and shows an increase of 10 per cent., and animals also show an increase. In addition to that we have a good increase in the important items of wool, hair, hides, skins, and grease, which are the most important products that the country which we serve produces, after the cereals. Well, we cannot, in the face of this, help coming to the conclusion that the intrinsic value of our property is improving, because the locusts are a visitation which is impossible to avoid, and it is satisfactory to think that the universality of this locust plague has been so great as to induce the authorities and the people to take such steps as we certainly trust will minimise the difficulty in the future. They have attempted the extermination of the locusts with an energy which is quite unusual in that country, and I am very glad to be able to tell you that the results have been so far, taken altogether, highly satisfactory. Now we come to another item which I think gives the proprietors every reason to be satisfied, and that is the heading of expenses. Under the heading of expenses we have 3,000*l.* less to show, which you will see is not much in view of the reduced train mileage; but it comes to a good deal when you come to consider that there are 107 miles more line and six stations being worked on revenue account for nine months out of the twelve, representing an expense of 7,700*l.* When you realise that the fall in the gold premium has made an increase of 10,000*l.* in the sterling value of the wages, and that a sum of nearly 3,000*l.* has had to be spent in the extermination of the locusts, that, in addition to the 3,000*l.* of saving, there is a sum of more than 20,000*l.* of extraordinary expenses which has gone to swell the expenses, and in addition to that that there has been no running down on the line—for we have spent no less than 16,000*l.* out of revenue during the year for rail and sleeper renewals, besides the 19,000*l.* which stood at the credit of the account for the first half-year—then, I think, you will consider that the position is satisfactory. So we have this, that the line has been thoroughly kept up in proper order, that the whole of the decrease in the gross revenue of the company is accounted for by the failure of the maize crop, and that all the principal sources of revenue show increase and our expenditure shows a very satisfactory decrease. Now, with regard to the prospects of the future business. I can tell you that for the first two months of the year we have 9,000*l.* net profits more available for dividend than we had in the corresponding two months of last year, and that the traffic returns we have received this morning—viz., 13,218*l.*—is considerably in excess of any traffic that we have had to show for many months back. We have also received a telegram this morning which is satisfactory:—

“Prospects are encouraging. There has been a general rainfall, which will do much good. The wheat prospects are very good, and at least 50 per cent. more has been sown west of Bragado both on the main line and on the Villegas branch. Wool prospects are fair. No locusts have appeared so far in our districts. A large area is being prepared for maize. The new National Government is regarded with confidence. Signs on all sides apparent of substantial progress being made by country.”

It may interest you to know that to-day is the day when the new President, General Roca, assumes the reins of office, and this morning's papers publish the names of the Ministers he has appointed. General Roca inspires great confidence, and it is believed there will be a Government of peace and order so long as he is in charge of the helm of State. There is, of course, still anxiety with regard to the Chilean question; but I think the general feeling of all persons connected with Buenos Ayres is that a solution will be found for it without having recourse to arms. I am sure we must all sincerely hope so, because if it is not so, the country will be thrown back a great many years. Now, there is one item of personal news that I omitted to mention to you, and that is that during the year under review our colleague, Mr. Bell, visited the River Plate, and was able to devote a considerable portion of the time that he was there to a careful inspection of our property and to conferences with our officials, and he has made himself well acquainted with our affairs there, and has brought away a most satisfactory impression with regard to them.

We have no new works on hand at present, with the exception of a corn-exchange at our Once Station at Buenos Ayres, which will cost us about 15,000*l.*, and which is let on satisfactory terms. You will notice that the north eastern portion of the province of Buenos Ayres which was served by the Ensenada Railway—a line to the east of the Southern—is the part which commands the principal outlets for our produce—viz., the port of La Plata and Ensenada, and the Port of Buenos Ayres. You will have seen, no doubt, in the papers that this property has been purchased by the Buenos Ayres Great Southern, and as the Buenos Ayres Western has always felt that it was necessary to provide itself with suitable export outlets for the produce which it carries, negotiations were entered into with our friends, the Buenos Ayres Great Southern, and I am very happy to be able to inform you that arrangements are practically concluded by which the Western Railway will get equal benefits in the purchase with the Great Southern—(applause)—and that in the future we shall have all the advantages of having free access to those ports of shipment. (Applause.) I consider that is a highly satisfactory feature, and one which will redound very much to the advantage of this company. I do not think, gentlemen, that there is anything else that I need trouble you about, or that can be of interest to you, but I shall be extremely happy to answer any questions which you may wish to put. I will merely move:—

“That the directors' report and audited statement of accounts for the fiscal year ended June 30th, 1898, now submitted, be received and adopted.”

Mr. GEORGE W. DRABBLE—Gentlemen, I beg to second that.

The resolution was agreed to unanimously without discussion.

The CHAIRMAN—I now move:—

“That a balance dividend of 4*s.* 6*d.* per share on the ordinary shares, making, with the interim dividend paid in April last, 4 per cent. for the whole year, be and is hereby declared on the ordinary share capital of the company for the year ended June 30th, 1898.”

Mr. G. W. DRABBLE—I beg to second that, gentlemen.

The resolution was carried unanimously.

On the motion of the CHAIRMAN, the retiring directors, Messrs. G. W. Drabble and H. Bell, were unanimously re-elected.

The CHAIRMAN—I have now to move a resolution in regard to this company adopting the provisions of the Forged Transfers Act. It will be remembered that at the last general meeting two shareholders made suggestions in regard to modifications that we should adopt. One was that we should convert our ordinary and deferred shares into stock, but in view of the depressing news that we had to give to the shareholders in our report, the bad times that we had to go through, and the depreciation in the price of our stock, it was considered that on the whole it was not an opportune time to enter into this, and, therefore, we have resolved to postpone it for the present at all events. The other question was that we should adopt the provisions of the Forged Transfers Act, which is a matter entirely for the shareholders themselves to decide. The Act, as I understand it—and the solicitor will correct me if I am wrong—is a species of insurance by which the whole body of the shareholders may insure out of their corporate funds any individual shareholder from loss through accepting a forged transfer.

The SOLICITOR—That is so.

The CHAIRMAN—That is the short meaning of the Act, and I shall move a resolution in accordance with the notice in the report, and I shall be glad to take your opinion as to whether you would wish to accede to it or not. The resolution is this:—

“That the company do adopt the provisions of the Forged Transfers Act, 1891 and 1892, and that the board be and they are hereby authorised upon such terms and subject to such conditions and regulations as they may think fit, to make compensation by a cash payment out of the funds of the company for any loss arising from a transfer of any of the stock, shares, or securities of the company in pursuance of a forged transfer or of a transfer under a forged power of attorney, whether such loss shall arise and whether the transfer or the power of attorney were forged before or after the passing of the Forged Transfers Act, 1891.”

Mr. J. W. BATTEN—I have great pleasure in seconding that, but I only hope it will not make shareholders careless in regard to transfers. I hardly know of any company since this Act was passed in which there has been a loss, because the secretarial departments take immense care to verify the signatures, and whenever transfers come in they send the notice of that transfer to the transferor. But it might be that a loss might occur, and in that case the whole body of the shareholders would have to bear the loss instead of the individual.

A SHAREHOLDER—Has there been any case of forged transfer in this company?

The CHAIRMAN—No, sir, none. We have no record of anything of the kind here. The Acts have been adopted by the Buenos Ayres Great Southern, and, I think, by nearly all the large English railway companies.

The resolution was agreed to unanimously.

The auditors, Messrs. Deloitte, Dever, and Co. and Messrs. Cash, Stone, and Co., were reappointed.

Mr. HENRY BELL—Gentlemen, when I visited Buenos Ayres a few months ago, I went there with three things clearly in my mind. The first was to satisfy myself whether the railway properly and efficiently served the district of the country where we are in and whether it was likely to repay us. The second was whether the line was physically in a good condition, so that the traffic offered to us might be economically dealt with; and the third was what sort of staff we had to work that railway. Every one, I think, who has visited Argentina, or who has looked over the map, and talked over the matter with people who have been there, is of opinion that we have a district which is one of the most promising in Argentina. We have also, through Mr. Roberts's efforts, a line which physically is second to none, and we have a staff which I can also say is second to none. I want you to give a vote of thanks to the staff. We say in our report that Mr. Roberts's connection with the railway was marked by the most untiring energy and unswerving devotion to its interests. You have heard what our chairman has added to that. These are very high words, but no words we can use can be too high for what he did for this railway. He was ably seconded in his efforts by Mr. Brian, our legal representative. We have lost Mr. Roberts, and we have got Mr. Simson. Mr. Simson has youth on his side, and zeal and energy; and I am sure these will be applied with ability, and for the future I have no fear at all that he will not manage the railway for our interest just as well, perhaps, as Mr. Roberts did. For Mr. Faithfull and the staff here I can speak equally highly. You all know them, and I have only, therefore, to propose:—

"That the hearty thanks of the shareholders be given to the legal representative, the general manager, and to the other officers and members of the staff of the railway in Buenos Ayres. Also to the secretary and staff and consulting engineers in London for their zealous services during the year."

Mr. J. W. BATTEN—I have great pleasure in seconding that.

The resolution was agreed to unanimously.

The CHAIRMAN—That concludes the business, gentlemen, and we thank you for your attendance.

The proceedings then terminated.

### BUENOS AYRES AND ENSENADA PORT RAILWAY.

An extraordinary general meeting was held on Saturday last at Winchester House, New Broad-street E.C., to consider resolutions—(1) selling and transferring the company's undertaking and property referred to in the agreement dated July 25th last, made between the company and the Buenos Ayres Great Southern Railway Company, Limited; (2) winding up the company voluntarily and appointing Mr. Batten and Mr. Frederick Neild liquidators; and (3) authorising the liquidators to distribute in specie among the members the fully-paid preference and ordinary shares in the Great Southern Company to which this company would become entitled under the agreement mentioned, being an agreement for the sale and transfer of this company's undertaking to the Great Southern Company. Mr. J. W. BATTEN presided.

The CHAIRMAN stated that the meeting had to be held under the statutes before the vendor company could wind up and distribute the assets to be received from the purchasing company. He regretted that they had been called together on a Saturday, but there was no help for it. Under the articles of association the meetings must be held within three months from the date of the agreement, which, as they saw by the resolutions, was July 25th last. They had postponed the meeting as late as possible in order to get everything completed before it was held. The last half-year's accounts from Buenos Ayres had not yet arrived, but they had received a telegraphic summary of them, and they found themselves enabled to declare the dividend of 5 per cent. per annum on the cumulative shares of the company. As they were all aware, the past half-year had been with most of the companies a bad one; and in a company like theirs, where they were winding up, their endeavour had been to pay off everything. The working expenses for the half-year had therefore been very high. Still, the telegraphed accounts showed that they had funds sufficient to pay the cumulative dividend on the preference shares, and they would therefore be able probably to divide the stock they were to receive from the Great Southern Company at an early date. Everything had been settled in the most amicable way with that company. When their stores came to be taken over by the Great Southern Company's officials they were found to be slightly in excess of that company's valuation—a circumstance showing that, after this company's twenty-six years' working, they had no stores hidden away which were valueless. After the confirmatory meeting, which would have to be held on the 24th inst., he thought that they would be able to receive shortly from the Great Southern Company the several stocks which had to be paid to them. In the first place, they would receive shares; but these would not be distributed. The Great Southern Company would afterwards convert the shares into stock, and subsequently Great Southern Company's stock and debentures would be issued respectively to the shareholders and debenture-holders of this company. One or two shareholders had written to ask the meaning of the words in the third resolution—"distribute in

specie"—appearing to think that the directors had changed their minds and that they were going to pay in gold. This, however, was a mistake. The words meant that they were going to pay in what they would receive—that was, stock and debentures. Considering everything, he thought that they had done wisely in selling their line to a powerful concern like the Buenos Ayres Great Southern Company, whose stocks would be of greater market value to the shareholders of this company than their own could possibly be for some time to come. He thought that the Great Southern Company had made a good bargain, but he did not believe that the shareholders of this company would have any cause to regret the transaction.

The resolutions, on being put to the meeting, were agreed to.

### TOWER COMPANY, LIMITED.

An extraordinary meeting of the shareholders was held on Monday at the Charing-cross Hotel, for the purpose of considering an agreement which has been entered into with the liquidator of the Metropolitan Tower Construction Company, Limited, under which the liquidator surrenders the lease of the land occupied by the Watkin Tower in consideration of certain deferred shares being allotted to him in the Tower Company, Limited. Mr. FRANCIS PAVY presided.

The CHAIRMAN, in moving a resolution approving the agreement, said that the Metropolitan Tower Construction Company, as the shareholders were aware, owned the tower, which they had been unable to complete, and on which an unpaid ground rent had accumulated amounting to 7,000*l.* or 8,000*l.* It had long been clear that the Tower Company could not allow the Construction Company to go on as they had been doing, so an agreement had therefore been entered into, under which they were willing to give the Construction Company deferred shares in their own company to the extent of 50 per cent. of the sum that had been expended on the tower. In consideration of these deferred shares they acquired the tower as at present constructed, whilst reserving for their own shareholders a 5 per cent. cumulative dividend from the date of the agreement, and the right to recoup themselves in the sum of 9,885*l.*, which represented the unpaid ground rent and certain trade debts owing by the Construction Company, which must be paid by whoever was in possession of the tower. This arrangement would give the shareholders in the Construction Company some chance of a dividend, and in the event of the winding up of the Tower Company, the ordinary shareholders in that company would get back their capital and 5 per cent. before dividing with the holders of the deferred shares. As regarded the future of the tower, he saw no reason why it should not pay in its present state, as during the period that the liquidator had been in possession, from January 19th to September 13th last, he had realised a net profit of 816*l.* He (the chairman) believed therefore that under judicious management a good profit could be obtained, and when the bicycle track in the park had been relaid, as they intended to do, another great attraction would be added to this beautiful ground. He confessed that he had grown impatient at the delay that had taken place in developing the estate; but he was glad to say that plans had now been approved, and building would shortly be commenced.

The resolution having been seconded,

The CHAIRMAN, in reply to several questions, said that it was not intended to expend any more money on the tower. He would not say that the tower would never be completed; but, if it were ever finished, it would have to be done by a syndicate of outsiders, who might see their way to make it pay. Personally, he would never be a party to allow the tower company to spend anything further upon the structure. As regarded the claim that had been made by some lady to their estates, they had nothing whatever to do with it. It was a matter which concerned the Crown. Their own title was clear and perfect.

The resolution, on being put to the meeting, was carried unanimously. A further resolution was passed authorising the company to increase its capital by the creation of 49,360 deferred shares of 1*l.* each.

## Directors' Reports.

### ARGENTINE GREAT WESTERN RAILWAY.

#### CAPITAL.

The capital account shows an expenditure during the past year of 48,896*l.* The total expenditure to June 30th, 1898, amounted to 4,125,092*l.*, whilst the receipts had been 4,195,252*l.*—viz., first debenture stock, 1,655,506*l.*; second debenture stock, 1,550,000*l.*; 5 per cent. preferred shares, 500,000*l.*; ordinary shares, 500,000*l.*; profit on conversion of 385,000*l.* 4½ per cent. equipment and improvement debenture stock at 90 per cent., under the scheme of arrangement of October 30th, 1894, 38,500*l.*; premium on sale of 50,000*l.* first debenture stock, 1,246*l.*

#### REVENUE.

The gross receipts for the year ending June 30th, 1898, amounted to 335,431*l.* (against 322,280*l.*), the expenses to 185,478*l.* (against 156,806*l.*), and the profit to 149,953*l.* (against 165,674*l.*). Adding balance from previous year 18,580*l.*; interest on Argentine Government bonds received in commutation of guarantee, &c., 18,645*l.*; interest on investments, 6,313*l.*, and sundries, 641*l.*; the total net revenue was 194,132*l.*, which was appropriated as follows:—Interest on the first debenture stock, 63,222*l.*; interest on second debenture stock, 71,746*l.*; insurance fund, 5,000*l.*; sundries, 543*l.*; dividend of 5 per cent. on the preference and ordinary stocks, 50,000*l.*; balance carried forward, 3,621*l.*

## TRAFFIC, &amp;c.

The number of passengers carried during the year was 199,220 (against 174,493); the quantity of goods carried, 234,141 tons (against 228,334 tons); the train mileage, 603,042 (against 579,078); the receipts per train mile, 11s. 1'50d. (against 11s. 5'51d.); the expenses per train mile, 6s. 2'31d. (against 5s. 9'01d.); the profit per train mile, 4s. 11'19d. (against 5s. 8'50d.); the ratio of working expenses to receipts, 55'66 per cent. (against 50'19 per cent.); the length of line worked, 319 miles (in each year). The report states:—

As compared with the figures for 1896-7, the receipts for the twelve months show a decrease of 4'71 per cent. in Argentine currency and an increase of 1'10 per cent. in sterling; the expenditure an increase of 5'91 per cent. in currency, and of 12'12 per cent. in sterling; and the net result a decrease of 15'39 per cent. in currency, and of 10'01 per cent. in sterling. This increase in the working expenses, beyond the increase of 9,000*l.* in renewal fund, as advised in the last report, is accounted for by floods and accidents and increased price of fuel. During the past year the floods were exceptionally violent, in one case the line having been practically washed away for the greater portion of 23 kilometres, interrupting the traffic for eight days. The increased price of fuel is due to the enhanced value of the paper currency augmenting the cost of wood, now forming a large portion of the fuel consumed.

The passenger traffic shows an increase in the number carried of 24,727, equal to 14'17 per cent., and of 1,469*l.*, equal to 2'94 per cent. in the receipts. The goods traffic exhibits an increase in transportation of 5,807 tons, equal to 2'54 per cent., and of 3,988*l.*, equal to 1'59 per cent.

The expenses of the year include a provision of 16,200*l.* for the renewal fund. After careful revision by the general manager and the executive officers, the directors have decided to increase this amount to 2,350*l.* per month, based upon the estimated requirements of the road for a period of five years.

## GENERAL.

In common with most of the English companies having interests in the Argentine Republic, this company was asked in April last to subscribe to the Internal Patriotic Loan. The directors being desirous of cultivating good relations with the Government, authorised a subscription of \$250,000 at 80 per cent., costing about 16,000*l.*, provision for which will be made by the sale of other investments held on reserve fund account.

The secretary of the company, Mr. Heald, has, at the request of the board, paid a visit to the Argentine Republic in order to become personally acquainted with the staff and inspect the property of the company.

Amongst the matters considered on the spot was the question of a short branch line of some 10 miles to the suburb of Lujan, lying to the south of the city of Mendoza, and situated almost in the centre of the wine-producing district. The directors have sanctioned the construction of this branch, as they are convinced it will meet the wants of an important district served by the company, and at the same time bring an increase of traffic to the main line. A concession was duly applied for from Congress, and has already been granted.

The directors record the severe losses the board has suffered during the past year by the decease of their chairman, the late Sir George Russell, Bart., of Mr. Edward Zimmerman, and of Mr. O. C. Waterfield, all three of whom had been members of the board from the foundation of the company in May, 1887. They also deplore the loss of Mr. N. Bouwer, the chairman of the local committee in Buenos Ayres, who had likewise served the railway from its formation. Mr. F. W. Lawrence has been unanimously elected chairman in succession to the late Sir George Russell. In accordance with the powers vested in them by the company's articles of association, the directors have elected Major W. J. Langford to a seat on the board, and the shareholders will be asked to confirm this appointment. It is not proposed at present to fill up the other vacancies on the board. Mr. Samuel Hale Pearson has been appointed chairman of the local board in Buenos Ayres in succession to Mr. N. Bouwer.

## HIGHLAND RAILWAY.

## CAPITAL.

August 31st, 1898.—The total expenditure amounts to 6,616,037*l.*, whilst the receipts have been 6,587,604*l.*, viz.:—

Ordinary stock .....	£2,564,383
Preference stocks .....	1,908,730
Debenture stock .....	1,920,640
Premiums .....	148,851
Parliamentary grant .....	45,000

Balance to debit of capital account, 28,433*l.* The expenditure during the past half-year amounted to 115,720*l.*, of which 57,273*l.* was on lines open for traffic, 5,223*l.* on working stock, and 53,223*l.* on lines in course of construction. Estimated further expenditure—In the current half-year, 139,475*l.*; in subsequent half-years, 225,836*l.*; total, 365,311*l.* Capital powers and other available assets amounted to 972,538*l.*

## REVENUE.

Subjoined is an abstract of the revenue account for the half-year ending August 31st:—

	1897.	1898.
Passengers, parcels, &c. ....	£172,922	£176,598
Goods, minerals, and live stock .....	102,559	105,889
Miscellaneous receipts .....	4,210	4,159
Total receipts .....	£279,691	£286,646
Total expenditure .....	164,681	173,013
Net receipts .....	£115,010	£113,633

Balance from last half-year .....	870	1,907
Sundries .....	—	2,314
Total net revenue .....	£115,880	£117,754
Prior charges .....	£45,004	£43,890
Preference dividends .....	34,754	40,004
Dividend on ordinary stock .....	*25,644	†12,822
Balance to next half-year .....	10,478	21,038
Total .....	£115,880	£117,754

\* At 2 per cent. per annum. † At 1 per cent. per annum.

The gross receipts for the past half-year show an increase of 6,955*l.*, the expenses an increase of 8,332*l.*, and the net receipts a decrease of 1,377*l.*

## TRAFFIC, &amp;c.

Half-year ending August 31st.	1897.	1898.
Passengers carried—total number .....	1,123,257	1,162,656
Mileage—Lines owned .....	462	472½
Foreign lines worked over .....	7½	7½
Total .....	469½	479½
Train mileage .....	1,341,289	1,412,180
Per-centage of working expenses .....	59'16	60'36

The report states that the large increase in the cost of locomotive power (8,231*l.*) arises chiefly from the higher price paid for coal in consequence of the prolonged strike in South Wales. During the half-year 70,908½ additional train miles were run. The line has been relaid with heavy steel rails during the half-year to the extent of 64 miles. Since last meeting two of the vacancies at the board have been filled up by the election of Sir W. Ogilvy Dalgleish, Bart., of Errol Park, Errol, and Mr. W. Whitelaw, Huntingtower, Perth. The portion of the Aviemore new line, from Daviot to Inverness, is expected to be completed and opened for traffic on 1st proximo.

## American &amp; Canadian Railways.

## LONG ISLAND.

The full accounts for the fiscal year ending June 30th are now to hand, and from them we take the following figures:—

	1896-7.	1897-8.
Gross earnings .....	\$3,954,866	\$4,333,194
Operating expenses .....	2,737,200	2,989,373
Net earnings .....	\$1,217,666	\$1,343,821
Other income .....	114,845	129,869
Total net income .....	\$1,332,511	\$1,473,690
Interest on bonds .....	\$644,231	\$638,629
Taxes .....	210,794	205,865
Rentals .....	310,466	312,800
Miscellaneous .....	64,816	72,521
Dividends (2 per cent.) .....	240,000	—
Total .....	\$1,470,307	\$1,229,815
Balance .....	Dr. \$137,796	Cr. \$243,875
N.Y. and Rockaway Beach Railway result .....	Dr. 6,815	Cr. 20,193
Prospect Park and C.I. Railway result .....	Dr. 54,338	Dr. 50,498
Balance—entire system .....	Dr. \$198,940	Cr. \$218,570

President W. H. Baldwin, junr., in his report, says:—"The general results for the past fiscal year have been encouraging. The policy has been to improve the physical condition of the property, and to provide train service even beyond the present needs of the public. With twelve separate branches in operation, each demanding through express service to the terminal, the problem is difficult, but it has been met in a generous spirit and to the general satisfaction of the public. The increased passenger train mileage has cost fully \$150,000, and the indications are that it will be wise to continue the largely-increased service. Outside of the ordinary maintenance of the property considerable expenditures have been made in roadway, equipment, and ferries. Ballast trains have been operated daily throughout the year. The dust will be entirely eliminated by another year. Hard coal is now used on 32 per cent. of passenger-train mileage. The important problem of making closer connection between Jamaica and the lower end of Manhattan Island has been helped materially by a contract with the Brooklyn Elevated Railroad. This contract, which runs for fifty years, provides for an inclined connection between the tracks of the Elevated and the Long Island at Chestnut-street, Brooklyn, and for through train service *via* such connection from Broadway Ferry, Brooklyn, to Rockaway Beach and Jamaica; through train service from New York city over the Brooklyn Bridge to Coney Island by the connection with the P.P. and C.I. Railroad in South Brooklyn; an inclined connection between the Elevated and the Long Island at Flatbush Avenue Station. The Rockaway Beach and Coney Island routes are now open and in operation, and have proved successful. The Flat-

bush Avenue connection will be built this fall. Through rapid-transit trains will be run from Jamaica to Brooklyn Bridge without stop, and will save considerable time to passengers to and from Jamaica and points beyond. The ability to collect and distribute passengers, without transfer, over the various routes of the Brooklyn Elevated system in Brooklyn and New York affords a most suitable terminal for Long Island traffic. No additional expense is incurred by the Long Island beyond its proportion of the cost of construction of the necessary physical connections. The Great Neck and Port Washington Railroad, from Great Neck to Port Washington, a distance of  $4\frac{1}{2}$  miles, was completed and opened for service on June 23rd, 1898. This road opens up a very beautiful section of country within 18 miles of New York, and will prove a valuable property. The Huntington Horse Railroad was purchased in April and equipped with the trolley electric system. The town of Huntington is located from 2 to 4 miles from the railroad station, and has been held back in its development on that account. The efficient service established by the electric car connection with all trains has met the needs of the public. The same policy of building short electric roads as feeders to the steam roads will be followed wherever such roads are needed."

### PANAMA.

Mr. Consul Mallet, in his supplementary report on the trade of Panama for 1897, includes an interesting account of the working of the Panama Railroad. Generally speaking, he says, the railroad has yielded quite satisfactory results during 1897, although the net profits—owing to increased expenditure without a correspondingly large increase in earnings—were fully 33 per cent. below the average for the past five years, and about 25 per cent. under 1896. To the reason assigned for this decline must be added the creation of two steamer reserve funds, which swallowed up a large portion of profit, and the appearance of yellow fever about the middle of the year, which diverted a considerable amount of first-class passenger traffic elsewhere. In like manner as during the previous five years no dividend has been allotted to stockholders, the profits, which represent some 6 per cent. upon the nominal capital, being carried to meet approaching liabilities in connection with La Boca terminus and wharf, for the value of which (277,800*l.*) only 7,227*l.* has, as yet, been paid in cash. The outstanding balance of the 1,000,000*l.* 7 per cent. mortgage bonds of 1867, referred to in last year's annual trade report, matured and was redeemed on October 10th, 1897, settlement having been effected from a reserve fund created for the purpose, and by the issue on September 15th of a  $4\frac{1}{2}$  per cent. twenty-year first mortgage of 400,000*l.* (the authorised issue being 800,000*l.*), which now constitutes the sole indebtedness of the company. Analysing the gross earnings we find that these, which aggregate 460,141*l.*, or 3.36 per cent. in excess of 1896, arise to the extent of 134,097*l.* from the steamship branch, 77,656*l.* from real estate and miscellaneous sources, and 248,388*l.* from the railroad proper. Owing to the presence of a mixed account, "joint railroad and steamship expenses," the major portion of which is properly chargeable to the road, the balance of earnings over expenses of each of the three sources of income can be given only approximately, that is:—Railroad, 122,145*l.*; steamships, 17,470*l.*; miscellaneous, 39,278*l.*; net earnings, 178,893*l.*; fixed charges, 96,919*l.*; net profits, 81,974*l.* Deducting the fixed charges from and adding miscellaneous entries to the railroad account, which will then represent it as previous to the installation of the steamship line, we arrive at the result that the road yielded a net profit of only 64,505*l.*, or say 3 per cent. upon its total cost up to date (1,977,879*l.*), whereas the steamers' return upon capital, notwithstanding a decline in passenger traffic, extensive repairs and alterations, and the establishment of a reserve fund, was nearly 24 per cent. Judging from the returns for the years 1896-97, the expense of moving freight across the line, exclusive of lighterage, was 6s. 6d. per ton. The total tonnage borne upon the road last year was the largest since 1888, and 4 per cent. in advance of 1896. This advance results entirely from east-bound freight and west-bound treasure and mails, there being notable decreases in all other directions caused by "the prejudicial effect upon traffic of a serious epidemic of yellow fever, which extended throughout several of the republics of Central and South America during the greater portion of the year, revolutionary uprisings in Central America, with consequent general breakdown of credit and business depression, and the depreciation of silver, affecting the currency of those republics." The increase in east-bound freight may be traced to the large coffee crop—38 per cent. in advance of 1896—hides, india-rubber, wine, and sundries. Of the total tonnage carried 59.64 per cent. was west-bound and 40.36 per cent. east-bound. In 1896 the proportions were 64.64 per cent. and 35.36 per cent. respectively. The through freight amounted to 82.93 per cent.

of the total number of tons carried, against 83.57 per cent. in 1896. It is intended to construct another line in the province of Chiriqui, which is essentially an agricultural district, and a concession to construct and exploit the line from "El Boquete" to the Port of Pedregal, a distance of approximately 30 miles, has been granted to a Colombian citizen.

### WHITE PASS AND YUKON RAILWAY.

An official statement of the progress of the White Pass and Yukon Railway appears in a New York newspaper. The statement says:—"The section of the road over the White Pass from Skagway, Alaska, to the Canadian side, is owned by the Pacific and Arctic Railway and Navigation Company. The distance from Skagway to the summit is about 20 miles, and from the summit to Lake Bennett about 25 miles. The company has about 1,500 men employed, and will be glad to have double that number. Trains are running about half-way to the summit of the pass, and it is expected that they will reach the summit before long, and the lakes later. The heavy rock cut on Porcupine Hill, which has been an obstacle to rapid progress, is finished. The rock cut at the summit of the pass is also completed and ready for track, and much of the heavy work on intermediate points is nearing completion. This includes two or three long heavy rock cuts and two short tunnels. The maximum grade is 3.9 per cent. and the maximum curve 16 degrees. There are several bridges, none of which require difficult or unusual construction. The larger bridges will be of iron and the smaller ones trestles. At Skagway are to be located a large wharf, Custom-house, &c., which are now building. The line is 3ft. gauge and the rails 56lb. It is especially built for winter operation, so as to avoid snow blockades, &c. Several syndicates have been organised to run freight and stage lines this winter between the end of the constructed line and the interior. The continuation of the line from Fort Bennett to Fort Selkirk is to be pushed as rapidly as possible, but it will not be possible to work during the winter on account of the short days and severity of the weather. The company hopes to have the line completed to Fort Selkirk before the end of next year."

### BALTIMORE AND OHIO.

The advisory committee of the Baltimore and Ohio Railroad Reorganisation has formulated a plan for the reorganisation or consolidation of Central Ohio Railroad Company's  $4\frac{1}{2}$  per cent. bonds and preferred and common stock, Sandusky Mansfield and Newark Railroad Company's 7 per cent. bonds and common stock, Columbus and Cincinnati Midland Railroad Company's  $4\frac{1}{2}$  per cent. bonds and preferred stock, Newark Somerset and Straitsville Railroad Company's 5 per cent. bonds, Pittsburgh Junction Railroad Company's first mortgage 6 per cent. bonds, second mortgage 5 per cent. bonds and preferred and common stock, and Pittsburgh Junction Terminal Company's 5 per cent. bonds. Messrs. Speyer and Co., Messrs. Kuhn, Loeb, and Co., and Messrs. Speyer Brothers, have consented to undertake, as managers, the consummation of the plan, copies of which and full information may be obtained from Messrs. Speyer Brothers, who are prepared to receive any of the securities therein mentioned, and forward the same for deposit under the plan, at the risk and expense of the reorganisation managers.

### LATEST EARNINGS.

First week of October.—Chicago Milwaukee and St. Paul, \$922,000—increase, \$120,000; Denver and Rio Grande, \$199,000—increase, \$14,000; Kansas City Pittsburg and Gulf, \$61,000—increase, \$5,000; Mexican Central, \$287,000—increase, \$61,000; Missouri Kansas and Texas, \$331,000—increase, \$16,000; Texas and Pacific, \$166,000—increase, \$27,000; Wabash, \$309,000—increase, \$19,000; Baltimore and Ohio South Western, \$149,000—increase, \$6,000; Chesapeake and Ohio, \$241,000—increase, \$11,000; Louisville and Nashville, \$466,000—increase, \$40,000; Missouri Pacific, \$578,000—increase, \$24,000; New York Ontario and Western, \$62,000—decrease, \$5,000; St. Louis and San Francisco, \$142,000—increase, \$3,000; St. Louis South Western, \$143,000—increase, \$12,000; Southern Railway, \$508,000—increase, \$39,000; Norfolk and Western, \$274,000—increase, \$35,000; Oregon Railroad and Navigation, \$217,000—increase, \$28,000.

Fourth week of September.—Northern Pacific, \$923,000—increase, \$52,000; Cleveland Cincinnati Chicago and St. Louis, \$432,000—increase, \$51,000. The gross earnings of sixty-two roads in the fourth week of September show an increase of 6.84 per cent.

Month of September.—Illinois Central, gross, \$2,319,000—decrease, \$27,000.

Month of August.—Illinois Central, gross, \$2,372,000—increase, \$196,000; net, \$691,000—increase, \$121,000. Pacific Coast Com-

pany, gross, \$454,000—decrease, \$37,000; net, \$115,000—decrease, \$49,000. Pacific Mail Steamship Company, gross, \$444,000—increase, \$113,000; net, \$232,000—increase, \$130,000.

### RAILROAD NOTES.

The Baltimore and Ohio has lost control of the Pittsburg and Western, which the Lake Erie and Western has just bought. The Baltimore and Ohio has had a preponderant interest in the company since 1891, and the road was one of those whose relations with the general system were left over for subsequent treatment when the last reorganisation plan was brought out in June. The Pittsburg and Western will form an important eastern extension of the Erie and Western's lines.—*Financial Times*.

President Callaway, of the New York Central, in the course of an interview on Thursday, said:—"The movement of freight in the west indicates a healthful permanent prosperity. All people are in much better spirits than they were last spring. Of course, there are the rate troubles, and there is not much chance of harmony until a federal law is passed giving the railroads power to adjust their differences on a pooling basis. The eastern lines will naturally feel the effects of the western rate troubles."

A New York correspondent, telegraphing on Thursday, says:—"I can state, on the authority of an officer of the Northern Pacific, that the fight between the Morgan and Hill factions has been settled so far as the payment of a dividend on the common is concerned. A quarterly dividend of 1 per cent. will be declared in November. The controversy still continues, however, regarding the through business on the Oregon short line as affecting the Northern Pacific and the Great Northern."

At Monday's meeting of the Western Trunk Line Committee an examination of the tonnage statements showed that two roads were carrying over 50 per cent. of all business from Kansas City to Chicago. This statement is regarded as absolute evidence of rate cutting. Both the lines were fined for violating the agreement to maintain rates, but it is claimed that the fines will never be paid, as the association is not strong enough to enforce payment.

The arbitration committee recently selected to determine whether the Canadian Pacific is entitled to a differential over the American roads on freight traffic from the eastern cities to California met on Wednesday. The American railroads selected Vice-President Stubbs, of the Southern, to present their side, and the Canadian Pacific's arguments are supported by Freight Traffic Manager Bosworth and Western Traffic Manager Kerr.

The report of the Alabama Great Southern Railway Company, Limited, for the year ending June 30th, states that an interim dividend on the A preference shares of 3 per cent. was paid in June, and the directors now recommend a further dividend at the same rate, payable in December next. These two amounts will absorb 39,212l., leaving 52,844l. to be carried forward.

The Great Northern has declared a quarterly dividend of 1½ per cent. on the preferred stock, increasing the annual rate to 7 per cent. The previous amounts have been 6 per cent. in 1897-8 and 5 per cent. from 1891-2 to 1896-7. The usual 6 per cent. has also been declared on the St. Paul Minneapolis and Manitoba stock.

The report of the Great Northern Railway for the year ended June 30th shows gross earnings, \$25,021,000—increase, \$3,285,000; net earnings, \$11,552,000—increase, \$3,046,000; net income, \$13,076,000—increase, \$3,905,000; surplus over dividends, \$5,162,000—increase, \$3,623,000.

Last week's east-bound all-rail freight tonnage from Chicago amounted to 63,000 tons, the Panhandle system leading with 11,000. Last year in the corresponding week 46,000 tons went forward.

A director of the Chicago Burlington and Quincy says that there is no truth in the reports circulated that President Perkins was about to resign his position.

The Pennsylvania Railroad has sold to Messrs. Kuhn, Loeb, and Co. \$3,000,000 of a 3½ per cent. car trust loan, repayable in ten yearly instalments.

The Northern Pacific Railway Company announces a quarterly dividend at the rate of 4 per cent. per annum on the preferred shares.

The *Railway Age* estimates the construction of new track during the first nine months of the year at 2,200 miles.

No decision has yet been delivered by the Supreme Court in the Joint Traffic Association suit.

The Union Pacific Railway Company has assumed control of the Oregon Short Line.

## General News.

### PROPOSED NEW RAILWAY FOR COVENTRY.

At a meeting of the Coventry City Council, on Tuesday, the town clerk read a letter he had received from Mr. J. F. E. Barnes, C.E., of Dorchester, setting forth the project of a new line, to promote which, the writer said, steps were intended shortly to be taken, and which proposes to open out a direct route from Reading and districts south thereof to Coventry, Nuneaton, Burton-on-Trent, Birmingham, Wolverhampton, Stafford, Liverpool, Manchester, the North, and Scotland, and *vice versa*, to connect the towns of Reading, Bicester, Brackley, Coventry, &c.; to open out new districts and develop their resources. Commencing by a junction with the South Eastern and London and South Western Joint Railway at Early Station, the line—about 78 miles in length—would run through Reading, Cuddesdon, Bicester (effecting junction there with the London and North Western Railway), Brackley, Byfield, Priors Hardwick, Southam, Birdinbury, Stretton-on-Dunsmore, Ryton-on-Dunsmore, and terminate by a junction with the London and North Western Railway at Coventry. The line would unite three of the principal lines in the kingdom—viz., the South Eastern, London and South Western, and the London and North Western, and open up a short and direct route, and bring Reading and districts south thereof into direct communication with Coventry, Birmingham, and the North. The local districts, moreover, to be served by the railway would be brought into direct communication, and the vast traffic proposed to be accommodated, instead of going, as was now the case, by circuitous routes, would pass over the short and direct route afforded by this line. The connection would ensure a considerable saving of mileage, and greatly increase railway accommodation to the general public; the line would, moreover, place the whole district served by it in direct communication with Reading, Guildford, &c., on the one hand, and Coventry, Nuneaton, Birmingham, Wolverhampton, &c., on the other. The advantages of good railway accommodation to mill-owners, residents, farmers, and traders were, of course, universally admitted, and there was hardly a person in the districts named to whom the line, when constructed and opened, would not afford some benefit. Mr. Barnes added that he should be glad to know the views of the Coventry Council, and whether they would take an interest in and assist in its promotion, and pass a resolution in favour of the line. On the motion of the Mayor, Mr. Barnes's letter was referred to the General Purposes Committee for a report.

### "A CANTANKEROUS ACTION."

At Southwark County Court last week, before Judge Addison, Q.C., an action was brought by Mr. Charles Wreford-Brown, solicitor, of Fenchurch-street, and Chilworth-street, Paddington, against the London and South Western Railway Company to recover 4s. 6d., the amount paid for cab hire in consequence of one of the defendants' station-masters closing a station entrance at least three minutes before a train was advertised to start.—Mr. PROBYN, who appeared for the plaintiff, said that the point involved was a very important one to the public. Should his Honour decide against the plaintiff, he would ask for leave to appeal. Plaintiff, who was a season ticket-holder, was on June 18th playing cricket at New Malden. He had an important engagement at Epsom in the evening, and drove from the cricket ground to Worcester-park Station to catch a train which was advertised in the company's time-table to leave at 6.59. He arrived at the station some nine minutes before the train was advertised to start, and, finding he had time to spare, deposited his luggage and went about 100 yards from the station. He returned at 6.56 or 6.56½, but found the door locked. The train was then approaching the station, being about 200 yds. distant. Plaintiff kicked and hammered at the door, but was not admitted, and, to his chagrin, saw the train leave. When the door was opened he remonstrated with the station-master, but was told by that official that he could close the door when he in his discretion thought fit. Plaintiff, in order to fulfil his engagement, was obliged to drive to Epsom in a cab. Mr. BANCELLOR, defendants' counsel, said he relied on the conditions published in the company's time-tables:—"The doors at the station may be closed five minutes before the departure of each train." Mr. PROBYN argued that the condition was unreasonable, and that it was not sufficiently brought to the

notice of the passengers. His HONOUR remarked that nothing could be more fair and reasonable than the conditions named. It was for the benefit and safety of the public, especially at a station where there was a level crossing, as in this case. This was a cantankerous action, and he gave judgment for the defendants, with costs on the higher scale. Mr. PROBYN asked for leave to appeal, but His HONOUR refused.

#### CENTRAL LONDON RAILWAY.

A party of the members of the Society of Engineers on Tuesday paid a visit to the works of the Central London Railway, at which great progress is now being made. Among those present were Mr. W. W. Beaumont (president), Mr. Henry Adams (past president), Messrs. J. C. Fell and Charles Mason (vice-presidents), Messrs. J. Patten Barber, J. Bernays, G. Burt, P. Griffith, and R. St. George Moore (members of the Council). The party entered the railway by the Post-office Station in King Edward-street, Newgate-street. This is about 80ft. below the surface. On account of the small amount of space in which the contractors have to work, this station, like a few others along the line, is in two parts, one being almost above the other. The clay displaced by the laying of the tunnels is brought up the shafts, which in the completed work will give passengers access to the line, and is carted off. Down these shafts also go the iron lining for the tunnel, the lime and cement for behind the lining, and the bricks. It is estimated that about sixty loads per day of twenty-four hours are sent down at each station. With this rapidity, and with men working day and night, there is every reason to expect the line to be in working order by next autumn. The shields—the machines by which the smaller tunnels for the lines and the larger tunnels for the stations are made—were watched in operation and explained. The rail level in the stations will be on the average 10ft. higher than the main length of the line. On entering a station a train will have to go up a gradient of one in sixty for about 600ft.; on leaving it will descend at a gradient of one in thirty for a distance of about 300 yards. The figures along the line in this respect vary somewhat, but these may be taken as general.

#### ABERDEEN JOINT STATION.

A public meeting, called by the Lord Provost, mainly at the instance of the Aberdeen branch of the Commercial Travellers' Association, was held in the Town and County Hall, Aberdeen, on the 7th inst., to make protest against the inadequacy of the joint passenger station at Aberdeen. The large hall was filled, gallery included, a large proportion of business men being of the audience. The Lord Provost presided. The following resolutions were carried unanimously:—(1) "That this meeting of citizens of Aberdeen considers that the Guild-street Joint Passenger Station has become totally inadequate for the safe and regular working of the passenger traffic now carried on by the railway companies, and desires to record its protest against the unreasonable delay on the part of the companies interested in providing sufficient accommodation to meet the requirements of the large and increasing traffic." (2) "That the following deputation be appointed to wait upon the Joint Station Committee, and convey to them the protest of this meeting embodied in the first resolution, and strongly urge upon them the necessity for having an adequate and comprehensive scheme of station improvement carried out without further delay, namely:—Lord Provost Mearns, Mr. D. V. Pirie, M.P.; Mr. J. W. Crombie, M.P.; Baillies Edwards, Lyon, and Sangster; Councillor Glass; Messrs. Robert Grant, G. B. Esslemont, John Leith, Henry Gray, Thomas Ogilvie, John Mackie, G. J. Shephard, A. R. Gray, Alexander Copland, George Gordon, John Graham, William Murray, G. G. Walker, and D. Hutcheon Duthie."

#### BURMA RAILWAY EXTENSION.

The Administration Report on Indian Railways for the official year ending March 31st last has now been published in England by order of the Secretary of State. As a rule the report is printed in India, and then reprinted, regardless of expense and delay, in London; but this time the title-page states that the printing has been done but once, and at Simla. The following particulars are given of the Mandalay-Kunlon section of the Burma railway—the line which, it is hoped, may ultimately tap a share of the produce of South-Western China:—"Work was in progress in April, 1897, on the first four divisions of the railway (up to mile 200), but in August, owing to the delay caused by the suspension of work at the Gokteik Gorge, it was not considered advisable to carry on works too far ahead, and the fourth division was abolished, construction being restricted to the length between Myohaung and Lashio (180 miles). In July, 1897, orders were received from the Government of India to restrict expenditure as far as possible. This restriction was removed in January, 1898, and since then

every effort has been made to push all works as rapidly as possible. Fair progress has been made throughout, and by the end of the current working season the formation between Myohaung and Thibaw will be practically completed, with the exception of the gap of 6½ miles at the Gokteik Gorge. The formation between Thibaw and Lashio will also be nearly completed. Beyond the gorge all the bricks that will be required have been manufactured, and work started on one major and fifty minor bridges. The bridging on the first two divisions, up to Nammaw Station, mile 73, was in hand, and will be completed before the rainy season begins. The first section of the railway, from Myohaung to Sedaw, 13 miles, has been worked for goods traffic since January 1st, 1898. The difficulty experienced last year in getting labour for the rock cuttings and tunnels has been overcome by training the Burmans to do it by piece-work, and it has not been necessary to import any labour from India this season. The Salween survey division party completed 13 miles of survey at the most difficult portion of the Salween Gorge and a reconnaissance map of the river to Kunlon, when it was recalled in April to carry out the realignment at the Gokteik Gorge."

#### THE FRENCH RAILWAY STRIKE.

A circular was issued on Thursday by the Railway Men's Union ordering a general strike to begin yesterday (Friday). The circular states that the object is to obtain higher wages, shorter hours, and a right to a pension for every class of railway servant. Work is not to be resumed until all these points have been conceded, and only after a number of employes who have been recently discharged in consequence of their connection with the union have been reinstated. The circular enjoined the men to refrain from acts of violence. Posters were addressed to the public, stating that, should any danger threaten the country, all the strikers would return to their posts immediately. M. Guimbert, president of the General Federation of the Engine-drivers and Stokers of France, has addressed a communication to the men, protesting against the strike voted by the Railway Servants' Union, declaring it to be criminal and injurious to the interests of the country. M. Guimbert appeals to the men's sense of duty, and calls upon them to remain on their engines, and to trust in the power of the law. Visits have been made by the police at the dwellings of certain members of the railway men's union. Among the papers seized were letters from the provincial sections pronouncing against a general strike. Proceedings have been ordered against the Council of Administration of the Union of Railway Workers of France and the colonies for infraction of the law of 1884 relative to trades unions. The council will be declared illegal, and will be disbanded. All the railway stations in Paris were occupied by soldiers during Thursday night, but yesterday the city wore its normal aspect. The authorities at the Northern Railway declared that none of their employes had left work. All the employes were at work at the Orleans Railway Station. The train service on the different lines is working in the ordinary way, and the companies report no defections from the ranks of their employes. Despatches from the provinces state that military measures had been taken to protect the railways, and that the men were at work. A marked falling-off in the passenger traffic, however, was noticeable at all the stations.

#### SHUNTING SIGNALS FOR PASSENGER TRAINS.

Lieutenant-Colonel Yorke has reported to the Board of Trade the result of his inquiry into the collision that occurred on August 22nd at the Caledonian Railway Company's high-level Central Station in Glasgow. About twelve passengers complained of cuts and bruises, but the injuries were said not to have been severe. The inspector finds that the collision was clearly due to the mistake made by a driver starting from a platform while the signals were against him. It appears, says the inspector, "that the custom is to employ shunting signals for the departure of trains from this station when the line is clear only as far as the advanced signals at the river bridge, a distance of about 200yds., and to use the semaphore signals when the line is clear beyond these signals as far as the next block box. The practice of employing shunting signals for controlling the departure of passenger trains, on to a main line is, in my opinion, undesirable. A shunting operation is totally distinct from the movement of a train on its journey, and a shunting signal being, as its name implies, intended to control shunting operations, should only be used for its legitimate purpose. It would, I consider, be better for the semaphore signals to be used for all trains departing from this station, it being understood that these signals only authorised drivers to draw down to the advanced signals, their further progress being controlled by the latter. The shunting signals or discs would then only be used for shunting operations or the movement of empty trains and light engines."

## THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Tuesday, are shown hereunder:—

Making-up Price.			Stock.	Continuation rate.
Sep. 13.	Sep. 27.	Oct. 11.		
152½	151	149	Caledonian .....	—

## FOREIGN AND COLONIAL ITEMS.

An interesting article on the Chinese Railway Situation appeared in the *Investor's Review* of yesterday.

The Russian Government has signified its disapproval of Count Kapnist's projected railway through Syria, connecting the Mediterranean and Persian Gulfs.

A strike has broken out among the native labourers employed in the construction of the Congo Railway. It has now spread along the line as far as Songolabo at the 94th kilometre.

The 420,800l. debentures of the Bechuanaland Railway Company which were offered for subscription the other day, have, it is officially stated, been considerably over-applied for.

The Turkish Minister of Public Works has presented plans to the Sublime Porte for the construction of certain narrow-gauge lines in Turkey. Lines which are to unite Constantinople with Bagdad, and Salonica with Janina, are, however, to be constructed on the ordinary gauge.

Messrs. A. and W. Ricardo, 62, Copthall-house, Copthall-avenue, E.C., notify that the forty-fifth dividend, being 8 per cent. for the year ending June 30th, 1898, upon the preference shares of the Norwegian Trunk Railway will be paid on and after October 24th at their offices as above.

There is some talk of an attempt being made to construct a line of railway from Boma, on the coast of Lower Guinea, and in such a line as to tap the hinterland of the Portuguese territory of Landana, Cabenda, and Massaba, and thence the French possessions, the line to be built by Belgians.

The survey of the Burma-Yang-tze Railway is expected to begin shortly. One party starts from Burma and one from Chung-king. The former is under Mr. Bagley, chief engineer of the Salween Railway. Two experienced frontier travellers, Captains Davies and Pottinger, accompany the parties.

The Lençoes extension of the Sorocabana-Ituana (Brazilian) Railway was opened to traffic on the 7th ult. This line is in the zone conceded to the Ituana Company in 1887, and runs through a promising coffee district. Beyond Lençoes the roadbed is completed to Bom Jardim, 13 kilometres from Lençoes, and 400 kilometres from the city of San Paulo.

It is stated that an offer is about to be made by those controlling the Panama Canal to sell the undertaking to the American Government. M. Hutin, their representative, has arrived in New York. He will try to convince the authorities at Washington that it will be cheaper for the United States to purchase the Panama Canal as it stands and finish it than to construct the Nicaragua Canal as lately proposed.

The Cape of Good Hope Parliament was formally opened on Monday by the Governor, Sir Alfred Milner, who in his speech intimated that Bills for the construction of railways in the western, midland, and eastern provinces would be introduced. In the House of Assembly Sir J. G. Sprigg introduced Bills for the construction of railways to Caledon, Somerset East, Piquetburg, Queenstown, Tarkastad, and Willowmore.

There is reason to believe, says the Exchange Telegraph Company, that the award of the arbitrators in the Delagoa Bay Railway dispute will be in the hands of the British, United States, and Portuguese Governments by the end of the present year. M. Heusler, one of the arbitrators, to whose serious illness much of the delay in the proceedings has been due, has now completely recovered, and will, it is stated, resume his duties at once. The order for the preparation of the *résumés* of the cases, which will be the final step preparatory to the delivery of the award, has not yet been received.

Messrs. Antony Gibbs and Sons announce that the trustees of the Jamaica Railway have received from their attorney in Jamaica the following cable message:—"We have taken possession as your attorney." This implies that the various impediments previously met with have been surmounted, and the bondholders are now in possession of the railway. A meeting of the bondholders will now be called at an early date, and they will then have an opportunity of exercising their option to exchange their railway bonds for inscribed 3½ per cent. Jamaica Government stock in accordance with the railway law.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected COCOA, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homoeopathic Chemists, London."

### STRONGEST LIFE OFFICE IN THE WORLD. THE EQUITABLE LIFE ASSURANCE SOCIETY of the UNITED STATES.

- Nov. 2—West Flanders Railway (Half-yearly), 10, Moorgate-street, E.C., at 2.

**Proposed New Railways in Pembrokeshire.**—The route for the new railway from Jordane, on the North Pembrokeshire and Fishguard line to St. David's, is being pegged out and the land acquired, so that the date of the formal cutting of the first sod will shortly be announced. The Fishguard Pier Railway is fast approaching completion, and the connection between it and the new line, which has been brought to Goodwick, will be made in about two months' time, so that Fishguard will then be in direct communication with the main Great Western Railway. Directly that is accomplished operations on the harbour, pier, and breakwater will be commenced and pushed forward rapidly. Meanwhile an inner shelter or small pier is near completion. The Great Western Company's engineers have almost completed the arrangements for commencing the loop line, which is to be made to avoid the heavy gradient between Maenclochog and Clynderwen.

## The Railway Times.

Established 1837.

OCTOBER 15, 1898.

## THE RAILWAYS AND THE ARMY.

Our monthly contemporary, the *United Service Magazine*, publishes in its October number an interesting article dealing with the part played by the railways in the recent manoeuvres on Salisbury Plain. Some time ago we pointed out the financial benefits likely to accrue to the companies in general, and to the South Western in particular, from the great exhibition of military activity which it is understood will now become an annual feature. Judging from the traffic increases of the lines principally concerned, it would seem that our anticipations were not incorrect, and the hint given in these columns was made the reason for a rise in the quotation of South Western securities, which has been well maintained. Our contemporary, however, takes less sordid and, we are willing to admit at once, higher ground in discussing the recent connection of the army and the railways as a matter intimately bound up with the question of national defence. It is gratifying to hear from a recognised organ of military opinion that the trust reposed in the "skilful management and material resources" of the English railway system has been so thoroughly justified by results. The concentration, supply, and dispersal of a force of some 50,000 men in a remote corner of the country was certainly a businesslike test of the arrangements which would accompany the mobilisation of all our military resources to repel an invader. On the Continent, of course, the procedure at such a crisis is to practically transfer the control of the railways from civil to military hands. The danger of such a course is obvious. Complicated work, technical to the highest degree, and requiring for its successful issue the application of an extended experience, is transferred, or liable to be transferred, more or less, wholesale, into the hands of those who, through no fault of their own, cannot be other than amateurs. The military authorities in this country appear to have recognised this, and the establishment of the Volunteer Railway Staff Corps met the objections of military etiquette and red-tape by turning our general managers into soldiers and vesting them with a high military authority. In matters of troop movements by rail the barest essentials are laid down by the military authorities, and the whole detail of arrangements on which the comfort and even, as we venture to think, the military efficiency of the operation depends, is left to the railway service. It would, perhaps, be ungracious to read into the appreciative remarks of the *United Service Magazine* a suspicion of surprise at the complete understanding of military requirements evinced by the civilian railway officials. It is sufficient to note that the avowal of that understanding is complete. And since such matters are generally reciprocal, it is not out of place to remark, as we may, that the qualities of mutual forbearance and consideration were not less marked on one side than on the other. This is no mean lesson of the manoeuvres, and augurs well for the day when two great services, the railways and the army, may have to pull together for their country.

## THE HIGHLAND RAILWAY.

In dealing with the Highland report for the half-year to February 28th last we remarked that it was far from being out of its difficulties. In the report for the half-year to August 31st just to hand our anticipation finds a reflex in

the decline in the ordinary dividend from 2 per cent. per annum to a 1 per cent. rate, and the price, which was 82 on April 16th last, when we wrote, is now only 69—the lowest yet touched. It is not many years ago that Highland ordinary stood at nearly double this figure, but that was when dividends were being maintained at a fictitious level by a too free encroachment upon capital funds. The dividend for the entire year to August 31st is now reduced to only  $\frac{3}{4}$  per cent., which represents a very meagre return on the stock, even at its present depreciated level. It is true that the balance carried forward (21,038*l.*) is double that carried forward at this time last year, and is equal to nearly 1 per cent. on the ordinary stock, but precautionary measures are necessary in order to ensure that the full dividends on the preference stocks are paid in full for the current period, which is the poorer half-year in the case of the Highland Railway. The heavy capital works which this company has had on hand for a long time have necessitated the raising of large amounts of preference capital. In the past half-year a new charge of 5,250*l.* in respect of 300,000*l.* new preference stock had to be met. On November 2nd, 1897, the Strome Ferry to Kyle line—10 $\frac{1}{2}$  miles—was opened for traffic, and it is hoped that the second and final portion of the Inverness and Aviemore direct line between Daviot and Aviemore—a distance of 10 $\frac{3}{8}$  miles—will be opened on the 1st proximo. Whilst this line will facilitate the handling of traffic from Perth and the south to Inverness and beyond, the financial results to the Highland are not likely to be advantageous. The line will not open up an area likely to yield any local traffic of importance, and it will reduce the mileage payable to the Highland on through traffic, whilst there will be a considerable addition to the length of road to be worked and maintained. For the half-year under review the company managed to secure an increase of 7,000*l.* in gross receipts; but working expenses, at the high rate of 61·24 per cent., absorbed 8,330*l.* additional, leaving the net revenue rather lower, and this, notwithstanding a reduction in Parliamentary expenses of 5,574*l.* Even now it does not appear that the company has come to the end of its troubles. One very ugly feature in the balance-sheet is 30,347*l.*, representing suspense accounts—a large portion of which sum, at least, will have to be provided out of future revenue. The auditors in their certificate only approve of the accounts “subject to the formation of the new suspense accounts in the balance-sheet.” It would appear, therefore, that the company has yet to suffer further for the misdeeds of the past.

### THE FORTUNATE SOUTH WESTERN.

The announcement that Mr. Frederic Macaulay, secretary of the London and South Western Railway Company, has been elected a director of that company by the unanimous vote of the board will be read with gratification by a wide circle of friends in the railway world, and by the general body of shareholders in the company. Mr. Macaulay has been connected with the South Western in various capacities for upwards of forty-eight years, and has during the last nineteen years, with dignity and conspicuous ability, filled the office which he is now vacating. We remember hearing Sir Charles Scotter, at some public function, telling his audience that the officers of the South Western Railway worked together like brothers. If we might carry the illustration further we would say that he and Mr. Macaulay have worked together like twins, and happy should be the board which enjoys the services of two such able, experienced, and energetic workers. The principal of constituting railway boards as far as possible of successful officials is thoroughly sound, and the South Western may now be regarded as a prominent disciple of the new order of

things. In its latest step in this direction the company, the board, and their late secretary are alike to be congratulated, and we can only wish Mr. Macaulay long life and health to enjoy the honours he has earned.

### THE GRAND TRUNK MEETING.

At the Grand Trunk half-yearly meeting on Thursday the president had the satisfaction of pointing to the results then submitted to the stockholders as being the best since 1890. This improvement enables them to resume the dividends on the guaranteed stock, the holders of which have received nothing since 1894, a dividend at the rate of 3 $\frac{1}{4}$  per cent. having been distributed in May of that year, representing the outcome of the second half of 1893. Having in view the fact that for the lean half of 1898 the full dividend of 4 per cent. is to be paid, the progress made by the company since 1893 is indeed marked, especially bearing in mind that in the interval there have been years in which the company came a long way short of earning its fixed charges. One feature of the working last half-year to which Sir Rivers Wilson referred with evident satisfaction was the reduction of the ratio of working expenses from 70·84 to 66·46 per cent. since the present board had come into office. This reduction, too, the president believes has come to stay. Both he and Mr. Joseph Price, the vice-president, have recently inspected the system and found the permanent way and rolling stock in first-class condition. Regarding the charges made, and still to be made, against revenue on account of the Victoria-bridge at Montreal, it is satisfactory to note that a saving in maintenance is to be looked for of probably nearly 4,000*l.* a year, and that for this an addition to income from tolls approaching 5,000*l.* per annum is expected when the new structure is completed. The new arrangements with the Wabash Company are found to be working satisfactorily, and the recent repayment of the Hamilton and North Western bonds will effect a saving in interest of 8,000*l.* per annum. As we have before pointed out, eventual savings of about 40,000*l.* per annum can be looked for during the next few years if the credit of the company remains at its present satisfactory level. The president evidently thinks the outlook is encouraging, though no indication was given whether the policy of the board is to be the payment of the fullest possible dividends, or otherwise—a question which we referred to last week. In every respect the position of the company is satisfactory except in reference to the rate question outstanding with the Canadian Pacific. In the report the hope was indulged in that harmony would be restored regarding the local rate-war, but on Thursday last Sir Rivers Wilson regretted that “he had no message of reconciliation and peace to bring from their neighbours,” and the situation at present does not point to an early settlement. The offer of arbitration put forward by the Grand Trunk has been declined, and even the settlement of the transcontinental war seems to have failed to smooth the way to an agreement. The Grand Trunk would appear to have the best case, and the “C. P. R.” has apparently failed to perceive that its rival is not so easily bullied as in the old days. The local war grew out of the transcontinental struggle, as the Canadian Pacific was incensed because the Grand Trunk had assisted its Pacific rivals in that business, and retaliated by cutting local rates. But as the Grand Trunk is very largely dependent on the traffic handed over to it at Chicago by the American roads for east-bound points there was no alternative for it but to assist its patrons, apart from the rights of the two parties to the struggle. As we have before pointed out, the charges thus brought against the Grand Trunk are really too absurd

for serious discussion. It was with a very bad grace that the Canadian Pacific gave up its claim to "differentials" on Pacific traffic, and apparently it is simply showing its resentment by declining to consider the matter in a business-like way. The refusal to arbitrate on the suggestion of the Grand Trunk seems to strengthen this view of the case.

### BUENOS AYRES GREAT SOUTHERN RAILWAY.

The report of the Buenos Ayres Great Southern Railway for the year ended June 30th last, to be submitted to the proprietors on the 20th inst., is an exceedingly satisfactory document, and fully bears out the anticipations expressed in these columns some time ago as to the prospects of the company. The improvement materialises in the shape of an augmented dividend—6 per cent. on the ordinary stock for 1897-8, as against  $5\frac{1}{2}$  for the preceding year. This rate is the best since 1890-1, and represents the outcome of a steady improvement in the fortunes of the company since 1893-4, when, owing to the high gold premium (251 per cent.), it was necessary for the company to fall back upon its reserve fund to the extent of 90,000*l.*, in order to maintain its dividend at 5 per cent., which rate, throughout the period of adversity which culminated in that year, the company had been able to regard as a minimum. For several years past, in addition to advancing its dividend, the company has prudently set aside considerable sums for addition to its reserve fund. In 1897-8 this course is again adopted, and 100,000*l.* is added to that fund, bringing it up to the handsome total of 475,000*l.* Though only 6 per cent. is paid for last year, the actual earnings amounted to rather over 7 per cent., whilst the accumulated amount of the reserve is equal to  $5\frac{1}{4}$  per cent. on the ordinary capital. A further record is made by the company as regards both gross and net revenue. The same cannot, unfortunately, be said regarding the dividend, for we have only to go back to 1889-90 to find that 10 per cent. was being paid. Since then the loss to the company through the depreciation in currency earnings has prevented its gross receipts and its net profit from advancing in the same ratio as the extension of its system and the capital outlay involved therein. Whilst in 1888-89 the average receipts per mile were 1,572*l.*; in 1893-4 they had sunk to only 748*l.*, a diminution of over 50 per cent. Since that year there has, of course, been a steady increase, and last year the receipts were 1,019*l.* per mile of line open. This circumstance will explain how it comes about that in a record year of net profits the dividend is so far from being the best in the history of the company. Though there has been a sharp decline in the average rate received per passenger and per ton, the receipts per train mile have actually advanced, and the ratio of working expenses is reduced. These are clear and unmistakable signs of capable management. In 1888-9, for instance, the average rate per passenger was 3*s.* 8*d.*, and per ton of goods it was 1*l.* 0*s.* 1*½d.* In 1897-8 these rates had dwindled to 2*s.* 3*½d.* and 1*s.* 8*½d.* respectively. But the profit per train mile advanced from 6*s.* 8*½d.* to 7*s.* 5*½d.*, and the ratio of expenses was reduced in the same period from 48·64 to 38·49 per cent. Last year the increase in receipts was 118,355*l.*—an advance of 8·45 per cent. compared with 1896-7. Of this, 27,688*l.* was derived from passengers and 74,305*l.* from goods. The latter figure was very satisfactory, bearing in mind the large decline in the receipts from the transportation of cereals. The quantity of wheat and maize carried in the year declined by 23·30 and 60·58 per cent. respectively. This was due to the locust ravages among the 1897 crops and the lateness of the 1898 maize crop. The latter is now moving, and it is anticipated that a large traffic will

result. Certainly the fact that there is a growth in traffic this half-year of 52,629*l.* for only fourteen weeks points to a very favourable result; for if this rate of increase continues throughout the period, the addition to gross revenue for this half-year alone will be almost equal to that secured in the whole year 1897-8. At the same time, it should not be overlooked that at the present time the company has in operation on revenue account 127 more miles than it had a year ago. This is in addition to about 217 miles representing part of the Neuquen extension, which are also open for traffic, but are being operated on capital account until completion of the entire line (350 miles). These large extensions have of course entailed a heavy capital outlay, and from a statement contained in the present accounts it appears that works in progress at June 30th last had involved a total outlay of 2,040,221*l.* The issue of extension shares to the amount of 2,250,000*l.* has provided all needs up to the present, and left a credit balance on capital account of 308,699*l.* As a further sum of 1,625,562*l.* had still to be paid in respect of instalments of this issue, the company will have plenty of funds to meet its future needs. Further, this 2,250,000*l.* of capital will not rank for dividend out of earnings until 1902, when it is expected that the new extensions will be yielding satisfactory results. The report refers to the fact that the results of the Neuquen Extension, so far as it is open, are in excess of the estimates. In various directions the Buenos Ayres Great Southern is extending its interests, but although the new ventures entail a certain amount of risk, there is every reason to believe that all of them will ultimately turn out well, and that the company will continue to show that progress which has marked its career since 1893-4.

### NORTHERN PACIFIC RAILWAY.

Attention in the American market has been mainly directed of late to Northern Pacific issues, and in New York the transactions in these specialities bear quite a large proportion to the entire volume of "business done." On this side, too, the stocks of this road have had a large share of attention, though at declining prices. Weakness, primarily developed on selling from Berlin, which seems to have been carrying a too heavy load of Pacific and other stocks and from the close association of the Deutsche Bank with the Northern Pacific, the issues of that road have been especially favoured by German investors. Owing to stringency in the money market, the banks in Berlin have been constrained to reduce their facilities for financing speculators, and considerable blocks of stocks had therefore to be realised. At the same time, the rumoured dissensions on the board to which we referred last week have developed to a somewhat acute stage, and have assisted to bring about the weakness recently shown. The situation is rather a pretty one, and withal extremely characteristic of American railroad methods. Some parties having large interests in the road are anxious that a speedy dividend should be declared on the common stock. The "Hill" crowd are opposed to such a payment, as apparently it would not suit their book. It may be remembered that one feature of the Northern Pacific reorganisation and the successful operation of the road ever since was the co-operation afforded by President J. J. Hill of the competing Great Northern system. That gentleman seems to have been allowed to have a finger in the reorganisation pie on the consideration that the competition of the Great Northern—the Northern Pacific's most dangerous rival—were withdrawn, or, at all events, restrained. This, of course, was a great "bull" point for the reorganised Northern Pacific, and we believe that the exceptionally good revenue results of that road last year were in large part directly due to this understanding between

the two rival administrations. Incidentally we may point out that another outcome was the fight which took place between the American Pacific roads and the Canadian Pacific regarding "differentials," in which the latter had at last to give way. The Canadian Pacific Railroad had previously been able to some extent to play off the American roads one against the other, for though the Northern Pacific, the Union Pacific, and the Great Northern had a unanimous dislike for the Canadian enterprise their own mutual jealousies prevented their taking combined action. Having by the temporary aid of his erstwhile rivals secured this victory over the Canadian Pacific, as well as having perhaps realised his interest in the Northern Pacific on satisfactory terms, Mr. Hill is doubtless inclined to "turn round." The worst of it is that he is in a position to enforce his views, for, whilst the Northern Pacific has been doing well of late, a rate war instituted by the Great Northern would put quite another complexion on the matter. We showed in our article of 1st inst. that the Northern Pacific was earning on paper  $3\frac{1}{2}$  per cent. on its common stock. But we also showed that working expenses were shaken down to an unduly low level, and there are indications that the road was being "skinned," to say nothing of the temporary relief given to revenue by capital funds provided under the reorganisation. Then, as the gross results were aided last year by exceptional crops, by the restrained competition with its neighbour, and by the rush to Klondike, there are grave reasons for doubting the ability of the Northern Pacific to maintain such figures as those shown in 1897-8, which, so far as net earnings were concerned, constituted a record. Had the Northern Pacific paid a reasonable rate of working expenses, say 65 per cent. out of revenue, it would have had nothing to divide on the common stock, and would actually have come short of earning its full dividend on the 4 per cent. preferred stock. Under the circumstances there is little wonder that the prices of both the preferred and the common have considerably declined. The former, which not long ago was quoted at  $82\frac{1}{2}$ , has this week fallen to 77; and the common, after touching 44, has fallen to 40.

### RAILWAY DEVELOPMENTS IN CORNWALL.

The present decade has witnessed great progress in the development of railways in the remoter districts of South-west England, and we have from time to time had occasion to note the various extensions of the London and South Western system, and those improvements which have gained for the Cornish service of the Great Western Railway the well-earned reputation which it to-day possesses. We have now to direct attention to the prospect of another advance in the immediate future. For many years there has been railway communication between Liskeard and the old Cornish port of Looe, but, inasmuch as there is no junction between the local line and the Great Western Railway at the first-named place, Looe still remains comparatively inaccessible, notwithstanding the fact that it has something like 3,000 inhabitants, and possesses a combination of natural attractions rare even in Cornwall. The present railway from Liskeard to Looe was constructed in 1858 by a company who previously owned the canal between the two places. The gauge is 4ft.  $8\frac{1}{2}$ in., and the ruling grade is 1 in 100. The Liskeard terminus is at Moorswater, 2 miles from the Great Western Railway station. From Moorswater a separate company owns a railway running up to the Caradon mining district. The length of line from Looe to Moorswater (Liskeard) is 7 miles, and the line from Moorswater to the Caradon mines is 9 miles long. The Caradon Railway

in its early days paid well, and an agreement was entered into between its directors and those of the Looe Company for working the two undertakings as one, under the management of the first named. Unfortunately, owing to the closing of the mines, the Caradon line has become quite unprofitable, and this has had a most detrimental effect on the dividends of the associated railways. Under a new Act, which the Liskeard and Looe Company obtained in 1895, the existing working arrangement with the Caradon will be annulled as soon as a junction with the Great Western at Liskeard, authorised by the Act, is completed. The original capital of the Looe Railway was 26,000*l.*, of which 13,000*l.* were debenture mortgages. The Act of 1895 authorises additional capital to the extent of 30,000*l.*, and this has already been subscribed. Amicable relations have, moreover, been established between the local lines of the Great Western Railway, and there is nothing now to prevent satisfactory progress being made as soon as the junction already referred to is opened. The work in connection with the junction is well in hand, and will be finished in a few months' time, and when completed the Looe trains will run to and from the Great Western station at Liskeard instead of to the present terminus at Moorswater, 2 miles distant. The number of passengers conveyed by the Looe line now averages about 25,000 a year, and when it is remembered that this traffic must of necessity be almost purely local, a very appreciable increase may be anticipated on the railway being put in connection with the Great Western system. As yet tourist traffic to Looe is entirely undeveloped, and, judging by the success which has attended the enterprise of the Great Western Railway in opening up Newquay, still greater things may be expected of Looe, with its more varied attractions, if the same policy is adopted. Looe is an old-fashioned town, quite unspoiled by the stamp of modernity, but this, from a tourist's point of view, might not be without its disadvantages, as far as accommodation is concerned, were it not for the fact that the same syndicate which has subscribed the greater part of the new capital for the railway has also engineered a road round the scarp of the west cliff, and so made available an extensive building estate, where, hidden from the old town, several comfortable villas have been built. Furthermore, Plymouth and Devonport people will be glad to make use of the new railway service, because at present, although Looe is popular with them as a week-end holiday resort, the journey there is tedious and expensive. To the public at large the Liskeard and Looe Railway does not offer a field for investment, for, as we have already remarked, the new capital has been subscribed, and it is not to be anticipated that much stock will change hands in the near future, except perhaps locally. Nevertheless, the action of the Great Western in co-operating in the development of the place is of general interest, because it tends to show that the enterprising policy of their management, which has already proved advantageous to their shareholders, is being steadily, if quietly, pursued.

### PASSING NOTES.

The traffic receipts for the week ending October 9th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,794,335*l.*, which was earned on 19,253 $\frac{1}{4}$  miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,717,927*l.*, with 19,034 $\frac{1}{4}$  miles open. There was thus an increase of 76,408*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for fifteen weeks to date amounted on the same thirty-three lines to 27,918,170*l.*, in comparison with 27,299,816*l.* for the corresponding period last year; increase, 618,354*l.*

The proposal to construct a branch railway to Magilligan Point,

Lough Foyle, with a pier or landing-stage, which was dropped out of the Belfast and Northern Counties Railway Bill a few years ago, was revived at the last meeting of the Coleraine Town Commissioners, who passed the following resolution:—"That the Coleraine Town Commissioners earnestly urge upon the directors of the Belfast and Northern Counties Railway the importance and advisability of proceeding at once to take the necessary steps to enable them to construct the railway and pier at Magilligan Point, and a suitable ferry service to Greencastle, as they believe the opening up of such a route will be of much service to their railway, and will largely benefit the town of Coleraine and surrounding district."

The death is announced of Mr. Arthur Mills, of Bude Haven, and 32, Carlisle-mansions, S.W., a director of the London and South Western, the North Cornwall, and the North Staffordshire railway companies. Mr. Mills, who had reached a great age, took an active part at one time in public affairs, and in December, 1873, was elected Conservative member for Exeter in the vacancy caused by the elevation of Sir John (afterwards Lord) Coleridge to the Lord Chief Justiceship. He was again returned at the General Election of 1874, but was defeated in 1880, and from that time took little part in public affairs.

The Light Railway Commissioners, who visited the Scotch agricultural and fishing districts last month, had up to last week disposed of twenty-nine of the thirty-five applications, thirteen of which have been granted, thirteen refused, two withdrawn, and one postponed, while half-a-dozen have yet to be heard. One application of unusual interest has yet to be considered—namely, the Hebridean Railway, in the islands of Skye and Lewis. This proposed line extends to 97 miles—the longest light railway ever asked for.

At the adjourned special meeting of the Whitechapel and Bow Railway Company, held on Thursday, the chairman explained that the agreement which they had been called together to consider had received consideration at the hands of the companies interested, and its main principles had been agreed to. There were, however, a few minor matters still to be decided, and he moved the adjournment of the meeting to that day four weeks. The motion was agreed to.

An interesting and somewhat unusual ceremony took place on Wednesday at the Southampton Docks, when Mr. W. W. B. Beach, M.P., Provincial Grand Master of Hampshire, performed, with full Masonic honours, the ceremony of placing in position a coping-stone to mark the completion of the deep-water quays in connection with the Southampton Docks. The foundation-stone of the docks was laid with Masonic honours October 12th, 1838—just sixty years ago.

The Midland Railway Company have commenced to remedy the defect which is believed to have been the cause of the recent disaster at Wellingborough. The down main line platform, from which the luggage barrow fell on to the metals in front of the ill-fated express, is being raised to an uniform height of 3ft. along its whole length, and it will slope towards the station buildings instead of in the opposite direction as hitherto.

The No. 2 Dock at Barry, which has been in course of construction since the latter end of 1894, received its first cargo steamer on Monday. The dock has therefore been put in use as soon as the necessity arose. The only official of the Barry Company present was the shipping superintendent, and there was no demonstration of any kind. The tip was used throughout the day, and worked in every way satisfactorily.

A public meeting of ratepayers was held at the Town-hall, Llanelli, on Monday night, in connection with the proposed railway from Llanelli to Pontardulais. The Harbour Commissioners had passed a resolution in favour of becoming promoters of the Bill by contributing the sum of 1,800*l.* towards the costs. A resolution was now passed approving the recommendation of the Harbour Commissioners.

The official trial of the new paddle steamer *Princess of Wales*, the latest addition to the South Eastern Railway Company's

fleet, and built by Messrs. Laird Brothers, of Birkenhead, took place on the Clyde on Saturday last very successfully, the speed realised averaging 19½ knots. The vessel is expected at Folkestone at the end of this week and will be at once put on the Folkestone-Boulogne service.

The promoters of the Renfrew Dock Bill of last session, says a Glasgow correspondent, have definitely decided to renew the application to Parliament in the coming session. The Clyde Trust at the moment is pushing ahead with improvements and should be able to put forward a stronger opposition.

Owing to the heavy rains, the Cork Bandon and West Coast Railway line has been severely damaged. For some distance between Bantry and Drinoleague the ballast has been washed away. At Desart the pile bridge is seriously damaged. No trains are running, and no mails can be delivered.

We are now in the middle of October, 1898, and Messrs. Giffen and Hopwood's report to the Board of Trade on the Railway Returns for 1897 has not yet seen the light of day. We see no earthly reason why this report should not have been ready fully six months ago.

It is generally rumoured in the Maesteg district that the Great Western Railway intend, at an early date, to double the line between Bridgend and Tondy and Tondy and Maesteg, and that the contract has already been given out.

The Board of Trade has recently confirmed the Gower Light Railway Order, 1897, authorising the construction of a light railway in the peninsular of Gower, in the county of Glamorgan.

The directors of the London and South Western Railway Company have unanimously elected Mr. Frederick J. Macaulay to be a director, in the place of the late Mr. Arthur E. Guest.

It is rumoured that the directors of the Great Western Railway are negotiating for the purchase of the Rhondda and Swansea Bay Railway.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 4th prox.; the fortnightly settlement in other Securities commences on the 25th inst.*

CITY, FRIDAY EVENING.

The feature in the MONEY MARKET during the past week has, of course, been the raising of the Bank rate to 4 per cent, for, though a rise was not altogether unexpected, the sudden jump of 1 per cent. was more than anybody had gone for. Following the advance in the Bank rate, the joint-stock Banks raised their rate of interest for money on deposit to 2½ per cent., while the discount houses now allow 2½ per cent. for money at call and 2¾ per cent. at notice. The Imperial Bank of Germany on Monday raised its rate from 4 to 5 per cent., and the Austro-Hungarian Bank yesterday raised its rate from 4 to 4½ per cent. In the open market here the lead of the Bank of England has been pretty closely followed, and 5½ to 3¾ is now quoted as the discount rate for three months' bills, brokers being not at all eager to take bills even at this rate. The Bank of England to-day borrowed a considerable sum at 3½ per cent. for a month, and the India Council called in a small amount, consequently market supplies were hardly sufficient to meet the demand. Rates for call loans ranged from 2½ to 3¾ per cent., and finally a small sum had to be borrowed from the Bank at 4 per cent. until Monday. The African gold in the market was sold at 77s. 10½*d.* per ounce, mostly to America. The Paris Exchange declined to 25·31½, while the Berlin rate remained at 20·45. The Bank Return, issued yesterday, shows that the exports of gold and the continued movement of coin into the country have been partially off set by the return of notes from circu

lation, so that the reserve is only 95,000*l.* lower at 20,291,000*l.*; its proportion to the current liabilities, however, is  $2\frac{1}{2}$  higher at  $46\frac{3}{4}$  per cent., owing to the heavy reduction in the deposits. The Government securities have declined by 1,340,000*l.*, and the "other" securities by 844,000*l.*, these movements being probably connected with repayments by the market and the Bank's recent borrowing operations. The public deposits show a decline of nearly a million, and the other deposits are 1,265,000*l.* lower on balance. At the Bank Bullion-office yesterday 12,000*l.* in sovereigns was withdrawn for Buenos Ayres, and to-day the sum of 120,000*l.* in sovereigns was withdrawn for Egypt, and 20,000*l.* for Malta.

Silver bars are now quoted at 27 11-16*d.* per oz., being 3-16*d.* lower on the week. A year ago the price was 27 3-16*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 15-16*d.*; Calcutta, 1*s.* 3 15-16*d.*; Hong Kong, 1*s.* 10-16*d.*; Shanghai, 2*s.* 7-16*d.*; Singapore, 1*s.* 11-16*d.*

The premium on gold at Buenos Ayres has risen during the week from 150-20 to 150-60 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 6-99*d.* A year ago the premium was 187 per cent., and the value of the paper dollar 1*s.* 4-57*d.*

The Valparaiso 90-day exchange comes over to-day at 13-16*d.*, a fall of 3-16*d.* on the week. A year ago it was 17 9-16*d.*

The Rio de Janeiro exchange on London is 8 25-32*d.*, being 7-32*d.* higher on the week. A year ago it was 7 15-32*d.*

The Bankers' Clearing-house return for the week ending October 12*th*, 1898, shows a total of 141,856,000*l.*, as compared with 126,370,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Renten, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£31,195,951	£31,997,028
Total Reserve .....	£26,291,376	£20,924,263
Proportion of Reserve to Liabilities...	46 <i>½</i> per cent.	43 <i>¾</i> per cent.
Notes in Circulation .....	£27,704,575	£27,872,765
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	$2\frac{1}{2}$ per cent.	$2\frac{1}{2}$ per cent.
Consols (account) .....	109 <i>¾</i>	111 <i>¾</i>
French Renten (account) .....	102 <i>f.</i> 27 <i>c.</i>	103 <i>f.</i> 02 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 29 <i>c.</i>	25 <i>f.</i> 18 <i>c.</i>
New York 60 days ditto .....	\$481 <i>¼</i>	\$482 <i>¼</i>

What with financial stringency at home and abroad, threatened complications between France and England, and a reported military conspiracy to throw over the French Government at a most critical moment in the nation's affairs, it would not be surprising if great uneasiness prevailed in the minds of investors. But, strange to say, that is not the case, and in all the leading departments the STOCK MARKETS to-day were steady almost to firmness, although not at all active. Consols recovered  $\frac{1}{8}$ , both for money and the account. As regards British Railway stocks Brighton deferred improved  $\frac{1}{8}$ , and Great Eastern, Great Western, and Chatham  $\frac{1}{8}$ , while ditto first preference declined  $\frac{1}{8}$ , and London and North Western and South Eastern deferred  $\frac{1}{8}$ . American Rails met with a little inside attention, and displayed a fair degree of strength at the close. Nearly a general advance was established, including  $1\frac{1}{4}$  in Norfolk preference,  $\frac{7}{8}$  in Louisville and Nashville,  $\frac{3}{8}$  in Northern Pacific preference,  $\frac{1}{2}$  in ditto preference, Union Pacific, Wabash debenture, Chicago and Milwaukee, and Atchison preference, and  $\frac{1}{8}$  to  $\frac{3}{8}$  in most others. As regards Canadian Railways, Canadian Pacific improved  $\frac{1}{8}$ , and Grand Trunk guaranteed  $\frac{1}{4}$ ; while ditto third preference fell  $\frac{1}{8}$ , and ditto second  $\frac{1}{8}$ . Foreign Railways were without particular attention. Nitrate preferred ordinary was inquired for, and fairly active at about  $4\frac{1}{2}$  to  $4\frac{3}{16}$ . The remaining months of the year should witness some bumper traffics, and, dis-

credited board notwithstanding, an active upward movement in the shares may be engineered at any moment.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>

Mr. George Frederick Glennie has retired from the secretaryship of the Bank of England, and his successor in that position is the deputy-secretary, Mr. Kenneth Grahame.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Tottenham and Forest-gate Railway Company—150,000*l.* 3 per cent. guaranteed preference stock.

Messrs. Thackeray and Co., of Cardiff, under date October 13*th*, report as follows:—Barry Railway undivided, 264*½* (unchanged); Barry preferred, 123 (unchanged); Barry deferred, 142 (a rise of 1); Cardiff preferred, 114 (unchanged); Port Talbot 9*½* (unchanged); Rhondda and Swansea Bay, 4*½* (unchanged); Rhymney undivided, 262*½* (a fall of 5); Rhymney preferred, 121 (unchanged); Rhymney deferred, 148 (unchanged); Taff Vale, 75 (a fall of 1); Vale of Glamorgan, 127*½* (unchanged). Business has again relapsed into a very quiet state, and prices in one or two cases show an easier tendency.

**Great Western of Brazil Railway.**—The following letter was addressed by the secretary of this company to the shareholders on Wednesday:—"It will probably be within your knowledge that Messrs. N. M. Rothschild and Sons, acting on behalf of the Government of the United States of Brazil, published in June last a scheme whereby the interest guaranteed to various Brazilian railways, is for the present and two succeeding years to be paid in Brazilian 5 per cent. funding bonds instead of in sterling, as hitherto. The effect of such step has been to considerably reduce the income of this company, as the proceeds of the bonds handed over in respect of the past half-year (which bonds the directors have sold at 75*½* per cent.) have been only sufficient to meet the fixed interest on the debenture stocks falling due in respect of the period named, and the directors much regret to have to inform you that the final results of the past half-year do not admit of an interim dividend being declared. As to a final dividend no judgment can at present be formed, as it must depend upon exchange, and the movement of sugar, cotton, and other crops that come forward in the later months of the year."

## Meetings.

### GRAND TRUNK RAILWAY OF CANADA.

The half-yearly general meeting of the proprietors was held at the Cannon-street Hotel, E.C., on Thursday; Sir CHARLES RIVERS WILSON, G.C.M.G., C.B., presiding.

The SECRETARY (Mr. Walter Lindley) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The PRESIDENT, who was received with applause, said—Ladies and gentlemen, the half-year ended June 30th last, which we have under review to-day, is the best June half-year that we have had since the year 1890—("Hear, hear")—and it further presents this interesting and agreeable feature, that after an interval of four-and-a-half years it places us in a position to resume the payment in full of the dividend upon our guaranteed stock, with every prospect, I trust, of further progress in the same direction within a very limited future. (Applause.) While, however, the gross receipts for the first five months of the half-year were favourable, there was a large falling-off in freight traffic in the month of June caused by the diminished shipments of grain in consequence of the abnormally large quantities previously sent forward owing to the "Leiter" speculations. The stocks of grain in the country were thus depleted, and our receipts from this source of traffic have consequently been adversely affected up to the present time. This year's harvest, both in Canada and the United States, has, however, been very abundant, and there is every probability that shipments will soon reach, if they do not exceed, last year's proportions. The gross receipts of the Grand Trunk from all sources in the past half-year were 115,167*l.* more than in the corresponding half-year, the working expenses were increased by 47,240*l.*, leaving the net result of the traffic operations more favourable by 67,927*l.* The amount payable by the Grand Trunk to the Chicago and Grand Trunk and Detroit Grand Haven and Milwaukee companies under traffic agreements was 39,484*l.* less than in the corresponding half-year, making a total improvement in the working of the entire system of 107,411*l.* There was an increase in the net revenue charges of 3,467*l.*, and, therefore, the increase at the credit of net revenue account on the working of the half-year was 103,944*l.* There was a net surplus for the half-year ended June 30th, 1897, of 2,708*l.*, which, added to the increase of 103,944*l.*, makes a total of 106,652*l.* as the net result of the past half-year's operations. You will remember that after writing off 264,974*l.*, the balance of the revenue deficiency which had accumulated to June 30th, 1896, there remained at the credit of net revenue account at December 31st, 1897, an amount of 10,289*l.*, of which, as explained in the report, \$50,000, or 10,274*l.*, has been written off on account of the amount chargeable to revenue for the reconstruction of the Victoria-bridge, the balance of 15*l.* 2*s.* 10*d.* being brought into the past half-year's net revenue account, and making a total sum available for dividend at June 30th, 1898, of 106,667*l.*, which will admit of a declaration to-day of the full half-year's dividend on the guaranteed stock, and leave a balance of 2,271*l.* to be carried forward to the next half-year's account. It may be interesting to recapitulate, in a very few words, the movement in the Grand Trunk net revenue account since the present board came into office, in May, 1895. On June 30th, 1895, the net revenue deficiency amounted to 191,556*l.* For the half-year to December 31st, 1895, there was a deficiency of 33,151*l.* For the half-year to June 30th, 1896, there was a deficiency of 82,062*l.*, making a total of 306,769*l.* at June 30th, 1896, when the inability of the Grand Trunk Company to meet all the pre-preference charges terminated, and 39,086*l.* of the total deficiency of 306,769*l.* was liquidated out of surplus net revenue for the half-year ended December 31st, 1896, 2,708*l.* from surplus net revenue for the half-year to June 30th, 1897, and the remaining amount of 264,974*l.*, I may say by the wise decision of the proprietors upon the recommendation of the board, was provided from surplus net revenue for the half-year ended December 31st, 1897, and, as I have said, we have now a net revenue surplus at June 30th, 1898, of 106,667*l.* available for dividend. I am really sorry to trouble you with so many figures, which you may, perhaps, have some difficulty in following, but which, no doubt, you will see elsewhere in print; but I think the figures are remarkable themselves and especially interesting as indicating what the Grand Trunk can really do when it finds itself under firm and economical management. (Applause.) And with reference to the question of economical management I will add one or two more figures which are of interest. The ratio of working expenses of the Grand Trunk proper for the past year was 66.48, as contrasted with 70.84 for the half-year, when we first took office, showing a saving of expenditure in the ratio of 4.38. Those who are conversant with railway matters will, I think, appreciate the great importance of that statement. (Applause.) The improvement in the revenue results of the Chicago and Grand Trunk Railway is a satisfactory feature in the past half-year's operations. There was an increase in the gross receipts of that line of 74,951*l.*, and in working expenses of 31,950*l.* The net traffic earnings were, therefore, 43,001*l.* better than in the corresponding half-year, and, deducting from that amount the increase of 1,319*l.* in the net revenue charges, there remained a deficiency to be advanced by the Grand Trunk Company under the provisions of the traffic agreements of 8,392*l.*, against 50,074*l.* in the corresponding half-year of 1897, an improvement of 41,682*l.* On the other hand, the working of the Detroit Grand Haven and Milwaukee has been of a less satisfactory character, the deficiency for the half-year to be provided amounting to 22,282*l.*, as compared with 20,084*l.*, an increase of 2,198*l.* The aggregate gross receipts

of the Grand Trunk, the Chicago and Grand Trunk, and the Detroit Grand Haven and Milwaukee amounted to 2,334,591*l.*, as compared with 2,154,222*l.* in the corresponding half-year of 1897, an increase of 180,369*l.* The working expenses were 1,609,803*l.*, against 1,537,868*l.*, an increase of 71,935*l.*; and the net traffic receipts were 724,788*l.*, against 616,354*l.*, an increase of 108,434*l.* The net revenue charges of the entire system show an increase of 4,490*l.*, making the net results better by 103,944*l.*, as shown in the Grand Trunk account No. 8. I gave you just now the ratio of working expenses to gross receipts only in respect to the Grand Trunk. As regards the whole system the ratio of working expenses was 68.95 in the last half-year, while for the half-year ending June 30th, 1895, when we came into office, they were no less than 74.99. You will, therefore, see that our management out in Canada has been able to obtain a reduction of no less than 6.04 per cent. (Applause.) I think I may say, with some confidence, that—to use an expression in use on the other side of the Atlantic—this reduction in expenses "has come to stay." (Applause.) The charges to capital in the past half-year are practically confined to expenditure on account of the Victoria Jubilee-bridge, and for equipping the rolling stock with air-brakes and automatic couplers to meet the requirements of the United States "Safety Appliance Act." 6 per cent. bonds of the company amounting to 409,400*l.* matured on June 1st last, almost the whole of which have now been acquired, and will be held, as required by the Act of 1888, as security for the 4 per cent. debenture stock. As stated in the report, a saving of 8,000*l.* per annum in our interest charges by the substitution of 4 per cent. debenture stock for these bonds has been effected. I will just add, while speaking of our financial position, that we have no floating debt whatsoever. I have mentioned when previously addressing you that in order to keep pace with our competitors for thorough business, and to economise to the fullest extent in the working of the line, it is essential not only to provide locomotives of modern type and greater haulage capacity, which is being gradually accomplished, but also to renew or strengthen such bridges as may be found inadequate to properly bear the heavier loads now required to pass over them, and it has therefore been determined to renew forthwith certain bridges on the Grand Trunk line in heavier material, and thus increase their bearing capacity. It is proposed to charge the cost of these improvements to revenue account, but in order to avoid burdening the maintenance charges unduly in any one year, it has been decided to spread the expenditure over a period of at least five years. This period may, of course, be extended as circumstances may render expedient. The same plan will be followed in regard to the revenue proportion of the expenditure for reconstructing the Victoria-bridge at Montreal, which has been fixed at 110,000*l.*, being the amount it is estimated would have been required to replace the old structure by a single girder bridge. It is stated in the report, and I am happy to confirm it to you, that we expect that the double track of the new bridge will be in full operation by the commencement of next year—a matter of the greatest consequence to us when you consider the traffic which passes over the bridge. The number of trains that run in and out of our Bonaventure station at Montreal is about 130 daily, and about 75 per cent. of these pass over the bridge. In view of the greatly increased weight of both locomotives and cars, I cannot sufficiently congratulate you and the board, who have had a good deal of anxiety on the subject, upon the fact that we are now going to have a really strong bridge adequate for all purposes, which, moreover, will be the cause of a good deal of economy in the future. (Applause.) Before leaving this question I should like to say one word as to the improvement of our line. The competition now among the great Transatlantic lines is so keen that it is only the best equipped lines and lines with the best tracks that are able to secure the bulk of the business, and it is the best equipped lines that have the most traffic. Therefore, we must look forward to a reasonable, but continual, expenditure in the direction of improvements of the rolling stock, of the track, of the gradients, and so forth, and the effect of that will be that we shall be in a position to acquire more traffic, and also that we shall in the future materially reduce our working expenses. I will give you an illustration taken from the Victoria-bridge. Hitherto the cost of the upkeep of the bridge has been about 4,000*l.* a year. Well, for the next ten years, we estimate that the expenditure will not be more than 400*l.* a year, and in addition we expect to receive a considerable revenue from the tolls on the carriage-road and the pathways with which the new bridge will be provided. A moderate estimate places that addition to our income at 5,000*l.* a year, and I daresay it will be more. All these improvements of our line have these great advantages: we reduce our expenses, and by so doing we improve our income, and we improve the credit of our company, and we improve the value of your securities. You will remember that we recently made an agreement with the Wabash Company for running over a section of our line from Windsor to Fort Erie, and from Welland Junction to Niagara-bridge, and that agreement has been in operation since March 1st, and has been attended with very advantageous results to our company, and it is a pleasure to know that the same result has accrued to the Wabash Company themselves. In their last report they advert also to the advantages of working in a friendly understanding with our company. (Applause.) I have recently returned from Canada, and whilst there I took the opportunity, as usual, of visiting several portions of our system. At the same time, I spent a good deal of time in Montreal in conferring with our officers. On this occasion I visited several points in the north-west of Ontario and studied with much interest the arrangements which are being made for improving our Lake connection with Lake Erie and the Georgian Bay ports. I had also occasion to observe with satisfaction

that there has been a considerable augmentation of traffic in that interesting region in which is situated the Muskoka Lakes. It is one of the most beautiful and picturesque parts of the world, and is gradually becoming known over the whole continent of America, and the consequence is there is a great influx of tourists there every year, and we have almost the monopoly of the carriage of those travellers. That promises to be a very good business in future. The increase this year has been about 100 per cent. over what it was last year. (Applause.) I did not proceed further west on this occasion, because I had the satisfaction of being accompanied by your vice-president, Mr. Joseph Price, and he undertook to make a careful inspection of the lines, more particularly in the west. He has gone over them with great care, and I shall ask him to be kind enough to convey to you his impressions of all he saw, and of all he heard, and you may be sure that whatever expressions of opinion come from Mr. Price they are entitled to the greatest weight, because he knows what he is talking about, being an expert in all railway matters, and also being intimately acquainted, as an old official, with the whole of our property. However, I shall leave Mr. Price to speak for himself. Leaving Mr. Price, therefore, to go to the west, I took the opportunity of making an inspection of the lines of our new connection—the Intercolonial, which, as you are aware, is a Government line. Accompanied by the general manager, I went all over that line, which presents many features of interest. I observed with regret that the population of the country traversed by the Intercolonial Railway in New Brunswick, Nova Scotia, and Cape Breton Island was not greater than it is, and it is a matter of astonishment to me that the advantages and the opportunities offered by those countries are not better known to the public of this country. There is land of excellent quality to be had upon very cheap terms, with assistance from the Government, and the climate is temperate and agreeable. But somehow or another, the tendency of immigration, as it has always been, is from East to West, and so these fertile lands and these fine timber countries are left almost behind in the race of immigration. I can only hope that in course of time, when the West has been gradually filled up, people will remember that there is in the East of Canada most admirable land for the purpose of immigration. You will remember that we have made arrangements with the Intercolonial Railway Company—that is to say, with the Government—by which they obtained running powers over a portion of our line, so as to bring them into Montreal instead of stopping at Port Levis. I must say, after examining all the conditions of the Intercolonial line, I think the Dominion Government have acted most wisely in making that arrangement, which at the same time will be beneficial to ourselves. I was in hopes that I might have brought back from Canada a message of peace and conciliation from our neighbours the Canadian Pacific authorities, and I much regret to say that no such message was given to me, and I have no such message to deliver to you to-day. I explained at some length upon the occasion of our last meeting here what were the differences which existed between our two companies. You will have understood that the reason for the attitude of the Canadian Pacific Company in antagonising us was stated to be, that we were aiding and abetting the Western American lines in the contest which was going on between them and the Canadian Pacific Company. I explained to you that much as we dislike to find ourselves at variance with our Canadian Pacific friends, it was absolutely impossible for us, under the circumstances explained, to dissociate ourselves altogether from our Western connections. The so-called trans-continental rate war has practically come to an end in consequence of the decision of the Interstate Commerce Commission to whom the matter was referred, and by the acceptance, more or less completely, by the Canadian Pacific of the finding of the commission. Well, it was naturally expected that that cause of dissension being removed, the action taken by the Canadian Pacific Company in cutting local rates would come to an end, but I am sorry to say that has not been the case, and that the directors of the Canadian Pacific Company have announced their intention of continuing their hostile attitude to us until we come into line with them in respect of other matters—viz., in respect of our transportation of traffic to the North West Territory. It really amounts to this, that they consider—they insist, I may say—that we must conduct our passenger traffic with the North West Territory in subservience to and under direction from themselves. That is a position which it is utterly impossible for us to accept. ("Hear, hear," and applause.) With the very best intentions to act in a friendly spirit towards the Canadian Pacific Company, it is absolutely impossible for us to ignore our western connections. We cannot do it, even in order to obtain peace with the Canadian Pacific Company. This being so, we are powerless in the matter. We must seek compensation in other directions, and I have no doubt we shall find it; and we must leave the Canadian Pacific authorities to be judged by public opinion, and perhaps by their own shareholders. I may add that in the course of the discussions we had with Sir William Van Horne and Mr. Shaughnessy, finding it impossible to come to an understanding, we made them this proposal, to refer all the questions at issue without any reservation whatsoever to arbitrators. ("Hear, hear.") I think that is a fair offer. (Applause.) It shows that we are not conscious of doing anything which is otherwise than fair and reasonable. That offer was as distinctly refused as it was distinctly made by us, and so the matter stands. Sir William Van Horne will not declare himself opposed to the principle of arbitration, or to the arbitrators whom we suggested, but he would only agree to enter into arbitration under such conditions and limitations and restrictions as would have placed us at the very outset in a position of inferiority and subservience to his company which we never could accept. (Applause.) Well, I turn with satisfaction to another matter, as to which I am able to make an announcement which I think will give you pleasure. You are aware that for a considerable time past negotiations have been pending between the Grand

Trunk Company and the Central Vermont for the establishment of relations on a proper businesslike footing, and I am able to tell you that in the last few days, and since the issue of the report—otherwise it would have been mentioned in the report—we have heard that all the interests connected with the Central Vermont have combined and entered into an agreement of a satisfactory description. It would not be proper for me to go into details as to what the arrangement is, for this reason—that certain formalities have yet to be conducted on the other side before the matter is absolutely settled, but I think I can affirm with some confidence when I tell you that the arrangement is virtually completed, and on the next occasion of our meeting I hope to have the honour of explaining the details of the arrangement and asking you to ratify it. I can only say at present that we shall continue on a permanent footing with a company whose operations in concert with our own will be most advantageous to both companies. (Applause.) I must not omit to say that this result is in great measure attributable to the skill and unwearied patience of our general manager, Mr. Hays. (Applause.) Ladies and gentlemen, while the retrospect of the last year or two affords matter for considerable satisfaction, I think we may confidently look forward to the future. On all sides there are evidences of improving prosperity in the United States. There has been an abundant harvest, the farmers have paid their debts, and they are so well off that they are holding back their harvest at the present time in expectation of higher prices. Politics are quiet in the United States, and as a result of the general prosperity, that strange but dangerous controversy—the currency controversy—is dormant. I wish I could say it were dead. Everything points to prosperous times in the immediate future, and therefore there should be increased prosperity for the railways, and no doubt they will partake of that prosperity. At the same time it has been the case that while other industries and other business have improved, the railways have not progressed in the same ratio, and the reason has been this—that they have been exposed, and you know the old story which has been told in this hall over and over again, they have been exposed, owing to the uncontrolled competition which prevails amongst American railroads, to a perpetual falling away of the rates. The losses thus occasioned have been met, so far as possible, by improved methods of transportations, by improved types of locomotives, and so forth, and by decrease of operating expenses. But there must be an end even to that. Fortunately there appears to be gradually growing up in the United States a more friendly and better feeling on the part of the community towards railways than has hitherto existed. It was said at one time, in the earlier days of the English railways. I am happy to say it does not apply to the English railways now—that railways have made everybody's fortune except their own. That observation applies with much truth to many of the American lines, and people are beginning to realise it. The remedy for the evils I have pointed out is generally recognised to be some interference on the part of the Legislature, so as to protect railways against themselves, to allow what are called pooling arrangements—that is to say, contracts among the different companies by which they may divide their business or maintain their rates, such contracts to be enforceable in the courts of law. The direction of the public mind, I think, is gradually tending to the introduction of some legislation of that sort. It would be unattended with any danger to the public, who fear increase of rates, because the Interstate Commission could be given powers to prevent any undue raising of the rates. Turning to Canada, you know the Dominion is doing extremely well. The Finance Minister was able, for the first time for some years, this year to declare a surplus—a surplus, I think, of \$1,575,000. The imports during last year have increased by \$21,000,000, and exports by \$25,000,000. All these things are in the right direction, and imply good business and increased prosperity for the carrying trade. We are doing everything we possibly can to put ourselves in a position to avail ourselves of this current of prosperity. At Portland we are making every preparation for a great export trade during the winter months and are expecting to have a heavy, and I hope a prosperous, season. As it is, during the past half-year there was an increase in our exports at that port of no less than 74,425 tons. There is one other hopeful feature of high importance in its bearing upon the mutual prosperity of the United States and Canada, and that the appointment of the International Commission which has been holding its sittings lately in Quebec, and which is shortly to meet again at Washington. Several of the questions submitted to the Commissioners are matters which intimately concern the Grand Trunk Company, such for instance as the question of bouding privileges. At the present time goods are allowed to go through in bond from one part of the United States through Canada to another part of the United States, and from time to time there have been agitations with a view to abrogating those privileges. For my own part I believe the great American interests concerned will never allow such a retrograde step to be taken, because it is to the interest of the Western States of America and the New England States that this privilege should remain. At the same time a good deal of bad blood has been occasioned by the renewal from time to time of this agitation, and it would be very satisfactory if the matter could be dealt with in a treaty undertaking so as to remove it from the sphere of everyday politics. Then there is another question which interests us, what is called the alien law, by which citizens of one country are debarred from working in the other country unless they reside there, and for us, in such touch as we are with the American frontiers at Niagara, Fort Erie, and Windsor, where there is constant traffic of passengers between the American shore and the Canadian shore, it is a matter of great importance that this restriction should be removed. When the law was passed it was never intended, I believe, to apply to Canadian citizens, but it has been so applied and it has caused a great deal of disagreeable friction on the frontier. That is one of the matters which I hope will be adjusted by the Commissioners. Then

there is the question of tariff, in which we are vitally concerned, because the Grand Trunk is the largest taxpayer in the Dominion of Canada. Therefore any relief we can get in reduction of duties will be so much to the advantage of this company. Whatever measure of success may attend the labours of the Commission the real significance of their appointment lies in this, that it is the outcome of the strong desire which has been expressed in many ways by the two countries to live together on terms of good fellowship, so that while each maintains its own separate nationality they may tend more and more to become one community for all purposes of social and industrial development. (Applause.) In conclusion, I will ask you to pass the following resolution:—

"That the report of the directors and accounts for the half-year ended June 30th, 1898, now presented, be and the same are hereby approved and adopted, and that a dividend of 2½ per cent. be paid to the holders of the 4 per cent. guaranteed stock."

Mr. JOSEPH PRICE—Ladies and gentlemen, I have recently returned from Canada and the United States, where I spent about two months, having during that time made a very careful inspection of the track and rolling stock of the Grand Trunk Railway. After spending several days in Montreal considering some important matters with the president and general manager, I commenced with the Portland division, 297 miles, and the terminal property at that point. I found the permanent way well cared for, and the ballasting well attended to. Great improvements have recently been made at Portland, where 13 miles of new sidings have been laid ready for this winter's business. The elevator, which was finished about a year ago, is a fine structure and is answering all expectations; 9 million bushels of grain were passed through this elevator last winter. While there we discussed what was the most useful traffic for railways. With modern rolling stock immense areas of land are required to feed a first-class railway like the Grand Trunk Railway with grain traffic. For example, the average crop of wheat is about 15 bushels per acre (except in Manitoba, where it is heavier). One of our 30-ton box cars has a loading capacity of 1,000 bushels; therefore, it takes about 70 acres of land to feed one box-car, and as our new locomotives are capable of hauling forty cars, it will be seen that to supply one of these trains takes the produce of no less than 2,800 acres of land. With the boundless extension of the great West, however, the railways are well supplied with tonnage. After finishing the Portland division I went over the Quebec and Montreal section, 174 miles, which is in good order, and quite equal to the traffic on that section. From Montreal I proceeded west to Niagara, 421 miles, over the main line of the Grand Trunk Railway and the Great Western division. Both were in excellent order. (Applause.) A very large portion of the Great Western division, that from Toronto to Niagara Falls, has been rebalasted with a very superior quality of ballast obtained from Lake Erie, near Port Colborne. At Niagara Falls the new double track girder bridge, erected in place of the old Suspension-bridge, is a very fine, solid structure, capable of supporting any amount of traffic. Proceeding west to Port Huron, 182 miles, I went over the workshops at that point. These shops are fitted with the most modern improvements, and very good work is done there. From Port Huron I went over the Chicago and Grand Trunk to Chicago, 335 miles, and found the track very much improved. The gradients are good, and one of our new large 85-ton locomotives can haul a train of forty cars over that section needing the assistance of "pushers" at only two points—viz., Flint and Valparaiso. Returning from Chicago, I came over the Wabash connection to Detroit, 272 miles, the shortest line between Chicago and Detroit. It is a line with very favourable gradients, and with the good gradients upon the loop line division of the Great Western, affords the Wabash a very good line from Chicago to the Niagara River, under our contract with that company, which is working satisfactorily. From Detroit I returned to Montreal, 557 miles. Altogether I found the permanent way of the main line of the Grand Trunk system in excellent order, so that trains can be run as fast as upon any other line in the country with perfect safety. With regard to the rolling stock, the improvements since I was there three years ago have been simply wonderful. Our trains are made up of new cars, and the best of the old rolling stock reconstructed in the same style as the new cars; in fact, I may safely say that they compare favourably with the best trains in the country. I did not see a shabby train upon the whole system. (Applause.) Some misgivings have been expressed here lest the rolling stock and roadway were being impoverished to secure the reduction in expenses. The shareholders may rest assured that this is not the case. Indeed, at the very time when Mr. Hays was reducing the working expenses he was actually charging in the expenses more than he was spending, and this enabled him to build up a locomotive and car renewal fund, all at the expense of revenue, out of which he has been able to pay for twenty new 85-ton locomotives and twenty-six new first-class passenger cars (all of which have been put upon the line during the last six months), still leaving a reserve fund of \$5,000 for further improvements. It is really wonderful how he has been able to accomplish so much in this direction and still to establish such a large saving in the ratio of working expenses. (Applause.) With regard to the stations and station yards, they are models of neatness, and lately there have been finished two very complete yards where the traffic is heavy, one at York, near Toronto, and the other at Belleville. The yards are so constructed that access is given to every siding from one straight line on the outside. During my examination I had the advantage of the attendance of the practical operating officers. Mr. Hays has selected a very efficient staff of energetic men who thoroughly understand their duties. In Mr. McGuigan, the general superintendent, we have a most efficient officer, and in Mr. Reeve, the traffic manager, Mr. Morse, the mechanical superintendent, and the divisional superintendents, we have

men who are rendering excellent service to the company. Having passed over 3,000 miles of the system, all by daylight, and some of it, including the main line, twice, I am able to speak with confidence of its good general condition. (Applause.) Notwithstanding the competition which has been introduced by new lines, you may rest assured that the old Grand Trunk Railway is undoubtedly the strongest line in Canada in the district which it occupies, having access to every important town in Quebec and Ontario, and, through its connections at Chicago, with all the important American railways. Mr. Hobson, the chief engineer, who was associated with me for many years on the Great Western of Canada, is another valuable official of the company. Mr. Hobson has under his supervision the new Victoria-bridge, which will be completed in January, a magnificent work. As it is built outside the old tube, one can easily see the difference between the two, as the old tube is still in existence, being gradually cut away, but the trains are now passing over on the new girders from one end to the other. The old tube looks only about one-third the size of the new bridge, and looking from the rear of the train, the difference is very perceptible after you have passed through. I will conclude by giving an example of the thorough manner in which the line is being operated by mentioning that in passing both ways on the main line, between Toronto and Montreal, with the working time-table before me, I could have set my watch by our arrival at any station on the line. The freight traffic is also moved expeditiously; for instance, goods delivered at Toronto before two o'clock in the afternoon are delivered in Montreal on the following morning by ten o'clock—333 miles. (Applause.) I wish to return my best thanks to Mr. Hays for the facilities rendered me in carrying out this inspection, which was rather trying work owing to the extreme heat, the thermometer being about 94 to 100 all the while. But the work was extremely interesting, enabling me to see the enormous improvement in the property and rolling stock compared with what it was when I last saw it three years ago, and the shareholders can rest assured that they have in Mr. Hays one of the most competent managers on the continent of America. In two years the debt incurred to keep up the debenture stock interest, over 300,000£, has been paid off, we are paying 100,000£ in dividends, and at the same time the roadway and rolling stock have been placed in first-rate condition. (Applause.) I have much pleasure in seconding the resolution proposed by the president for the adoption of the report and accounts, and for the declaration of the dividend on the guaranteed stock.

Mr. JEFFRIES regretted the chairman had been unable to come to an arrangement with the Canadian Pacific Railway. Still, he thought they might congratulate the board on the improvement that had taken place in their property, and upon the fact that their general manager had been able to reduce the expenses to such an extent as had been mentioned. He should like to know what decision had been come to with regard to the Belt Toronto line.

Mr. BAKER considered the chairman had hardly correctly represented the cause which originated the unfortunate and unsatisfactory war of rates from which the various transatlantic lines had suffered.

The CHAIRMAN, in reply, said that they were so much impressed, on inspection of the Belt line, with the undesirability of retaining it that they took upon themselves the immediate responsibility of closing the line. Although endeavours had been made to get rid of the line they had been unable to do so. Mr. Baker had charged this company with being the originator of the rate war. There was no foundation for such a statement.

The resolution was then put to the vote and carried unanimously amid applause.

Mr. JEFFRIES—I have great pleasure in proposing a vote of thanks to the president and his colleagues.

The motion was duly seconded and carried unanimously.

The PRESIDENT—Mr. Jeffries and gentlemen, I am extremely obliged to you on behalf of my brother directors and on my own part for the very kind expressions you have used.

#### CENTRAL URUGUAY RAILWAY OF MONTEVIDEO.

The annual general meeting was held yesterday at the Cannon-street Hotel, E.C.; Mr. REGINALD J. NEILD presiding.

The SECRETARY (Mr. H. C. Allen) read the notice convening the meeting and the minutes of the last meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN—Gentlemen, a year ago, when I gave you the account of the business of this company to June 30th, 1897, it was an account of a year of absolute misfortune, principally caused by the serious revolt which had taken place in Montevideo, and which had upset all business there. At the same time, the board were able, with some caution and in a guarded way, to indicate to the proprietors the probability that this year which we are now reviewing might reasonably be expected to show somewhat better results. For we met in the month of October, when the revolution to which I have just alluded had just terminated, and, as all who know those countries are aware, the recuperative powers are so great that hardly does one of those political ebullitions cease than the natural vitality of the country asserts itself, and improvement is noticed on all sides almost immediately. Our prevision in regard to the prospects has proved correct and well founded, inasmuch as during the year which we are now reviewing we have taken about 33,000£ more of receipts, at an additional expense of about 2,000£, which is in itself a very satisfactory feature, and which allows of our disposing of an additional net profit of about 30,000£. You may remember that last year we were only able altogether to distribute the sum of 1½ per cent., while this

year we are able to distribute 3 per cent., and also to inform you that all your property has been thoroughly well cared for and kept up. But it is worthy of remark that this year has been much less satisfactory and more disappointing to the board than they had hoped at the time they issued their half-yearly report to December 31st. As I said earlier, the revolution terminated at the end of September, and the improvement in trade was noticed immediately, and continued unabated until the month of March, which was the month when we issued our half-yearly report. At that time the country was visited by abnormally heavy rains, which made the roads in the vicinity of the stations almost impassable, and which caused a falling-off in our receipts of a disappointing character between the months of March and June. Therefore the good results I have indicated to you have been obtained by only six months' fair trading instead of twelve; and those rains, which kept back the goods from arriving at the stations in the last three months of the year under review, were also the means of causing the maize to be kept back in its ripening, and we were thus deprived of that traffic, not only because it failed to reach the stations, but also because its want of condition and dryness did not allow it to be exported. Nevertheless, that feature is not so unfavourable as it might be, inasmuch as that maize is not lost, but remains to be transported during the current year. I propose, for the information of those who happen to be in the room who are new shareholders, to explain certain items of the balance-sheet, although there is little in it which differs from former balance-sheets. The first item on the debit side, on page 27 of the report, is the balance of capital account, which shows unspent capital of about 28,000*l.*, against overspent capital last year of about 12,000*l.* That has been put on the right side by the sale of 50,000*l.* of debenture stock at the price of 13*4*, which I indicated at the last general meeting would be done when an opportunity offered. The next item, sundry credits, London, 18,900*l.*, consists principally—in fact the greater part of it by far—of sums of money due to the extension companies under their working contract. Sundry credits, Monte Video, 14,000*l.*, consist of accounts outstanding in Monte Video on June 30th—principally for wages and salaries, which were paid in the following month, the other items being unimportant. The next item which requires explanation is under the head of "reserve funds," the capitalised guarantee interest, which has been explained repeatedly to you; but I may mention shortly that it was bonds delivered to the company in commutation of the money owing to us in 1878, which bonds are redeemed from time to time, and when the account is passed it is placed to the general reserve fund of the company. There is a set-off on the other side to a similar amount. The general reserve has been trenced upon slightly this year to the extent of three amounts, which you will find set forth in detail in the latter part of the report. Two of the amounts are of a permanent character, the other is temporary—depreciation in Government bonds, which we have received in payment of our accounts. Rio Negro extension subvention is set off by an amount of the same size on the other side of the account, by bonds which were given to us at the time of the construction of the Rio Negro branch, and which the Government contend do not bear interest, as we are receiving 8 per cent. on that branch. We contend that we do not receive it, and that is a matter for discussion. On the other side, the first item that requires explanation is the sundry debits, London. These are almost all represented by stores in transit, with the exception of an amount of 1,346*l.* to the debit of Income-tax Commissioners. Then the item of "extension companies" means loans to the extension companies, which bear 5 per cent. interest. "Lands and properties" have been reduced by the sale of a profitable character, which yielded a profit of something like 1,200*l.* The "Government bonds" and the "Rio Negro subvention bonds" I have mentioned. The "Government freight accounts" have been reduced very considerably by a payment of bonds bearing 4 per cent. interest, which has been regularly maintained. Owing to the present condition of Montevideo we have been obliged to write those down to the market price on June 30th, and that has caused a debit amount which I hope will come back to us. The "Uruguayan Government accounts" have been since collected, and the "freight accounts" will come in. The "sundry debits" are all good; consequently, there is nothing special in the balance-sheet which I have to explain. Now I do not propose to trouble you with a recapitulation of the various increases and decreases in the traffic, as the custom is, for if you have the curiosity to know the details of how the profits of the year have been made up, you will find them set forth in such a lucid form in the report, that I think it will spare you a good half-hour of discussion or explanation. But I may mention what the real result of the year's working is. We have gained 33,296*l.* more, at an increased cost of 2,287*l.*, making the increased net profit 31,009*l.* The extension companies have done better for us than they did last year, inasmuch as the Eastern Extension has given an actual profit on working of 867*l.*, while the Northern Extension has given a loss of 5,528*l.*, which is less than the corresponding period of the previous year. But, nevertheless, as against that loss 57 per cent. of the passengers and 96 per cent. of the cargo from this extension has passed over the main line, and it has, therefore, acted as a feeder. Therefore, whatever the general impression may be, there is no need for the proprietors to be alarmed as to the effect of the extensions on the parent company. The North Eastern Extension has always been a black page in our books. It has been, as a rule, a heavy charge upon us, but there is now some little hope of improvement inasmuch as it has given us 2,000*l.* less loss this year than in the previous year; and I am glad to be able to tell you whilst on this head, that whereas the North Eastern was formerly a stone line, the receipts to-day are of a varied kind, and include wheat, and wool, and posts, and the ordinary products of the country, and they give us a slight hope that within a measurable time, supposing the prosperity of the country is fairly maintained,

we may even turn that unfortunate undertaking into a paying thing, which I hope sincerely will be the case. We have on balance 34,656*l.*, and out of that we propose to distribute a dividend of 1*1* per cent., making with the interim dividend paid in April last 3 per cent. for the year, free of income-tax, and carrying forward a balance of 4,656*l.* 9*s.* 8*d.* to the new account. ("Hear, hear.") Well, gentlemen, I do not think that you can be dissatisfied with that, and still less can you be so when you think that nearly the whole of a very plentiful maize crop remains to be carried and is credited to the current year. Of course, the position in Montevideo is not without anxiety. In the coming month of November will take place elections which will lead to the selection of a Constitutional President, who will take his seat on March 1st in the coming year; and you who have had experience of those countries know full well that in moments like these we cannot feel altogether tranquil. There is no sign yet that there will be any disturbance other than the usual political effervescence which goes on there, and I hope the Presidential election will take place quietly, and when once a man, who, I hope, will be a suitable one, has assumed power, then the country will settle down and then the improvement which we have been expecting, which is come in a minor degree, and which has been handicapped by the apprehension of this election hanging over our heads, will be frankly declared, and we shall once more enter upon years of prosperity and hard work. I think it would be wrong of me to pass on to the proposing of the resolution without saying a word or two in favour of our friends on the other side for the valuable help they have given us throughout the whole of the year. We have had to say that often, but in no previous year have our thanks been more deserved than in this, which has been a year of anxiety. Three months were as good as lost by the revolution, and nine months entailed much anxiety as to what might take place. All concerned have put their hands to the plough and done their best to assist in promoting the prosperity of the company, and our friends, Mr. Horacio Garcia Lagos and Mr. William Galwey, who have been our representatives on the local committee, and our general manager, Mr. Frank Henderson, have rendered good service. All three have been unremitting in their work; and I am glad to see in the body of the hall our old friend, Mr. Wingate, who has had to be invalided home. I believe the voyage has done him a great deal of good, and I hope and trust that when he returns he will be in robust health. We owe him gratitude for twenty years of constant service, and that is a debt which is not easily paid. (Applause.) Now, gentlemen, what about our future prospects? We have up to date 7,000*l.* more, which is a good point in our favour, and we have fairly good news in the body of a telegram dated October 11th, or two days ago. It says:—"Reports of wool satisfactory. Wheat prospects very good and equal to last year. Prospects for planting maize are good. Cattle are very good, and cattle in Estancias are healthy and doing well. Once elections are over next month we consider prospects to be favorable." That embodies really the opinion of people who are residents of Monte Video. Among those on this side who know Monte Video there is a feeling of doubt as to whether the elections will pass off satisfactorily and result in a quiet resumption of business. My own opinion is that in all probability they will. There is one other point, and that is, the proximate construction of what is known as the Western Railway of Uruguay. You will see on the map a station on our line called San José, and from that there branch off two lines, one going to Mercedes; one to the port of Saucé, and the other from Rosario to Colonia. A concession has been granted by the Uruguayan Government for the construction of those lines, and at the present time the line from Saucé to San José is almost completed. It is probable that that line will be taken over by English capitalists, and the other line will, no doubt, be duly constructed under the terms of the concession; and as that part of the country is one of the richest, and is equal to any part of the Central Uruguay system, it must be obvious to you all that the Central Uruguay line can scarcely look to the construction of that without, to say the least, great interest, as it must become a valuable feeder to it. Also, if it fell into foreign hands it might prove an inconvenient neighbour. We have been alive to the importance of that business, and I am happy to be able to tell you that we have made provisional arrangements, in case the line should be constructed, to undertake the work of constructing it on favourable terms. The matter is still in embryo, but I thought you would like to know that we are keeping our eyes open, and that we should be able to give a good account of ourselves in the event of the undertaking being proceeded with. I will say nothing further, but will conclude by moving the resolution, which is:—"That the directors' report and audited statement of accounts for the fiscal year ended June 30th, 1898, now submitted, be received and adopted."

Mr. G. W. DRABBLE—I beg to second that, gentlemen.

The CHAIRMAN—If any gentleman has any question to ask, I shall be pleased to answer it.

Mr. SPICER—I wish to ask if there is any account from which the shareholders in the main line can ascertain what their annual losses are by the leasing of the North Eastern, and what they have been from the first?

The CHAIRMAN—I can tell you what the loss last year was; it was 26,000*l.*, as against 28,000*l.* in the previous year. If you want to know what it was for every year, you can see the return. The loss varies according to whether the times are good or bad; but, as I have indicated, there are signs of that property improving.

Mr. SPICER—That is besides the Government paying something towards it—a Government guarantee?

The SECRETARY—We have a guarantee there.

Mr. SPICER—I should like to know, in the event of this new line being

executed, whether we should be called upon to undertake to give a guarantee, as on the other lines. Further, I see in the new works expenses were caused by the damage done to fences and telegraph lines during the revolution. Do I understand that those damages were done by the contending parties? If so, have we made any call upon the Government to undertake the reconstruction?

The CHAIRMAN—As to the damage done to the fences by the Revolutionists, it was principally cutting through the fences by armed bands. A claim has been lodged with the Government, and will receive attention in due time. As to whether we shall be called upon to give any guarantee in respect of the Western of Uruguay, if we worked it there is no doubt we should have to undertake some responsibility. There is no doubt whatever that the country served by the Western of Uruguay cannot be compared with the country served by the Northern or Eastern Extensions, and before we are committed finally to anything of that sort, the shareholders will be consulted, and the *pros* and *cons* of the business will be laid before them. The board have already received lessons in the cases of the extensions, which will not be lost upon them. ("Hear, hear.")

Mr. SPICEB—Can you give us any forecast as to the extent of the guarantee?

The CHAIRMAN—It would be premature to do so, for the matter is scarcely ripe for discussion.

Mr. DOUGLAS—I think the shareholders can, with the full knowledge they have of the admirable management of this undertaking, have entire confidence, and trust the directors implicitly in what they do. ("Hear, hear.") I know of no company which has been managed so well. The directors, I hope, will exercise their own judgment, and that the shareholders will have implicit confidence in them.

The CHAIRMAN—I am much obliged for the remarks of the last gentleman, and also for the questions put by the other shareholder, for I always like to hear questions asked.

The resolution was then put and carried unanimously.

The CHAIRMAN—I beg to move:—

"That a balance dividend of 1½ per cent., making with the interim dividend paid in April last 3 per cent. for the whole year, free of income-tax, be, and the same is hereby, declared upon the ordinary stock of the company.

Mr. DRABBLE—I beg to second that, gentlemen.

The resolution was agreed to *nem. con.*

The CHAIRMAN—I beg to move:—

"That Mr. Loftus FitzWygram be, and is hereby, re-elected a director of the company."

He is one of the most assiduous of our board, and I feel quite sure that as an old friend you will be only too glad to re-elect him as a director.

Mr. F. PARISH—I shall be very glad to second that, gentlemen.

The resolution was put and carried unanimously.

Mr. FITZWYGRAM—I thank you, gentlemen, most sincerely for the continuance of your confidence—a confidence which I am proud to have enjoyed ever since this company was established in the year 1871. ("Hear, hear.")

Colonel ARMSTRONG—I beg to move:—

"That Mr. Thomas Abercrombie Welton and Mr. John George Griffiths be, and are hereby, reappointed auditors of the company for the ensuing year, and that their remuneration be increased to fifty guineas each per annum."

Captain DURY—I beg to second that.

A SHAREHOLDER—Why increase the remuneration?

The CHAIRMAN—Because it is considered that the amount of work now involved in the investigation of this company's accounts is ill paid for by a remuneration of twenty-five guineas per annum. ("Hear, hear.")

The resolution was then agreed to.

The CHAIRMAN—I have now to move:—

"That the thanks of the shareholders be given to the local committee, and to Mr. Frank Henderson (the general manager), and the officers and staff of the railway in Monte Video, and also to the secretary and staff in London for their zealous services during the year."

I have made a few remarks in the body of my speech in regard to that, and I will confine myself now to formally moving the resolution.

Mr. H. G. ANDERSON—I beg to second the resolution, and I fully endorse the whole of the remarks made by the chairman as to the efficiency and zeal of our staff in Monte Video and in London.

Mr. DOUGLAS—I support that. I think it should be supported from the body of the hall.

The CHAIRMAN—I am sure the staff will be very grateful to you for supporting it from the body of the hall, for they are very much pleased when the proprietors appreciate what they do. ("Hear, hear.")

The resolution was then carried unanimously.

The CHAIRMAN—That concludes, gentlemen, the business of the Central Company.

The proceedings thereupon terminated.

## THE CENTRAL URUGUAY NORTHERN EXTENSION RAILWAY COMPANY, LIMITED.

The annual general meeting of the proprietors was held on Friday, October 14th, at the City Terminus Hotel, Cannon-street, E.C.; Mr. REGINALD J. NEILD presiding.

The SECRETARY (Mr. George R. Cable) read the notice convening the meeting, and the minutes of the last meeting.

The CHAIRMAN—Gentlemen, you have heard the notice; you will wish probably to take the report as read, as on former occasions. ("Hear, hear.") The same remarks which I made to the meeting of the Central

Company will apply to the Northern Extension. There is no necessity for me to go all over them again, which would only weary you. The part served by the Northern extension goes, as you see, towards the frontiers of Brazil, and is more undeveloped, and formed the theatre of the military movements at the time of the so-called revolution. Therefore it suffered considerably more than the territory served by either the Central or the Eastern extension. Nevertheless, during the year under review, the gross receipts amounted to 32,425*l.*, or an increase of 654*l.* over the previous year, which, I think, is pretty satisfactory. As I told you at the last meeting, at the town of Riviera, which is where the railway terminates and reaches the Brazilian frontier, a decree had been signed for the establishment of a Custom-house; but they have had their troubles in Brazil, and nothing further has been done in that, I think, owing to the difficulty in obtaining funds for the erection of the necessary building; so that the benefits and advantages which should be accruing to us by the establishment of that Custom-house have not yet been felt by us. But I hope that they are in store. The guarantees have been promptly met by the Government during the year, and we have a disposable balance of 17,358*l.* 8*s.* 6*d.*, out of which we propose to you to pay a balance dividend of 3*s.* per share, making with the interim dividend 6*s.* 6*d.*, or at the rate of 3½ per cent. for the year, carrying forward a balance of 2,358*l.* 8*s.* 6*d.* I will put the resolution to you, if you will allow me. It is:—

"That the directors' report and audited statement of accounts for the fiscal year ended June 30th, 1898, now submitted be received and adopted."

Mr. G. W. DRABBLE—I beg to second that, gentlemen.

The resolution was put and carried unanimously without discussion.

The CHAIRMAN—I beg to propose:—

"That a balance dividend of 3*s.* per share, making, with the interim dividend paid in April last, 6*s.* 6*d.* per share for the whole year free of income-tax, be and the same is hereby declared on the ordinary share capital of the company."

Mr. DRABBLE—I beg to second that, gentlemen.

The resolution was agreed to *nem. con.*

The CHAIRMAN—I beg to propose:—

"That Mr. Loftus FitzWygram be and is hereby re-elected a director of the company."

Mr. F. PARISH—I shall be glad to second that.

The resolution was unanimously agreed to.

Mr. FITZWYGRAM—I beg to thank you, gentlemen.

Colonel ARMSTRONG—I beg to move:—

"That Messrs. Deloitte, Dever, Griffiths, and Co., and Messrs. Gane, Jackson, Jefferys, and Wells be and are hereby reappointed auditors of the company for the ensuing year, and that their remuneration be continued at fifteen guineas each."

The Rev. E. W. MATTHEWS—I beg to second it.

The resolution was carried *nem. dis.*

The CHAIRMAN—That concludes the business of the Northern Extension, gentlemen.

The proceedings then terminated.

## THE CENTRAL URUGUAY EASTERN EXTENSION RAILWAY, LIMITED.

The annual ordinary general meeting of the proprietors was held on Friday, October 14th, at the City Terminus Hotel, Cannon-street, E.C.; Mr. REGINALD J. NEILD presiding.

The SECRETARY (Mr. Geo. R. Cable) read the notice convening the meeting and the minutes of the last meeting.

The CHAIRMAN—You have heard the notice, and I suppose, gentlemen, you will take the report as read. ("Hear, hear.") In that case, I may say that the results of the Eastern Extension Company have been, I think, exceedingly satisfactory. They display increases all along the line with the exception of the number of animals carried, and the wheat and maize, which have failed because of reasons explained in the case of the Central Company. But all the districts served by the Eastern Extension are being developed, and they give promise of a very good business before them. It has always been good business for the Central Company, but they will soon, I think, become independent of the Government guarantee, which will be a satisfactory feature when the line begins to pay its interest itself. The net earnings have been 3,000*l.* better than last year, but owing to the operation of the guarantee arrangement the amount received for guarantee has been about the same amount less from the Government, inasmuch as they give us less guarantee as our net profits are greater. It is perfectly just. The result is that the net amount of receipts, including the amount brought forward from last year, is 53,194*l.*, against 52,970*l.* last year; and the amount which we have available for dividend is 16,855*l.* 14*s.* 2*d.*, out of which we propose to you to distribute a balance dividend of 4*s.* per share, making with the interim dividend 7*s.* 6*d.* for the year equal to 3½ per cent., and carrying forward a balance of 2,855*l.* 14*s.* 2*d.* I shall move this resolution, if you have no objection:—"That the directors' report and audited statement of accounts for the fiscal year ended June 30th, 1898, now submitted be received and adopted."

Mr. G. W. DRABBLE—I beg to second that.

The resolution was put to the vote and carried unanimously without discussion.

The CHAIRMAN—I now propose—"That a balance dividend of 4*s.* per share, making, with the interim dividend paid in April last, 7*s.* 6*d.* per share for the whole year free of income-tax, be and the same is hereby declared upon the share capital of the company."

Mr. DRABBLE—I beg to second that.

The resolution was agreed to *nem. con.*

The CHAIRMAN—I beg to propose—"That Mr. Loftus FitzWygram be and is hereby re-elected a director of the company."

Mr. F. PARISH—I have pleasure in seconding it.

The resolution was carried *nem. dis.*

Mr. FITZWYGRAM—I thank you, gentlemen.

Colonel ARMSTRONG—I beg to move:—"That Messrs. Deloitte, Dever Griffiths, and Co., and Messrs. Gane, Jackson, Jefferys, and Wells be and are hereby reappointed auditors of the company for the ensuing year, and that their remuneration be continued at fifteen guineas each."

Mr. H. COURTIER—I beg to second it.

The resolution was carried unanimously.

The CHAIRMAN—That concludes the business, gentlemen. We are very much obliged to you for your attendance.

The Rev. E. W. MATTHEWS—I beg to move that our best thanks be given to the directors of these three companies for their splendid services. Although we do not suggest, like our good friend and brother shareholder did just now, that we should not ask any questions, yet we recognise the ability, the knowledge, and the great service which our directors have rendered to us. ("Hear, hear.")

Mr. J. DOUGLAS—I beg to second it. This board is a peculiar one in this respect—that five directors I know are fully informed on the subject matter. The sixth—I don't happen to know about him, but I have no doubt he is as fully informed also, or his colleagues would not have him on the board. ("Hear, hear.")

The resolution was carried by acclamation.

The CHAIRMAN—I don't know whether I should say I thank you in my capacity of the sixth—(laughter)—but we are all very much obliged to you.

The proceedings then terminated.

### SANTA FE AND CORDOVA GREAT SOUTHERN RAILWAY.

The annual general meeting was held yesterday, at Winchester-house, E.C.; Colonel GEORGE OLDHAM presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said, with regard to the extension from Venado Tuerto to Rufino, that at the last general meeting he told the shareholders the board had obtained a concession for the line. The rails were laid through to Rufino, and they hoped on the 1st of next month to open the line for general traffic. About this time last year they heard a report—and they were very much disturbed by it—that an application had been made to the Argentine Government for another concession almost similar to the one the company had obtained. In the opinion of the directors it would be in the highest degree detrimental to the company's line if such an extension were in the hands of any one but themselves, for it would no doubt take a great deal of the traffic. The board, therefore, had used every means to carry through the construction of the extension as speedily as possible, and it was a great satisfaction to say that the line was practically complete, and that it was under their own control. Every dollar earned on the extension meant, roughly speaking, the earning of one dollar and a half on the company's line; consequently, the earning capability of the new line was a matter of considerable importance and interest to them. He referred to the fact that the land through which the extension ran was most suitable for agricultural purposes, and that colonisation had for some time been going on at several places; therefore, they might expect that from local traffic alone good results would be shown. Moreover, the extension was really the bridge which connected the western line by the short route to Panama, and the shareholders might rest assured that the board would do everything in their power to make the bridge as useful as possible. The extension would be worked and maintained for 50 per cent. of the gross receipts. The board thought that this part of the agreement was not only fair, but, taking the average of years, in all reasonable probability it would be advantageous to the old company. The result of the past year's working of the railway, so far as the earnings were concerned, had been most disappointing. The net revenue account showed only too plainly that the net results were less than the fixed charges by 9,534*l.*, and the directors were obliged to borrow 16,000*l.* in order to meet the current charges and liabilities on July 1st. He was glad to say that of this 8,500*l.* had already been repaid, leaving a balance of 7,500*l.* outstanding. One really good harvest would alter the present aspect altogether; but in the meantime the position was undoubtedly serious. They had received a telegram from the general manager stating that if the weather continued to be fine there was every prospect of a splendid harvest. The efforts to exterminate locusts had done a great deal of good, and it now seemed within the bounds of possibility that this plague would be minimised. When the tide turned in their favour, he thought it possible that they might regain the position they had lost.

Mr. J. AUNGIER seconded the motion, which was carried.

### METROPOLITAN DISTRICT RAILWAY.

An adjourned extraordinary general meeting was held on Thursday at Westminster Palace Hotel for the purpose of sanctioning and approving an agreement, dated the 12th ult., made between the Whitechapel and Bow Railway Company, the Metropolitan District Railway Company, and the London Tilbury and Southend Railway Company for the maintenance, working, and user of the Whitechapel and Bow Railway Company and the division of the receipts from the traffic thereon. Major LEWIS H.

ISAACS presided in the absence, through illness, of the chairman of the company (Mr. J. S. Forbes).

The CHAIRMAN expressed regret that the agreement could not yet be submitted for the official sanction of the proprietors. He was happy to say that all the material points which the agreement contained had been practically agreed to by the parties concerned; but there were one or two points, involving considerations of a technical character which had not yet been settled. He had, therefore, again to ask them to allow the meeting to be adjourned till that day four weeks, and he moved a resolution to that effect.

Viscount GORT seconded the motion, which was agreed to.

## General News.

### NITRATE NOTES.

One of our financial contemporaries yesterday had the following paragraph in its leader columns:—

"We understand that the directors of the Nitrate Railways Company, Limited, will very shortly issue a scheme for adjusting the capital account, and distributing the large balance of revenue carried over after the payment of last dividend. Considerable reticence on the subject is observed at the company's office, but we are, none the less, satisfied that our information is quite reliable, and a smart advance in the shares is certain to ensue when it becomes known in the market."

Our contemporary might have added that quite apart from any scheme for dealing with the capital account, the improved prospects of the company alone would justify a considerable rise in the shares. Yesterday's closing prices were:—Ordinary, 5½; preferred, 4½; deferred, ¾. A year ago, when the position and prospects were far less satisfactory, the prices were—ordinary, 5¼*d.*; preferred, 3¼*d.*; deferred, 1.

To aid the gambling transactions of the late lamented "Col." North and his associates, by creating a security of the undivided ordinary shares—to which their operations were chiefly confined—an Act of Parliament was obtained in 1891 authorising the splitting of those shares into preferred and deferred. Misled by the wording of the Act, North's dupes fell into the trap, and to this day have never been allowed to reconvert, thereby suffering a gross injustice, for the preferred and deferred together never command as high a price as the undivided ordinary. In many quarters there is an impression that the company has no power to reconvert the shares, but this is wholly erroneous, for the wording of clause 3 (sub-clause 11) of the Act shows that reconversion was contemplated. But even without express power in the Act, reconversion could be allowed by altering the Articles of Association. Whether, however, it will suit the book of the present board to do tardy justice to the unfortunate holders of preferred and deferred shares is quite another question.

The following from last week's *Sunday Times*, if true, should be welcome reading to Nitrate Railway shareholders, though scarcely so to shareholders in the nitrate producing companies:—"The negotiations for arranging a fresh combination among the nitrate makers have broken down. That is a pity, because in view of the abnormally low stocks the moment is propitious for co-operating to bring about a better adjustment of production to consumption. The collapse occurred over the question of the fixing of quotations. Some of the makers wanted to fix their own quotations, which was a trifle pretentious, and so the business fell through. An effort will be made to reopen it, but the outlook is not promising. The price on the coast is only 4*s.* 10½*d.* per quintal, and at that figure two sales of, respectively, 50,000 and 70,000 tons for delivery next year have just been made. Nitrate shares are a poor investment in these circumstances."

Mr. James Head's organ, the *Financial News*, in its issue of Tuesday last, has the following:—"A curiosity in quotations is to be found in Nitrate Railways issues. The undivided and preferred ordinary shares are at 5½ and 4½ respectively. Now, the preferred are entitled to 7 per cent., and are consequently worth as much as the undivided until there is a prospect of anything more than 7 per cent. being earned. At present the shares are only on a 3 per cent. basis, and the chance of the company ever again being able to pay more than 7 per cent. on its share capital is practically nil, having regard to the rival lines which now serve the nitrate district. Under these circumstances, it would appear a sound operation to sell the undivided, which only yield 5*l.* 14*s.* 3*d.* per cent. at the current price, and to buy the preferred, which return 7*l.* 5*s.* 6*d.* per cent. Moreover, the combined prices of the preferred and deferred splits do not amount to that of the undivided

share, there being a difference of 7-16 in favour of the undivided; so that if two halves are only equal to the whole, and not larger, as experts on splitting would have us believe, there must be something wrong with the quotations of the three classes of shares. We mention this as another illustration of the complete lack of interest in the markets, because there would not be these discrepancies in times of normal activity."

The liquidator of the Paccha and Jazpampa Nitrate Company, Limited, announces that in pursuance of the special resolutions passed at the recent meetings of the company, the New Paccha and Jazpampa Nitrate Company, Limited, has been incorporated with a share capital of 72,000*l.*, divided into 72,000 shares of 1*l.* each. Each holder of a share warrant to bearer of shares in the old company is entitled to claim for each share represented thereby an allotment of one share of 1*l.* in the new company, with 14*s.* credited as paid up thereon, on condition that on claiming the same he pays 2*s.* per share in respect of the shares in the new company which he claims.

#### ARGENTINE RAILWAY ITEMS.

Mr. J. Wynford Philipps, M.P. (chairman of the Costa Rica Railway Company, Limited), has been elected a director of the Buenos Ayres and Pacific Railway Company, Limited.

Mr. Frederick William Lawrence (of Messrs. J. S. Morgan and Co.) has joined the board of the Buenos Ayres and Valparaíso Transandine Railway Company, Limited.

Sr. Nicolás Vucasovich has applied to the Argentine Congress for a concession for a railway from Mercedes, Republic of Uruguay, to Puerto Montt, Chili.

Three years' time has been given to the Argentine Great Western Railway Company in which to wire in its line from Villa Mercedes to k. 180, from Alto Verde to k. 368, and from k. 486 to San Juan.

The Argentine Minister of the Interior has decreed that the railways of the province of Santa Fé which are owned by a French company come under the jurisdiction of the National Railway Board, as about 20 kilometres of their system runs through national territory.

Mr. Malcolm Graham, resident engineer of the Central Argentine Railway Company, is on his way to England in the same steamer as Mr. Craik and Mr. Theobald. During Mr. Graham's absence Mr. Christie, sectional engineer of the Northern section, will take his place.

The Argentine Congress has granted a modification in Art. 1 of law 3,442, which gives Messrs. Eduardo B. Madero and J. R. Dodson a concession for a line to the San Rafael coal mines. The line is now to be carried on from the Arroyo Blanco to the frontier line with Chili. The surveys are already being carried out.

The Argentine Senate has approved the application of Sr. Victor Pechieu for a concession for a line from Rosario to San Juan. The line leaves Rosario passing through Santa Cecilia Colony and Los Reantes in the province of Córdoba, Villa Dolores in San Luis, to join up with the Transandine Railway in the department of Lujan (Mendoza), passing by Guaymallen—another from Junta de los Ríos of Rio Segundo to the city of Córdoba, connecting up with the Central Córdoba, and a third from the port of Santa Fé to the main line. A clause was added to the effect that if the concessionaire does not sign the contract, nor present the plans, or commence the works within the stipulated period, the concession will thereby become cancelled, and the sum deposited in guarantee will immediately form part of the national treasury. We think (says the Buenos Ayres Review) that the insertion of this clause is a splendid idea, and we should not be surprised to hear that it completely chokes off the concessionaire; if it does not, he will certainly lose his money, because no one with an atom of sense will ever put money into a concern that is to serve a district already fully occupied by other lines which find it hard enough, as it is, to pay dividends. British investors are, therefore, forewarned.

With regard to the case for damages instituted by the Central Argentine and Buenos Ayres and Ensenada railway companies against the Argentine Government for the forcible removal of the rails of the said companies between Retiro and the central station at Buenos Ayres, the compensation for alleged losses demanded by the said companies amounts to \$4,000,000 gold.

The claim in the suit was passed to the Fiscal Attorney of Argentina. Dr. Botet, who has made his report upon it, makes a detailed study of the antecedents of the concession of the line when it went from the Paseo de Julio to San Fernando, and he sustains that the laws of the Legislature of the province of Buenos Ayres never intended that the land should be given in perpetuity to the railway company, nor could such a gift be authorised according to the laws and principles in vogue then and also at the present time. He sustains that the National Government as concessionaire of the Provincial Government and as direct and local chief of the capital, is only obliged to recognise those rights which the company may have legitimately acquired, and not those which it may have obtained by its exactions, by the condescensions of the Governments of the province of Buenos Ayres and by the extra limitations of its respective powers. He adds that the National Government when ordering the rails to be removed has done nothing more than exercise with rigour and energy the rights of the community which are confided to it, and which up to the past year were trampled under foot and neutralised by the private interests of a company, thanks to unjustifiable condescensions. The erroneous conception by the company of its rights is, says Dr. Botet, the cause of its grasping and threatening attitude, but "happily the tranquil and serious mind of the judge will protect the public interests and put the company in its right place, securing the inflation of its private interests, and making it understand that the laws and principles by which we are governed are those of a civilised country, which, though it is disposed to be liberal towards those who assist in its development, is able to guard the general interests and to preserve its own personality, and know the danger of accepting as legitimate the pretensions of capitalists who, under the pretext of being the agents of progress, endeavour to transform this country into a commercial establishment attached by bonds of iron to foreign syndicates." After a further array of language of this sort, Dr. Botet asks that the plaintiffs be non-suited and, furthermore, condemned in costs.

#### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., chartered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, &c., may be had gratuitously]

20,293. Wilson Shelford Shacklock, Brougham-chambers, Nottingham—Improvements in and relating to brakes for railway vehicles.

20,415. William Fletcher and John Fletcher—Improvements in means or apparatus for signalling on railways.

20,359. Andrew Kholodkowsky—A method of making safety joints for air brakes, to prevent the consequences resulting from trains leaving the rails.

20,416. William Pickersgill—New or improved fog-signalling apparatus, for use on railways and the like.

20,418. Sidney Howe Short—Improvements relating to motors for electric railways.

20,422. John Fisher—Improvements in rail joints for railways.

20,432. Haydon Parker—Improvements in self-acting brakes for railway platform trolleys and the like.

20,436. Campbell Thompson, Quetta, Baluchistan—A combined metal and wood railway sleeper.

20,446. George William Johnson—Improvements in connection with electric railways. (Stilson Hutchins, United States.)

20,461. Percy Richard Julius Willis, Fairfield, Kingston-on-Thames—Improvements in brake mechanism for railway trucks and other vehicles. (Michael Q. Rutan and William Zergiebel, United States.)

20,467. George Wood and William Mills—Improvements in fog-signalling apparatus for railways.

20,530. William Thomas—Improvements in automatically locking and unlocking the doors of railway carriages or other vehicles.

20,624. Henry Williams—Improvements in and relating to railway signalling.

20,685. Richard R. Harper and James C. Garnham—An improved sliding and self-locking coupling for electrical communication apparatus between parts of railway trains.

20,705. Alfred Anderson—Improvements in railway signalling apparatus.

**West Highland Railway.**—A correspondent writes:—"At the recent half-yearly meeting of the shareholders of this company the chairman expressed disappointment at the earnings of same; but when the 'great glen' scheme, as was originally intended, is carried through to Inverness, it will open up some of the finest scenery in Europe, and promises to become the most

popular route in this country. The Invergarry line is expected to be finished for next year's tourist traffic. The Mallaig Railway, as compared with the Highland, will shorten the distance between the islands and Glasgow by 70 miles. It is, therefore, all but certain that in the near future the West Highland will become one of the best paying lines in this country. Let us, therefore, hope that the North British will at once push on to Inverness. It would be the beginning of a new era for the large and fine country beyond, which would no doubt go on prospering by leaps and bounds with the additional railway communication. Take, for instance, the large traffic at Aberdeen. What cheapening and development it would mean for Inverness and beyond."

**Accidents to Shunters.**—A return of the number of accidents which have occurred during shunting operations to employes on the railways of the United Kingdom during the ten years ending 1897 was issued on Monday as a Parliamentary paper. It is stated that in 1888 the proportion of men killed was 1 in 185 of the brakemen and goods guards employed, and 1 in 224 shunters. In 1897 the proportion was 1 in 264, and 1 in 203 respectively. An analysis of the various companies' figures shows that on the London and North Western Railway there were last year 13 killed and 465 injured, while the Great Western Railway had 14 killed and 157 injured. On the Midland 8 were killed and 359 injured; on the Great Northern 8 were killed and 104 injured; on the North Eastern 4 killed and 235 injured; and on the South Eastern 4 killed and 44 injured. The Great Central figures show only 1 killed and 47 injured, and the Lancashire and Yorkshire 4 killed and 259 injured. On the Cheshire lines there was no fatal accident, and but 30 injuries, and on the Manchester Ship Canal 1 killed and 1 injured. The figures for the previous year show that there were 3 killed and 4 injured on the Manchester Ship Canal.

**Irish Railway Officers' Association.**—A meeting of the Irish Railway Officers' Association was held on the 7th inst., in Costigan's Hotel, Upper Sackville-street, Dublin. Mr. George Wilson, who presided, said the meeting was called by a request made by some of the railway officials in Dublin who, while being in sympathy with the association, knew very little about it. They could not hope to make the association a success

until they had a central place in Dublin where the officers of the different termini could meet. Their object now was simply to give information as to the objects of the association. They had now ninety-five members, and received many promises to join the association. Stated in a few words, the objects of the association were the dissemination of knowledge and the promotion of social intercourse among railway servants. Resolutions were passed approving of the principles of the association, appointing a Dublin committee for organising purposes, and pledging the members to support the *Irish Railway News*.

**Chinese Railway Concessions.**—The Pekin correspondent of the *Times* telegraphing on Monday last says:—"To-day the manager of the Hong Kong and Shanghai Bank (British) and Hu Yu Fen, Director of Railways, signed the final contract for a 5 per cent. sterling loan of 2,250,000*l.* for the continuation of the northern railway to Niuchwang and Hsi-ming-ting. The total length is to be 260 miles, and the line is to be completed within three years by the present Administration. The security is a Government guarantee and a charge on the railway from Pekin to Shan-hai-kwan, which is already open. The contract complies with the conditions imposed by M. Pavloff and accepted by England—namely, that the proposed extension north of the Great Wall should not be given as security, and that no foreign control of the railway north of the Great Wall should be conceded. At the same time a final agreement was signed for a valuable coal-mining concession near the proposed railway north of the Great Wall."

### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS of RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

ESTABLISHED 1774.

## TENDER FOR LETTERS PATENT.

HERBERT HADDAN and CO., Patent Agents, of 18 Buckingham-street, Strand, W.C., London, have been instructed by Herr Julius Emden, of Hamburg, the Inventor and Patentee of British Letters Patent No. 2, 2035, of 25th September, 1897, for "A new or improved Safety Device for use in Railroad Trains," invite offers to PURCHASE said PATENT by Tender to be made H. H. and Co., in writing on or before Tuesday, 1st November next, at above address. The French Patent for the same Invention may also be tendered for separately or jointly with the British Patent. A Model on view. Full particulars on inquiry.

FOR FULL PARTICULARS, PRICES, AND PAMPHLETS, APPLY TO THE OFFICES OF THE  
COMPANY AS ABOVE.

**GREAT WESTERN RAILWAY.**

The Directors of this Company are prepared to receive TENDERS for the WIDENING of the LINE between Bridgend and Tondü, a distance of about 2½ miles, and for the RECONSTRUCTION of a BRIDGE and other WORKS at Tondü Station.

Plans and Specification may be seen, and Forms of Tender and Bills of Quantities obtained, at the Office of the Engineer at Newport Station, between the hours of 10.0 a.m. and 4.0 p.m.

Tenders, addressed to the undersigned, and marked outside "Tender for Widening between Bridgend and Tondü," will be received on or before Tuesday, the 8th proximo.

The Directors do not bind themselves to accept the lowest or any Tender.

G. K. MILLS, Secretary.

Paddington Station, London,  
13th October, 1898.

**CALEDONIAN RAILWAY COMPANY.**

EDINBURGH STATION HOTEL—  
CONTRACT FOR MASON WORK AND IRON  
AND STEEL WORK.

The Directors of the Caledonian Railway Company invite TENDERS for the MASON WORK AND IRON AND STEEL WORK of the new HOTEL to be erected at Princes-street Station, Edinburgh.

The Drawings and Conditions of Contract may be seen at the Office of Messrs. Peddie and Washington Browne, Architects, 8, Albany-place, Edinburgh, on and after Monday, the 17th instant.

Copies of the Specification, Schedule of Quantities, and Form of Tender may be obtained from the Architects on payment of a deposit of Two Guineas per copy for the Mason Work, and One Guinea per copy for the Iron and Steel Work.

Sealed Tenders, addressed to the undersigned, and marked "Tender for Edinburgh Station Hotel," must be lodged with him on or before Monday, the 7th November, 1898.

The Directors do not bind themselves to accept the lowest or any of the Tenders.

J. BLACKBURN, Secretary.

Caledonian Railway Company's Offices, Glasgow,  
11th October, 1898.

**DEMERARA RAILWAY COMPANY.**

NOTICE is hereby given, that the next HALF-YEARLY GENERAL MEETING of this Company will be held at the City Terminus Hotel, Cannon-street, London, on FRIDAY, the 28th inst., at 12 o'clock.

The Transfer Books of the Company will be Closed from the 18th to the 28th instant, both days inclusive.

GEO. H. CHAMBERS, Chairman.

H. MARTIN SELLS, Secretary.

110, Cannon-street, London, 13th October, 1898.

**AMERICAN RAILWAY SHARES AND BONDS.**

**THE ENGLISH ASSOCIATION of AMERICAN BOND AND SHARE HOLDERS,** Limited, Register Shares, Collect Dividends, and Cash Coupons. Shares may be registered either in owners' names or in that of the Association. In the former case dividends are collected by Powers of Attorney (forms supplied at the office), and on shares in Association's name on presentation of the shares certificates. The Association also issues its own certificates good to bearer or registerable, countersigned by the London and Westminster Bank against the deposit of the original shares. These certificates save great trouble to Executors as they can be distributed, avoiding the expense of sending the original shares and certified copies of Wills to America.

Particulars and Forms may be obtained at the Association's Offices, 51, Great Winchester-street, London, E.C.

From the general report made by Messrs. A. E. Bateman and F. J. S. Hopwood to the Board of Trade, in regard to the capital, revenue, and traffic of the railways of the United Kingdom for the year 1897, we take the following. It may be mentioned that the returns upon which this report is largely based appeared in THE RAILWAY TIMES of August 20th:—

The forecast made at the conclusion of the report which was submitted to you a year ago, as to the results which would probably be shown by the returns for 1897, has been fully justified. It was stated in that report that the improvement of railway business which had been observable during the first portion of last year was at a somewhat slackened rate as compared with that shown in 1896, and it was added that it would probably be found, when the returns for 1897 had been made up, that that improvement had been accompanied by a larger proportionate increase in expenditure. The actual facts brought out by the returns for 1897 prove these statements to have been well founded. There was a very considerable increase last year in the revenue earned by the companies as compared with that earned in 1896, though it was smaller in amount than the increase of 1896 over 1895. There was also a large increase in the expenditure of the companies, a larger increase in fact than that of 1896 over 1895, and one of such magnitude as to reduce the improvement in the net earnings to only moderate proportions. This result, coupled with an increase in capital, caused mainly by division of stocks, has effected an apparent reduction in the per-centage proportion of the net earnings to the total capital paid up to a fraction lower than the proportion in 1894, and to only 13 higher than the proportion for 1893.

**CAPITAL.**

The paid-up capital of the railway companies of the United Kingdom reached the stupendous sum of over 1,000 million pounds at the close of 1895, and at the end of last year it exceeded that amount by nearly 90 million pounds. Included in the total sum, however, was a large amount, over 152 millions in fact, which was merely nominal, being due to additions made in the conversion, consolidation, or division of stocks; so that, deducting this sum, the real amount of the total paid-up capital would be about 937 millions. The following statement shows the amounts of capital returned as paid up under the heads of "Ordinary," "Guaranteed and Preference," and "Loans and Debenture Stocks" at the close of last year, and the amounts by which the totals under each head had been swollen by these merely nominal additions:—

	Ordinary stock. Million.	Guar. and Pref. stock. Million.	Loans and Deb. stock. Million.	Total. Million.
"Paid-up" capital .....	£425.5	£372.5	£291.8	£1089.8
Amount included in above, representing nominal additions on the consolidation, conversion, and divi- sion of stocks.	77.9	36.6	38.0	152.5

Thus 14 per cent. of the total capital returned as paid up was nominal only, while the "ordinary" capital was swollen by nominal additions to the extent of over 18 per cent., the "guaranteed and preference" by nearly 10 per cent., and the "loans and debenture" stock by 13 per cent. Taking the figures of total amounts as they stand, however, they show that as compared with 1896 there was an increase last year of 45.4 millions in the ordinary capital, of 12.4 millions in the guaranteed and preference capital, and of only 2.5 millions in the loans and debenture stock—a total increase in the year of 60.3 millions. But if we omit the purely nominal additions in the year, resulting from the causes above referred to, the increase in the ordinary capital will appear as 4.9 millions only; while that in the guaranteed and preference will be 7.3 millions, and that in the loans and debenture stock will be 1.9 millions—making a total real increase of 14.1 millions, as against an apparent increase of 60.3 millions. The large increase in the ordinary capital has brought about a variation in the proportions which each description bears to the total paid up, as compared with the proportions at the end of 1896, and those proportions now are 39 per cent. for the ordinary, 34 per cent. for the guaranteed and preference, and 27 per cent. for the loans and debenture stock. It may be of interest at this point to refer to the table in the appendix showing the computed gross amounts and average rates of dividend or interest paid on each class of capital. The figures in this table have been computed, as usual, on the basis of the rates returned as having been actually paid by the companies, and the amounts of capital to which each rate applied. The results shown by these computations are, however, in excess of the real amounts to a certain extent, owing mainly to some companies having invested portions of their capital in the stocks of other companies, and, in a few cases which cannot be separately distinguished, to dividends having been paid on some capital for portions of a year only. A comparison of the total of the computed amounts with the actual net earnings of the companies in 1897 shows indeed a difference of as much as 1,000,000. But as the computations of the amounts of dividend or interest paid have been made in the same manner for the whole of the years for which particulars are given in the table, the figures still remain valuable for comparative purposes. It will be seen from this table, then, that taking all classes of capital together, a larger amount is computed to have been paid in interest or dividend in 1897 than in any of the previous years for which particulars are given. Both the total amounts and average rates computed as having been paid

had increased year by year from 1893 to 1896, the increase in 1896 over 1895 having been as much as 2,000,000*l.* in the computed amount and nearly 1 in the computed average rate, but in 1897, while the computed amount showed an increase of less than 600,000*l.*, the average rate, owing to the increase in the capital itself, fell off from 3.99 per cent. to 3.82 per cent. Moreover, it must be noticed that what has been said with regard to the computations in respect of the total capital is true also of each description. Alike in the ordinary, the guaranteed and preference, and the loans and debenture stock, there was an increase in the gross amounts computed as paid in dividend or interest and a reduction in the average rate, the reduction, as might naturally have been expected, being most pronounced in the case of the ordinary capital. Here the reduction was from the 4.29 per cent. of 1896 to 3.91 per cent., but it must be borne in mind that the lowness of this latter figure is to be ascribed to the large increase of a purely nominal character in the capital itself as mentioned above.

#### TRAFFIC AND RECEIPTS THEREFROM.

We have already referred to the fact that there was a considerable increase last year in the revenue earned by the companies as compared with that earned in even so favourable a year for railway business as 1896. The following statement illustrates this:—

Receipts from—	1897.	1896.	Increase.	
	Million.	Million.	Amount.	Per cent.
Passenger traffic	£40.5	£39.1	£1.4	3.6
Goods traffic	47.8	46.2	1.6	3.6
Miscellaneous*	5.4	4.8	0.6	11.2
Total	£93.7	£90.1	£3.6	4.0

\* The miscellaneous receipts include rents, tolls, revenue from steamboats, and other items.

These figures point to a very satisfactory condition of affairs, especially when considered in conjunction with those as to the work done by the companies last year, to which we shall presently refer, and also when it is remembered that the totals for 1896 were already the largest on record. There was an appreciable increase under each head last year, passenger traffic, goods traffic, and the miscellaneous items all contributing their share, the proportion of the increase in the "miscellaneous" receipts being especially noticeable.

#### PASSENGER TRAFFIC.

We propose as usual to analyse the above statement further, and in doing so we have first to quote figures comparing the receipts from passenger traffic in 1897 with those in 1896:—

Receipts from—	1897.	1896.	Increase.	
	£	£	£	P.c.
Ordinary passengers—				
First-class	£2,211,000	£2,133,000	£78,000	2.5
Second-class	2,306,000	2,058,000	248,000	12.1
Third-class	25,492,000	24,780,000	712,000	2.9
Season-ticket holders	3,027,000	2,915,000	112,000	3.8
Excess luggage, mails, &c.	6,482,000	6,235,000	247,000	4.0
Total	40,518,000	39,121,000	1,397,000	3.6

This shows that, following the experience of 1896, as compared with 1895, but contrary to that of several years immediately preceding, each branch of the passenger traffic contributed its share of the general increase in revenue. As regards receipts from first-class ordinary passengers, these had shown a continuous decrease for the four years from 1890 to 1894, a tendency which was arrested in 1895. In that year and in the two succeeding ones, increases have occurred which, although small in absolute amount, have sufficed to place the first-class receipts of 1897 at a higher level than reached any time during the past ten years. As regards the receipts from second-class ordinary passengers, these had continuously decreased in the six years from 1889 to 1895, the whole decline in that period having amounted to 769,000*l.*, or 28 per cent. As suggested last year, this decline was mainly due to the cessation, or partial cessation, of second-class traffic on some of the principal systems, a movement which was assisted by the development of the season-ticket system, as well as by other causes, such as the improvement of third-class accommodation. In 1896, however, the limit of reduction appeared to have been temporarily reached, inasmuch as a fairly large proportionate increase occurred in that year in this item. A further and more important increase occurred last year, and so much of the lee-way under this head has now been made up, that the total receipt from second-class ordinary passengers in 1897 stood at only a small amount less than in 1892. It would seem from this, and from the facts as to passengers carried which will presently be referred to, that the movement in the direction of the abolition of this class of traffic has ceased, at least for a time. In each of the other branches of passenger traffic receipts there was also a satisfactory increase last year, though that increase was in no case as great either in absolute amount or in proportion as the increase which occurred in 1896 compared with 1895. A noticeable fact is that, coupled with the increase in first and second class passenger receipts, an increase of fairly average proportions is shown by the receipts from season-ticket holders. The total of the miscellaneous items (excess luggage, mails, &c.) also showed a considerable increase, thus continuing a movement which has been uninterrupted since 1879. The bulk of the increased revenue derived from passenger traffic, however, was, as usual, due to the receipts from third-class passengers, under which head there have been increases of greater or less amount year by year since 1885. In that year the total receipts from third-class passengers amounted to a little over 17½ millions, so that the increase to 25½ millions last year represents a gain in the period of 8 millions, or at the rate of about 666,000*l.* per

annum. The increase in 1897 itself was, therefore, a little above the average of the last twelve years, although it fell short of the increases of 1896 over 1895, and of the two years from 1888 to 1890. The receipts from third-class ordinary passengers now amount to over three-fifths of the total revenue derived from passenger traffic. We have been enabled by the courtesy of the railway companies, as in former years, to apportion the receipts from season-ticket holders among the different classes, and the following table, showing the result of combining the different amounts with the receipts from ordinary passengers of each class, may be of interest:—

Receipts from—	1897.	1896.	Increase.	
			Amount.	Per cent.
Ordinary and season-ticket passengers:—				
First-class	£4,418,000	£4,300,000	£118,000	2.7
Second-class	5,199,000	2,133,000	2,966,000	9.1
Third-class	26,419,000	25,652,000	767,000	3.0
Total	£34,036,000	*£32,886,000	£1,150,000	3.5

\* Including a small amount on account of season-ticket passengers, unclassified.

It will be observed on comparing this table with the preceding one that, as regards proportionate increases, only a slight difference is made in respect of first and third class receipts as the result of including the receipts from season-ticket holders of those classes. In the case of the first-class receipts the increase of 2.5 per cent., taking ordinary passenger receipts only, becomes 2.7 per cent. when the first-class season-ticket receipts are included, while in the case of the third-class the increase of 2.9 per cent. becomes 3.0 per cent. On the other hand, it must be pointed out that while the increase in the receipts from second-class ordinary passengers was 12.1 per cent., the result of including the season-ticket receipts of that class is to reduce the proportionate increase to 9.1 per cent. There was an increase in the second-class season-ticket receipts last year, it is true, but it only amounted to about 18,000*l.* in all, and it seems clear, therefore, that the circumstances which occasioned the increase in the receipts from the ordinary passengers of this class did not operate as regards season-ticket holders. The following table shows the numbers of the ordinary passengers of each class conveyed during each of the last two years, excluding the journeys of the holders of season or periodical tickets:—

	1897.	1896.	Increase.	
	No.	No.	No.	Per cent.
Ordinary passengers:—				
First-class	32,498,000	31,362,000	1,136,000	3.6
Second-class	62,762,600	60,373,000	2,389,600	4.0
Third-class	935,160,000	888,604,000	46,556,000	5.2
Total	1,030,460,600	980,339,000	50,081,600	5.1

On comparing this table with the former one relating to receipts from ordinary passengers, it will be seen that while first-class passengers increased in numbers last year by 3.6 per cent., the increase in receipts was only 2.5 per cent.; and, that while third-class passengers increased in numbers by 5.2 per cent., the increase in receipts was only 2.9 per cent. On the other hand, while the second-class passengers increased in numbers by 4.0 per cent., the increase in the receipts from this class was at the rate of 12.1 per cent., a fact which of itself gives rise to the surmise that the increase in second-class ordinary receipts is to be accounted for by an increase in the numbers travelling long distances. Putting all three classes together, we find that there was an increase last year of 5.1 per cent. in numbers, as compared with one of 3.5 per cent. in receipts, and as passenger train-mileage (as we shall presently see) increased by 4.4 per cent., it would appear, so far as can be judged from the available figures as to passenger traffic, that in this branch of business the companies were doing more work for the same amount of money in 1897 than was the case in 1896. The point cannot, however, be considered as conclusively established in the absence of returns as to the actual passenger-mileage. We have noticed above that as regards third-class passenger traffic, increase had been continuous in the receipts from this source since 1885. If we go back to the returns for that year, we find that the total number of third-class ordinary passengers conveyed was 603½ millions, while in 1897 the total was over 935 millions. This is an increase of 331 millions in the twelve years, or about 27½ millions annually. A certain proportion of this increase has doubtless been occasioned by the cessation of the issue of workmen's weekly tickets on some lines; but putting this aside it will be seen that while the numbers of third-class passengers have increased in the period named by 55 per cent., the receipts from such passengers have increased in somewhat less proportion—viz., 4.5 per cent. We may also point out that the increases in numbers in 1896 and 1897, which were about 47½ and 46½ millions respectively, were much above the average. Another point to be noticed is that for the first time the total figure as to numbers of ordinary passengers carried has touched, and even exceeded, 1,000 millions, and that, vast as this number is, it is evident that it would be considerably increased if it were possible to add to it a trustworthy estimate of the journeys of the holders of season and periodical tickets. In the absence of such an estimate, however, the table fails to give a complete statement as to the work done by the companies in the conveyance of passengers.

#### GOODS TRAFFIC.

Turning to the figures relating to the goods traffic, we have first to quote the following figures, comparing the receipts from each branch in 1897 and 1896:—

Receipts from—	1897.	1896.	Increase.	
			Amount.	Per Cent.
Mineral traffic	£19,747,000	£18,931,000	£816,000	4.3
General merchandise traffic	26,737,000	25,901,000	836,000	3.2
Live stock	1,373,000	1,343,000	30,000	2.2
Total	£47,857,000	£46,175,000	£1,682,000	3.6

As in the case of the revenue from the passenger traffic, there was thus

an increase in each of the groups into which the returns divide this branch of revenue, and in the aggregate, as will be noticed, the increase in the goods traffic revenue last year was at the same proportionate rate as the increase in the revenue from passenger traffic. The increase in the receipts from the "mineral" traffic, moreover, was even larger in amount, and to a small extent larger in proportion, than the increase which occurred in 1896 compared with 1895, an increase which, as remarked in last year's report, was considerably in excess of the average for the previous nine years. The increase in the receipts from the "general merchandise" traffic must also be considered as fairly satisfactory to the companies. It fell short indeed of the increase of 1896 over 1895, but it was still some 200,000*l.* in excess of the annual average for the past nine years, in which, however, there have been one or two bad years for railway business. The following table compares the tonnage of "minerals" and of "general merchandise" conveyed in 1897 and 1896:—

	1897.		1896.		Increase.	
	Million Tons.		Million Tons.		Amount.	Per ct.
Minerals conveyed	266.9		254.7		12.2	4.8
General merchandise conveyed	107.5		101.8		5.7	5.6
Total	374.4		356.5		17.9	5.0

Here again the figures indicate a fairly satisfactory condition of affairs. It is worthy of notice, too, that there is a close correspondence between the gross results in regard to the goods traffic of the companies last year with those already quoted in regard to passenger traffic. The correspondence between the proportionate increase in the revenue derived from passenger and goods traffic has been mentioned above, and now we have further to point out that, while the number of ordinary passengers conveyed in 1897 increased as compared with the number in 1896 by 5.1 per cent., the increase in the aggregate tonnage of goods conveyed differed only fractionally, having been at the rate of 5.0 per cent. If the railway traffic returns, as may be contended, afford a trustworthy index to the general condition of national business prosperity at the moment, these figures as to the work done and revenue earned by the companies must give ground for satisfaction. Further, the above figures show, when compared with those in the preceding table, that, while there was an increase in the tonnage of "minerals" carried to the extent of 4.8 per cent., the increase in receipts was 4.3 per cent., and that, as regards "general merchandise," while the tonnage increase was at the rate of 5.6 per cent., the increase in receipts was only 3.2 per cent. Here again the facts correspond with those in regard to the passenger traffic of the year, and, as in that case, the inference would naturally seem to be that the railway companies were doing the same amount of work in 1897 as in 1896 for a less monetary return. The figures, however, cannot be considered as conclusive in the absence of returns of the actual ton-mileage.

#### TRAIN MILEAGE.

We give in the following table a statement of the mileage travelled by passenger and goods trains during 1897 and 1896, in order to complete our review of the work done by the railway companies so far as available statistics throw light on the subject:—

	Passenger Trains. Million Miles.	Goods Trains. Million Miles.	Total (including Mixed Trains. Million Miles.
1897	202.2	163.6	367.9
1896	193.7	157.7	353.4
Increase	8.5	5.9	14.5
	or 4.4 per cent.	or 3.7 per cent.	or 4.1 per cent.

If information as to the actual passenger mileage and ton mileage had been available, such particulars would of course have afforded a more satisfactory basis for comparing the work done by the companies in 1897 with that done in previous years, than is afforded by a comparison of the figures in the above table with those already quoted as to passengers and goods carried. Summarising the available figures, however, we get the following comparison:—Increase in ordinary passenger journeys in 1897 compared with 1896, 5.1 per cent.; increase in passenger train mileage, 4.4 per cent.; increase in receipts from passenger traffic, 3.6 per cent.; increase in tonnage of goods conveyed in 1897 compared with 1896, 5 per cent.; increase in goods train mileage, 3.7 per cent.; increase in receipts from goods traffic, 3.6 per cent. These figures show at a glance that, as we have before observed, there was last year a close agreement between the gross results of the working of the two great branches of railway business. They also show in each branch a fairly close correspondence throughout, and to the slight extent to which they are divergent illustrate our previous remarks as to the companies having, on the whole, been doing in 1897 more work than in 1896 for the same amount of money.

As regards the receipts per train mile, it will be seen on referring to the table No. 13 in the appendix, that these showed a slight reduction last year—viz., from 57.93*d.* in 1896 to 57.66*d.* The highest level reached in this particular during the past ten years was that of 1890, when the figure was 58.61*d.*, while the lowest level was that of 1893 (the year of the great coal strike) when the figure was 57.13*d.* From this low point there had been continuous increase up to 1896, but the reduction in 1897 left the train mileage receipt of the year at almost exactly the same level as that of 1895, and at a figure moreover which was slightly below the average for the past ten years.

#### WORKING EXPENDITURE.

We have already referred to the fact that, coupled with the increase in work done and in revenue earned by the companies last year, there was

also a considerable increase in the gross amount of the companies' working expenses, and we have now to notice that that increase was larger both in amount and in proportion than any which has occurred for several years. It was, indeed, of sufficient magnitude to vary the proportion of expenditure to receipts, which after having stood at 56 per cent. for the three previous years was raised in 1897 to 57 per cent., that is, to the same level as that which obtained in 1893, when the revenue of the companies was so injuriously affected as a result of the great coal strike. It may be added that this proportion of 57 per cent. in 1897 and 1893 is the highest yet recorded. We shall endeavour later on to point out the particular items of expense to which this increase was in great part due, but we have first to call attention to the following statement showing the variations in the total working expenses of the companies in each year since 1888:—

Year.	Total working expenses. Million £	Amount. Million £	Increase Per cent.
1888	37.76	—	—
1889	40.09	2.33	6.2
1890	43.19	3.10	7.7
1891	45.15	1.96	4.5
1892	45.72	0.57	1.3
1893	45.70	dec. 0.02	—
1894	47.21	1.51	3.3
1895	47.88	0.67	1.4
1896	50.19	2.31	4.8
1897	53.08	2.89	5.8

It was remarked in last year's report in regard to the figures for 1896 in this table that although the increase over 1895 was large both in amount and in proportion, it was to have been expected that some increase would have occurred, having regard to the increase in the traffic and earnings of the companies in the year. The same remark will apply to the figures for 1897, with this difference, that whereas the increase which occurred in 1896 was very largely the outcome of satisfactory business conditions, it was not so much so in 1897. In 1896 the gross earnings of the companies increased as compared with 1895 by 4.9 per cent., and the gross working expenses by 4.8 per cent. In 1897, on the other hand, while expenses increased by 5.8 per cent., the gross earnings only increased by 4.0 per cent., and this, of course, is simply another way of saying what has already been said above—viz., that the increase in expenditure last year was disproportionate to that in the revenue earned. Analysing the particulars as to working expenditure further, we get the following figures respecting the amounts expended under each of the four principal heads during the last two years, the items mentioned being also those more prominently connected with the actual working of the railways themselves, and at the same time those more particularly affected by questions as to wages and the cost of materials:—

	1897. Million.	1896. Million.	Increase. Million.
Maintenance of way, works, and stations	£8.62	£8.17	£0.45
Locomotive power	13.71	12.93	0.78
Repairing and renewing carriages and wagons	4.37	4.26	0.11
Traffic expenses	16.51	15.56	0.95

It will be seen from this that there was a considerable increase last year under each of these four principal heads of expense, the whole increase accounting for no less than 2,290,000*l.* out of the total increase of 2,890,000*l.* shown in the previous table. Much of this, as above suggested, was due to increased business, but other causes, to be presently referred to, were not without effect in bringing about the general result. At the same time, even when allowance is made for the increase occasioned by these great heads of expense, there still remains the substantial sum of 600,000*l.* to be accounted for by what may be looked upon as the minor items. Of this sum, as will be seen on reference to Table No. 11 in the Appendix, the increase in the item of "rates and taxes" accounts for no less than 145,000*l.* The continuous increase in this item of the companies' expenditure has been adverted to in former reports, and the increase last year simply continues, though perhaps at a less rate than a few years ago—a movement which has now been markedly in progress since about 1892. In that year there was an increased charge for rates and taxes of 122,000*l.*; in 1893 there was a further increase of 219,000*l.*; and this was followed in succession by increases of 228,000*l.* in 1894, 195,000*l.* in 1895, 138,000*l.* in 1896, and, as above stated, 145,000*l.* last year. Thus the whole increase in this one item, which even now only constitutes about 6 per cent. of the total expenditure, has amounted to 1,047,000*l.* since 1891, and upon the 1891 total for rates and taxes this represents an advance of no less than 46½ per cent. In addition, however, to these differences, which are the principal ones observable in the items connected with railway working, it will be seen, on referring to the general "Railway Returns," that there was also an increase of 210,000*l.* in the expenditure under the head of "Steamboat, Canal, and Harbour Expenses." It has been the practice in rendering these reports in recent years to cause an examination to be made of the printed half-yearly accounts presented by the principal companies to their shareholders, in order to see how far the details which they contain would throw light on the extent to which the total working expenses of the companies had been affected by variations in the cost for wages and materials. We have continued the examination on this occasion, and the particulars which we have been able to compile upon the subject will be found in Table No. 18 in the appendix. We may mention that the fifteen companies for which particulars are given in the table referred to are accountable, taken together, for an expenditure of 44,170,000*l.* out of 53,084,000*l.* which was the total expenditure of all the companies for the year, and that they may consequently be regarded as being representative of about 83 per cent. of the whole. Taking first

the cost of coal and of materials used in the working and repair of engines, we have the following comparison for the fifteen leading lines:—

	Expenditure on Coal and Coke.	Expenditure on Materials in Locomotive Repairing Department.
In 1889 .....	£2,317,000	£1,283,000
" 1890 .....	3,149,000	1,315,000
" 1891 .....	3,491,000	1,347,000
" 1892 .....	3,290,000	1,338,000
" 1893 .....	3,199,000	1,260,000
" 1894 .....	3,059,000	1,270,000
" 1895 .....	2,932,000	1,262,000
" 1896 .....	2,839,000	1,403,000
" 1897 .....	3,031,000	1,498,000

Particulars as to the cost of materials used in the maintenance of permanent way and in the repair and renewal of rolling stock are given in the appendix. We do not quote them here as the expenses under these heads which the companies may think it necessary to incur in any one year must vary with the circumstances of each case. From the above figures as to the locomotive department, however, it will be seen that a continuous reduction had occurred in the cost of fuel in each of the five years ending 1896, notwithstanding a general increase in the train-mileage in the period, but that last year this tendency to decline was broken by a substantial increase of nearly 200,000. In the same period the cost of materials, after showing a slight decline between 1891 and 1895, increased in 1896 to a point somewhat higher than that touched in 1891, and this was followed by a further increase in 1897. Assuming, as we may fairly do, that the expenditure of the smaller companies in their locomotive departments has varied in the same direction as that of the larger, we get the following comparison of the per-centage increase or decrease in train-mileage and cost of fuel in each of the last six years:—

Years.	Increase (+) or Decrease (—)	
	In Train Mileage.	In Cost of Fuel.
	Per cent.	Per cent.
1892 .....	(+) 13	(—) 57
1893 .....	(—) 15	(—) 28
1894 .....	(+) 32	(—) 44
1895 .....	(+) 18	(—) 42
1896 .....	(+) 43	(—) 32
1897 .....	(+) 41	(+) 68

From this it will be seen that the only year of the series in which a reduction in train mileage occurred was 1893, the year of the great coal strike, and that even in that year the reduction in the cost of fuel was larger than that in miles run. In the five years ending 1896, then, it may be said that while as regards train mileage there was a general increase, a continuous decline occurred in the cost of fuel. The position, however, was altered in 1897, for, while the tendency of train mileage to increase was continued last year to a degree almost equal to that shown in 1896, there was for the first time in the six years an increase in the cost for fuel, and an increase moreover which was, proportionately, half as large again as the increase in train mileage. It was suggested in last year's report that it was doubtful whether the cost of fuel could decline much below the level reached in 1896. Prices seemed to be almost at a minimum in that year, and it will naturally be gathered from what has been said above, that there must have been some appreciable advance in 1897 in this respect. The following table is given with a view to affording a general idea of the course of prices during recent years rather than as throwing light on the increased cost of fuel to the railway companies, it being remembered that the prices of coal stated in the table relate to all descriptions taken together, and not simply the special class of coal used for railway locomotive purposes:—

Years.	Approximate Price of Coal at the Miner, according to the "Mineral Statistics."		Average Export Prices, computed from the Quantities and Declared Values of the Exports.	
	Per Ton.	Of Coal.	Per Ton.	Of Iron and Steel Rails.
1890 .....	8s. 3d.	1239s.	.....	£547
1891 .....	8s. 0d.	1196s.	.....	503
1892 .....	7s. 3d.	1089s.	.....	440
1893 .....	6s. 9d.	977s.	.....	416
1894 .....	6s. 7d.	1041s.	.....	395
1895 .....	6s. 0d.	921s.	.....	383
1896 .....	5s. 10d.	873s.	.....	446
1897 .....	5s. 11d.	882s.	.....	461

On the question of wages, we have to quote the following figures from the table in the Appendix to which we have referred above:—

In Locomotive Department.	In Traffic Department.	
Working of Engines.	Repairing and Renewing Engines.	
In 1889 .....	£1,508,000	£8,167,000
" 1890 .....	1,553,000	8,663,000
" 1891 .....	1,611,000	9,146,000
" 1892 .....	1,622,000	9,405,000
" 1893 .....	1,594,000	9,481,000
" 1894 .....	1,678,000	9,760,000
" 1895 .....	1,659,000	9,980,000
" 1896 .....	1,758,000	10,383,000
" 1897 .....	1,804,000	11,050,000

It was naturally to have been expected that the increased work done by the railway companies last year, whether measured by train mileage or by passengers and goods carried, or both, would have been accompanied by an increase in the expenditure on account of wages. Such an increase

actually occurred, and it is worthy of note that it was not confined to any one of the three heads mentioned in the table; each department contributed its share. Moreover, the table indicates that there was no slackening last year in the rate of expansion, but rather the reverse. We may perhaps assume, in regard to this question of wages, that the expenditure of the smaller companies showed a similar tendency to that of the larger, and if that be allowed, it would seem that the wages bill, as a whole, was increased last year to an extent out of proportion to the increase in the work done by the companies. We may compare the available figures on this point, as follows:—Increase in work done in 1897, as compared with 1896—Increase in number of ordinary passengers conveyed, 5.1 per cent.; increase in tonnage of goods carried, 5.0 per cent.; increase in total train mileage, 4.1 per cent. Increase in cost for wages in 1897, compared with 1896—Increase in locomotive running department, 6.7 per cent.; increase in traffic department, 6.4 per cent.; increase in the two departments taken together, 6.5 per cent. No doubt a portion of the increased charge for wages is to be ascribed to the exigencies of increasing traffic, as well as to the additional facilities afforded to the travelling public from time to time by the railway companies; to the operation of the Act dealing with the hours of labour of railway servants; and also to the voluntary alterations made by some companies in the hours of duty to be worked by their servants. These causes, or some of them, are sufficient in themselves to lead to the impression that the wages bill may be expected to continue to increase rather than diminish in the immediate future. Calculations have been made, as in former reports, as to the expenditure per train mile of some of the principal companies last year, and the results appear to be worthy of the attention of those interested in the particular undertakings. Similar calculations have also been made for all the companies combined, and the following statement compares the results with the corresponding figures for 1896:—

Expenditure on account of	Cost per train mile.		Increase or decrease in 1897.	
	1897.	1896.	Increase.	Decrease.
Maintenance of way .....	5.62d.	5.54d.	0.08d.	—
Locomotive power .....	8.97	8.81	0.16	—
Rolling stock .....	2.86	2.90	—	0.04
Traffic expenses .....	10.76	10.56	0.20	—
General charges .....	1.47	1.48	—	0.01
Rates and taxes .....	2.14	2.13	0.01	—
Government duty* .....	0.20	0.19	0.01	—
Compensations:				
Personal injuries .....	0.08	0.08	—	—
Damage to goods .....	0.21	0.18	0.03	—
Legal and Parliamentary expenses .....	0.31	0.20	0.11	—
Miscellaneous .....	0.38	0.34	0.04	—
Total .....	32.39	32.41	0.02	—

\* For Great Britain only. The railway passenger duty is not charged in Ireland.

We have already noticed that the increase in the total working expenditure last year was proportionately greater than that which occurred either in the revenue earned or in the work done, whether the latter be measured by the passengers and goods actually conveyed or by the mileage travelled by trains. Attention has also been directed to the facts that the cost of fuel and the charge for wages in the principal departments were both increased disproportionately last year. The result of all this is, naturally, a general increase in the expenditure per train mile in 1897 compared with that in 1896, the advance being more particularly pronounced in the two items of "locomotive power" and "traffic expenses." The whole increase, in fact, amounts to nearly one halfpenny per train mile run, a larger increase than any which has occurred since 1890. It may be added, moreover, that for some years prior to 1890 the total working expenditure per train mile stood at about 2s. 6d., while since that year it has stood at a fraction over 2s. 8d., with a general tendency to increase. Thus the figures, as regards the outlay which the companies incurred in 1897, and which have been adverted to above, bear out the observation made in last year's report to the effect that it was unlikely that the train mileage expenditure would be reduced within the next year or two, and that the probabilities were in favour of the experience of the immediate future being in the opposite direction. It appears to us also that there is nothing in the actual experience of 1897 which can be taken to indicate a prospect of early alteration in this particular, more especially when it is recollected that there is not much likelihood of any considerable fall in the range of prices of fuel at present, and that the charge for wages may be expected to go on increasing rather than diminishing. We give below a statement comparing the variations which have occurred in the last ten years in the traffic receipts, the working expenditure, and the net earnings of the companies per train mile:—

Years.	Traffic Receipts.		Working Expenditure.		Net Earnings.	
	Amount per Train Mile.	Increase (+) or Decrease (—).	Amount per Train Mile.	Increase (+) or Decrease (—).	Amount per Train Mile.	Increase (+) or Decrease (—).

1897 .....	57.63	(—) 0.28	32.89	(+) 0.45	24.77	(—) 0.76

From this it will be seen that the net earnings per train mile increased lightly in 1888 and 1889, and again in the three years from 1894 to 1896.

Inclusive, the total amount of these increases being 1'45d. These combined increases, however, were outweighed by the consecutive decreases which occurred between 1890 and 1893, amounting to 3'30d., to which the decrease of '75d. in 1897 has now to be added. The final result is thus to leave the net earnings per train mile in 1897 2'60d. less than they were in 1887.

### NET EARNINGS AND DIVIDENDS.

Turning now to the question of the actual net earnings in 1897, we have first to repeat what we said at the outset—viz., that the improvement in these, as compared with 1896, was reduced to merely moderate proportions by the greater proportionate increase in expenditure than in receipts, and that this, coupled with a large nominal increase in the capital returned as paid up, brought about an apparent decline in the proportion of the net earnings to total capital from 3'88 per cent., the figure for 1896, to 3'73 per cent. The actual increase in the net earnings last year amounted, in fact, to about 727,000*l.*, or 1'8 per cent., as against an increase of 1,881,000*l.*, or 4'9 per cent. in 1896 compared with 1895, while the total "paid-up" capital increased in 1897 by 5'9 per cent. The main effect of this apparent reduction in proportionate return is, of course, to be seen in the computations which have been made as to the average return on the ordinary capital, the rates of dividend or interest on the other descriptions of capital being more or less definitely fixed. The computed average rate of interest on the loans and debenture stocks, as given in table No. 3 in the appendix, declined last year by '02, a decline which simply continues a movement which has been going on for several years, and is so small that it may well be considered as forming part of that movement. The average for the guaranteed and preference capital also showed a slight reduction in the per-centage rate—viz., from 4'02 per cent. to 3'95 per cent. As regards the ordinary capital, however, it will be seen that the computed average rate fell off from 4'29 per cent. in 1896 to 3'91 per cent. last year, but it must be remembered that this reduction was solely due to the large increase in the ordinary capital itself, caused by additions of a merely nominal character, and not to the smallness of the increase in the amount available for distribution. The following statement is a summary of the table No. 4 in the appendix and shows the amounts of each description of capital classed according to the rates of dividend or interest paid in 1897:—

Rate of Interest or Dividend.	Ordinary.		Guaranteed.		Preference.		Loans and Debenture Stock.	
	Amount of Capital.	Per cent. of Total.	Amount of Capital.	Per cent. of Total.	Amount of Capital.	Per cent. of Total.	Amount of Capital.	Per cent. of Total.
Nil .....	£41,468,004	10·5	£136,200	0·1	£14,548,599	5·4	£386,715	0·1

7 " 8 " 9 " .....	28,000	—	—	—	—	—	—	—
8 " 9 " 10 " .....	750,112	0·2	50,000	0·1	—	—	—	—
9 " 10 " 11 " .....	499,011	0·1	—	—	5,340	—	—	—
Total .....	425,501,582	100·0	103,061,275	100·0	269,373,440	100·0	291,828,798	100·0

If this table be compared with the corresponding one contained in last year's report it will be seen that the grouping of the descriptions of capital other than ordinary remained much the same in 1897 as in 1896. The only variation of any importance was a decline of about 7 per cent. in the total of the preference capital from the class receiving between 3 and 4 per cent. in 1896 to the class receiving between 2 and 3 per cent. in 1897, this having been brought about by the conversion of preference stocks of the Lancashire and Yorkshire Company, formerly entitled to dividend rates of 3½ and 4 per cent., to a stock bearing the uniform rate of 3 per cent. This conversion resulted, at the same time, in a merely nominal increase of about 5,000,000*l.* in the total amount of the preference capital. As regards the ordinary capital it should be mentioned that comparison in respect of classification by rates is somewhat obscured as the result of similar conversion operations. The ordinary stocks of the Midland and the Glasgow and South Western companies were divided last year into "preferred" and "deferred" stocks in such a way as to double the amounts while reducing the rates of dividend. The ordinary stocks of these two companies in 1896 amounted together to 40 millions, and nearly all of this appeared in the table published a year ago in the class receiving rates between 5 and 6 per cent. In the present table (the 40 millions having been virtually doubled in the conversion) 35 millions appears in the class receiving between 3 and 4 per cent., and 4½ millions in that receiving between 2 and 3 per cent. If allowance be made for these alterations, which are altogether nominal, it will be seen that there were last year, instead of reductions (as would appear at first sight), some slight advances all along the line. A moment's consideration will show that this must have been the case. According to the table No. 3 in the Appendix, the amount computed as having been actually paid in dividends on ordinary capital increased last year by nearly 320,000*l.* as compared with 1896, and as the actual increase in the ordinary capital only amounted to about 5,000,000*l.*, which probably received little or no dividend, this sum would go some way, though not far, towards improving the position of the ordinary capital generally. The following table, showing the amounts of ordinary capital grouped according to dividends paid for each of the last five years, is given with a view to afford an idea of the variations which have occurred in the grouping in the period:—

Rates of Dividend.	1894.		1895.		1896.		1897.	
	Amount.	Per cent. of Total.	Amount.	Per cent. of Total.	Amount.	Per cent. of Total.	Amount.	Per cent. of Total.

Receipts per train mile from traffic .....	d. 57·66	d. 57·93	—	—	—	—	0·27	0·5
Expenditure per train mile, exclusive of harbour, &c., expenses .....	d. 32·89	d. 32·41	d. 0·48	1·5	—	—	—	—
Net earnings per train mile .....	d. 24·77	d. 25·52	—	—	—	—	0·75	2·9
Per-centage of net earnings on capital .....	3·73	3·88	—	—	—	—	0·15	3·9
Dividend paid on ordinary capital .....	*3·91	*4·29	—	—	—	—	0·38	8·9

\* These per-centages are calculated on amounts a little in excess of the true totals.

As regards the prospects of the current year, it would seem that up to the present time there has been a continuation of the improvement in the earnings of the railway companies which has been observable in the last three or four years, notwithstanding the injurious effect on the traffic of certain lines in consequence of the unfortunate dispute in the South Wales coal trade. As was the case last year, however, the improvement will probably be found to have been accompanied by a somewhat larger proportionate increase in expenditure, and, all things considered, it is doubtful whether the returns for 1898, when they are completed, will show more generally satisfactory results from the railway shareholders' point of view than those shown by the returns for 1897.

## American & Canadian Railways.

### CANADIAN PACIFIC AND GRAND TRUNK RATE DISPUTE.

Hereunder we reproduce copies of a correspondence which has taken place between the Canadian Pacific and Grand Trunk Railway companies:—

(1)

"Montreal, September 1st, 1898.—Dear Sir Rivers—In order to guard against any possible misunderstanding, I beg leave to state in writing our position concerning the questions we have recently discussed. The two main questions between our respective companies are:—First, the existing demoralisation of transcontinental and local passenger rates; second, the future use of the Grand Trunk line between Toronto and North Bay as a means of connection between the Canadian Pacific Company's lines in middle and southern Ontario and its main line. The first question is of immediate and pressing importance to the Grand Trunk and the Canadian Pacific companies and to all of the trunk and transcontinental lines as well. The second question is a domestic matter in which lines other than the Grand Trunk and Canadian Pacific are not necessarily interested. As regards the first question the Canadian Pacific Railway was indisputably the party attacked, and while we felt quite justified in our demand that rates and conditions *ante bellum* should be restored as a condition precedent to a meeting of the lines interested, looking to a new arrange-

ment, we proposed later on that disinterested arbitrators should determine whether the rates and conditions should be restored in whole or in part, or not at all, as a condition precedent to such a meeting. The fairness of this was recognised by your own company, which assented to it, as did all the other lines interested, save two of your western connections—the Great Northern and the Northern Pacific. So matters stood until, quite recently, a proposition from a disinterested source was made to the lines interested that the transcontinental passenger rates should be restored and the question of differentials to the Canadian Pacific submitted to arbitration, and pending such arbitration the Canadian Pacific should be allowed one-half the differential it formerly enjoyed. We indicated our willingness to join the other lines in the restoration of rates on these conditions, and we have indicated to you our willingness to agree that as between the Canadian Pacific and the Grand Trunk all passenger rates should be restored at the same time to the *ante bellum* basis. You have emphatically stated that the termination of the North Bay arrangement by the Grand Trunk had no connection with or relation to the transcontinental rate question. Certainly the question of the future use of your North Bay line for our traffic has no relation to the transcontinental rate matter. Whether or not we shall make use of your North Bay line for our Ontario traffic instead of using our own longer line, as we are now doing, or instead of making a new and shorter line of our own, we cannot permit anybody to determine for us. That is not a proper subject for arbitration. We may or may not be able to agree with you for the use of your line, but there is no reason why negotiations concerning this matter should in any way be complicated with or delay the settlement of the passenger rate difficulty.—Yours truly, (signed) W. C. VAN HORNE, President. Sir C. Rivers Wilson, G.C.M.G., President Grand Trunk Railway Company."

(2)

"Grand Trunk Railway Company of Canada, London, September 16th, 1898.—Dear Sir William—I did not, unfortunately, receive your letter of the 1st inst., addressed to New York, before I sailed, and it has only reached me to-day. Since it was written the decision of the Interstate Commerce Commission has been published, and, if I am correctly informed, you have taken steps which presumably terminate the regrettable conflict between the Canadian Pacific Railway Company and the American lines. I congratulate you on your prompt and satisfactory action in the matter, and trust that the differences between the Canadian Pacific and Grand Trunk railway companies may also be now adjusted without further delay. In one important respect I should hope that you would be willing to withdraw from the position you have taken up, without waiting for an issue on other points. I mean as to the restoration of local rates in Ontario and Quebec, which you have stated were reduced by the Canadian Pacific Railway Company in consequence of the joint action of the Grand Trunk with the American lines in the matter of transcontinental passenger rates. You know the reasons which obliged us to act in concert with our Western connections, and that, being neither responsible for the action of the American lines nor competent to influence it, we considered that the proceeding of the Canadian Pacific, in seeking to penalise the Grand Trunk, was neither equitable nor practical. Now, however, that the cause of offence (however unintentional or unavoidable) has ceased to exist, I feel sure that you will not hesitate to complete the arrangement I understand you have made in respect of the transcontinental passenger rates by applying it to local Canadian rates and restoring them to their former standard. As regards the use of the Grand Trunk North Bay line, which you properly dissociate from the question of the demoralisation of passenger rates, I quite agree with you that it is no proper question for arbitration whether you should or should not make use of that line, nor do I know that such a proposal was ever made. It certainly was not mentioned at our last meeting in Montreal; but what would be a proper subject for arbitration would be the terms upon which the line should be used, if used at all, which is quite a different question. Both on this point and on any other between us, whether it be that of the Ontario and Manitoba rates, or the propriety of local rate-cutting in Ontario and Quebec, the Grand Trunk Company, as I had the honour of stating to you verbally, are prepared—should agreement be impossible otherwise—to submit to the decision of an impartial tribunal. I venture again to press this proposal upon your consideration. You will remember that in the course of our last conversation the names of the board of arbitration of the Joint Traffic Association and that of Mr. Olney were mentioned as highly eligible arbitrators, and we should be willing to refer all matters in dispute to either.—Believe me, yours very truly, (signed) C. RIVERS WILSON."

(3)

"The Canadian Pacific Railway Company, Montreal, September 29th, 1898. Dear Sir Rivers—I have your letter of the 16th, in which you express the hope that the restoration of transcontinental passenger rates may be extended to the restoration of local Canadian rates to their former standard. That is what we have already proposed, as you will see by the enclosed copy of a letter from Mr. Shaughnessy to Mr. Hays, under date September 19th. I enclose a copy of Mr. Hays's reply, which we take as meaning that he will not restore the *ante bellum* colonist rate *via* Chicago, a rate which had been in force for years between our respective companies. This, for reasons already fully discussed with you, precludes the restoration of Canadian local rates. In reference to the North Bay arrangement, while admitting that the question whether or not we shall make use of your line is not a proper one to arbitrate, you say that the terms upon which it shall be used, if used at all, is quite a different question. I regret that I see it differently. What we shall pay is the essential question. We know better than anybody else can possibly know what, in view of all our complex circumstances, we can afford to pay rather than continue the use of our own longer line or to

build a shorter line, and so with all the terms and conditions relating to the use of your line. We cannot permit any one to determine them for us. I regret exceedingly that we are so far from an agreement covering all matters, but we have gone to our extreme limit in the concessions we have offered, and the solution of both of the main questions between us now rests with your company.—Most sincerely yours, (signed) W. C. VAN HORNE. Sir Charles Rivers Wilson, G.C.M.G., President Grand Trunk Railway Company."

(4)

"Canadian Pacific Railway Company, Montreal, September 19th, 1898.—Charles M. Hays, Esq., General Manager Grand Trunk System, Montreal. Dear Sir—Referring to my circular letter dated September 6th, about the restoration of transcontinental rates, will you please say if your company is prepared on that same date to restore the rates between all points in Canada east of British Columbia to the figures which were in force previous to recent disturbances?—Yours truly, (signed) T. G. SHAUGHNESSY, Vice-President."

(5)

"Grand Trunk Railway System, Quebec, September 21st, 1898.—Mr. T. G. Shaughnessy, Vice-President Canadian Pacific Railway, Montreal. Dear Sir—Replying to your favour of September 12th, referring to your circular letter dated September 6th, about the restoration of transcontinental rates, and making inquiry if this company is prepared on that same date to restore the rates between all points in Canada east of British Columbia to the figures which were in force previous to recent disturbances, will say we will be very glad, on the date named, to restore all rates in the territory described to figures uniform with those of your company in force before the recent disturbances.—Yours truly, (signed) CHAS. M. HAYS, General Manager."

(6)

"Canadian Pacific Railway Company, Montreal, September 23rd, 1898. Charles M. Hays, Esq., General Manager Grand Trunk System, Montreal. Dear Sir—Referring to your letter of yesterday, I understand your answer to be that you are not prepared to join with us in restoring passenger rates between points in Canada to the basis which prevailed previous to the disturbances.—Yours truly, (signed) T. G. SHAUGHNESSY, Vice-President."

(7)

"Grand Trunk Railway Company of Canada. London, October 17th, 1898.—Dear Sir William—I am in receipt of your letter of the 29th ult. The questions at issue between us appear to be simply as follow:—Your company has abandoned its claim to differentials on transcontinental traffic as against the American lines, but still proposes to maintain them against the Grand Trunk for business to north-western Canadian points; and in order to coerce the Grand Trunk into an acceptance of this contention, the Canadian Pacific Railway cuts local rates, which hitherto have always been uniform for the two companies. My suggestion to you was that your claim to differentials on Ontario-North Western rates, as well as the terms on which you might, if you were so disposed, use our North Bay line, should be referred to arbitration, but that local rates should meanwhile be restored. I sincerely hope that further consideration may still induce you to accept this reasonable proposal.—Believe me, yours very truly, (signed) C. RIVERS WILSON. Sir W. C. Van Horne, K.C.M.G., President Canadian Pacific Railway, Montreal."

#### LOUISVILLE AND NASHVILLE.

The report of this company for the year ending June 30th, 1898, compares as follows with that for the preceding fiscal year:—

	1896-7.	1897-8.
Passenger earnings .....	\$4,291,735	\$4,557,729
Freight earnings .....	14,641,263	15,854,802
Mail, express, &c. ....	1,439,309	1,584,022
<b>Total earnings .....</b>	<b>\$20,372,307</b>	<b>\$21,996,553</b>
Operating expenses .....	13,849,217	14,921,730
<b>Net earnings .....</b>	<b>\$6,523,090</b>	<b>\$7,074,823</b>
Income from investments, &c. ....	427,064	590,776
<b>Total net income .....</b>	<b>\$6,950,154</b>	<b>\$7,665,600</b>
Taxes .....	\$589,516	\$640,249
Rentals, interest on debt, &c. ....	4,981,993	4,972,592
Georgia Railroad deficit .....	25,440	162,620
Loss on other roads .....	49,975	12,480
Sinking fund payment (net) .....	194,663	162,007
Advances to S. and N.A. Railroad ...	108,440	56,472
Sundries .....	20,947	26,375
<b>Total disbursements .....</b>	<b>\$5,970,974</b>	<b>\$6,032,795</b>
<b>Balance—surplus .....</b>	<b>\$979,180</b>	<b>\$1,632,904</b>

The balance-sheet at June 30th, 1898, shows a stock capital of \$55,000,000, and a bonded debt of \$110,389,660. The company owns stocks to the amount of \$1,631,598, and bonds to the amount of \$7,705,031. It has, besides, \$37,935,534 of stocks and bonds in trust.

The average length of line operated was 2,988 miles (against 2,981 miles); the number of passengers carried, 5,208,588 (against 5,115,190); the average rate per passenger per mile, 2.15 cents (against 2.25 cents); the quantity of freight moved, 12,309,731 tons (against 11,391,942 tons); the average rate per ton per mile, 0.750 cent (against 0.805 cent); ratio of expenses to receipts, 67.84 per cent. (against 67.98 per cent.).

Mr. Belmont, the president, in his report states:—"On April 1st, 1898, the Louisville and Nashville consolidated mortgage 7 per cent. bonds, amounting to \$7,070,000 matured. In order to provide for the payment of these bonds, for the cost of the Paducah and Memphis division and the liquidation of the floating debt of the company, there have been issued \$12,500,000 collateral trust five-twenty year gold bonds, secured by \$14,000,000 of unified fifty-year 4 per cent. gold mortgage bonds and \$4,000,000 Paducah and Memphis division fifty-year 4 per cent. gold first mortgage bonds as collateral. These bonds have been sold at a satisfactory price, and the proceeds have been applied to the payment of \$7,001,000 consolidated mortgage bonds (leaving still outstanding \$69,000) and to reimburse the company for its expenditures for the Paducah and Memphis division, amounting to \$3,623,319, and the balance of the proceeds is in cash in the treasury of the company.

"Income account has been charged with the discount on bonds received for the sinking fund payments and for sinking fund payments for which no bonds were received, amounting to \$162,007; also the annual *pro rata* discount on bonds sold, amounting to \$26,375; and the loss on the other roads amounting to \$175,100, leaving a balance to the credit of income account of \$1,632,901, which has been transferred to the credit of profit and loss account. The directors have revalued the assets of the company, and have charged all losses, accounts, and advances considered uncollectable, to the amount of \$128,246, to profit and loss account. The balance to the credit of profit and loss account June 30th, 1898, is \$2,846,360.

"There has been credited to reserve fund account and charged to profit and loss the following amounts appropriated out of this year's surplus:—For couplers and air-brakes, to comply with the law passed by Congress, for equipping the balance of the company's rolling stock, \$500,000; for rolling stock, \$500,000; for reduction of grade, \$248,441; there was still unexpended from amounts previously appropriated for rolling stock, \$380,883; making a total appropriation of \$1,629,324. The physical and financial condition of the company is eminently satisfactory. It has upwards of \$2,000,000 in bank, and is entirely free from floating debt.

"The improvement of the physical condition of the company's property, its rolling stock, &c., which has been made during the past five years, will relieve the management from further extraordinary expenditures for improvement of the road.

"The expenditures for the terminal facilities at Nashville, Tenn., will be represented by bonds secured by a lease of the terminal property jointly to the Nashville Chattanooga and St. Louis Railway and Louisville and Nashville Railroad Company.

"It was the understanding with the employees of the company, at the time that their salaries and wages were reduced, that the same should be restored when the business of the company warranted it. The reductions were to the extent of 20 per cent. on salaries in excess of \$4,000 and 10 per cent. on all salaries and wages less than that amount. Partial restoration has been made as of July 1st, 1898, to the extent of one-half of the respective reductions, and assurances given that the remainder will be restored on January 1st, 1899.

"It may be proper to state that it is proposed to consider surplus hereafter earned over and above operating expenses and fixed charges for each year as a basis for dividends for such year, which dividends will be regulated by the amount so earned for that period, but it is not contemplated to use any of the accumulated surplus of the company for the payment of dividends."

### LATEST EARNINGS.

Second week of October.—Chicago Milwaukee and St. Paul, \$946,000—increase, \$140,000; Denver and Rio Grande, \$186,000—increase, \$15,000; Mexican Central, \$275,000—increase, \$56,000; Mexican National, \$120,000—increase, \$13,000; Missouri Kansas and Texas, \$351,000—increase, \$60,000; Kansas City Pittsburg and Gulf, \$70,000—increase, \$10,000; New York Ontario and Western, \$76,000—decrease, \$6,000; Texas and Pacific, \$211,000—increase, \$20,000; Wabash, \$307,000—increase, \$6,000; Chesapeake and Ohio, \$248,000—increase, \$17,000; Chicago Great Western, \$116,000—decrease, \$6,000; Louisville and Nashville, \$466,000—increase, \$36,000; Missouri Pacific, \$607,000—increase, \$22,000; Southern Railway, \$528,000—increase, \$31,000.

First week of October.—Cleveland Cincinnati Chicago and St. Louis, \$297,000—decrease, \$2,000; Northern Pacific, \$655,000—increase, \$23,000. The earnings of 68 roads in the first week of October show an increase of 5.75 per cent.

Month of September.—Nashville Chattanooga and St. Louis, gross, \$528,000—increase, \$42,000; net, \$106,000—increase, \$23,000. Tennessee Coal, Iron, and Railroad, net, \$53,000—decrease, \$9,000; surplus over charges, \$6,000—decrease, \$6,000. The gross earnings of 129 roads in the month of September amounted to \$48,969,885, an increase of \$2,790,805, or 6.04 per cent.

Month of August.—Pittsburg and Lake Erie, gross, \$461,000—increase, \$11,000; net, \$189,000—increase, \$38,000. Missouri Kansas and Texas, gross, \$907,000—decrease, \$81,000; net, \$290,000—decrease, \$34,000; surplus after charges, \$5,000—decrease, \$34,000. Qu'Appelle Long Lake and Saskatchewan, gross earnings, \$7,753; net loss, \$2,728. Calgary and Edmonton, gross earnings, \$18,720; net loss, \$3,017.

### RAILROAD NOTES.

Chairman Walker, of the Atchison Topeka and Santa Fé, states that negotiations are virtually completed for the purchase of the San Francisco and San Joaquin Valley Railway, which will give the Atchison road an entrance into San Francisco. The San Joaquin Valley Company's stock has been deposited, and the whole plan is ready for ratification by the Atchison Company's stockholders. Mr. C. P. Huntington, in an interview regarding the Atchison's purchase, said—"I am glad to hear the news of the purchase, as the Southern Pacific will now have a responsible instead of an irresponsible competitor. The Valley Road thus far has been a free lance."

The California State Railroad Commissioners will attempt to bring about a reduction of rates by the Pullman Car Company. Colonel Polk, expert accountant of the committee, has made a report showing that the capital stock of the Pullman Company is estimated at \$36,000,000. The net earnings for the last fiscal year were \$4,650,850, and the income from the surplus account on July 31st amounted to \$25,247,648. It is argued by the commissioners that these profits indicate excessive charges.

The option granted to holders of Pacific Railroad bonds becoming due January 1st, 1899, to receive payment in full, with interest, less a rebate of  $\frac{1}{2}$  of 1 per cent., terminated with the month of September. The department, however, extended the option through the month of October to November 1st. Although there are about \$14,000,000 of these bonds outstanding, only \$846,000 have so far been presented for payment. This fact is regarded by the treasury officials as proof that there is no general scarcity of money.

The report of the Pullman Palace Car Company for the year ended July 31st shows:—Gross revenue, \$10,675,000—increase, \$1,700,000; surplus over charges, and dividends, \$2,394,000—increase, \$623,000. The annual meeting of stockholders of the company has ratified the plan cabled some time ago for the distribution of the surplus. The company has made an application to the New York Stock Exchange to list 18,000 shares of additional stock.

There are signs of an impending outbreak of hostility amongst the railroads of the North-West. Renewed accusations against the Canadian Pacific have been filed through the Great Northern's head passenger department. It is claimed that the Canadian Pacific has not kept faith with the American roads regarding the restoration of east-bound rates, and it is intimated that the Great Northern is preparing to adopt retaliatory measures.

The arbitration dispute over the freight differentials between the American lines and the Canadian Pacific was concluded on Saturday at Chicago. The committee will not come to any Saturday at Chicago. The arbitrators have decided that the Canadian Pacific is not entitled to a differential rate under the freight rates of American roads between San Francisco and points on or east of the Missouri River.

A United States Commissioner is taking testimony at New York in the proceedings instituted by the first preferred stockholders of the Baltimore and Ohio Railroad Company, who seek to stop the reorganisation plan by a foreclosure on the consolidated bonds, demanding that the interest on these, amounting to \$300,000, which has been in default since August 1st, shall be paid.

Mr. Provand, M.P., of Glasgow, has gone to Ottawa, to urge the reopening of the case of the Chignecto Ship Railway Company with a view to its being enabled to earn the Dominion subsidy, or else to its being compensated for its expenditure in Canada.

An officer of the Baltimore and Ohio Railroad states that the company still has the control of the Pittsburg and Western road, in contradiction of the rumours that the latter had gone to the Lake Erie and Western.

At the annual meeting of the Northern Pacific Railroad Company, on Thursday, the Philadelphia stockholders, representing 13,000 shares, had an opposition ticket, but finally withdrew and refused to vote at all.

It is officially announced that the Reading Company has purchased the majority stock of the Wilmington and Northern Railroad, which will be operated in connection with the Reading system.

The reorganisation plan of the Baltimore and Ohio South Western is now about ready, and President Edward R. Bacon sails for Europe to-day to submit it to foreign interests.

The new line between Chicago and St. Louis will be built by the Toledo St. Louis and Kansas City. It is estimated that \$13,000,000 will be required to carry out the work.

Messrs. Simon Borg and Co. have bought from the Protective Committee its entire holdings of Pittsburgh and Western seconds on terms equal to probably about 7½.

The managers of the Northern Pacific Railroad have reduced local passenger and freight rates to Washington.

## Directors' Reports.

### BUENOS AYRES AND PACIFIC RAILWAY.

#### CAPITAL.

The accounts to June 30th, 1898, show a total capital expenditure of 5,092,054*l.*, whilst the receipts have been 5,100,000*l.*, as follows:—4 per cent. first mortgage debenture stock, 2,200,000*l.*; 4½ per cent. second debenture stock (non-cumulative until 1901), 1,500,000*l.*; 7 per cent. first preference stock, 1,000,000*l.*; second preferred shares of 20*l.* each, 100,000*l.*; deferred shares of 20*l.* each, 300,000*l.*

#### REVENUE.

The gross receipts for the year ending June 30th, 1898, amounted to 358,334*l.* (against 411,672*l.*), the expenses to 197,689*l.* (against 222,645*l.*), and the profits to 160,645*l.* (against 189,027*l.*). Sundry credits brought up the total net revenue to 178,724*l.*, which is disposed of as follows:—Special renewals, 15,139*l.*; interest on first debenture stock, 88,000*l.*; interest on Caballito Junction capital account, 394*l.*; together, 103,533*l.*; leaving 75,190*l.*. This will allow of a distribution in full on the second debenture stock—viz., 4½ per cent. on 1,500,000*l.*—67,500*l.*—leaving a balance of 7,690*l.*, subject to a deduction of 1,047*l.*, to adjust last year's account, and the difference, 6,642*l.*, will be applied in reduction of the 11,919*l.* carried forward in renewal of line suspense account from last year's balance-sheet.

#### TRAFFIC, &c.

The number of passengers carried in the year was 432,273 (against 455,446 in the previous year); the quantity of freight carried, 329,225 tonnes (against 462,326 tonnes); the number of animals carried, 261,950 (against 225,022); the train miles run, 1,015,636 (against 1,099,693); the receipts per train mile, 7*s.* 0½*d.* (against 7*s.* 5½*d.*); expenses per train mile, 3*s.* 10½*d.* (against 4*s.* 0½*d.*); net profit per train mile, 3*s.* 2*d.* (against 3*s.* 5½*d.*); receipts per passenger, 3*s.* 5½*d.* (against 3*s.* 5½*d.*); the receipts per tonne of goods, 15*s.* 5½*d.* (against 12*s.* 11½*d.*); length of line worked, 426 miles (in each year); ratio of working expenses to receipts, 55·12 per cent. (against 52·56 per cent.). The report states:—

At the request of the Argentine Government, a new classification of the accounts has been adopted, necessitating the rearrangement of last year's figures, for the purpose of comparison. The expenses of 1896-97 included 6,000*l.* for special renewals. A reduction of 53,337*l.* in gross receipts has been accompanied by a decrease of 24,956*l.* in the expenses, resulting in a net decrease of 28,382*l.*, or 15 per cent., in the profit. Passenger traffic shows a decrease, both in numbers and value, of about 5 per cent., part of this being due to the closing of the central station at Buenos Ayres. Parcels traffic exhibits an apparent decrease, which is solely due to the transfer of the fruit traffic, hitherto carried by passenger train to special goods trains. Goods tonnage shows a considerable diminution of 133,101 tonnes [metric tonne = 1,000 kilogrammes = 2,204½*lbs.* aver.] from 462,326 tonnes to 329,225 tonnes, the main decrease being—Grain, 88,783 tonnes; timber, 14,461 tonnes; and general merchandise, 32,251 tonnes. Cattle traffic has increased satisfactorily, the number of animals carried being 261,950, as against 225,022 in 1896-97. The train mileage has been reduced by 7·64 per cent. The general manager's remarks show that the anticipations expressed in the last report as to the unfavourable results of the bad season in 1897 have been fulfilled, and in addition to the lateness of the maize harvest of 1898 has precluded the forwarding of the crop until too late for the year under review. These are disadvantages common to nearly the whole of the Argentine railways traversing agricultural districts. The results of the current year, however, are encouraging, as the delayed maize began to come forward in July, and for the fourteen weeks to date the gross traffic is 95,521*l.*, as against 84,109*l.* last year.

#### GENERAL.

The junction with the Buenos Ayres and Rosario Railway, in the city of Buenos Ayres, was completed and opened to traffic on April 1st, 1898. In view of the unfavourable conditions which have prevailed in Argentina, the board have authorised a petition to be presented to the Government asking for an extension of time for the construction of the branch to Ita-ló. The directors availed themselves of the presence in Argentina of Mr. Harrison Hodgson, M.I.C.E., to obtain a further independent inspection and report upon the permanent way. This report

confirms the recommendations of the general manager and engineer, and makes it clear that the relaying of the road must be continued, both in the interests of the travelling public and of the proprietors of the railway. During the year 43 kilometres of line through salt districts were relaid with good 50*lb.* rails, taken last year out of the Buenos Ayres and Mercedes section, and strengthened with additional sleepers, at a total cost of 22,254*l.*, of which 7,114*l.* is chargeable to capital and 15,140*l.* to revenue. In other parts of the line additional sleepers have been laid at a capital cost of 8,960*l.*. No charge has been made for special renewals, which account shows a total of 24,454*l.*, as against 38,845*l.* last year. The board have decided to charge the whole 15,140*l.* in net revenue account, thus bringing up the total expenditure on permanent way maintenance to about the total of last year. It is satisfactory to note that, with the improved road, the ordinary permanent way gangs can be decreased, and it is anticipated that considerable reductions will continue to be made in the maintenance charges as the relaying with 70*lb.* rails proceeds. The Government accounts for freight have been carried to the credit of the net revenue account. Hitherto it has been the practice only to credit the cash as and when received from the various Government departments. The Board report with great regret the resignation of Mr. Robert Byrie, who has rendered the company most valuable services during the fifteen years of his association with his colleagues. The board have elected in his place Mr. J. W. Philipps, M.P. The agreement under which the Villa Maria and Rufino Railway Company's line was worked by this company having expired, the line was handed back on July 1st last. The directors will be very glad if holders entitled to fractions of Argentine Government railway guarantees rescission bonds will either sell their holdings or buy upon the market sufficient scrip to make up 100*l.*, so that bonds may be delivered. There is a comparatively small amount of scrip outstanding, and after the payment of the coupon due January 1st next, no further distribution of interest upon the scrip will be made by the company.

### THE RECENT ARMY MANŒUVRES.

The Secretary of State for War has written to Mr. Sam Fay, the general manager of the Midland and South Western Junction Railway, stating that he has learnt with pleasure from the reports submitted to him, the extent to which the officials of that railway, by their zealous co-operation with the military authorities, contributed to the successful conveyance of the large number of troops engaged in the recent manœuvres on Salisbury Plain. The Marquis of Lansdowne has further requested Mr. Fay to convey to those in the employ of the company who contributed to so satisfactory a result his appreciation of their services. The Midland and South Western Junction Railway conveyed over their line some 26,000 men, 1,500 horses, and five batteries of artillery, or rather more than half the troops engaged in the manœuvres. This is the first occasion on which the military authorities have entrained cavalry and artillery in any considerable numbers. On all previous occasions, when there has been any large concentration of troops, those arms of the service have been marched by road, but upon the breaking up of the camps last month the railway authorities were confronted with the transport of an army practically under war conditions, and it is satisfactory to learn that the Midland and South Western Junction Railway Company (who have only a single line) was equal to the occasion.

The trustees of the first mortgage bondholders of the Jamaica Railway Company have called a meeting of the bondholders to be held at Winchester-house, on November 4th, "for the purpose of considering and discussing the future prospects of the undertaking." Messrs. Antony Gibbs and Sons, 15, Bishopsgate-street Within, E.C., will forward circulars explaining the arrangements made for voting at the meeting, as well as forms of proxy.

**EPPS'S COCOA.—GRATEFUL AND COMFORTING.**—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—"Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homœopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

**Telegraphic Address:**—RAILWAY TIMES, LONDON. **Telephone No.:**—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Oct. 24—Midland Uruguay Railway (Debenture Stockholders), Winchester-house, at 12.30.  
 Oct. 25—Alabama Great Southern Railway (Annual), City Terminus Hotel, at 1.  
 Oct. 25—Buenos Ayres and Pacific Railway (Annual), Winchester-house, at 12.  
 Oct. 26—Alberta Railway and Coal Company, Limited (Annual), 37, Old Jewry, E.C., at 12.  
 Oct. 26—Highland Railway (Half-yearly), Inverness, at 1.  
 Oct. 27—Metropolitan District Railway (Adjourned Special), Westminster Palace Hotel.  
 Oct. 28—Demerara Railway (Half-yearly), City Terminus Hotel, at 12.  
 Nov. 2—West Flanders Railway (Half-yearly), 10, Moorgate-street, E.C., at 2.  
 Nov. 4—Jamaica Railway (First Mortgage Bondholders), Winchester-house, at 12.30.

The *Times* correspondent at Shanghai, telegraphing on Wednesday, says:—"The British-Chinese Corporation and Sheng have signed a preliminary contract for the Su-chau, Hang-chau, and Ning-po Railway, the terms being identical with the Shanghai, Su-chau, and Nan-king undertaking. The representatives of the American-Chinese Development Company are due to arrive on the 29th to conclude the negotiations for the loan for the construction of the Han-kau-Canton Railway, for which a preliminary contract was made with the Minister in Washington, the company depositing a forfeit fund."

## The Railway Times.

Established 1837.

OCTOBER 22, 1898.

## RAILWAY RETURNS FOR 1897.

We have had occasion more than once of late to call attention to the unusual delay in the publication of the report to the Board of Trade upon the working of our railways for 1897. This document never appears very early, but never before do we remember it to have been so late in making its appearance. And the extraordinary thing is that now it has appeared we find that it is signed and dated by Messrs. Bateman and Hopwood on July 28th, 1898! Has the period which has since elapsed been occupied by the Government printers, and if not how is this delay of nearly three months to be accounted for? The general railway returns upon which the report is based were published in August and dealt with by us in our issue of the 20th of that month. Even that is late enough, for by that time the results of the first half of 1898 were nearly all announced, though the present report only covers the results of 1897. The belated report contains much information of a valuable kind, but its value would be immeasurably increased if it appeared in April instead of October, and we know of no reason why it should not appear in the former month. On August 20th, in our examination of the figures supplied in the general return, we pointed out that the net yield on capital, which is the essence of that document, showed a larger apparent decline in 1897 than was really the case, on account of the inclusion in the figure of "paid-up" capital of large sums due to nominal additions. The "water" amounted to no less than 14 per cent. of the whole capital, and in the case of the ordinary stock alone it represented 18 per cent. at the end of 1897. It is a pity that the net yield on the whole capital is not shown after eliminating the nominal increases, as the fall in that yield—rapid enough in all conscience—is exaggerated by reason of the large amounts of these nominal additions during recent years. Though the report before us does not supply these figures, it is important to bear this in mind. Consequently, we show the total yearly increase in capital and the amount of the nominal additions included therein since 1890:—

Year.	Increase in capital returned.	Amount of nominal increase included.
1890 .....	£20.9 millions	£6.0 millions
1891 .....	21.9 "	7.1 "
1892 .....	24.9 "	4.0 "
1893 .....	27.0 "	10.0 "
1894 .....	14.1 "	3.0 "
1895 .....	15.7 "	7.4 "
1896 .....	28.3 "	17.8 "
1897 .....	60.3 "	46.2 "

Total, 1890-7... £213.1 millions ..... £101.5 millions

Thus, out of the 213 millions of increase in total capital since 1890, no less than 101½ millions was merely "water." Excluding the latter, however, it will be noted that there was an increase in *real* capital last year of 14.1 millions, against only 10.5 millions in 1896 and 8.3 millions in 1895. This fully bears out our warnings for many months past as to the growing rate of capital outlay. This element of nominal additions especially vitiates the comparisons of the average dividend paid on the ordinary stock shown in the report. According to figures supplied therein, the average return on this class of capital fell from 4.29 per cent. in 1896 to only 3.91 per cent. in 1897. This is obviously not a correct representation of actual results, and is accounted for by the inclusion in

the 1897 figures of a nominal increase during that year of over 40 millions sterling. The per-centages, as given in the report, being based upon the total nominal capital are practically valueless for comparative purposes. If every company followed the example of the Midland and duplicated their ordinary capital, the average return on this footing would sink to about 2 per cent., which is obviously absurd. More work for less money is the moral to be drawn from the revenue figures. Passenger revenue increased by 3·6 per cent., but passenger train mileage advanced by 4·4 per cent. Goods traffic also increased by 3·6 per cent., and the train mileage by 3·7 per cent. But the total increase in working expenditure was 5·8 per cent. for all classes of traffic. To carry this comparison a step further, we find that whilst the receipts per train mile diminished last year by 27d., the expenditure advanced by 48d., leaving the net profit per train mile run just 1½d. less than in 1896, and over 3d. less than it was in 1889. Rates and taxes advanced last year by 145,000*l.*, and the total increase in this comparatively small item of expenditure since 1891 has been 1,047,000*l.* For this result railway shareholders have to thank the numerous petty local authorities set up in recent years over whose outgoings the railways themselves have practically no check. Wages of course accounted for a good deal of the advance in expenditure, as the following comparison of the outlay under this head incurred by the fifteen leading companies in the years 1896 and 1897 will reveal:—

Department.	1896.	1897.
Maintenance of way .....	£2,142,850	£2,208,558
Locomotive working .....	4,148,051	4,426,524
repairs .....	1,757,844	1,804,303
Carriage and wagon repairs .....	1,479,480	1,519,231
Traffic .....	10,383,474	11,049,862
Total .....	£19,911,679	£21,008,478

Thus nearly 1,100,000*l.* of the increase in expenses last year is accounted for by the growth in wages paid by only fifteen companies. The total increase in expenses for the whole of the railways in the United Kingdom was 2,890,000*l.* In cost of materials the same fifteen companies had to face an increase of 702,000*l.*—a larger increase than was shown in any of the previous four years. To sum up the position, we may point out that in 1897 an increase of 5·9 per cent. in capital was accompanied by an increase of only 4·0 in total revenue, an increase of 5·8 in expenses, and a decrease of 1·8 per cent. in net earnings. In 1896 there was an increase of only 2·8 per cent. in capital accompanied by a growth in receipts of 4·9 per cent., and in working expenses of 4·8 per cent., leaving an advance in net profits of 4·9 per cent. also. Contrasting the results of these two years it is clear that the turning point in railway profits has been passed as we indicated months ago would probably be the case. The final word on the prospects of 1898 pronounced by Messrs. Bateman and Hopwood is that the improvement in the gross earnings "will probably be found to have been accompanied by a somewhat larger proportionate increase in expenditure, and, all things considered, it is doubtful whether the returns for 1898, when they are completed, will show more generally satisfactory results from the railway shareholders' point of view than those shown by the returns for 1897." This is putting the case very mildly indeed, for to our mind there is not the slightest doubt that the 1898 results will be very decidedly less satisfactory than those for 1897.

### THE NITRATE BANK.

Fortunately for the peace of mind of shareholders in the Bank of Tarapacá and London, the accounts to be presented to them on the 27th inst. stop short on the threshold of the Chilean financial crisis, in which the Tarapacan "mont de piété" played a somewhat inglorious rôle. It would,

perhaps, be going too far to say that the Bank of Tarapacá was instrumental in precipitating the doom of the gold standard, albeit some highly uncomplimentary comments on its action have been passed in the Chilean Congress; but in any case, it cheerfully availed itself of the "moratorium," as stated in the RAILWAY TIMES of August 27th, thus publishing its inability to face the music. The probability is that the goodly array of current and deposit accounts, amounting to no less than 743,000*l.*, in the balance-sheet at June 30th last (against 596,000*l.* a year before), has since then suffered a sensible shrinkage, depositors having a pardonable weakness for liquid assets, and for this reason the striking of an ante-moratorium balance must be a godsend to the directors. Whether from innate modesty or for reasons of state, those gentlemen carefully omit all reference to the issue of 500,000*l.* Chilean Government Treasury bills, a stroke of business of which they might justly be supposed to be proud. Of course one does not expect a bank balance-sheet to show individual transactions, and "the half-million sterling (not currency)" was placed on the London market in the ordinary way. (See letter to the *Times* June 13th.) Still, these leviathans of finance might, without loss of dignity, have unbended to the extent of congratulating their constituents on an eminently successful deal. Even the Bank of Tarapacá and London, Limited, does not every day lend 500,000*l.* "in the ordinary way" at 10 per cent. in its own paper in exchange for Government bills, which it places (also in the ordinary way) on a 6 per cent. basis! The honest (Stock Exchange) broker will claim his reward, but the profit is "real elegant" anyway. As we said a fortnight ago, rumour has it that the bank was "stuck" with a considerable line of the Treasury bills, and certainly the balance-sheet does not disprove the report. There is room for them in the "foreign bonds, &c.," which item has risen from the modest sum of 3,740*l.* to 82,197*l.* within the year, whilst bills receivable, advances, &c., 1,604,053*l.* (against 1,236,655*l.* in 1897) are sufficiently elastic to cover a round figure. At all events, commerce in Tarapacá has not been so flourishing of late as to account for so large an increase of business "in the ordinary way." On the same grounds the largely increased liability on bills payable (1,008,678*l.*, against 621,537*l.*) can only be reasonably attributed to the acceptances handed to the Minister of Finance. Although the gross profits for the past year were 4,000*l.* less than in 1896-7 the charges at head offices and branches are to the same extent larger, a somewhat illogical conclusion, probably traceable to the nitric nature of the institution. Twelve months ago the profit and loss account was shorn of 25,641*l.*, in order to write down the capital employed in Chili from 21d. to 19½d. per dollar, then worth 17½d. The value of the paper dollar, into which gold has since been converted, is to-day in the neighbourhood of 13d., but not a single cent in the past year was written off the 400,000*l.* originally remitted to Chili at 26d. Nobody would think of grudging the shareholders of the Bank of Tarapacá their pittance of 2½ per cent. for the half-year "in the ordinary way," but, as we said two months ago, they must not be surprised if it has to be returned at an early date with a vengeance in the shape of a call. By a strange coincidence the directors offering themselves for re-election are Messrs. Harvey and Lockett; their offer should be unhesitatingly accepted, for they can influence the business of the Primitiva, San Donato, San Pablo, and other nitrate companies sorely in need of funds to defray expenses during permanent stoppage.

### UNSECURED SECURITIES.

#### AMERICAN RAILROAD LAND GRANTS.

The recent decision of Special Master Cary, in the Northern Pacific sequestration proceedings, is an instructive

illustration of the misleading, if indeed not absolutely non-existent, basis upon which certain American railroad issues purport to be secured. The plaint, in brief, sought to establish the claim of the preferred stock-holders of the old company—i.e., those dating from a period anterior to the reorganisation of 1896—to a lien upon the lands lying east of the Missouri River, some four million acres in extent, and unquestionably the property of the old company. Let it be said at once that the issue of the action was practically of no interest to the proprietors of the new company. Had the claim been established, which it was not, the new company would have come into possession of the lands in respect of the adhesion to the reorganisation scheme of all but a million of the old preferred stock. The lands, if, on the other hand, adjudicated to the general creditors of the old company, would have passed in great part to the present Northern Pacific, as representing about 95 per cent. of the total claims. In fact, when it is added that by a simultaneous judgment the new company is credited with nearly 87 million dollars as still due to it, while the lands are not valued at much over 18 millions, it will be seen that the matter was of secondary importance in any case. What is, however, of great interest to trace is the apparently quite false security on which the old preferred stockholders of the last twenty years had been relying, and which must have assuredly given an entirely fictitious and unjustifiable status to their holdings. It is true that the whole of the issue having now ceased to exist, the interest is mainly academic, but the lesson is not without its bearing upon other and current railway securities which may claim to be similarly supported. The history of the old preferred stock is a simple one. At the smash of 1874 the 7 per cent. mortgage bonds were cancelled, and the holders agreed to a voluntary retirement of their lien upon the line on receiving for each \$1,000 of such bonds \$1,400 in the preferred stock issued on January 1st, 1875. This stock was vested, or purported to be vested, with certain rights over the lands now in dispute. It was provided that the deferred stock "shall be convertible at the par value into any lands belonging to the company, or hereafter to belong to it, east of the Missouri River . . . . until default shall occur in some of the provisions of the first mortgage bonds hereinafter provided for, and such conversion shall be an extinguishment of such stock. The proceeds of the sales of such lands, until such default shall occur, shall be used likewise in extinguishment of such stock." Now, this amounts to neither more nor less than a gradual dissipation of one of the material assets of the company, and to the paying off with the proceeds of part of the original capital. The position of general creditors, were such a scheme common and pursued unchallenged in the ordinary course of business corporations, would be untenable. It is not surprising, therefore, to find that it was from the first illegal. The capital of a company is, says Master Cary in effect, a trust fund for the benefit of those to whom it has incurred obligations, and the positions of proprietor and of preferential creditor in respect of the same object, are irreconcilable. It only remains to add that the interest on the first mortgage of the old company having at no time been permitted to lapse, about one-third of the old preferred stock was gradually converted into lands, and became thus automatically extinguished. The assets thus diverted are undoubtedly recoverable so far as they can be traced, except as against holders for value and without notice. The point as to the large number of such transactions which had taken place without protest was actually urged in court in support of the claim for the upholding of the lien. Quite a nice little crop of actions appear to be on the cards, and if any considerable bulk of the conversions

could be traced and declared null and void, an additional windfall would accrue to the new company. But, special circumstances apart, the history of such a financial juggle shows the necessity for a careful examination of reorganisation methods as practised in the States. To use the same security twice over, whether in good faith or not, and for twenty years to escape detection, is a trifle tall.

## GRAND TRUNK v. CANADIAN PACIFIC.

At the Grand Trunk meeting on the 13th inst. Sir Rivers Wilson gave his version of the rate struggle between his company and the Canadian Pacific, and putting two and two together we expressed the opinion last week that the Grand Trunk had the best of the case. The Canadian Pacific president retorted by publishing a letter we had addressed to Sir Rivers Wilson as long ago as September 1st, and from which it might have been supposed that the responsibility for the present unfortunate situation rested upon the Grand Trunk. As the letter was written previous to the settlement of the transcontinental rate war by the decision of the Interstate Commerce Commission it was really in the nature of ancient history and had no direct bearing on the situation as explained by the president of the Grand Trunk at the meeting. Oblivious of this all-important fact a number of our contemporaries hastened to show that all the fault lay with the Grand Trunk as shown by Sir William Van Horne's letter referred to, and one of them went so far as to remark, *à propos* of its publication, that one side of the story as told by the Grand Trunk president held good until the other was told. Quite a different appearance has been put on matters by the publication on Tuesday of the *whole* of the correspondence up to date, which we reproduce in another column. It is as clear as daylight that, as we have all along contended, the Canadian Pacific has simply been victimising the Grand Trunk because of the latter's action in supporting its American rivals and the victory of the latter over the "C.P.R.," instead of clearing the way for a complete settlement of the local as well as transcontinental struggle, has only the more embittered the relations between the two Canadian roads. In an article on this question published in THE RAILWAY TIMES of March 12th last we showed that there were two distinct questions open between them. The first was that connected with the "cut" in Pacific rates, in which the Grand Trunk was compelled to side with the American roads or lose the bulk of their traffic offered by them for carriage to points east of Chicago. This originated in the desire to compel the Canadian Pacific to give up its claim to "differentials," which object has been successfully accomplished. The other question arose in connection with the terms upon which the Canadian Pacific used the Grand Trunk's North Bay line for traffic to Toronto. No agreement on this point having been reached, local rates had become disorganised, and the Canadian Pacific has for some time used its own circuitous route, and threatens to build a line of its own parallel to the Grand Trunk's North Bay line. This is in spite of the fact that the Grand Trunk has proposed that local rates be restored, and that the question of terms upon which the North Bay line be used by the Canadian Pacific as well as the latter's claim to differentials for traffic to North Western points be referred to arbitration. At every point the Canadian Pacific appears to take up an untenable position. It refuses to arbitrate on the terms to be paid by it for the use of the North Bay line of the Grand Trunk, it carries its Toronto traffic 220 miles further by its own route, and it holds out a veiled threat to construct a shorter line of its own. Beyond this it has tried to force upon the Grand Trunk "differentials" which in the

case of the American lines have been surrendered, and because these absurd contentions are not admitted by the Grand Trunk to be reasonable it maintains a local rate war which injures nobody but itself and the Grand Trunk. Meantime the stockholders of both are suffering from loss of traffic, and last half-year, in spite of the expansion in other items of revenue, the Grand Trunk earned 25,600*l.* less from passengers, though it carried 61,332 more than in the first half of 1897. This intolerable state of affairs seems likely to continue until the Canadian Pacific president takes a more reasonable view.

### "AMALGAMATED" SOCIETY AMENITIES.

At the recent annual congress of the Amalgamated Society of Railway Servants a host of resolutions were passed, but there was a notable absence of those threats of strikes which have characterised previous gatherings of this kind. In fact, the congress has been too much concerned about its internal affairs to have much time left for talking about crusades against the railways. There is some ground for believing, too, that the outcome of past efforts in this direction has had a decidedly sobering effect on the leaders of the society. There was a good deal of loose talk about "victimisation" of members who have been prominent in connection with the society's efforts, but the explanation of the allegation was provided by one of the speakers, who said that "Some men imagined that after they had joined 'the society they could do anything they liked with 'the railway companies, and that the society would always 'back them up.' Experience has probably taught such misguided individuals where their real interests lie. The failure of the strike movement in Ireland, and the bad odour into which it brought the society and its leaders, has apparently compelled them to find a scapegoat. Mr. Tevanan, the Irish secretary, is the unfortunate individual fixed upon, and he was asked to resign. Besides passing a resolution in favour of an eight hours' Bill, another agreeing to affiliate with the Railway Nationalisation League, and numerous others relating to the South Wales strike, continuous brakes, railway accidents, a minimum wage, &c., it was agreed to appoint a special representative in Parliament, and to pay the expenses of Mr. R. Bell, the general secretary, with this in view: If the electors of Rotherham will be satisfied with a man pledged to devote himself to the interests of railway servants, as viewed from the somewhat limited standpoint of the Amalgamated Society of Railway Servants. A Radical contemporary had the temerity to refer a few days ago to Mr. F. Maddison, M.P., as the "railway men's representative in Parliament." This brought forth a sharp protest from Mr. Bell, who, in spite of Mr. Maddison's well-known efforts, has the impudence to say he is not the railway men's representative. Apparently, the A.S.R.S. are still smarting under the sharp rebuff inflicted last winter by Mr. Maddison, in their official organ, by his frankness in declaring that the men were not in a position to carry out their threat of striking; hence Mr. Bell's protest.

### THE MIDLAND URUGUAY JOB.

A preposterous proposal has been put to the debenture stockholders of the Midland Uruguay Railway Company, Limited, ostensibly by the trustees for the debenture stockholders, but presumably by the board of directors. The proposal is: that in lieu of the 6 per cent. to which they are entitled, they shall accept 4 per cent. until 1902, and thereafter 5 per cent. in perpetuity. Apparently, the sole excuse for this scheme is that the present net revenue is not equal to 6 per cent. on the debenture stock; if so it is a very lame

excuse indeed. With remarkable instances before us of the progressive power of railways in new countries it would be absurd to suppose that the Midland Uruguay has no chance of ever earning its full debenture interest, and that being so, it is beyond all reason to ask the holders to permanently forego the inducements upon which they may originally have subscribed for the stock. A similar proposal was made by the board half-a-dozen years ago, but thanks to a well-led and united opposition, it was promptly rejected. It is to be hoped the debenture stockholders will be fortunate enough to find an energetic leader to champion their cause on this occasion. If not they will inevitably and most unjustly be despoiled, in the interests of the ordinary stockholders.

### PASSING NOTES.

The traffic receipts for the week ending October 16th, on thirty-three of the principal lines of the United Kingdom amounted to 1,750,159*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,695,795*l.*, with 19,034½ miles open. There was thus an increase of 54,364*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for sixteen weeks to date amounted on the same thirty-three lines to 29,668,329*l.*, in comparison with 28,995,611*l.* for the corresponding period last year; increase, 672,718*l.*

If the following be a truthful statement of the working of the suburban service of the Midland Railway, the unfortunate customers of that company have every reason to feel aggrieved:—

1898	Due "ex" Moorgate-st.	Arrived Hendon.
Oct. 3 .....	7.54 p.m. ....	41 min. late.
Oct. 4 .....	8.47 p.m. ....	37 ditto.
Oct. 5 .....	9.12 p.m. ....	20 ditto.
Oct. 11 .....	9.12 p.m. ....	left Moorgate 45 min. late.
Oct. 11 .....	7.54 p.m. ....	over one hour late.
Oct. 13 .....	8.47 p.m. ....	28 min. late.
Oct. 13 .....	8.47 p.m. ....	30 ditto.
Oct. 14 .....	8.47 p.m. ....	29 ditto.

An extraordinary general meeting of the Lanarkshire and Dumbartonshire Railway Company was held on Tuesday, when resolutions were passed authorising the company, under its Capital Act of 1898, to raise (1) the sum of 225,000 by the creation and issue of new ordinary shares or stock, and (2) the sum of 75,000*l.* by borrowing on mortgage of the undertaking any sum not exceeding in the whole the said sum of 75,000*l.*, or by the creation and issue of debenture stock to the said last-mentioned amount, and that all at such times, in such amounts and manner, and on such terms, and subject to such conditions, and with such rights and privileges as the company think fit.

About two years ago the Belfast and Northern Counties Railway Company arranged for a series of lectures on the north of Ireland and its scenery, and subsequently obtained the assistance in the enterprise of the other railway companies who are interested in the development of this district. The lectures are illustrated by limelight views, and delivered by persons intimately acquainted with the localities described. In the metropolis lectures have been delivered at the Polytechnic, the People's Palace, and at the Crystal Palace. Numerous lectures have also been delivered in the provinces. A series of lectures have also been delivered in America.

At a public meeting held in Fulham last week the following resolutions were passed:—"That this meeting urges the forthcoming conference to be held at the Fulham Town-hall to do its utmost to secure that all workmen's tickets issued shall be available on all trains by the several companies running through Fulham, both to and from London, up to 8 a.m." "That the forthcoming conference use its best endeavours to secure a reduction of fares to the following rate—any distance not exceeding 12 miles, return 2d.; 16 miles, 3d.; or 20 miles, 4d. return."

Mr. J. H. Burns has been appointed general manager of the Wirral Railway, in succession to the late Mr. Carr. He was accountant for the West Lancashire and Liverpool Southport

and Preston Junction companies, prior to their absorption by the Lancashire and Yorkshire Company in July last year, a post he had occupied since 1889. Up to that time he was in the service of the Manchester Sheffield and Lincolnshire Company, now Great Central, in the superintendent's, goods manager's, and accountant's departments.

The report of the Lanarkshire and Dumbartonshire Railway for the half-year ended July 31st shows a gross revenue of 34,045*l.* (being proportion of receipts under agreement with Caledonian Railway Company 33,191*l.* and sundries 854*l.*) and a net revenue of 32,440*l.* The directors recommend a dividend at the usual rate of 4 per cent. per annum on the share capital. The length of lines owned is 17½ miles, and of joint lines 7½ miles. The total capital expenditure has been 1,645,625*l.*

The preliminary arrangements for letting several acres of land for the purpose of a dry dock adjoining the site of the new dock which the Cardiff Railway Company are building have been entered into. Already Cardiff is one of the greatest ship repairing ports in the United Kingdom, and with the increased dock accommodation increased facilities for ship repairing will be required. The rent of the land is stated to be 200*l.* per acre.

A meeting, held at Debenham on Monday, for the purpose of further considering the proposed scheme for providing a light railway starting from Ipswich to Bramford or Claydon, and thence "running north, and touching Coddendam, Crowfield, Debenham, Southot, Stradbroke, Laxfield, and Cratfield, with branch to either Halesworth or Harleston, or both," has given hearty support to the scheme.

The accounts of the North Wales Narrow Gauge Railways Company for the half-year ending June 30th show a gross revenue of 2,976*l.*, and a net revenue of 279*l.* The half-year's interest charges amounted to 957*l.*, and the accumulated balance at debit of net revenue account now amounts to 17,867*l.* The length of line open is 12 miles, on which the capital expenditure has been 128,391*l.*

The directors of the London and North Western Railway Company have appointed Mr. A. G. Wand their general passenger and freight agent for North America, in succession to the late Mr. C. A. Barattoni. Mr. Wand was principal assistant to the late Mr. Barattoni during the whole term of that gentleman's connection with the company.

The half-yearly report of the Mold and Denbigh Junction Railway Company states that the rent-charges and interest due on debenture stock A on the 1st instant have been duly paid, and the directors recommend that a payment at the rate of 1½ (against 3) per cent. per annum be made on account of interest due on debenture stock B.

What on earth has come over the *Critic*—which usually slates all new issues indiscriminately—that it should go out of its way to puff the shares of the Knott End Railway Company. For all that the subscribers to this issue will ever get, beyond the 3 per cent. interest during construction, we would not give a row of beans.

The half-yearly report of the Devon and Somerset Railway Company states that interest warrants at the rate of 3*l.* per cent. per annum for the half-year on the A debenture stock, and at ½ per cent. for the year on the B stock, have been forwarded to the holders.

A return of accidents and casualties, as reported to the Board of Trade by the several railway companies in the United Kingdom during the six months ending June 30th this year, was issued on Thursday. We shall publish the return in our next issue.

An interesting article on "The Railways of the Isle of Wight," with a map of those railways, and a portrait of Mr. Charles L. Conacher, general manager of the Isle of Wight Central Railway, appeared in *Transport* of the 14th inst.

The Great Northern Railway Company have had so much goods traffic to deal with lately that arrangements have been

made that all signal-boxes on their main line shall remain open on Sundays.

Mr. George Hemmen, who has for several years been the manager of the Mumbles Railway, has resigned the position, he having received an important appointment in connection with another undertaking.

Mr. Morgan Bransby Williams has been elected chairman of the Rhondda and Swansea Bay Railway in the place of Sir John J. Jenkins, M.P., who, however, still retains his seat on the board.

In the list of creditors of Mr. E. T. Hooley the Midland Railway Company figures for 154*l.* No doubt this is the unpaid balance of the great financier's "score" at the St. Pancras Hotel.

It is understood that a Bill will be promoted in the next session of Parliament to obtain powers for an important enlargement of Victoria Station, Pimlico, and a widening of the approaches.

The important work in connection with the London and North Western Railway deviation and tunnel construction through Shap Fells is to commence early next spring.

Mr. J. S. Forbes, chairman of the London Chatham and Dover Railway Company, has been lying somewhat seriously ill at the Hague, but is now reported to be better.

Major Marindin, on behalf of the Board of Trade, yesterday completed his two days' inspection of the new Aviemore line of the Highland Railway Company.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 4th prox.; the fortnightly settlement in other Securities commences on the 25th inst.*

### CITY, FRIDAY EVENING.

The feature in the MONEY MARKET during the past week has been the raising of the Bank of France Rate from 2 to 3 per cent., this being the first movement made by that institution since March 14th, 1895. It now seems probable that there will be a further rise by the Bank of Berlin on Monday, in which event a Bank of England rate of 4½ or 5 per cent. next week is not improbable, as the directors may be trusted to protect the country's gold at the present juncture. Under all the circumstances it is not surprising that monetary rates just now are pretty stiff, three months' Bills to-day commanding 3¼ to 3½ per cent. The India Council renewed a moderate amount until November 4th at 3½ per cent. Foreign exchanges were hardly altered, the Paris coming 25.33 and the Berlin 20.43½. In the open market the price of bar gold was reported weaker. Money was a good deal wanted to-day, and 3¼ to 3½ per cent. was readily paid for call loans, while a small amount had to be borrowed from the Bank of England at 4 per cent. The Bank Return issued yesterday shows an increase, caused by the return of notes and coin from circulation, of 311,000*l.* in the reserve, which now stands at 20,632,000*l.*; its proportion to the current liabilities is 2½ higher at 49 per cent. Borrowings by the Bank are probably the chief cause of the decreases of 1,495,000*l.* and 467,000*l.* in the Government and "other securities," but perhaps part of the former decrease may be due to the repayment of deficiency advances by the Treasury. Revenue payments have increased the public deposits by 119,000*l.*, and the other deposits have declined by 1,740,000*l.* on balance. Since the return was made up, the Bank has bought 7,000*l.* in French gold.

Silver bars are now quoted at 27½*d.* per oz., being 1-16*d.* higher on the week. A year ago the price was 27½*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 15-16*d.*; Calcutta, 1*s.* 3 15-16*d.*; Hong Kong, 1*s.* 11 1-16*d.*; Shanghai, 2*s.* 8*d.*; Singapore, 1*s.* 11½*d.*

The premium on gold at Buenos Ayres has fallen during the week from 150'60 to 149'30 per cent., making the paper dollar (nominally worth 4s. 2d.) now actually worth 1s. 7'10d. A year ago the premium was 185 per cent., and the value of the paper dollar 1s. 4'70d.

The Valparaiso 90-day exchange comes over to-day at 13 3-16d., a fall of 5-16d. on the week. A year ago it was 17 9-16d.

The Rio de Janeiro exchange on London is 8½d., being 13-32d. lower on the week. A year ago it was 7 13-32d.

The Bankers' Clearing-house return for the week ending October 19th, 1898, shows a total of 169,496,000l., as compared with 176,295,000l. for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£21,143,744	£31,855,639
Total Reserve .....	£20,631,894	£21,145,654
Proportion of Reserve to Liabilities...	49 per cent.	48½ per cent.
Notes in Circulation .....	£27,311,860	£27,510,015
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	3½ per cent.	2½ per cent.
Consols (account) .....	109	111½
French Rentes (account) .....	101f. 77c.	102f. 95c.
Paris Cheque Exchange .....	25f. 33½c.	25f. 16½c.
New York 60 days ditto .....	\$481½	\$482½

Although nothing approaching panic has so far taken possession of the STOCK MARKETS it cannot be denied that a feeling of great uneasiness prevails, and it is not surprising that prices have been marked down all round. This, however, may be taken to be more a precautionary measure on the part of jobbers to save themselves from being loaded with stock than as a result of any real pressure of sales on the part of the public. Of speculation there is virtually none at the present time, and genuine holders of stock are not easily frightened into selling. Should this class really take alarm, then we shall witness movements in prices against which the fall so far will seem a mere bagatelle. It is mostly a question of developments in Paris—of peace or war. If left to themselves the French, in their present mood, might decide to cross swords with us, but not improbably Russian counsels will prevail, and on its being demonstrated by Count Muravieff to the French Government that neither France nor Russia is yet prepared for the strife, England may be left alone for awhile, and the present crisis will pass over. But besides politics there is just now the monetary situation to consider—the latter in a measure the outcome of the former—and with Bank rates going up all round it is not surprising to find the gilt-edged stocks with the lowest yields amongst the first to crumble away. However, after three days of depression, the markets this afternoon experienced a general recovery, partly on the absence of bad news from Paris, and partly on rumours that the German Bank rate would not, after all, be further raised. Consols picked up 3-16, and the week's fall is now reduced to ¾. The recovery extended to British railway stocks, which, with the exception of Metropolitan, nearly all experienced a fractional rise, which, however, made little impression on the earlier losses of the week. Yankee rails up to the close displayed a very undecided tendency, but a smart and material rebound in this department may be looked for immediately on any improvement in the political situation, as the fall during the past month or so has been very marked in the leading speculative descriptions. As regards Canadians, it is no use looking for any substantial recovery so long as the Canadian Pacific continues its cut-throat opposition to the Grand Trunk. Foreign Rails have naturally shared in the general depression, and most of the Argentine and Brazilian descriptions are marked lower. In the latter class, Campos and Carangola debentures have been an exception, being up

8½ points on the week on inquiries for stock in a bare market, the reason being a probably well-founded rumour of closer relationship with the Leopoldina. Costa Rica shares are amongst the few that are up on the week. The prospects of this line, notwithstanding the present lull in traffics, are very favourably regarded in the "House," where they are very scarce, and a bona-fide purchase of two or three thousand shares would result in an important rise. Manila Railway 6 per cent. debentures were being actively dealt in round about 40, until the political scare set in. This line has shown remarkable recuperative power since it was reopened upon the cessation of hostilities between America and Spain. For some weeks past the traffic returns have shown 100 per cent. increases, and the accumulated losses, which five weeks ago were \$93,110, have now been reduced to \$44,668. There is every probability that the total receipts for 1898 will be at least equal to those of last year, and there are many circumstances which might lead to a big rise in the debentures. The Mexican dividend announced to-day was about what was expected, and had no appreciable effect on prices. At the present price of 19½, the ordinary is a pretty safe spec.—always "barring politics," of course. Nitrate Rails were moving up satisfactorily, until news arrived of a strike amongst the railway hands and nitrate workers. However, the ordinary and preferred are still ¼ up on the week, and the debentures 1½. The other movements (beyond those shown in tabular form below) include a rise of 3 in Antofagasta ordinary, 1 in Ituana debentures, ½ in San Paulo new, and ½ in Piræus first mortgage, and a fall of 4½ in Midland Uruguay debenture stock (on the preposterous scheme referred to in our leader columns), 5½ in Ottoman 1886 debentures, 1½ in ditto 1893 debentures, 2 in Buenos Ayres Great Southern preference, 1 in Ensenada ordinary, 2½ in Buenos Ayres and Pacific first preference, 1½ in Great Western of Brazil shares, ½ in Leopoldina, and 1 in Recife and Sao Francisco. Amongst Miscellaneous descriptions, East and West India Dock is down ½, Stock Conversion and Investment (London and North Western deferred charge) ½, ditto (North Eastern deferred charge) 2, and Railway Share Trust shares ½.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<b>British Funds, &amp;c.</b>			<b>American Railway Shares.</b>

Messrs. Thackeray and Co., of Cardiff, under date October 20th, report as follows:—Barry Railway undivided, 264½ (unchanged); Barry preferred, 123 (unchanged); Barry deferred, 142 (unchanged); Cardiff preferred, 113 (a fall of 1); Port Talbot 9½ (unchanged); Rhondda and Swansea Bay, 4½ (unchanged); Rhymney undivided, 261½ (a fall of 1); Rhymney preferred, 121 (unchanged); Rhymney deferred, 145 (a fall of 3); Taff Vale, 73 (a fall of 2); Vale of Glamorgan, 128 (a rise of ½). There has been a rather better tone in the local rail market, and there has been a fair business moving. Taffs have again fallen, and Rhymneys are easier.

Applications have been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Atchison Topeka and Santa Fé Railway Company—\$4,476,000 additional general mortgage 4 per cent. 100-year gold bonds, Nos. 91,793 to 96,206 of \$1,000, and 49,251 to 49,374 of \$500 each. Erie Railroad Company—\$793,200 additional voting trust certificates of 4 per cent. non-cumulative first preferred stock; and \$260,100 additional voting trust certificates for common stock. New York Central and Hudson River Railroad Company—\$8,877,000 additional 3½ per cent. Lake Shore collateral gold bonds of 1898, Nos. 53,001 to 61,877, of \$1,000; and \$5,075,000 additional 3½ per cent. Michigan Central collateral gold bonds of 1898, Nos. 11,001 to 16,075. United Railways of the Havana and Regla Warehouses, Limited—Further issue of 5 per cent. consolidated irredeemable debenture stock.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Argentine Republic—Further issue of 50,000 4 per cent. railway guarantees rescission bonds, Nos. 697 to 716 of 1,000l.; 7,381 to 7,420 of 500l.; and 38,473 to 38,572 of 100l. each. Canning Jarrah Timber Company (Western Australia), Limited.—50,000 5 per cent. first mortgage debentures of 100l. each, Nos. 1 to 500. Espirito Santo and Caravellas Railway Company, Limited.—14,417 shares of 10l. each, fully paid, Nos. 1 to 13,987 and 16,568 to 16,997, in lieu of the bonds and committees' certificates for bonds of the Espirito Santo and Caravellas Navigation and Railway Company, now quoted. Great Northern Railway Company (U.S.A.)—\$25,000,000 additional preferred stock. Midland and South Western Junction Railway.—376,679 3 per cent. A debenture stock (cumulative); 476,789 3 per cent. B debenture stock (non-cumulative); 191,171 3 per cent. C debenture stock (non-cumulative).

The directors of the Mexican Railway Company, Limited announce a dividend at the rate of 2½ per cent. per annum on the first preference stock. For the corresponding half of last year the dividend on this stock was at the rate of 2½ per cent. per annum.

The Russian Government has decided on constructing a railway commencing at Nevinonskaya, between the Sea of Azof and the Caspian Sea, following the course of the Kuban, cutting the Trans-Caucasian mountain chain, and then descending on Sukhum Kaleh. A branch will be carried from Drandy to the Trans-Caucasian line at Abas-Tuman. The Port of Sukhum Kaleh, on the Black Sea, will thus be placed in communication with the Trans-Caucasian network.

The Kent "Collieries."—Mr. N. R. Griffith, of Wrexham, consulting engineer to the Kent Collieries Corporation, Limited, has reported on the progress of the works done. Mr. Griffith says one great cause of delay and expense in the sinking has been the enormous wear and tear of the pumps by sand from the Sandgate beds pumped with the water while sinking through these beds. This trouble is now practically at an end. Nos. 1 and 2 shafts have passed through these beds, and No. 3 shaft is just through them. The colliery is now equipped with very superior sinking and pumping plant and machinery, and provision has been made to deal with all contingencies that may occur. Satisfactory progress is being made, and the difficulties that have been met with, and which are likely still to be met with, are not so great as those that have been successfully overcome at many collieries. "Nothing that has occurred," says Mr. Griffith, "has altered my firm conviction that the undertaking will be a gigantic commercial success." The No. 1, or Brady Shaft, which is 17ft. in diameter, and is situated about 280ft. west of the borehole which proved the coalfield, was commenced by the Channel Tunnel Company, and sunk by that company to a depth of 80ft., has since been carried a further 440ft.

## Meetings.

### BUENOS AYRES GREAT SOUTHERN RAILWAY.

The half-yearly general meeting was held at the Cannon-street Hotel, E.C., on Thursday; Mr. FRANK PARISH (chairman of the company) presiding.

The SECRETARY (Mr. H. C. Allen) having read the notice convening the meeting, and the minutes of the previous extraordinary general meeting, submitted the following telegram from Buenos Ayres, dated October 17th:—

"Traffic for week ended October 16th, 32,192l.—being an increase of 4,932l.; aggregate receipts to date 337,998l.—being an increase of 59,857l. Gold premium 151, as against 187 last year. Traffic good. Wool coming in in large quantities; also maize. Wool clip equal to last year, and larger area of wheat sown. Good lambing season. Cattle, sheep and pigs are in fair condition. We have no locusts. Agricultural prospects are favourable. Bahia Blanca to Neuquen extension open for public traffic as far as Choele Choele, kilometre 349; rails have reached kilometre 426. Construction making satisfactory progress on section between Chelforó and Chichinales. Extension from San Carlos to Guaminí, rails have reached kilometre 481; extension from Saavedra (Alfalfa) to Guaminí, rails have reached kilometre 76. Extension to Puerto Belgrano has been completed. Political and financial situation is in a state of expectancy. There is no anxiety with regard to the Chilean boundary question. It is still necessary to come to an understanding with respect to the Puna district, but we do not attach much importance to this."

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—Ladies and gentlemen, I refer back to the proceedings of our last half-yearly meeting, and I cannot help feeling the force of the concluding sentence of my speech in which I gave you a slight summary of the condition of things at that time, and of our probable prospects for the year. Now, I think the expressions I used then will bear repeating, and will form a not inappropriate introduction to my address to you to-day. If you will allow me I will repeat them:—

"The period we have reviewed in our report affords much encouragement from every point of view, and from the favourable result you have before you of the first ten months of the year, we may confidently expect that our annual report at our next meeting will be one of the most satisfactory we have been able to present to you for a long series of years. You will then be in possession of figures and facts, which will prove more conclusively than anything I have said, that our great enterprise is gaining ground and strength every year, and that its resources are well able to bear the burden of the additional capital we are asking you for."

Now, gentlemen, reading facts by the light of subsequent events, I see nothing of any exaggeration, I may say, in the expressions I then used. The best proof of this is the report which you have in your hands to-day, for without exception it is the most satisfactory and encouraging we have ever submitted to you. (Applause.) No one who has studied the details of the report can fail to see that our railway is gaining ground and strength year by year, and that during the last year we have made still greater strides in advance; we have considerably improved our position by adding numerous works of importance, adding to our line, and increasing largely the capital and the resources that are required; and all this, I may say, without reducing or impairing our dividend-earning powers. I think this is no flourish of words on my part, as you will find it borne out by facts. The history of our railway may be summed up in a few words. It is a record of steady development, of capital well employed, carefully and economically administered, and profitably utilised. ("Hear, hear.") Now, these may appear to you loud-sounding phrases, but they are the simple truths founded on the actual results. I think you may go all through the world, and with difficulty will you find an enterprise equally successful with the Great Southern. I may go a step further, and point out to you that the country is young, and in its early stage of development, and that we have merely touched the fringe, I may say, of those great resources of the district which we have opened up, but, with the assistance of immigration, which means an increase of cultivation and also an increase of production and consumption, we ought to reach far greater results. Now, a country with such a character as the Argentine Republic possesses, with such wonderful fertility and I may say advantages of every kind, it is difficult to foresee what the ultimate prospects of any railway will be; but I speak with the greatest confidence that the prospects of our Great Southern Railway, which occupies the most privileged position, are beyond all doubt. Now, gentlemen, before going further, I have a duty to perform in which I think you will all join me. I wish to offer our hearty congratulations to the Argentines for the advent to power of General Roca. (Applause.) He has been elected for a second time by his countrymen without an electoral contest, and with a unanimity which is unusual in such cases, and which only shows that he commands the confidence of all the people. General Roca is not an untried man; he has proved himself a remarkable man, perhaps the strongest of men and one of the greatest prestige amongst Argentine politicians. He has also the singularly happy, I may say, art of knowing how to govern men, and he possesses the necessary qualities in a great degree of firmness, sagacity, and experience, and I think we may have no anxiety as to his being able to maintain, as it is his desire, peace and order at home and abroad. ("Hear, hear.") And to us, and to all other commercial enterprises, as well as to the Argentines themselves, this is the essential condition on which our prosperity rests. I have known General Roca for many years, and I have been honoured with his friendship ever since his first presidency, and during his long visit to Europe, when he resigned office, I had

frequent opportunities of intercourse with him. I can speak as to his powers of observation, his desire to acquire knowledge, and his anxiety to understand something of our ways and modes of government. All those things ought to be of very great advantage to us. He enters office, I think, under good auspices, with the good will of his countrymen, and I think he ought to have the support of everybody who is interested in the welfare of the Argentine Republic. I will ask you to depute me to send a message of congratulation to General Roca from this room—(applause)—expressing the feelings of the shareholders of perhaps the greatest enterprise in that country, and one of the greatest elements of progress he has at his command. I may mention that all that I have said, and perhaps more, though in fewer words, you will find in the report and in the opinion of Mr. White, our representative. He is well acquainted with General Roca. He held office with him during his administration, and his opinion of Argentine things and men is probably better than that which I could give you. There is one matter which has had a disturbing influence over our business, and that has been the disputed boundary question with Chili, but I am glad to say that that is disappearing, and we all know that General Roca is a strong advocate for a peaceful arrangement of this question, and I presume his influence will be exercised to dispose of the matter finally. The telegram read to you shows there is no further anxiety on that point, and I think that when this is set at rest, probably the two nations will show that fraternity and friendship they ought to, being of one origin, and having practically acquired their independence through their mutual efforts. They have both of them been spending money foolishly and extravagantly in war equipment, and all that will cease to exist, as will also the drain which this has created on their resources, resources which are very urgently required, I may say, for much better purposes. ("Hear, hear," and applause.) The general prospects of the country, are, as you see, exceedingly promising, and the best indicator of these good prospects, perhaps, is the paper money. It is, perhaps, the most sensitive, and, at the same time the most correct, barometer of public opinion, and you will see that during the past year the average rate of premium on gold has fallen to 175 against 189, and it stands now at about 150, which is the lowest rate it has been quoted at since the time of the Baring crisis. ("Hear, hear.") Now, this paper depreciation has been very perplexing to us, and has been the disturbing feature in our business, and we are certainly very much interested in seeing the currency fall much lower, and, if possible, come down to its par value, or that some fixed rate should be established. You will understand our business is conducted on a gold basis, and our rates, under an agreement with the Government, are supposed to be collected in gold. But in order to make up the equal value with gold, we have to add to our ordinary rates a considerable amount, varying according to the gold premium. Now, our customers deal, most of them, with paper money—and paper money to them has, perhaps, no relation to gold, they do not look at its sterling value, and therefore they think that our rates are excessive. Now, that is not the case. I maintain that our rates are fair, and lower than they are in this country; at the same time, it is difficult to persuade the public of this. As you are all aware, here and everywhere, wherever the shoe pinches, it is always the railway that is in fault; we are always to blame. Now, that is the case out there. If you look at our passenger rates, and there is no better proof of this than our statistics, which show in the mileage results that we are carrying passengers under 1d. a mile, and the goods at an average rate of under 1½d. per mile per ton. I have compared these with some of the English railways and I find that they are lower, very much lower; and as regards the passengers, we are certainly carrying them in far more luxury than you travel in England, for we spend more money on our equipment than I think we do in England. As regards the goods, all our low-class goods are carried at very low rates; general goods, which constitute the supplies of the country, are carried at perhaps rather higher rates, but the gentlemen who accuse the railways of increasing the cost of the articles of consumption do not recollect that before they go on our trucks they pay a contribution to the country in taxes of nearly 50 per cent., as they are mostly imported goods, and I do not suppose we are charging another 1 per cent., so it is absurd to say that we are ruining the industries of the country by our high rates. Of course, it is to our advantage to work in harmony with our customers, and that is our great desire, and we shall do our best to inquire into this matter thoroughly, so as to see if it is possible in any way to make a new revision of our rates. Our general manager has been in England, and has dedicated some time to this object, and we shall endeavour to come to some reasonable understanding as to what rates it is wise for us to charge, bearing in mind the duty we have to our shareholders and the results of any reduction to them. Now, let us come to the figures in our report. You will see that the gross receipts for the year have amounted to 1,519,000*l.*, an increase of 118,000*l.*—I am dealing with round figures. The working expenses have been 584,000*l.*—an increase of 50,000*l.*, and the net receipts have amounted to 934,000*l.*—being an increase of 67,000*l.* (Applause.) Now, if you will refer to the statistical table, which gives the analysis of working for the last ten years, you will find on page 22 that the gross receipts for the past year have been 200,000*l.* greater than that of the year of boom, 1888-9, which, up to the present time, is the best year we have recorded. The working expenses, on the other hand, have been 60,000*l.* less, notwithstanding that we have worked 651 more miles, so that the net results of the past year have been 260,000*l.* more than in the best year we have ever previously recorded; and I may go further still: the amount of traffic carried last year, both in passengers and goods, exceeds very greatly that of the year 1888-9, and had that been reckoned at the same rate of exchange—52 as it was in 1888-9, as against 175 last year—we should have shown an additional 200,000*l.* That is a fair comparison

between the best year we have ever had and last year's results. Now it is hardly necessary, I think, for me to enter into any detailed explanation of the tabular statement which you will find on page 5, which gives the increases and decreases. You will observe, perhaps, that we have carried 68,000 tons less of goods, but, on the other hand, we have received 33,700*l.* more in money. That arises from the decrease in some of the low class cargo cereals and other things, and the increase in some of the higher class goods, such as wool and general goods. The passenger traffic, I may say, continues to increase, and this year, for the first time, the proportion of receipts has increased in larger ratio than the number of passengers carried. That is owing to the appreciation of the paper money. The animal traffic continues to be satisfactory. There has been a falling off in cattle, but the number of sheep has been very largely increased, and the money receipts have been 3,170*l.* more. As regards the working expenses, a very few words will explain. There has been an increase of 50,000*l.*, and of that 18,000*l.* is due to the exchange. You will understand the operation of that, as it has been explained so frequently. 16,000*l.* is due to extraordinary expenses caused by pulling up arrears in the workshops, resulting from the strike of the previous year. 9,000*l.* is due to higher wages to drivers and firemen, and to increased cost of coal, and the extra amount consumed, and 7,000*l.* represents the fair proportion of ordinary traffic expenses with regard to the additional work done. The ratio of working expenses has been practically the same as the previous year, 38.49 against 38.13. In the balance-sheet you will find everything very clearly stated, in fact, for a company with such a large business and capital we possess, it is exceptionally clear and concise. ("Hear, hear.") The principal item on the debit side you will find is the amount of our reserves, and, on the other side, you will find the corresponding amount of investments made, which includes everything except the maintenance and casualty fund. Every other item of reserve is invested in gilt-edged securities. The maintenance and casualty fund, of course, is a floating amount, and is provided for by monthly contributions, and subject to monthly charges, and the amount is kept running in our accounts. Now, with regard to all the other special matters which are dealt with in our report, I must ask you to save me the necessity of going into any detailed explanation of each one—"Hear, hear"—for you will recollect at the last meeting I presented to you a statement wherein I expressed to you, far more accurately than I could now do, matters in connection with these respective works. In that statement you will see everything enumerated and described relative to these respective works—the object and necessity for them, and everything connected with them. The first of these matters is the purchase of the Ensenada Railway, about which you will recollect that there has been some little discussion. All this business has now been satisfactorily completed. Some legal difficulties existed, but they have now been wound up. The Ensenada Company have gone into liquidation, and they have obtained powers for the distribution of our stock, and in a few days all the legal matters will be finished, and the legal transfer will be made. Our securities will then be exchanged for Ensenada securities, and all will be completed certainly within the next month. In connection with this matter I may say it has fortunately brought us into more friendly relations with our friends the Western Railway. They are our neighbours in that district, and they possess lines which might run in competition with ours. We therefore felt it would be wise and to the advantage of both companies that we should come to some understanding to work these lines in common. We are framing an agreement now in which all the lines in the district belonging to the Western and ourselves will be worked on a joint account. (Applause.) I have always myself personally been a very strong advocate for unification of railways, and I am glad to say we have made one step in advance in that direction with our Western friends, and I only hope it will go further. Now, the next matter is the Southern Dock. This matter also has advanced, and arrangements have been completed for forming this new company, to which we are large contributors, and which will be under the control of the Southern Railway, though worked as a separate company. The lands, which form the great feature in this business, belonged to Señor Demarchi, who having become a shareholder to the extent of the value of these lands, has already transferred them to the company, so that matter is complete, and we have in hand now the plans, which are being studied, with a view to the appointment of somebody to carry out the work. The advantages of this I need not point out to you. It will afford us very great facilities in the shipment of our produce in Buenos Ayres. The new extensions which are being carried out are explained to you in paragraph 13, and they are further referred to by the general manager in his report on pages 10 and 11. The Neuquen extension, which is the principal one of all, is now approaching completion—that is to say, that we hope within another six months' time we shall be able to open that throughout. So far as we learn now the results are far more satisfactory than we anticipated. Mr. Barrow tells us that up to the last point at which it has been opened the traffic amounts to 2*l.* 10s. per mile per week, which is as favourable as almost any line we have yet opened. We are making additions to the Bahía Blanca wharf. That, as you know, is our southern terminus, and where the shipment of all the southern produce is dealt with. We have found it necessary to increase considerably all our wharfage accommodation and plans have been approved, and the work will be commenced immediately. A short line has been made from Gruenbein, 13 miles long, down to Puerto Belgrano, where the Government are making a naval depot. That short line we have made to satisfy the wishes of the Government, who desired, of course, to have a connection between their depot there and the railway system. We are about to erect new workshops. This has been also explained on several occasions, and the necessity for it has been, of course, self-

apparent. Our business has grown to such a size that it is necessary that our work-shops should correspond, and we have no other way of doing that than by removing our workshops from their present position at Sola and establishing them outside. Land has been bought, and all the work will be gone on with very quickly. We are also engaged on an enlargement of our terminal station at Plaza Constitucion; for some time it was in doubt where the terminal station should be. Questions had arisen about the central station, and as long as that was in doubt we remained working in the best way we could; but it is evident now, as our general manager has explained to you, that our station must be greatly enlarged. Plans which he brought home have been approved by us. The work will be carried on as economically as possible, and when it is completed the form of the station will not be unlike the Great Western station at Paddington. We are building, as you are aware, new offices for the company in London. We thought you would approve of our emerging from the insignificant office which we put up with for so long a time, and that we should erect a building more corresponding to the wants and to the character of our railway. This has been done with all due regard to economy, and I think it will prove a good financial operation. The house will be ready by Lady-day next, so that we may hope that our next meeting will be held in our new hall. (Applause.) Now, all these additions and improvements involve a considerable amount of money, and they are included in the programme of new works that we submitted when we asked you for increased capital of four millions. This four millions of money will provide for the completion of all the extensions now in hand, and, as I said at the beginning, our railway will be very much improved by this accession of strength. Now, there is one matter more—viz., our coal ships. We have added another steamer to our small fleet of coal vessels. One was lost some little time ago, and in place of that we have constructed a new vessel of larger dimensions. The cost of this has come out of the insurance money with the addition of the amount standing to the credit of the wrecked vessel in the depreciation reserve account. The boat is of 5,000 tons burden, and has been built to meet all the requirements of our English and Argentine Governments in regard to cattle-carrying. The vessel has arrived at Buenos Ayres, and is now on her voyage back to England, with a full cargo of cattle, and we expect she will show very good results. Now let me go to the question of dividend and reserve. You will see that the results of the year would have enabled us to have paid you 7½ per cent. dividend, but having regard to the general circumstances and to the fixed policy which we have adhered to and which you have always approved—viz., of strengthening our reserve—(“Hear, hear”)—we have thought it wise to retain a certain amount of money for that purpose, and we have limited the dividend to 6 per cent., placing to reserve 100,000*l.*—(applause)—carrying forward an amount of 9,000*l.* I hope that will be satisfactory to you all. (“Hear, hear.”) Our reserve fund will then amount to 475,000*l.*, and if you add to that the increased value of our investments, amounting to 50,000*l.*, you will see we have over half-a-million of money in reserve. (Applause.) We have also our Bahia Blanca lands, which are entered at their cost value of 11,000*l.*, and which I do not hesitate to say are now worth ten times the amount, and I am sanguine enough to think the time will arrive when we shall see our reserve at even a very much higher figure. Anyhow, I think it is our duty to strengthen our position by raising the reserve fund to an amount corresponding to the increase of capital. Our business has not been an easy one to conduct, either on this or the other side. Year after year our responsibilities increase, and those on the other side, the active workers, deserve our special thanks. Mr. White is, as I have always said, our almost invaluable assistant. His position in the country is one that enables us to conciliate our views and interests with those of the Argentines. He is a firm and upright man, and we can always rely upon him. With regard to our management, our general manager has recently been home, and has returned again. Some of you will have heard that he has resigned his position. I regret it and, probably, many of you also will share my feelings. But he has done his service to us, and he has placed us in such a position by his organisation of our staff and everything, that his absence will not be felt so much as it otherwise would have been. He received an offer from the Leopoldina Company of such a tempting nature that, I think, few men would have refused, far beyond any emoluments which any reasonable company, or any company could reasonably be expected to pay—(laughter)—and, accompanied with a higher title, which, no doubt, has satisfied his ambition. Anyhow he did not like to refuse, although I have no doubt that he felt that his Southern Railway was his oldest and best friend. The old adage that no man is indispensable—or that there is no man's place that cannot be filled—is a perfect truth, and in connection with that I will point to our position here in London. There was a time when the shareholders, who all knew and admired our late friend, Mr. Barker, thought his place could never be filled, but I will say with full knowledge of the capabilities of my friend Mr. Allen, that he possesses every quality that you could require to carry out his duties to this company satisfactorily. (“Hear, hear,” and applause.) He is an indefatigable worker, and he has the advantage of youth in his favour. He has also a large railway acquaintance and he has had a perfect training in official matters, so, I think, with his assistance on this side and with the assistance of all the chiefs of departments on the other, who are all men who have gained long experience in our service, we shall certainly sustain no prejudice from the loss of Mr. Barrow. I have given you a slight sketch of the general condition of things, and you will be able to judge of the favourable influence they will have over our business. I am bold enough to say that we are continuously advancing, and that the next year will find that we have even beaten last year's record. (Applause.) I will now put the resolution:—“That

the directors' report and audited statement of accounts for the fiscal year ended June 30th, 1898, now submitted, be received and adopted.”

Mr. JOHN FAIR seconded the resolution.

Mr. WEIR said it was of the utmost importance that the reserve fund should be a large and substantial one, and invested in solid and substantial securities; but he would ask to what extent did they intend to raise the reserve fund.

A SHAREHOLDER asked whether any information could be given regarding a concession which had been granted for a light railway in the company's district.

Mr. REGINALD NEILD, in reply, said he did not think it would be prudent to name the figure to which they expected to raise the reserve fund, as that must depend largely on the future prosperity of the company and also upon the rate of increase of the capital. Their habit had always been, as far as possible, to buttress up the reserve fund in proportion to the size and importance of the company itself, and also in proportion to the dividend to be earned on the share capital. As to the light railway they had no information which led them to attach any special importance to it. There had been a law passed by the nation giving a general permission to the executive to grant a concession for light railways under certain conditions, and they believed that, acting upon that law, certain concessions had been granted; but they had not heard of any attempt yet made to raise the capital to construct those lines. They were not disposed at present, with the advice they had, to attach much importance to it.

The report was then agreed to unanimously.

The CHAIRMAN then moved:—

“That a balance dividend of 3½ per cent., free of income-tax, be, and the same is hereby, declared on the ordinary stock of the company for the half-year ended June 30th, 1898; and that out of the balance of net revenue the board be authorised to contribute 100,000*l.* to the general reserve fund.”

Mr. JOHN FAIR seconded the resolution, which was adopted.

On the motion of Mr. L. J. BAKER, seconded by Major-General TTPPEE, the remuneration of the directors from and after October 1st current was fixed at a sum of 5,000*l.* per annum.

The retiring directors, Mr. John Fair and Mr. Ashworth, were unanimously re-elected, as were also the auditors, Messrs. Welton and Griffiths.

Mr. NEILD proposed:—

“That the thanks of the proprietors be given to the local committee, the general manager, and to the other officers and members of the staff in Buenos Ayres, and also to the secretary, the consulting engineers, and the members of the staff in London.”

The motion was duly seconded and carried unanimously.

#### PRESENTATION OF CHAIRMAN'S PORTRAIT.

Sir CUTHBERT QUILTER, M.P.—I rise, in pursuance of notice, to move a hearty vote of thanks to our chairman and directors, but at this period, after the length of these proceedings, I must still ask you to bear with me for a few minutes while I make a few remarks about a question which I think will be gratifying to us all. Every shareholder certainly must have been pleased and gratified with the report that has been put before him to-day, and with the unanimity of the proceedings that followed it—very satisfactory to the directors and shareholders alike; but what we are now going to do will, I think, give still greater pleasure to all of us. Some eleven years since I had the great pleasure and honour, on behalf of 400 subscribers, of presenting to our friend and chairman, Mr. Frank Parish, a handsome piece of plate, as a small evidence of our admiration for the many qualities and the many great services he had rendered to this company. On the present occasion, gentlemen, I have a still greater honour, of offering to the board of this company a portrait of their chairman, and before that portrait is unveiled, I beg that you will allow me to say what our estimation of Mr. Parish and his colleagues is. I think I should like for one moment in this day of our prosperity and this day of our rejoicing, to refer to one or two of those who have gone—to the sagacious chairman in the earlier days of this company, our friend Mr. Holt, and to the friend of all of us, Mr. Barker, the ablest and best of organisers, one of the ablest and best the City of London has ever seen. Now, it is not given to many men in the City to receive two such gratifying evidences of the goodwill and admiration of their friends, but I do not think it is possible to over-estimate the services Mr. Parish has rendered to this company. (“Hear, hear.”) We all know what prudence, what zeal, what continued and abiding interest he has shown in its fortunes since he first interested himself in procuring the concession in Buenos Ayres, and during all the time that he has sat at this board, both as director and as chairman. I think that I shall only be expressing the sentiments of everyone, not only in this room, but every shareholder of the company, when I say that in presenting this portrait of Mr. Parish, not to Mr. Parish in his private capacity, but to Mr. Parish as chairman, and to his brother directors, we desire to pay a compliment to them as well as to Mr. Parish himself. Mr. Laurence Baker, at an earlier period of the afternoon, has well stated that we are fortunate in this company in having men at its head who are conversant with the country with which they have to deal, but I add to that—I say we are not only fortunate in that respect, but we are fortunate in having men of the highest honour, and of the most conspicuous wisdom and ability. I think we ought to-day, in acknowledging the services of our chairman, not to forget that men like Mr. Fair, Mr. Drabble, and Mr. Ashworth, and for a shorter time, but in no less conspicuous degree, Mr. Neild and Mr. Shennan, have rendered most conspicuous and meritorious services to this great undertaking. And, I think, when you look on this portrait, and on the replica—both from the brush of Professor Herkomer—you will agree that your committee have made the wisest choice, for I

believe these pictures to be thoroughly worthy of the great painter, and that he has treated in his best manner the most excellent subject he had before him. (Cheers.) Gentlemen, when it pleases Providence to remove Mr. Parish from the scene of his labours and his triumphs, which we trust will be many years hence, we hope that this portrait will remain a record of his long, loyal and distinguished service, and as an incentive to his successors, whoever they may be, to render equally honourable and valuable service to the great enterprise entrusted to their charge. I have now the honour and pleasure, on behalf of over 500 subscribers, to ask you, Sir, as chairman of the company, and on behalf of the board, to accept this portrait of yourself, to be hung in the board room of the Great Southern Railway; also to request Mrs. Parish to accept this replica with the best wishes of every one of us for the continued welfare of her husband. (Loud applause.)

The portraits having been unveiled,

The CHAIRMAN said—I feel deeply sensible of the honour you have paid me, and beg to thank Sir Cuthbert Quilter, who has acted as your mouthpiece. I feel I can hardly express my thanks for all the flattering expressions he has used towards me. I have been brought up in a school where a sense of duty has been the first object. Gentlemen, I feel that the portrait which you have presented to me to be retained by the company, as well as the one you give to my wife, conveys an honourable distinction which I value very much. They will serve as a record of a long history of mutual friendship and association with the shareholders of this company. I feel really more than I can express as to the high compliment you have conferred upon me, and I am proud that you should consider me and my services worthy of such a high mark of distinction. (Applause.) The success which has attended the administration and the direction of this company's affairs must be to each one of my colleagues, as well as to myself, a source of great pride and satisfaction. The portrait which you have been good enough to give to my wife will be appreciated by her as it deserves. It will recall to her many pleasant recollections of some of the pleasantest episodes of our life. She, as well as myself, was present at the inauguration of this railway. She has continually helped me, and rendered some service to this company. ("Hear, hear.") She will retain it, no doubt, as a pleasant recollection of all these circumstances. It will be to us in our home the greatest treasure we possess. As regards the portrait which I presume will hang in the new home of the Southern Railway, I hope that as long as I live it will serve to recall to my colleagues and myself all our many years of pleasant meetings and associations, and that in the course of time when the sands of the glass are exhausted, and I am no longer an active member of this life, at any rate I hope that it will then serve to preserve the memory of your old chairman and friends. (Loud applause.) I cannot thank Sir Cuthbert Quilter sufficiently for the repeated acts of kindness he has shown me. He is one of the oldest, and perhaps one of the most influential, of the promoters of this company, and I am deeply sensible to him for all he has said of my services in building up this great enterprise. To those gentlemen who have acted as a committee in carrying out your wishes, with Mr. Cole, who has been an active member of it, I have to return my sincere thanks. I ought also to add my personal recognition of the services of Professor Herkomer, the artist to whom you intrusted this work, and who has shown so much care, and displayed so much skill in endeavouring to preserve the memory of your friend and chairman. (Applause.)

Sir CUTHBERT QUILTER—It may interest the proprietors to hear read the inscription which it is suggested should be placed on this portrait. It is:—"Presented to the Board of Directors of the Buenos Ayres Great Southern Railway Company, Limited, by upwards of 500 shareholders, on the 20th October, 1898, as a slight recognition of Mr. Frank Parish's long, eminent, and successful services to the Company, and of the great zeal and ability he has displayed in furthering its interests during a period extending over thirty-five years, for twenty of which he acted as Chairman of the Company."

The proceedings then terminated.

### RECIFE AND SAO FRANCISCO (PERNAMBUCO) RAILWAY.

The half-yearly general meeting was held on Tuesday at the Cannon-street Hotel, E.C.; Viscount GORT presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—Ladies and gentlemen, I meet you under somewhat different circumstances than usual. We have been forty-three years at work, and during that number of years—all the later ones—we have given you a steady, comfortable dividend, having paid you 5 per cent. year after year. We have given you 5 per cent., and we have carried on the work, fought against difficulties, as a rule got over them, and have got on steadily in that way. Now it is somewhat different—very unexpectedly so—and we will have to talk over how the thing has come about, and also we will have to make our best expectations as to the future. As regards the traffic itself, during those forty-three years there is only one year, that is the year before last, 1896, that has beaten this last one. The half-year which ended on June 30th, 1896, is the only half-year which has beaten the one that we have this year; that is to say, this past half-year. We have got a very excellent amount of traffic. The figures of the half-year in 1896, of course, beat us, but not by a very large sum, and our traffic, both the goods and the passengers, has improved in a very satisfactory way. We shall get some of the details put before you more clearly than perhaps I can put them by General Reid, when he speaks on the matter; but, as a general rule, as you have seen yourselves in the report, the advantage has been very good. I find

here, for instance, that in the month of July—the accounts that you have ended on June 30th, but the returns from that time have been coming in—in the month of July we had 12,700*l.*, with some shillings and pence, as against 8,500*l.* last year, and the expenditure was a little over 11,000*l.* each time, last year and this year; so that the result was that this year there was a gain of 1,500*l.*, as against a loss last year. Then comes the month of August, and there is the same story again. Our receipts were 13,000*l.* as against 8,800*l.*, and our expenditure was 10,900*l.* against 10,900*l.*, so the expenditure was the same; but, nevertheless, the receipts being greater, we got 2,314*l.* profit, as against a loss in that month of 1897. Of course 1896 beat us a little, but that was the only year in all the forty-three years. That in its way is satisfactory. There were one or two improvements that were required, both in the permanent way and in the locomotive departments, and we accordingly—everything looking very promising—spent some extra money in purchasing things that were very necessary to us. Within the last couple of months a great change has come upon us. Its results we cannot, of course, tell as yet, but it took us and the other Brazilian railways who are in somewhat the same position, very much by surprise. The Government, instead of handing us a cheque upon their bankers in London for the full amount that they had to pay us, passed a rule, as most of you know, and came to the decision that in future they would, for the next three years, pay us, not in cash, not by ordinary cheques upon their bankers, but the same nominal amount of money by an issue of funding bonds which they were going to make, and which were to be handed over to us. We and the other companies, I think with some justice, have rebelled against it; but, on the other hand, we cannot quite tell what the result will be. All we know is, that for this half-year it has reduced the dividend which we saw our way to pay you. The difference between 5 per cent. and 4 per cent. for the half-year is 6,000*l.*; but, when we came to get these bonds from the Government, instead of the money that we had taken for granted would have as usual been paid to us, we found ourselves obliged to sell them. We realised by selling them, and I am happy to say we sold the bonds at a better rate than some of the other railway companies sold theirs. We got a better price. We sold for 79½ in the hundred, whereas our next neighbours, the Bahia, only got 75, I think. So that we sold better in that respect; but, at the same time, there was a loss, because we only got 79*l.* 10*s.*, whereas we should have got 100*l.*; so that made a serious loss. The loss was over 8,000*l.*; so that we saw nothing for it but to recommend a dividend at 4 per cent., and for the first time we are not to give you the 5 per cent. that we should have liked you to have. If that was to be permanent we should all regret it very much; but, as it is a matter we cannot form an opinion upon—or, at least, we cannot know that the opinion is the right one—my own opinion, and that of some other people I have spoken to who are familiar with these money transactions, is that if it is found that Rothschild pays the interest in gold, and if it is found the companies are working on steadily in spite of that misfortune, we believe that the value of this funding stock will gradually grow higher and higher, and very likely in six months' time we may find, instead of 79 to 80, it will be worth 89 or 90, or perhaps more than that. ("Hear, hear.") If so, that will set us all right. In the meantime the dividend of 4 per cent. is one that is considered a good one in most companies. I do really think that those persons who bought this Government stock from us at 79½ will not be prepared to sell it again except at a great deal more than that, and therefore we hope to see the stock get steadily higher and higher. In other respects I think we are in a very good position. The details are very carefully looked out by my colleague, General Reid, and he, as he usually does, will be able to give you details upon different small points. But I think the fact that this half-year has only been beaten by one of the corresponding half-years in the whole history of the company is a proof that we get on in a satisfactory way. You will see in the report which has been sent to you improvement in almost everything. Sometimes there would be one great loss and other improvements, but the losses in traffic as compared with last year are of the very smallest amount. Timber, I think, is the only loser, and all the other things are improvements; and the passenger traffic is improving in a way that shows that the trade of the country and the business of the town of Pernambuco itself is improving and giving us a better foundation than we had before. Another thing is that we are proceeding, as before, with the paying off of our debenture debt. We have paid off a number of them, and that has been going on for several years; and we have done it this year on nearly as good a scale as we ever had. Therefore, the debenture debt, which was originally 275,000*l.*, has been brought down to a little over 100,000*l.*, and we shall, I hope, go on reducing it at the same rate, so that by the time our receipts from the Government are legally reduced—for they gave us the guarantee only for a number of years—we shall be in an independent position and be able to go on just as smoothly as when the Government were paying us that extra money. Under all the circumstances, therefore, for my own part, and I think it would be wise on your part too, whilst feeling regret that this policy of the Government has done what it has and that it has caused damage to a certain degree, we should at the same time hope that things will come right. I think from another cause that they will go on very well, and that is that there is a new President elected. I attended a dinner in his honour, which was also attended by a great many people connected with the English railways there, before he left London, and I heard a good deal of the policy that he was inclined to take up. One thing that he appeared very anxious about was to get up a rise in the exchange. I think that that will only be done by the Government getting rid of a certain amount of the paper money; but I think that this new President seems to have a very clear head about those sorts of things and a very great desire to set matters right as regards them, and, therefore, I do entertain the hope that within the next couple of years or so we may see a very decided advance in the

exchange. The result of that will be to do us a great deal of good, as it will all other people mercantilely connected with Brazil. I have generally tried not to make you too cheerful or hopeful, but when there is such an unexpected fall in the dividend as there is this half-year I think it only right to give you, after what is my pretty long experience of Brazil, a hopeful look into the future, especially as that hopeful look is based very much on the satisfactory advance that we are making in our work and on the satisfactory improvement which has taken place in our receipts. ("Hear, hear.") I propose to you that you should approve of the boards' views on the subject, and I move:—"That the report of the directors and the auditors be received and adopted." (Applause.)

Mr. W. B. GREENFIELD—I beg to second that.

Major-General J. REID—Gentlemen, no doubt the thing which touches us most to-day is the Brazilian funding scheme, for it is owing entirely to the operation of that scheme that this company is obliged to break the records and propose a reduced dividend. Brazil has suffered greatly from various troubles, political and financial, culminating with the disastrous collapse in the exchange, and at last it became evident that some such temporary expedient to rehabilitate the finances was inevitable. Dr. Campos Salles, the President-elect, has emphatically and repeatedly promised that during his tenure of office he will do all in his power to enforce rigid economies, improve the exchange, and restore the financial equilibrium, and, as he has a very high reputation indeed, we may reasonably rely upon his assurances, and look forward to a return of cash payments at the end of the three years. The value of the milreis has already risen to 8½d. This is very encouraging, and a much larger rise is generally anticipated. Our guarantee, as you are all aware, for the half-year is 40,141.10s. We have received bonds of this nominal value, and sold them, the realisation resulting in a loss of 8,197.15s.11d. This loss has necessitated the reduction of the dividend from 5 per cent. to 4 per cent., and of the appropriation towards the extinction of the debenture debt from 7,000l. to 5,600l. The bulk of the bonds issued under the scheme have been quoted from 75 to 81. We sold at about 79½, and none under 79¼. At these prices the bonds are a very good investment, and if Brazil prospers we may reasonably expect a considerable rise, of which we, of course, will have the benefit. It is just possible that we may be able to obtain from the Government some concession in compensation for the loss entailed by the funding scheme. This matter is under consideration, but it is no use applying for what has been already refused to other companies. As regards the working of the line, it contrasts favourably with the corresponding period of the last year, the receipts being 18,219l. in excess. There has been a small increase in passengers, I think, and a much larger increase in goods traffic. Our great staple, sugar, shows a big rise of 8,221 tons, the crop of cane having been both heavier and of better quality than in 1897, and there are increases in nearly all headings both to and from the interior; and as these are continuing up to latest accounts, I think we may fairly assume that the period of stagnation has passed away. Turning to expenditure, the accounts show an excess of 15,521l. 18s. 1d. At first, this looks a little ugly, but it is easily explained. An increase of traffic necessarily brings with it some increase of expenditure. During the period under review the exchange was at its very worst, consequently many more milreis were required to meet the charges payable in gold; but the main cause of the excess expenditure was the very heavy outlay on steel rails and other permanent way materials, and also two new steam cranes. In ordinary permanent expenditure there was a substantial reduction. 400 tons of steel rails are still required to complete the line. These, we hope, will be shipped before the end of the year. Some more ballasting requires to be done; when this is finished and the new rails laid the line will be in thoroughly good order from end to end, and should be maintained at a comparatively small cost for many years. Our debentures again show very satisfactorily. We have actually paid off 14,700l., and we have reduced the interest on 6,800l. from 4½ to 4 per cent. We have now, indeed, repaid 5,000l. more than our programme contemplated. The outstanding debentures are now very little over 8 per cent. of our capital. I think I may venture to affirm that very few railways indeed are so favourably situated in this respect. With these remarks, I beg to support the adoption of the report. (Cheers.)

Questions were asked by Messrs. S. J. WILDE and J. WEBSTER, and after a short discussion the resolution was put to the vote and carried unanimously.

On the motion of the CHAIRMAN, seconded by Mr. TOMLIN, it was also resolved that a dividend at the rate of 4 per cent. per annum for the half-year ended June 30th, 1898, be declared.

The retiring directors and the auditor were re-elected, and the proceedings terminated with a hearty vote of thanks to the chairman and directors, the secretary, and the staff generally, for their past services.

#### ARGENTINE GREAT WESTERN RAILWAY.

The annual general meeting was held on Wednesday, at Winchester-house, E.C.; Mr. P. W. LAWRENCE presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), referred to the unusual number of deaths since the last meeting, these including their late chairman (Sir G. Russell), Mr. E. Zimmerman, and Mr. O. C. Waterfield, and also Mr. N. Bouwer, the chairman of the local committee in Buenos Ayres. The working results of the year showed a falling off, and, with the increased price of fuel and the damage done by floods and accidents, there was a much poorer result to lay before the shareholders. Considering all the circumstances of the year, the depression of trade, the political uncertainties, and the exceptional accidents, he thought they had every reason to be satisfied that they had been able to pay their

preferred and ordinary stockholders the very respectable dividend of 5 per cent. per annum, and to carry forward a balance of 3,620l. He reminded them that they had practically three reserves. Reserve A consisted of seven-eighths of the rescission bonds received from the Government in commutation of guarantee, which represented a present value of 245,900l.; reserve B represented one-eighth of the commutation bonds, and were of the present value of 35,000l. Then there was the general reserve account, invested in marketable securities which cost 136,700l., although the actual cash value was over 140,000l. These three reserves amounted in the whole to 417,700l., which not only placed their debentures upon the safest possible footing, but also gave their preferred and ordinary stock a position of very great security. Their renewal expenditure would have to be increased, and for the next five years the appropriation would have to be increased to 28,200l. per annum. The permanent way had suffered from the sal-nitrous earth used instead of clean gravel for ballast, and the renewals necessitated were upon a much larger scale than had been anticipated. The renewal was being effected with the best clean gravel, and with 70lb. steel rails, which would effectually prevent the recurrence of damage from the same cause again. There was a short branch to Lugan projected, and the necessary concession had been applied for; the branch would, he hoped, become immediately remunerative, and prove a useful feeder to their main line. The time had, he thought, arrived when the dividend on the preferred stock might be declared half-yearly, and he hoped it might also be possible hereafter to declare an interim dividend on their ordinary stock. They had sold 100,000l. of first debentures at a satisfactory premium, 50,000l. of which appeared in the statement, and the other 50,000l. would come into this year's account. They had subscribed about 16,000l. to the Argentine Patriotic Loan, which he hoped would prove a good investment. There had been added a large quantity of rolling stock to what they possessed this year. So far as they had gone in the present financial year, their gross receipts had shown an increase of 11,400l. over last year, and their net receipts for the first quarter were 3,700l. over those of last year.

The Hon. C. H. LAWRENCE seconded the motion, which was carried.

#### ENTRE RIOS RAILWAYS.

The annual general meeting was held on Wednesday, at Winchester-house, E.C.; Mr. E. J. NEILD presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said he was pleased to give the shareholders a better account than he had been able to do for the past three years. Their record year was 1894, when they carried a very large amount of grain and showed a great improvement in the working results. In 1895 there was a falling off, and the same occurred in the following year; but the most disastrous of all was 1897, when their expenses exceeded the revenue by 916l.—apart from their bonds, investments, &c. He was happy to say they had a very fair crop last year, the result of which was at once felt on the railway, and instead of a loss of nearly 1,000l., as in 1897, they had made a net profit of nearly 15,000l. He thought this showed conclusively that the railway itself was intrinsically a valuable property, and it only required two or three good years in succession to fully justify the action of the bondholders when they took it over as the best available asset they could place their hands upon. The interest on their Government bonds was now regularly paid, and they could count upon 6 per cent. from this source, instead of only 4 per cent., as before. On their provincial bonds, however, they had received no interest since 1893, and the amount now due was 65,000l., while all efforts to effect a settlement had been unavailing. However, under the new president, it was understood that efforts would be made to consolidate the whole of the outstanding foreign debt, so that they might hope to get something in due course. The delimitation with Chili had not yet been fully settled, but was in a fair way of being so, and it was extremely improbable that any difficulty would arise in connection therewith. The net profit of 14,922l. which they had made for the year enabled them to pay a dividend of 2 per cent. on the preference shares, carrying forward 2,830l.

Mr. F. PARISH seconded the motion, which was carried.

#### General News.

##### WATERFORD LIMERICK AND WESTERN RAILWAY.

Mr. J. L. Wilkinson, general manager of the Great Western Railway, arrived in Limerick on Wednesday, and the visit is stated to be in connection with the pending sale of the Waterford Limerick and Western line. He was met at Waterford by Mr. R. G. Colhoun, traffic manager of the Great Southern and Western Railway, and Mr. F. Vaughan, traffic manager of the Waterford Limerick and Western Railway, and travelled by special saloon train to Limerick, stopping for a short time en route at Clonmel and Tipperary. He inspected the locomotive works after arrival. On Wednesday Mr. Wilkinson had a conference at Limerick with Messrs. William Holliday, John F. Power, and Alderman Stephen O'Meara, who for some time past have been arranging opposition to the Rosslare-Fishguard alternative route to England promoted by the Great Western Railway Company and the Great Southern and Western Company. The ground of the opposition of the traders of Limerick and district is that the purchase of the Waterford line by the Great Southern and Western Company will prove detrimental to the trade of

this city and the centres which it serves, and Mr. Wilkinson and Mr. Colhoun, who, with Mr. F. Vaughan, traffic manager of the Waterford Railway, were also present at Wednesday's conference, addressed themselves to removing the grounds of the objection named. Mr. WILKINSON pointed out that the scheme would greatly improve the tourist and other traffic to Ireland, that the Great Western could not promote the success of the undertaking save conjointly with the Great Southern and Western Company, and that the whole trade of the South of Ireland would benefit by services on the proposed new route. Alderman O'MEARA said no matter how the tourist traffic was benefited Limerick would never consent to the monopoly that would be created by the Great Southern and Western Company through the purchase of the Waterford line. Mr. POWER, answering Mr. Wilkinson's query with regard to the safeguard required, said they objected to the Great Southern and Western getting possession of the Waterford line, as it would practically mean handing over the carrying trade of the South and West of Ireland to one man, the traffic manager of the Great Southern and Western Company. There was no precedent for the creation of any such monopoly in England or Scotland. The conference came to an end without any compromise being effected.

### THE RAILWAYS OF VICTORIA.

The Railways Commissioner of Victoria (Mr. John Mathieson) has issued a report upon the working of the railways in that colony for the year ending June 30th, 1898. The following is a general summary of the leading features of the report, and for purposes of comparison corresponding items for 1895-6 are given:—

	1896-7.	1897-8.
Total debenture capital raised .....	£36,735,954	£36,663,187
Total yearly interest payable .....	£1,447,452	£1,437,269
Unspent balances on loan moneys .....	£864,044	£528,408
Amount spent on capital account during the year .....	£221,250	£272,902
Total spent in construction .....	£38,329,402	£38,602,304
At an average cost per mile open of .....	£12,317	£12,404
Total mileage open for traffic .....	3,129 miles	3,113 miles
Average mileage open for traffic .....	3,126	3,123
Gross revenue earned .....	£2,615,935	£2,608,896
Working expenditure .....	£1,563,805	£1,646,054
Profit on working .....	£1,052,130	£962,842
Per-centage of working expenses to revenue .....	59.78	63.09
Ditto, exclusive of pensions and gratuities .....	56.74	60.03
Revenue per average mile open .....	£837	£835
Expenditure per average mile open .....	£500	£527
Gross earnings per train mile .....	5s. 8.03d.	5s. 7.77d.
Expenses per train mile .....	3s. 4.67d.	3s. 6.76d.
Number of passenger journeys .....	42,263,638	43,090,749
Goods tonnage .....	2,180,195	2,226,897
Live stock tonnage .....	203,250	181,768
Train mileage .....	9,228,687	9,239,657
The net revenue paid on the total capital cost .....	2.74 p.c.	2.49 p.c.
The net revenue paid on the total debenture capital expended .....	2.98 p.c.	2.71 p.c.
Ditto, exclusive of pensions and gratuities .....	3.20 p.c.	2.93 p.c.

The Commissioner in his report states:—"The total revenue amounted to 2,608,896l., being 7,038l. less than last year's receipts. The decrease is principally accounted for by the falling-off in live stock receipts, which are 17,708l. below the amount received from that source last year. The passenger revenue is 3,396l. less. There was, however, an increase of 17,495l. in the goods, mails, and miscellaneous receipts. Had it not been for the exceptional traffic occasioned by the Jubilee celebrations last year, which added at least 15,000l. to the receipts, the ordinary revenue this year would have been in excess of the corresponding period, notwithstanding the continued drought and another harvest failure. The bush fires and the severe storm which swept over portion of the colony were factors which also severely affected the railway revenue. A large proportion of the increased expenditure is due to concessions granted to employes, consisting of increases of pay to the lower paid employes under the new classification (28,522l.), and the cessation of certain per-centage deductions (37,790). There has been no additional mileage opened for traffic during the year. The line from Dunkeld to Peshurst (16½ miles) which was closed for traffic in 1891 has now been dismantled, and, as the cost of construction is included in the capital account, the interest (about 2,000l. per annum) will remain as a perpetual debit to this department. It is recognised that there is a limit to the life of certain railway works and stock, and that, although extensive repairs may be effected year by year, and the railway lines thereby maintained in a serviceable and safe condition, a time must inevitably come when extraordinary expenditure on renewals and replacements will be absolutely necessary. This is especially the case when the condition of the public finances, or

other State exigencies are factors which govern the amount available from time to time for the purpose. Obsolete types of rolling stock have to be discarded and replaced in the interests of efficiency and safety, and in order to satisfy modern requirements. To meet such contingencies provision is made in some private railway companies by the establishment of a reserve fund, so that, to equalise dividends and in justice to the management and shareholders, no particular year's working cost should have to bear extraordinary charges on depreciation account. No such scheme has been adopted by the State, and as a large expenditure must now be incurred on renewals and improvements to the lines and to provide for the development of traffic which may be confidently anticipated, it is necessary to make special financial provision. The work of relaying the lines with heavier rails is being proceeded with. It has been found absolutely essential, in order to carry with safety the fast and heavy traffic on the main lines, to substitute steel rails 80lb. to the yard for the 66lb. steel rails with which some of the important lines were originally laid. Parliament has been asked to provide the funds for relaying 185 miles. The rails taken up are not nearly worn out, and can be utilised for renewals on some of the light branch lines, or on such new light lines as may be authorised by Parliament. The State should, however, profit by this experience, and care should be taken, in authorising the construction of new lines upon which there is a prospect of heavy traffic, to provide at the outset for laying way of sufficient strength to meet probable requirements. The ultimate saving in maintenance and renewals will more than compensate for the extra initial cost involved.

### NON-PAYING LINES.

"One of the most serious difficulties with which the administration has to contend is the fact that the department has a large number of branch lines, constructed at a heavy capital cost, expensive to work and maintain, and, under existing conditions, necessarily unremunerative in character. It will be seen from the accompanying return (Appendix No. 24), which shows in detail the approximate loss on certain lines for the year 1895-6 compared with 1896-7, that an improvement in the net result of working has taken place. Every effort is being made to bring the working expenses down to the lowest limit compatible with safety, and with the requirements of the traffic. The train service has been curtailed when such curtailment has lessened loss and has not been likely to materially diminish revenue. The interest charges are a fixed factor, and remain a perpetual charge, as in the case of the Dunkeld line, even after the line is closed and dismantled. Such a drastic remedy as closing the lines cannot, however, be entertained, except in very exceptional cases, and all that the administration can do is to use every effort to increase the traffic and to minimise loss. It must be borne in mind that as the lines become older the maintenance cost increases. The bad seasons have materially retarded the development of traffic, but there is no doubt that with a return to better harvest conditions, and an increase of settlement in the localities served, many of the lines which are now non-paying will yield a net result sufficient to cover, not only their working expenditure, but in addition something towards the interest on their capital cost. It is certain, however, that, taking into consideration the existing conditions in the colony, under no circumstances could some of the lines be worked at a profit. The revenue credited to the lines might be augmented by subsidies or by special legislation probably involving the taxation of the property-holders in the districts served, and for whose benefit railway lines have been made and maintained in the place of main roads. The non-paying lines are an "object-lesson" which should be kept prominently in the foreground, especially in view of the contemplated authorisation of a number of additional railways. It may, I think, be safely asserted that should some of the suggested lines be constructed, they will inevitably add to the incubus which this department already has to bear, and in view of past experience it may not perhaps be out of place to offer a word of warning at this juncture. The following lines were kept closed for traffic during the year:—Fairfield Park to Oakleigh, 12½ miles, capital cost, 298,506l.; Darling to Waverley, 1 mile, capital cost, 7,000l.; Lancefield to Kilmore, 18½ miles, capital cost, 117,954l.; Dunkeld to Peshurst, 16½ miles, capital cost, 50,000l.; total, 48 miles; capital cost, 473,460l. The interest, amounting to about 19,000l. per annum, on this unproductive capital is debited to the Railway Department.

### RAILWAY ACCIDENT FUND.

"In accordance with the provisions of Act No. 1,250, section 46, a railway accident fund has been established by the payment into the Treasury of 10s. for every 100l. received for fares for the conveyance of passengers, and for charges for the conveyance of animals, goods, and parcels, until the total of such fund reaches 100,000l. The credit of the fund was at June 30th last, 54,557l. It is contemplated to enlarge the purposes to which this fund can be applied, so as to make it cover insurance of railway

buildings, plant, stores, or other properties, and to provide for the payment of any amounts which may be recommended by the Commissioner and approved by the Minister as compensation to any employé who may be injured in the execution of his duty."

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### MONORAIL RAILWAY COMPANY, LIMITED.

This is the title of a company registered October 7th, with a capital of 4,000*l.* in 10*l.* shares, to carry on the general business of engineers, railway contractors, &c. The directors are to be elected by the signatories. Qualification, 100*l.* Remuneration, 10 per cent of the net profits after payment of 10 per cent. dividend. Registered by Devonshire and Co., 1, Frederick's-place, Old Jewry, E.C.

#### KNOTT END RAILWAY COMPANY.

Subscriptions are being invited by the Knott End Railway Company, for an issue at par of 10,000 shares of 5*l.* each. The prospectus states:—"The Knott End Railway Company has been incorporated by Act of Parliament (the Knott End Railway Act, 1898) for the purpose of constructing, working, and maintaining a railway from Pilling to Knott End, near Fleetwood, Lancashire. The terminus of the railway is situate on the northern bank of the River Wyre, immediately opposite the town and harbour of Fleetwood, and will be in direct communication from Fleetwood with Blackpool by the new electric tramway. The railway will be constructed at first as a single line and of the ordinary gauge, with 56*lb.* rails. The Act confers running powers over the Garstang and Knott End Railway in order to join the main line of the London and North Western Railway. The company have entered into an agreement dated April 28th, 1898, to purchase the undertaking of the Garstang and Knott End Railway, subject to the sanction of Parliament, so that the company will then own a railway 11 miles in length, in direct communication with the main line of the London and North Western Railway, with the joint use of the Garstang and Catterall Station of that company." The company are authorised, under their Act, to pay interest during the period allowed for construction at the rate of 3*l.* per cent. per annum, and the first payment will be made on January 1st next, and subsequently on that date and July 1st in each year.

#### BRITISH CHINESE RAILWAYS SYNDICATE, LIMITED.

This is the title of a company which has been formed with a capital of 101,000*l.* in 1*l.* shares (100,000 ordinary and 1,000 management shares), to acquire mineral properties and to develop and work the same; to prospect, explore, and develop the resources of lands and hereditaments by building, planting, clearing, mining, and otherwise dealing with the same, and to stock the same and other lands; to cut and sell timber, and to breed and deal in all kinds of stock, cattle and sheep; to add, encourage, and promote immigration into the properties of the colony, and to colonise the same, and for such purpose to grant and lend any sums of money; to lay out towns and villages; to manufacture and deal in all kinds of goods, stores, implements, provisions, chattels, and effects capable of being used or required by the company or its workmen; and as general shopkeepers and merchants; to acquire any mines, mining rights and claims, minerals, ores, stamps, smelting and other works for treating ores and minerals, and rendering them marketable metals, including all kinds of buildings, machinery, and plant in relation thereto; as colliery proprietors, coal factors, &c.; and so far as lawfully may be, to convert metals into coin, and establish, work, and maintain mints; as shipowners, stock and share dealers; and to acquire, work, deal with, and turn to account any patents, patent rights, and inventions. The first directors—of whom there shall be not less than three nor more than seven—are to be elected by the signatories. Qualification, 100 ordinary or ten management shares. Remuneration to be fixed by the company. Registered by Greenwood and Co., 13, Serjeants'-inn, W.C.

### RAILWAY MAGNATES AT HASTINGS.

At the annual dinner of the Hastings Borough Association held last week, the mayor (Alderman Dr. BAGSHAWE) spoke of the disadvantage which the town suffered by not having through railway communication with the north. In the course of the evening Mr. Bonsor, M.P. (chairman of the South Eastern Railway Company), stated that preparations were now in progress for increasing the facilities to the public by extending the number of rails into London. When that was accomplished no doubt some of the improvements which had been proposed at Hastings would be carried into effect. The London Brighton and South Coast Railway and the South Eastern Railway, he said, had no intention of taking advantage of each other, but rather would try by mutual consideration to both give a better service

to the public. He congratulated Mr. Gooday on the result of his experiment in the fast train from London to Brighton, and also remarked that he thought it would be a good thing for Hastings to get through communication with the north, adding that he thought the time was not far distant when it would be brought about. Mr. GOODAY, general manager of the London Brighton and South Coast Railway, spoke hopefully of providing quicker trains. He congratulated the town on not having its frontagespoilt by tramways. Mr. ALFRED WILLIS, general manager of the South Eastern and London Chatham and Dover Railways Joint Committee, who proposed the toast of "The Borough Association," said (according to the *Sussex Daily News*) that he did not think the town would benefit so much from a through service with the north, pointing out that a similar service from Folkestone and Dover had not been a success. As regarded the running of the fast train to Brighton, he personally preferred good carriages and safe travelling. He did not consider that rushing from one place to another with the risk of coming to grief was good railway management.

### LIGHT RAILWAYS.

The Light Railway Commissioners will hold an inquiry to-day (Saturday) respecting the proposed line between Marthyr and Dowlais.

The Board of Trade has confirmed the provisional order granted by the Light Railway Commissioners for the making of the Isle of Axholme Light Railway. The line will, by means of various branches, connect Epworth, Haxey, Crowle, Luddington, and Hatfield, and will have a branch giving connection with the Goole and Marshland line, now in course of construction, by a junction at Swinefleet, which is connected with the Goole and Doncaster railway of the North Eastern Railway Company. An inquiry into the application was made last February by Lord Jersey and his colleagues on the Commission.

The county council of Berwickshire, at a meeting at Duns on Tuesday, discussed a proposal to advance 12,000*l.* by the county towards the share capital of the Lauder Light Railway Company. The meeting approved of a recommendation of the West District Committee to this effect, the said sum to be borrowed on security of a rate upon lands and heritages in the parishes of Channelkirk, Lauder, Ledgerwood, and Westruther. The committee apportioned the rate thus:—Channelkirk and Lauder, 3*d.* per 1*l.*; Ledgerwood and Westruther, 1*d.* per 1*l.* For the current year, however, the council only levied an assessment for preliminary expenses of the loan, of 1*d.* per 1*l.* on Channelkirk and Lauder, and ½*d.* per 1*l.* on Ledgerwood and Westruther. These rates are payable equally by owners and occupiers.

A memorandum was submitted at the meeting of Ayr District Committee of the county council at Ayr on Tuesday, giving particulars regarding the proposed Ayr and Monkton Light Railway. Application is being made for an order to construct the railway by the Drake and Gorham Electric Light and Traction Company, Limited, of London. It is proposed to work the cars on the overhead trolley system, the current to be supplied from a generating station to be erected by the company. The cars are to be seated for about fifty passengers, and will be lighted with electric lamps. A single line of rails would be laid. A fifteen minutes' service from each end of the line was proposed. The route originally proposed was from Ayr New-bridge along Main-street and Prestwick-road, through Prestwick, to Monkton village. Mr. R. D. WALLACE, solicitor, on behalf of the promoters, stated that in consequence of representations by Ayr Police Commissioners it had been decided to extend the line southwards along High-street, Alloway-street, and Carrick-road, to St. Leonard's Church. Mr. M. SMITH said the project had the approval of the Monkton and Prestwick Parish Council. It was agreed to approve generally of the scheme.

A correspondent writes:—"I understand that the great delay which has taken place in the construction of the State-aided light railways in County Donegal is to be attributed to a dispute which has arisen between the Londonderry and Lough Swilly Railway Company and the Irish Board of Works. The new railways are to run from Buncrana to Carndonagh and from Letterkenny to Burtonport respectively, and the Act which provides for their construction was passed more than two years ago. Both railways are extensions of the Lough Swilly Company's system, and that company will have to run and maintain the lines after they are made. The Burtonport extension, I am credibly informed, is all but agreed upon, but the Carndonagh line is still in dispute, inasmuch as while the company originally agreed to a line of the same standard as the existing railway from Stranorlar to Glenties, they are now striving to obtain a line of a much better type. This the Board of Works are naturally refusing to concede, and unless the Lough Swilly Company adopt a different attitude, it is not impossible that the construction of the line may have to be abandoned altogether, as only a fixed sum has been set aside by

the Government for this purpose, and this sum is insufficient to provide the higher type of railway demanded, and the Board contend the Glenties standard is more than sufficient for the requirements of the district."

#### NITRATE NOTES.

A Renter's telegram, dated Santiago, October 19th, says:—"The employes on the railways and in the saltpetre works have gone out on strike." Whether the first part of this message applies to the Nitrate Railway Company only or to all the lines serving the nitrate districts is not clear, but having regard to the recent drastic "reforms" on the Nitrate Railway the former alternative seems the more probable. Another cause for discontent, which would apply alike to railway hands and to employes at the nitrate oficinas, may be found in the practice of paying the workmen in currency, which just now is so greatly depreciated as to seriously affect their wages.

We must offer an apology to our readers for some of the absurdities lately inflicted upon them by our printers. For example, in the first of our "Nitrate Notes" last week Nitrate Railway ordinary shares were quoted at 5½d. and the preferred at 3½d., the "pence sign" being interpolated by the intelligent compositor—whose views, perhaps, differ from other people's as to the intrinsic value of the shares. Similarly, in the second line of the second paragraph, the word "security" was given instead of "scarcity." Security—excepting for himself—was about the last thing in the world the late "Colonel" North ever dreamed of creating.

The Nitrate Railway traffic return for the first half of this month, showing an increase of 8,136l., was quite up to expectations, and the shares keep very firm amidst the depression affecting most other stocks. Should the strike not be prolonged, further bumper traffics will probably be forthcoming before the close of the year.

The Fortnightly Circular of Messrs. Henry Bath and Son, dated October 17th, states:—"Floating Cargoes.—Business during the fortnight has been almost at a standstill, and the only transaction reported is that of refined nitrate for shipment in March, 1899, at 5s. f.o.b. The market for October-November sailings remains very firm, but there are few buyers and the inquiry for cargoes in any position is limited. Freight are firm, with a hardening tendency."

In our leader columns will be found an article dealing with the report and accounts just issued by the Bank of Tarapaca and London, Limited, for the year ending June 30th, 1898.

By an oversight we have hitherto omitted to state that the New Paccha and Jazpampa Nitrate Company, Limited, was registered on the 3rd inst., with a capital of 72,000l. in 5l. shares. To-day (Saturday) is the last day upon which shareholders in the old company can exercise their claim to an allotment of shares in the new company; but, according to what we hear, the victims of the original swindle—one of the very worst ever conceived by the late lamented "Colonel"—are not tumbling over each other to throw good money after bad.

#### THE RAILWAYS OF SOUTH AUSTRALIA.

The report of the Railway Commissioner for the year ending June 30th, 1898, shows that on the date named 1,723 miles of railway were open to traffic, and that the capital cost was 12,764,106l., an average of 7,405l. per mile. The earnings amounted to 984,228l. (a decrease of 40,807l. on the previous year), the expenses to 603,473l. (a decrease of 10,780l.), and the profit on working to 380,755l. Interest on loans absorbed 461,523l., leaving a net loss to the treasury of 80,768l. on the year (against 53,989l. for the previous year). The return was equal to 2.98 per cent. on the total capital expenditure, against 2.6 per cent. for the previous year. The proportion of working expenses to gross revenue was 61.31 per cent.—the highest ratio, with only one exception, touched in the last decennial period. The receipts per mile open were 571l., compared with 595l. in 1896-97, and per train mile run 63.57d., against 66.95d. in the previous year. The working expenses per mile open were 350l., compared with 356l., and per train mile 38.98d., compared with 40.12d. in 1896-97. The net revenue per train mile was 25d., against 27d. for the previous year. The movement of net revenue earned per mile has been from the highest point of 39d. in 1891 to 32d., 24d., 30d., 28d., 27d., and last year 26d. The Commissioner (Mr. Pendleton) regrets that it was not found possible to reduce the disbursements in proportion to the fall in revenue, but he says that certain expenditure in renewal of rolling stock "could not be further delayed." He further

points out that the automatic increases of pay, the burden of which he sought to readjust three years ago, "have helped to increase the outlay." The total is, however, nearly 11,000l. less than last year. The Commissioner explains that a good deal of unremunerative work had to be done in the carriage of water and on account of the large number of miles run in conveying starving stock at a low rate. Then the removal of the smelting works from Broken Hill "very seriously decreased" the back-loading to the Barrier silver-fields. The loss on the Northern Territory Railway last year amounted to 6,144l., not calculating interest. The report contains certain historical information covering the finance of the railways from the period of their birth. This shows that the working expenditure on the South Australian lines to June 30th last reached a grand total of 11,440,215l. Add to this interest paid on bonds, stock, and Treasury bills, 8,629,387l.—less charged to capital account of the lines under construction, 56,035l.—and a total outlay of 20,013,567l. is made up. Deduct the total revenue earned in the same period—18,161,271l.—and there is shown a total loss of 1,852,296l.

#### ARGENTINE RAILWAY ITEMS.

Messrs. Runciman and Co. have applied to the Argentine Congress offering to rent the national railways for a period of ninety years.

The Chamber of Deputies of the province of Buenos Ayres has granted a concession to Sres. E. Palengrin and Co., for a system of light railways in the province, under the Williams law.

Mr. W. C. Huxtable, general manager of the Buenos Ayres and Pacific Railway, will visit England next month. Mr. J. Huxtable, accountant of the Buenos Ayres Western Railway Company, is in England on a short holiday.

Congress has granted a concession to Sr. Esteban Borzone for a railway line from San Pedro, Province of Buenos Ayres, to Necochea, passing through Arrecifes, Salto, Chacabuco, 9 de Julio, Olavarria, and Juarez.

The Government of the Province of Santa Fé has protested against the decree of the Argentine Minister of the Interior to the effect that the Santa Fé Railways come under national jurisdiction, on account of there being a short section in the Chaco, and states that if the decree is to hold good, it is disposed to have the 20 kilometres of line in the Chaco torn up.

The report of the Compagnie de Chemins de fer de la Province de Santa Fé for the year 1897 states that the gross earnings amounted to \$3,333,146, and the working expenses to \$2,867,842, being an increase of receipts of \$104,602, as compared with 1896; but the expenses have increased on those of 1896 by \$261,979. The net receipts for 1897 were, therefore, \$465,304, as against \$622,681 in 1896.

#### FOREIGN AND COLONIAL ITEMS.

The Schenectady Locomotive Works have just completed for the Inter-oceanic Railway of Mexico two narrow-gauge ten-wheel compound passenger locomotives and six consolidation simple locomotives.

The accounts of the Robilkund and Kumaon Railway Company, Limited, for the half-year ended June 30th, admit of the payment of a dividend for the half-year of 2l. 11s. 9d. per cent., free of Indian but subject to English income-tax, or 2l. 10s. per cent. net.

The directors of the Mexican Southern Railway Company, Limited, have resolved to place 5,000l. to a renewal and contingency fund, and to recommend a dividend of 1½ per cent. per annum upon the ordinary stock for the year ending March 31st, 1898. This will leave a balance of 6,930l. to be carried forward.

Under the rules published by the Government of India Finance and Commerce Department, dated May 31st, 1897, it is notified for general information that the market rate of exchange for the third quarter of 1898-99 has been fixed at 1s. 3 27-32d., the percentage of salary admissible on account of exchange compensation allowance in that quarter being Rs.6-12-11 approximately.

The Secretary of State for Foreign Affairs has received a despatch from her Majesty's Consul-General at Christiania stating that tenders are invited by the chief engineer of the Ofoten Railway for the delivery of 3,000 metres of working railway rails, and twenty stone trolleys with iron carriages. Tenders in sealed envelopes, marked "Anbud paa Transportmaterial til Ofotbanen,"

should be addressed to "Overingeniörens Kontor, Narvik," where they must be received by 7 p.m., on October 25th, 1898. A copy of the conditions of contract and full details may be examined at the Commercial Department of the Foreign-office any day between the hours of 11 a.m. and 5 p.m.

#### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., chartered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, &c., may be had gratuitously.]

21,386. John Jones and David H. Fletcher, 31, Church-road, Seaford, Liverpool—Improvements in fog-signalling machines. October 11th, 1898.

21,425. Henry Michelson, 12, Church-st., Windhill, Shipley, Yorks—Improvements in fog-signalling on railways by sound. October 12th, 1898.

21,439. Samuel Sims and William Jerram, Imperial-chambers, Albert-street, Derby—Improved means or device for securing rails in railway chairs. October 12th, 1898.

21,515. Matthew Walton, 17, St. Ann's-square, Manchester—A method of and means for automatically locking and unlocking the doors of railway carriages and other vehicles. October 13th, 1898.

21,544. Charles Hubert Dunton and Thomas Richard Thomas, 19, Holborn-viaduct, London—An improved apparatus for preventing the opening of doors of railway or other carriages whilst the train or other vehicle is in motion. October 13th.

21,550. William B. Potter, 83, Cannon-street, London—Improvements in systems of control for railway trains. (Date applied for under Patents, &c., Act, 1883, section 103, March 17th, 1898, being date of application in the United States.) October 13th, 1898.

21,551. Edwin W. Rice, junior, 83, Cannon-street, London—Improvements in controlling electrically propelled railway trains. (Date applied for under Patents, &c., Act, 1883, section 103, March 26th, 1898, being date of application in United States.) October 13th, 1898.

21,652. Sydney Worthington and Richard Joseph Crowley, 18, Granville-place, Portman-square, London—An improved system of electric traction. October 14th, 1898.

21,703. John James Smith, 119, White Hart-lane, Barnes, London—An automatic safety catch for securing railway carriage doors while a train is in motion. October 15th, 1898.

21,759. William B. Potter, 83, Cannon-street, London—Improvements in electric train systems. (Date applied for under Patents, &c., Act, 1883, section 103, March 31st, 1898, being date of application in the United States.) October 15th.

21,762. Horace Frederick Flux, 47, Lincoln's-inn-fields, London—Improvements in couplings for railway wagons and like vehicles. October 15th, 1898.

21,525. John Muir and James McLean, 96, Buchanan-street, Glasgow—Improvements in and relating to the conveying and storing of bicycles in railway vans, steamboats, and the like. October 13th, 1898.

21,529. Henry Keeling, 42, Prospecthill-road, Langside, Glasgow—Improvements in or applicable to the operating-rods of signals and switches, and other railway appliances. October 13th, 1898.

#### SPECIFICATIONS PUBLISHED.

25,403. Boulton (Anderson and Anderson)—Current collectors for electric railways. 1897.

29,880. Tozer, Stanton, and Stanton—Railway and other wheels and their mode of manufacture. 1897.

#### TENDER FOR LETTERS PATENT.

HERBERT HADDAN and CO., Patent Agents, of 18 Buckingham-street, Strand, W.C., London, have been instructed by Herr Julius Emden, of Hamburg, the Inventor and Patentee of British Letters Patent No. 2, 2,035, of 25th September, 1897, for "A new or improved Safety Device for use in Railroad Trains," invite offers to PURCHASE said PATENT by Tender to be made H. H. and Co., in writing on or before Tuesday, 1st November next, at above address. The French Patent for the same Invention may also be tendered for separately or jointly with the British Patent. A Model on view. Full particulars on inquiry.

#### WEST AUSTRALIAN HARDWOODS.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and BB. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1898.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 samples including Blaenavon	850 Specimens 7.140	850 Specimens 23,257	546 Specimens 7,102	273 Specimens 91,061
Average of 5 samples of Blaenavon only	63 Specimens 7.175	63 Specimens 25,588	46 Specimens 7,488	21 Specimens 108,281

**Meetings.****BUENOS AYRES AND PACIFIC RAILWAY.**

The annual general meeting was held on Tuesday, at Winchester-house, E.C.; Sir GABRIEL GOLDNEY, Bart., presiding.

The SECRETARY (Mr. F. O. Smithers) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN said—We meet under somewhat less favourable circumstances than last year, but certainly not in any worse position than was anticipated from our forecast made twelve months ago. We saw the decrease of traffic coming and were prepared to meet it, as far as possible, by a reduction in traffic expenses. The gross takings for the year were 54,000*l.* less than in 1896-7, but a reduction in expenses brought the net difference to 28,000*l.* odd only. That, however, is a large sum, and mainly caused by the almost total destruction of the maize crop of 1897. It is difficult to say anything fresh about it, but we are in a position to summarise the other Argentine railway reports, and if we put together the returns of the five larger railways which traverse the agricultural districts, we can obtain a general view of what the failure of this great cereal crop means. The Southern, Western, Rosario, Central Argentine, and ourselves carried over 1,000,000 tons less maize in 1897 than they did in 1896. On a fair estimate the producers and dealers in the country have lost between 2,000,000*l.* and 2,500,000*l.* sterling, or in currency \$35,000,000 to \$40,000,000. The railways lost at least 250,000*l.* sterling in traffic receipts. This is no exaggerated statement, and it brings home to all of us the remarkable effect of a decrease in one crop and its widespread and serious effects. And, while upon this subject, the Government must be congratulated upon the energetic measures taken last year for dealing with the dangerous pest of locusts. We, in common with all the English owned railways, subscribed to a committee to collect information and adopt remedial measures, and our permanent way gangs did their part in destroying insects along the line. The result has shown that it has been a false view hitherto to regard the locust as an unavoidable visitation. The locust is an enemy to be fought and beaten. Four million pounds sterling in one crop alone is not an exaggerated estimate of the loss to the country and commerce, taking the quantity of maize lost at 1,000,000 tons at 4*l.* per ton the value of it in Europe. In 1898, however, much maize was saved, and we are looking for even better results from the improved organisation of the locust destroying forces this year. As the general manager points out on page 4 of the report, we had about 70,000 tons of maize within sight of our line safe and under cover in the middle of August this year, which should gradually come forward and maintain our weekly traffics, until we begin to deal with the new wheat at the end of December next. There has been a favourable winter, and we know that wheat has rooted well, and is now coming up in the best possible way, and at present all promises well for the coming crop. The following telegram confirms this:—

"Traffic receipts for week ended 22nd inst. were 8,396*l.* (increase of 2,395*l.* over those for the corresponding period in 1897). Traffic good. Wool coming in in large quantities. Considerable movement maize. It has been raining steadily inside Rufino station. Crops are in good condition; weather fine; hope for steady good traffic till end of year. Larger area under grain cultivation. New wheat crop promising. There are no locusts this season as yet all along the line. Wine traffic most satisfactory. Cattle traffic heavy."

From the report you will see that for the fourteen weeks since July 1st the gross takings had been 95,521*l.*, against 84,000*l.* odd of last year; but the figures, including the last week's receipts to the 22nd instant, are 111,500*l.*, as against 95,600*l.* for the same period of last year, showing an increase of 16,000*l.*, and I may say that from the comparative reduction of expenses the whole of that increase may be taken as increased profit up to date. The gold premium is steadier and lower than for many years past, and is progressing in the right direction for us. The quotation to-day is 147. We have every confidence in the new President and the Government, and, with the improving conditions referred to, this reduction in the gold premium may, I hope, be permanent. As regards expenditure, so many details are given in the report and accounts that there is, perhaps, little need for me to do more than deal with the permanent way charges. Some three years ago we received reports from our then general manager and engineer regarding the state of the road, and the wear of the rails, and, on going into the matter, it appeared to us possible that as large a sum as 120,000*l.* to 150,000*l.* would have to be spent sooner or later, say during a period of fifteen years, upon relaying and strengthening the road. The board considered the idea of capitalising the amount and writing it off during an extended period, and thus lessening the burden falling upon the present shareholders. But our auditors and officials pointed out that that was contrary to practice, and we had to defer to their view and to charge more to revenue than we contemplated at that time. All the details have been given in the last two reports. We have tried three methods—first, taking up the 50*lb.* and substituting 70*lb.* rails on parts of the line; second, relaying the good 50*lb.* rails thus set at liberty in the parts of the road not so frequently run over; and, third, putting in additional wooden sleepers to strengthen special lengths of rail without relaying at all. We have done nothing hurriedly nor without the fullest expert advice and thorough consideration. Our general manager, Mr. Huxtable, who arrived in London only last night, and whom we are glad to see with us to-day, has perhaps had some anxious times as to the safe and proper conduct of the traffic, and also he may have considered that the board were unduly parsimonious in withholding from him the

permission to carry out such works as seemed desirable, if not actually necessary, to thoroughly rehabilitate the permanent way. We gave you pledges last year to do only what was necessary for safety. We take our stand upon that, and come to you to-day with the assurance that no more has been done. We have not aimed at putting the road into first-class order, however much we may have desired to do so. We have simply done what was reasonably, if not absolutely, necessary for the maintenance of the line in safe running order. Mr. Hodgson, whom I am also pleased to see here to-day, is an engineer of large experience, and he has gone into all the considerations on the spot, and he is rather disposed to say that we have done too little rather than too much. I do not want anybody to go away with the idea that we have done too little for safety. Our duty to our debenture-holders, to you as shareholders, and to the passengers whose lives are in our hands would preclude that, but I am only saying that we have kept a tight hand upon the spending departments because the matter touches our dividend so closely. But there is another and favourable side to this expenditure, which shows up clearly in the paragraph of page 9 of the report—viz., that in consequence of the better state of the line we spend less upon wages, upon stores, and upon the upkeep of the renewed line. I do not say the whole 14,400*l.* economised in permanent way charges during the year is due to the relaying, but a considerable portion is. Seeing that we have saved 14,400*l.* it is no great hardship upon you on this occasion if we charge the revenue with the whole 15,000*l.* spent during the year. But I must add that it is upon the relaid road that the economies have been effected, the strengthening by additional sleepers does not permit of the same economy. It is clear, however, that a certain amount of expenditure in relaying must be continued, and it seems likely that 15,000*l.* a year will not be an extravagant amount to set aside each year for the next ten years, looking at the increasing traffic and the weight and speed of locomotives necessary to maintain our connections with other lines. If fortune smiles on us, or if further economies are possible, we shall certainly not hesitate to adopt them, but, whatever we do, you may rest assured that we shall continue to weigh, on the one side, the absolute necessities of the railway and, on the other, the cost which comes out of your dividend, so that whatever is done may be done in the most economical manner. As regards capital expenditure during the year, we have continued the fencing of the line, as the work already done has given such satisfactory results in protecting the trains from cattle and other dangerous intrusions, and there remains now but 129 kilometres to complete the whole—four-fifths are completely fenced. The other large items of expenditure have been:—The completion of the junction with the Rosario Company, which is now in operation, and makes a further link towards the complete chain of rails round the town of Buenos Ayres to facilitate interchange of goods and getting them to and from the markets and docks. A further item includes an enlargement of our locomotive works at Junin. The remarks of the general manager on page 7 of the report show that the shops there were constructed for only twenty engines, and that we now have sixty-five with all their appliances. Our yard at Junin is a very busy place, and quite an English town has grown up alongside owing to the industry arising out of our line. *Italo Concession*.—This matter remains *in statu quo*. Neither our circumstances, nor the financial conditions in Europe nor Argentina have been propitious for the undertaking of this branch. Our manager speaks very highly of the quality of the land and the prospects of development, and there is no doubt that a considerable number of estancias have been established in the district, which only await the construction of the branch. I must refer to an item in the balance-sheet, page 21—viz., 11,332*l.* paid for lands under the construction contract. This matter has been referred to at previous meetings, so I need not go into the details now, but we have been obliged to spend this sum, as we have had actions brought against us in respect to defective titles, and naturally we have had to press our claim against the contractors for it. Until this matter with the contractors is settled, you will all agree that it is most important that the first preference-holders should be united and represented in overwhelming strength at these meetings. We are obliged to the preference-holders for the support accorded to us on this occasion as shown by the proxies we hold to-day. Before concluding let me say a few words as regards the net revenue account. You know the second debentures are non-cumulative, but are strictly dependent on the profits of the year. The responsible officials of the board in preparing the account for the auditors as to the exact revenue of the year found that it was necessary to carry to the credit of revenue the Government freight account, which, in the old days of the guarantee, was held in suspense until we actually received cash in payment, but that amount, according to the second debenture trust-deed, must now be treated as money earned during the year, and as revenue of the year, and be taken into the account. The auditors went thoroughly into the matter, and have certified the account accordingly. I do not think there are any further details to deal with in the report, and I will conclude by referring to the hopeful statements which the general manager makes in his summing up on page 7. The country we traverse is still developing—more estancias are being established, and, as we said last year, “apart from special causes affecting any particular crop, the steady progress of our undertaking may be anticipated.” The maize crop is coming in in large quantities, the wheat sown is of a large area, and is doing well, and it is hoped that it is too far advanced to be damaged by locusts, and agricultural prospects generally are favourable. There is, happily, I learn little fear of a rupture as regards the Chilian boundary, and the increased value of the paper money is a strong indication that the prospects of the country are improving, and it is a great gratification to me to say that we now see a prospect before us of a realisation of the hope originally formed, that this under-

taking will rank with the soundest and best railways in the Argentine Republic. The board have to regret the retirement of Mr. Eyrre, whose most valuable services we acknowledge in the report. We have elected in his stead Mr. J. W. Philipps, M.P., a gentleman whom I have known for many years, and who represents a very large amount of preference stock in this company held by some of our oldest shareholders. I now conclude by moving:—“That the report of the directors and statement of accounts now presented be and they are hereby received and adopted.”

Mr. E. NORMAN seconded the motion.

Mr. BRUCE GARDYNE thought the shareholders generally would re-echo the chairman's remark that the report was of a somewhat disappointing character. He proceeded to criticise various paragraphs of the report, and contended that instead of the permanent way charges being about the same as last year, as stated by the directors, they showed an increase of 7,400*l.* This increase was diametrically opposed to the statement made last year by Mr. J. C. F. Lee, who said he was personally of opinion that the renewals had been excessive, and that in future the board did not mean to go further in this direction except for purposes of safety. He wished to know how Mr. Lee could justify that statement in the face of increased expenditure on the permanent way.

Mr. LAURENCE BAKER submitted that the present condition of the company's affairs was much more unsatisfactory than that of last year, because in 1897 the shareholders were paid 3½ per cent., and now they would receive nothing. His charge against the board was that during the last few years they had not paid sufficient attention to the company's affairs, and that they had allowed the permanent way to get into a discreditable condition. The chairman was a director of six companies, and of the seven directors five held exactly the necessary qualification for office; whereas his own holding was more than double that of the whole board. In concluding, he moved as an amendment:—“That the report be received but not adopted, and that a committee of three shareholders be appointed to confer with the directors and report to an adjourned meeting.”

Mr. S. TRACEY seconded the amendment.

Mr. VAN RAALTE maintained that the depressed condition of the company's affairs was due to bad seasons and the locust plague, that the line occupied the position of the English Midland amongst South American railways, and it had a great future before it if the shareholders would work harmoniously together. (“Hear, hear.”) He considered it absolutely necessary, not only for the purposes of safety, but for satisfying the requirements of the Government, that the permanent way should be kept in fair working order.

Mr. T. P. GASKELL, replying on behalf of the chairman, said the question of the renewal of the permanent way had been a matter of the deepest consideration with the board, time after time. What would any one think of them if they scamped the road and incurred the risk of grave dangers to the travelling public? The railway was originally a contractors' line, and with sleepers 4ft. 6in. apart, and it had been absolutely necessary to strengthen the permanent way from time to time to keep it in working order. Since Mr. Lee made his statement of last year Mr. Harrison Hodgson had visited the railway at Mr. Lee's request, and had made a special report, which clearly proved that the relaying of the road must be continued, both in the interests of the travelling public and of the proprietors of the railway. This showed that Mr. Lee last year made his statement on insufficient information. He denied that the board had encroached upon the preference interest in order to pay the second debenture dividend, and pointed out that Mr. Philipps had been elected a director because he represented a large amount of preference stock, and was a man of commercial ability and experience. The directors intended to enforce their claim against the late contractors, and hoped very little of the debt would be lost to the company. As to the second debenture dividend, it amounted to 67,500*l.*, but as the board had no money in hand, the bulk of that money would have to be borrowed. Authority had been obtained from the first debenture-holders to raise 100,000*l.* in first debentures unconditionally and 50,000*l.* conditionally, but no steps had been taken to raise the stock, because it was only quoted at par, and the board considered it ought to command a considerable premium.

Mr. HARRISON HODGSON, by request, addressed the meeting, and said he considered it absolutely necessary that the line should be relaid with rails of 70lb. instead of 50lb. He was, therefore, glad that it was the intention of the board to relay a portion of the road with the heavier rails. He believed the company possessed a first-class property, which was capable of considerable development, and that it was more economical to spend money on the renewal of the permanent way than to run the risk of what might be a bad accident on the road. (“Hear, hear.”)

Mr. GARDYNE said he did not object to the line being kept in working condition, but he certainly objected to more money having been expended on the permanent way than in the previous year after Mr. Lee having said that less expenditure would be required.

Mr. J. W. PHILIPPS, M.P., as a new and unbiassed director, thought there could be little doubt that Mr. Lee last year made an ill-advised speech, and that the board at the time should have disavowed it. (“Hear, hear.”) Mr. Harrison Hodgson was one of the best railway experts in this country, and he had advised the board to relay the road. No impartial man could come to any other conclusion than that the board were right in spending every penny they could spare on the permanent way, so as to put it in good working order and prevent possible accidents.

Mr. BAKER said his contention was that the renewals should have been carried out years ago. He considered the board had neglected their obvious duties.

In reply to a question,

Mr. GASKELL said the line was 428 miles long, and 60 miles had been

renewed with the heavier rails. In outlying districts the lighter rails would be sufficient for the requirements of traffic, and with 39,000*l.* a year on maintenance the company would be able to go on very comfortably. Even with the heavy outlay on renewals the board's expenditure was not above that incurred by the other South American railways.

Mr. W. C. HUXTABLE, the general manager, said that having only just arrived in this country he was not prepared to make a set speech. He would, however, say that he considered the first duty of a general manager was to see that he carried the traffic safely. When he took charge of the line it was nine years old, and a great part of it had been deteriorated by salt. He believed that an expenditure of about 15,000*l.* or 16,000*l.* a year for renewals, for about ten years, would be sufficient to keep the line in working order. It was never in a better condition for business than at present, and the prospects for the future were better than those of any railway in the country. The whole of any increase in gross receipts could be looked upon as profits, because the working expenses had been reduced to a minimum, and there was no reason why they should increase. The whole of the increase in receipts would be for the benefit of the preference shareholders. There were at present no locusts, and he had never seen the country looking better. He hoped the shareholders would seriously consider the extension of the line by branches. If they did not, others would step in and take the bread out of their mouths. The extension to Italo was a very valuable one.

Mr. BLUNDELL suggested the withdrawal of the amendment on condition that the board agreed to have a friendly discussion with two or three influential shareholders.

Mr. BAKER and his SECONDER said they were willing to withdraw the amendment on the condition suggested.

The CHAIRMAN intimated that the board could not agree to receive any deputation, but would be willing to give any required information regarding the expenditure to any shareholder who chose to go to the company's office.

Mr. VAN RAALTE suggested that Mr. Baker should go to the office, but that gentleman declined.

The amendment was thereupon put to the vote, and it was negatived by a large majority, only three shareholders voting in its favour.

The resolution for the adoption of the report was then carried unanimously.

The retiring directors, Mr. C. E. Günther and Mr. J. W. Philipps, M.P., were unanimously re-elected, and it was intimated by the CHAIRMAN that Mr. Philipps had agreed to visit the River Plate and the company's property during the current fiscal year.

On the motion of Mr. HERBERT, the auditors, Messrs. Turquand, Youngs, and Co., were also reappointed.

The proceedings terminated with a vote of thanks to the chairman and directors, the general manager, and the staff in Buenos Ayres, for their past services.

#### MIDLAND URUGUAY RAILWAY.

A meeting of debenture stockholders, convened by the trustees (Lord Farrer and Lord Welby), was held on Monday at Winchester-house to consider resolutions (1) fixing the debenture stock interest for the four years from May 1st last to April 30th, 1902, at the rate of 4 per cent. per annum, on the understanding that no dividend should be paid on the ordinary stock during the period mentioned, "after which latter date the payment of interest on the stock shall be at the rate of 5 per cent. per annum;" and (2) altering article 4 of the trust-deed dated May 31st, 1893, and made between the company of the one part and Lord Basing and Sir T. H. Farrer of the other part, by substituting 1,250,000*l.* for 1,180,000*l.* Lord WELBY presided.

The CHAIRMAN stated that the directors had addressed to the trustees a letter on the position and prospects of the company. A copy of the letter had been communicated to the debenture stockholders, and he might state that the trustees had felt no hesitation in at once asking them to meet together in order to hear the reasons which had led the directors to make these important proposals to them. They must all feel that the company had been labouring under disadvantageous circumstances which no circumspection or prudence on the part of the directors could have avoided. The first thing they must satisfy themselves about was what was necessary to keep the line open and going.

Sir W. L. YOUNG then addressed the meeting, and reminded them that he and Mr. Farrer were appointed to represent them on the board by the agreement made with the company dated May 31st, 1893. When they joined the directorate they found that this agreement was practically the result of the action of the Government in cutting down the guarantee from 110,000*l.* to 55,481*l.* per annum. The old guarantee was amply sufficient to pay 6 per cent. on the debenture stock and leave a large margin over. The Government, however, found themselves unable to pay the full guarantee, and therefore reduced it to the amount mentioned. The sum required to pay 6 per cent. on the whole issue of debenture stock was 70,500*l.*; to pay 5 per cent. on the amount issued 59,000*l.* was required; and to pay 4 per cent. 47,200*l.* was necessary. Therefore the guarantee was now sufficient only to pay 4 per cent. and a little over, provided the road did not earn enough beyond its expenses to help to pay the extra amount required. In order to pay 5 per cent. the road must earn 3,519*l.* over the amount now received for the guarantee, and to pay 6 per cent. 15,319*l.* beyond the guarantee was required. Therefore, at the time the agreement was made, if the road was making its way, the interest guaranteed would no doubt have been safe; but on referring to the old reports he found that it was not paying its way. In 1889-90 the loss was 1,040*l.*; in 1890-1 it was 12,000*l.*; in 1891-2 it was 2,172*l.*;

while in 1892-3 there was a small profit of 395*l.* Since the date of the agreement the traffics had considerably improved. In 1893-4 the gross receipts were 34,968*l.*, showing a net profit of 8,950*l.*; in 1894-5 the gross receipts were 39,860*l.*, giving a net profit of 11,762*l.*; and in 1895-6 the gross receipts were 42,910*l.*; but there was a very large increase in the working expenses, and the net profit dropped to 4,219*l.* In 1896-7 the gross receipts during the revolution were 35,215*l.*, and there was a net profit of only 1,516*l.*, while this year, subject to audit, the gross receipts were 37,540*l.*, and the net profit on the working of the road would be 3,777*l.* Thus, for five years up to the present time the average net profit had been 5,590*l.* per annum, which with the guarantee was sufficient to pay 5 per cent. and a little over, although it had never been enough to pay the full 6 per cent. He and Mr. Farrer found on joining the board that there was no clause in the agreement objecting to a dividend being paid to the ordinary shareholders—at all events, while 4 per cent. was being paid on the debenture stock. In 1893-4 and in the following year a certain sum was put to reserve and a certain amount was paid as dividend to the shareholders. He then referred to the position of the capital account, and afterwards alluded to the condition of the road, remarking that a great deal was spent upon it during their good years. Since the revolution, however, they had kept the working expenses as low as possible, and now that the revolution was over they had to repair all the damage that was occasioned by it, and the Government had made a requisition on them to do certain other work. The sleepers also, which had been down nine or ten years, seemed to be altogether failing now, and their manager, in a letter just received, stated that he would not be responsible for the consequences unless a certain amount were at once expended on new sleepers. In the next four years it would be necessary to put in 330,000 sleepers. If the debenture stockholders consented to reduce the interest as now proposed, it would give them just about the amount they required to provide the sleepers. They might ask why they had not been called together sooner. The directors had hoped to be able to pay the 5 per cent. interest this time. They had, however, nearly 4,000*l.* still to collect from the Government, they had a law suit to provide for, and they were also under the necessity of putting in new sleepers. If, therefore, they had to pay the 5 per cent. interest on the 1st prox., they would not have enough to do so. No doubt there would be opposition to the proposal to reduce the interest permanently to 5 per cent., but considering what he had told them, and the amount of the traffics, there did not seem any great reason for supposing that they would earn much more than would suffice to pay 5 per cent. They were also practically at the end of their capital account, and it was impossible to add new revenue to a road without at all events a little additional capital outlay. They were, therefore, asking the meeting to permit them from time to time to issue the balance of the debenture stock which was at present unissued—70,000*l.* This would require another 3,500*l.* per annum for interest at 5 per cent.; and in order to pay 5 per cent. on the whole issue the road would have to earn a profit of 7,000*l.* per annum. He thought it would also be right for them to put a certain amount to reserve, because what had happened once might happen again. These were the reasons which had induced the directors to submit the proposals before the meeting.

The Hon. T. C. FARRER proposed the first resolution. He pointed out that the debenture-holders practically owned the railway, and that it was really worked for their benefit. The reason that had led him to support the proposal to pay 5 per cent. in perpetuity was that he believed that that was all that the road was likely to yield, and he held that the custom of heaping up paper debts was fatal to the best interests of the concern.

Mr. C. G. MOTT (chairman of the company) seconded the motion.

Mr. GARDYNE referred to the committee which was appointed in 1892, consisting of Mr. Stanley Boulter, Mr. C. M. Rose, Mr. F. Praed, and himself, and stated that he was authorised to say that that committee offered uncompromising opposition to the proposal to reduce the debenture interest permanently to 5 per cent. He reminded them of what had happened after the reconstruction in 1892. During the past five years 45,000*l.* had been distributed among the shareholders, which, he maintained, ought either to have been paid to the debenture stockholders or expended on the property. So long as provision was not made that no dividends should be paid on the ordinary shares at any time until the debenture stockholders returned to their full 6 per cent., so long they would oppose the proposed reduction in the rate of interest. He concluded by proposing an amendment for adjourning the meeting, and appointing a committee to confer with the directors and to report to the adjourned meeting.

Mr. PRAED seconded the amendment. A protracted discussion followed.

Mr. FARRER stated that he was perfectly prepared to accept Mr. Gardyne's amendment provided that the chairman of the company could get the shareholders' consent to it. If not he supposed that the company would go into liquidation.

Mr. HENRY PRINCE said that he failed to see how the shareholders could object so long as the debenture-holders did not claim more than their rights. Several other proposals were brought forward, but eventually

The following amended resolution, which Mr. Gardyne proposed at the invitation of Lord Welby, was carried *nem. con.*—

"That the interest on the debenture stock for four years, from May 1st, 1898, to April 30th, 1902, be at the rate of 4 per cent. per annum, after which latter date the payment of interest shall be at the rate of 5 per cent. per annum until April 30th, 1907, and thenceforth at the rate of 6 per cent., it being on the understanding that no dividend be paid on the ordinary stock of the company until interest at the rate of 6 per

cent. has been paid to the debenture stockholders, the company being at liberty to resume payment of 6 per cent. at an earlier date."

On the motion of Mr. MOTT, seconded by Mr. FARRER, it was resolved:—

"That Article 4 of the trust-deed dated May 31st, 1893, and made between the Midland Uruguay Railway Company, Limited, of the one part, and the Right Hon. George Lord Basing and Sir Thomas Henry Farrer, Bart., of the other part, be altered by striking out the figures 1,180,000*l.* and inserting in lieu thereof the figures 1,250,000*l.*, and that all necessary and consequent alterations in the said trust-deed be made accordingly."

#### DEMERARA RAILWAY.

The half-yearly general meeting was held yesterday, at the City Terminus Hotel, Causton-street, E.C.; Sir GEORGE H. CHAMBERS, the chairman of the company, presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue amounting to 16,995*l.* (against 15,894*l.*), and an expenditure of 9,136*l.* (against 10,075*l.*), leaving net receipts 7,859*l.*, to be added to 307*l.* brought forward, making 8,166*l.*, out of which the directors recommended a dividend upon the original stock at the rate of 3 (against 2) per cent. per annum, amounting to 2,475*l.*, to be paid with the preference dividend of 4,025*l.*, together 6,500*l.*, leaving 1,666*l.* to be carried to next account. Length of line, 20 miles. Paid-up capital, 280,000*l.*—viz., ordinary stock (175,000*l.*, less 10,000*l.* in the hands of the company), 165,000*l.*; perpetual preference stock, 7 per cent., 115,000*l.*

The SECRETARY (Mr. H. Martin Sells) having read the notice convening the meeting,

The CHAIRMAN said—Gentlemen, the directors have much pleasure in meeting on this occasion, when we have to submit a report which on the whole may be regarded as satisfactory, the more so because it is not in one or two items only there is cause for congratulation; in almost every particular we find encouragement. Our acting manager has gone into details in furnishing the half-yearly accounts, and one point to which he specially alludes is the greater recourse to the cheaper classes of carriage, which tells a little against the company, but happily the greater number of passengers almost makes good the loss; and this increase in the number moving about is a satisfactory feature which we hope to see more strongly developed. In goods the greater weight is remarkable, and it would have been greater still but for the Cuban war, the effect of which was to raise the price of American provisions in Demerara, and this induced the farmers to sell their produce in the country instead of sending it to town. In expenditure there has been a saving in several departments; a considerable reduction in the cost of fuel had been effected by the use of Welsh coal, which also had other advantages; these were interrupted by the unfortunate strike which was so long kept up, but we hope that market will now be again open to us. As to general matters, our manager, summing up, says:—"The line, working engines, and rolling stock have been maintained in good order." He then refers to the work done to bridges during the half-year, which has been considerable, and is calculated to diminish future cost. "At Cumming's Canal a new bridge, with two spans of 20ft. each, is finished, and steel joints put on. At Belfield West new concrete abutments and inverts are put in, reducing span from 17ft. to 6ft., and various others." I cannot doubt its being satisfactory to the shareholders to know that the property is being well kept up, and that, where practicable, improvement still goes on. With regard to the extensions, considerable progress has been made. The state of our engineer's health rendered it necessary for him to leave the colony for a short time, and he came home for the change, but he has gone back, and we hope is now actively employed in urging the works forward. During his absence Mr. Clarke has had the superintendence of the Berbice line and Mr. Adams of the West Coast line. As the result of the half-year, there is a sum of 7,858*l.* 18*s.* 4*d.* to be added to the 306*l.* 19*s.* 5*d.* brought forward from the preceding account, making together 8,165*l.* 17*s.* 9*d.*, out of which sum the directors recommend a dividend on the original stock at the rate of 3 per cent. per annum, to be paid with the preference dividend; the two amount to 6,500*l.*, and will leave a balance of 1,665*l.* 17*s.* 9*d.* With the large works in hand, opportunities may arise of carrying out advantageously some further improvements in the existing line, and the directors therefore think it prudent to retain this balance available for any such purpose, leaving appropriation open till we make up the accounts for the last six months of the year. I do not know that there is any further information which I can afford you, but if any shareholder wishes to make any inquiries, I shall be happy to answer them. I beg to move—"That the report of the directors and the accounts laid over therewith be received and adopted."

Mr. J. ERNEST TINNE seconded the resolution.

Mr. CUFF desired to know whether the extensions were being proceeded with to the satisfaction of the board, and whether they would be completed within the estimated expenditure. He proceeded to remark that Demerara was very much dependent upon sugar cultivation—too much so; and that at the meeting of the Royal Mail Steam Company on Wednesday the chairman spoke strongly and hopefully about the cultivation of fruits in the West Indies. He wished to know whether cultivators in Demerara had given any attention to fruit growing, because if properly picked and packed, fruit could perhaps take the place of sugar to a great extent, and its export would help to relieve the depression which at present existed in the sugar trade.

Sir JOHN SWINBURNE asked when it was expected that the Western extension would be opened for traffic, and suggested that the dividend should not be increased—although there might be an increase of traffic and revenue—until the 2,000*l.* which had been hanging like a millstone

round the neck of the company for compensation in connection with the Bell Air collision had been taken from the suspense account.

Mr. THORNTON asked whether a portion of the large balance which was being carried forward could not be devoted to paying off the 2,000*l.* in the suspense account.

The CHAIRMAN, in reply, said the work in connection with the extensions was going on pretty rapidly, although not quite so fast as the directors would have liked, owing to Mr. Dorman's absence from the colony for a time in consequence of ill health. It was hoped and believed that the West Coast extension line would be completed and in working order by the middle of next year. The outlay on the extensions was within the estimates, and the board had every reason to be satisfied with the expenditure as far as it had gone. With regard to the 2,000*l.* remaining in the suspense account for the collision, he hoped and believed this was the last time there would be any reference to it in the accounts. He considered the directors were acting wisely in carrying forward the sum of 1,665*l.*, seeing that the company had large works in hand. As to Mr. Cuff's inquiry, Demerara undoubtedly produced other articles of consumption besides sugar, and it was hoped that when the line to Berbice was completed, there would be a large carriage of various articles of produce.

The resolution was then put and carried unanimously.

On the motion of the CHAIRMAN, seconded by Mr. TINNE, a dividend at the rate of 3 per cent. per annum was declared on the original stock, payable with the interest on the preference stock on the 31st inst.

Sir JOHN SWINBURNE, in proposing a vote of thanks to the chairman and directors, and the staff in Demerara, said the country was not a pleasant one in hot weather, therefore the thanks of the shareholders were due to the officials there for the energy they had displayed in carrying out the work of extension. He sincerely hoped Mr. Dorman's health would remain equal to the task which had been imposed upon him, and that he would be able to superintend the construction works until they were satisfactorily completed. ("Hear, hear.")

Mr. ATTER seconded the resolution, which was carried unanimously; and the CHAIRMAN having acknowledged the vote, the proceedings terminated.

#### ALABAMA GREAT SOUTHERN RAILWAY.

The annual general meeting was held on the 25th inst. at the Cannon-street Hotel, E.C.; Mr. H. DOUGHTY BROWNE presiding.

The accounts for the year ending June 30th, 1898, showed a gross revenue of 359,936*l.* (against 331,271*l.*), an expenditure of 243,395*l.* (against 226,963*l.*), and a profit of 116,541*l.* (against 104,308*l.*). Interest on bonds and debentures and other deductions absorbed 61,821*l.*, leaving 54,720*l.*, to which must be added 55,514*l.* brought forward from last year, making a total of 110,234*l.* From this had been deducted 5,144*l.* paid for legal services in past years, 12,005*l.* for discount on securities sold, and 1,029*l.* account written off as valueless; together 18,178*l.*, leaving a balance of 92,056*l.* An interim dividend on the A preference shares of 3*l.* per cent. was paid in June, and the directors now recommended a further dividend at the same rate, payable in December next. These two amounts would absorb 39,212*l.*, leaving 52,844*l.* to be carried forward. The capital account of the company showed the following issues to have been made:—Ordinary 10*l.* shares, 1,556,000*l.*; preference 10*l.* shares, 676,070*l.*; debentures, 134,000*l.* The proceeds of these issues have been invested in the ordinary and preference shares of an American corporation called the Alabama Great Southern Railroad Company.

The CHAIRMAN, in moving the adoption of the report and accounts, said the report indicated substantial progress in their earnings. They had taken in round figures an additional income of 28,000*l.*, to obtain which had cost them a little over 16,000*l.* Altogether they were 11,700*l.* better off than they were in the preceding year. The additional expenses might seem to represent a rather heavy proportion of the increased revenue, but an investigation of the accounts would show that they had been liberal in their expenditure on the line and its equipment. He believed that he was justified in stating that at no former period was the condition of their undertaking and rolling stock better than it was at the present time. Their returns would have been more satisfactory, but for the interference with their traffic which was caused by the outbreak of yellow fever in the autumn of 1897. They had had certain arrears to write off in connection with old liabilities—5,000*l.* for law expenses, 1,000*l.* for a bad debt, and 12,000*l.* for the loss they sustained on selling a portion of their stock of the South Western Construction Company, although this loss was only a book entry. He hoped that there was nothing much more of this character to go against them. Had it not been for the misfortunes which they had suffered during the depression of the past six years, their earnings last year would not only have enabled them to pay the full dividend of 6 per cent. on the preference shares, but also a dividend at the rate of 1 per cent. on the B shares. They were making gradual progress, and at the present time their undertaking was in a more flourishing condition than it had been in for the last seven years, although their progress had been made in spite of considerable disadvantages. In this country they were accustomed, whatever the net results were, to see a constant increase, year by year, in the gross receipts of their railways, but as regarded their own undertaking it was an unpleasant fact that, although they did better last year than they had done for some years, their gross receipts were only 360,000*l.*, whereas seven years ago they were nearly 400,000*l.* He trusted that the moderate degree of prosperity which they had attained last year might continue. For the first three months of their current year there had been an increase of 30,000 in their receipts. If they could go on

as they were doing at present, there was no reason to despair of the future of their undertaking.

Mr. FRANCIS PAVY seconded the motion, which was agreed to.

### HIGHLAND RAILWAY.

The half-yearly general meeting was held at Inverness on Wednesday; Sir GEORGE M. GRANT presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said that at a capital cost of 5,000*l.* they had considerably improved the rolling stock and engines, but he knew very well that they had still a great deal to do in that direction. Referring to the revenue for the half-year, the chairman pointed out that for the first time the report gave the revenue receipts and expenditure in a tabulated form. The parcel traffic had decreased by 1,107*l.*, partly owing to the reduced rates for parcels, and mainly to the partial failure of the fish traffic. Never before had the Highland Railway carried in one half-year the present total of 1,162,656 passengers, which was an increase over the corresponding half-year of 39,399. There was also a satisfactory increase in the number of season-tickets, and he had very little doubt that the great increase in passengers was owing to the cheapening of the fares. The goods and mineral traffic had shown a satisfactory and steady growth, although not extensive; but the live stock trade had been almost stationary. The expenditure was largely increased owing to the great increase in the cost of the locomotive department, to 10 miles more railway, and to the coal strike in South Wales. The coalmasters in Scotland were not able to enter into contracts with the company, and they had to buy their coals from hand to mouth, which was a costly proceeding. They had now concluded contracts for the supply of coals for six months at a cheaper rate than the last contracts. After paying interest on the debentures and preference stock and placing 6,000*l.* to the suspense account to pay off the very heavy Parliamentary charges, they were left with a sum which enabled them to declare a dividend of 1 per cent. and to carry forward 21,000*l.* He had received letters from some shareholders complaining of the large amount carried forward, but some of the largest shareholders had said that by so doing the directors had pursued a wise policy. They might take it from him that the decision was not arrived at without full consideration. They had substantially followed the policy accepted by the shareholders twelve months ago of making such provision for the winter or lean half-year as would keep them in a safe financial position. The revenue had now to carry a greater burden, as they had more interest to pay on preference stock, and were committed in such a way that they were bound to make provision for the future. On the opening of the Aviemore line on November 1st there would probably be at the commencement a certain loss on their through fares, as it lessened the length of the line. They could not fix what the loss would be, but they wanted to be prepared if there was a loss. These were the reasons which had guided the directors in their decision to carry a good sum forward, and he hoped the meeting would see that they were right.

The Earl of MARCH seconded the resolution, which was agreed to.

### BARRANQUILLA RAILWAY AND PIER.

The annual general meeting was held on Wednesday at the offices of the company, 39, Coleman-street, E.C.; Mr. FREDERICK S. ISAAC presiding.

The report for the year ending June 30th, 1898, stated that the gross receipts were \$646,845, against \$571,932, an increase of \$74,913. The working expenses were \$256,272, against \$229,292, an increase of \$26,980, and the net profits were \$390,572, against \$342,639, an increase of \$47,933. The profit in sterling was 28,509*l.*, against 27,971*l.*, an increase of 538*l.* The per-centage of working expenses for the year was 39.62, as compared with 40.09 for the previous year. The directors recommended that a dividend be declared upon the shares of 3 per cent. for the year, and also proposed to invest a further sum of 3,000*l.* in Consols as a provision against contingencies. The capital account showed an expenditure of 325,416*l.* and receipts amounting to 300,000*l.*—viz., 200,000*l.* from shares and 100,000*l.* from 6 per cent. debenture stock.

The CHAIRMAN, in moving the adoption of the report and accounts, referred to the death of the general manager, Mr. Cisneros, and to the retirement from the board, through severe illness, of Mr. Tamburini, and continued:—It is gratifying to notice that the traffics of the line continue to steadily increase. It will be observed that we carried during the year under review 10,000 tons more than last year, and 15,000 tons more than in the preceding year. This gradual growth of traffics has led the directors to take a step which had been under their consideration for some time. Although the maintenance of the line has been carefully kept up, and for ten years the traffic has been worked without any serious accident whatever, it was nevertheless felt that the rails which were down at the time the line was taken over by this company, although well-adapted for the traffic at that period, were hardly of a sufficient weight to bear the considerably increased tonnage now being carried over the railway. It was also felt that it would be wise to incur a further expenditure in additional locomotives and cars, the directors being of opinion that the right policy in view of competition was to give shippers the very best and quickest service possible. The whole question was gone into very carefully with Mr. Cisneros when he was in England in November last, and reports and estimates obtained, with the result that the directors placed an order for sufficient new rails of 60lbs. weight and sleepers to cover about one-third of the line, also the materials for rebuilding certain of the wooden bridges with iron, together with two locomotives, six box and two passenger cars. All this material has now been delivered, and the greater part of the rails and sleepers relaid. The

balance of the renewals and improvements will be proceeded with as the funds of the company will admit. Part of the expenditure might have been fairly charged to capital account, but after careful consideration, and in view of the position of our capital account, which I explained somewhat fully at last year's meeting, also on the advice of our auditors, it was decided to bear the whole expense out of revenue, and you will observe that it has been so treated in the accounts before you. After meeting this expenditure, amounting nearly to 15,000*l.*, and the interest on the debenture debt, the directors feel justified in recommending a dividend of 3 per cent. upon the share capital, and the investment of a further 3,000*l.* in consols as a provision against contingencies. The directors feel confident that in undertaking these renewals and in building up the reserve fund they will meet with the approval of the shareholders, inasmuch as it is putting the company in a sound condition both as regards its property in Colombia and its financial position in London, and at the same time it places the debenture-holders' security in a very safe position, well guarded against unforeseen contingencies.

Mr. WILLIAM BURROWS seconded the motion, which was agreed to.

## Directors' Reports.

### SAN PAULO RAILWAY.

#### CAPITAL.

The original capital authorised and created by the company consists of 2,000,000*l.* in ordinary shares of 20*l.* each, fully paid-up; 750,000*l.* in 5½ per cent. and 250,000*l.* in 5 per cent. debenture stock; making a total share and debenture capital of 3,000,000*l.* The whole of this has been expended.

The new capital authorised in October, 1896, consists of 1,000,000*l.* in 5 per cent. preference shares of 10*l.* each; 1,000,000*l.* in new ordinary shares of 10*l.* each; and 500,000*l.* in 4 per cent. debenture stock; making the total new share and debenture capital 2,500,000*l.* Up to June 30th, 1898, 1,298,974*l.* of the new capital had been raised, 265,463*l.* had been received as premiums, and 67,757*l.* as interest—together, 1,632,194*l.* The expenditure to same date amounted to 1,646,529*l.*

#### REVENUE.

The receipts and expenditure on revenue account in the half-year ending June 30th were as follows:—

	1897.	1898.
Passengers, parcels, &c. ....	£53,959	£41,328
Merchandise and live stock .....	220,479	171,819
Miscellaneous receipts .....	5,538	5,144
<b>Total receipts.....</b>	<b>£279,976</b>	<b>£218,291</b>
<b>Expenditure .....</b>	<b>169,073</b>	<b>142,119</b>
<b>Net earnings .....</b>	<b>£110,903</b>	<b>£76,172</b>
<b>Balance from previous account .....</b>	<b>92,539</b>	<b>105,448</b>
<b>Total net revenue.....</b>	<b>£203,412</b>	<b>£181,620</b>
<b>Debiture interest .....</b>	<b>£26,875</b>	<b>£26,875</b>
<b>Dividend .....</b>	<b>*143,697</b>	<b>†122,538</b>
<b>Balance to next account .....</b>	<b>32,840</b>	<b>32,207</b>
<b>Total .....</b>	<b>£203,412</b>	<b>£181,620</b>

\* On the preference shares at the rate of 5 per cent. per annum, and on the ordinary and new ordinary shares at the rate of 6 per cent. for the half-year, together with a bonus of 4s. per share on the ordinary shares, and 4s. per share on the new ordinary shares (making 13 per cent. for the year). The dividend on the preference shares and on the new ordinary shares will be provided for out of the special fund referred to in the last report.

† On the preference shares at the rate of 5 per cent. per annum (less income-tax), and on the ordinary and new ordinary shares a dividend at the rate of 6 per cent. for the half-year, free of income-tax (making 11½ per cent. for the year). The dividend on the new ordinary shares will be in respect of the amounts from time to time paid up on these shares, and this dividend, as also that on the preference shares, will be provided out of the special fund as hitherto.

#### TRAFFIC, &c.

The number of passengers carried was 672,871 (against 694,738 in the corresponding half-year); the quantity of freight carried 546,220 metrical tons (against 568,950 tons); the train mileage 859,941 (against 861,115); the length of line operated 86½ miles (in each half-year); the ratio of expenses to receipts was 62.53 per cent. (against 54.71 per cent.) The report states:—

"The receipts for the past half-year amounted to Rs.8,207,215, being a decrease as compared with those for the corresponding period of 1897 of Rs.282,097, attributable chiefly to the falling off in imports. The working expenses were Rs.5,131,933, or 62 per cent. of the gross receipts, and the net revenue was Rs.3,075,282, which, at the several rates of exchange at which the remittances for the half-year were made, amounts to 81,731*l.* The average rate of exchange for the half-year was 6.3784*d.* The superintendent anticipates that the receipts for the current year will be about the average.

"The directors regret that they are on the present occasion unable to report as usual that the traffic had been conducted with safety during the half-year. On April 19th an accident occurred on the third section, resulting in the loss of three lives, which the directors deplore. Also the traffic was interrupted for six days, owing to a landslip on the Serra inclines.

"The projected extensions of the various railways have been practically suspended, but the Santos Harbour Improvements Company are still carrying out further extensions of the quays.

"Satisfactory progress continues to be made with the new works. On the first section from Santos to Kil. 16.400 the two large bridges have been completed, and the rails laid for practically the whole distance. On

the second section the tunnels, masonry, and earthworks have made good progress. On the third section the bridgework is well advanced, and 26 kilometres of the permanent way laid. The building of the new intermediate stations has also made good progress. On the fourth section the earthworks are practically completed, and the laying of the permanent way has been continued; also the engineer anticipates that the Belem tunnel will be finished by the end of the year. During the month of June the number of men employed directly in connection with the new works was 6,232."

### CENTRAL ARGENTINE RAILWAY.

An interim report issued by this company gives the following approximate summary of the working of the line for the six months ending June 30th:—

	1897.	1898.
Passenger traffic .....	£125,131	£138,371
Goods traffic .....	242,256	342,563
Parcels and luggage .....	10,244	12,337
Miscellaneous .....	20,546	37,187
<b>Total receipts .....</b>	<b>£398,177</b>	<b>£530,458</b>
<b>Total expenses .....</b>	<b>226,582</b>	<b>249,186</b>
<b>Net earnings .....</b>	<b>£171,595</b>	<b>£281,272</b>

The gross receipts show an increase of 132,281*l.*, the expenses an increase of 22,604*l.*, and the net receipts an increase of 109,677*l.*

The current value of the paper dollar was 17*38d.* on December 31st, 1897, compared with 17*13d.* on June 30th, 1898. The balance to the credit of the exchange suspense account is thus reduced from 17,233*l.*, at which it stood on December 31st, 1897, to 14,044*l.*

The net revenue account to June 30th, 1898, was approximately as follows:—Balance brought forward from 1897, 10,158*l.*; net receipts for the half-year as above, 281,272*l.*; interest on investments, general interest, registration fees, &c., 2,627*l.*—together, 294,057*l.*. Deducting interest on debenture stock, 26,100*l.*; Buenos Ayres Northern section rent, 24,059*l.*; Buenos Ayres Western section annuity, 45,394*l.*; income-tax, 2,822*l.*; general interest, 1,142*l.*; stamps on bills, 132*l.*; together, 100,549*l.*; there remained a net balance of 193,507*l.*. Out of the above balance of 193,507*l.*, the directors on the 6th inst. declared an interim dividend for the six months ending June 30th, 1898, at the rate of 3½ per cent. per annum, free of income-tax, on the paid-up capital of the company, absorbing 117,515*l.*, leaving a balance of 75,992*l.* to be carried forward.

### TRAFFIC, &c.

The number of passengers carried in the half-year was 1,705,033 (against 1,826,457 in the corresponding half of 1897); the quantity of freight carried 708,376 tons (against 648,961 tons); the train miles run 980,736 (against 978,683); the receipts per train mile, 10*s.* 9½*d.* (against 8*s.* 1½*d.*); expenses per train mile, 5*s.* 1*d.* (against 4*s.* 7½*d.*); net profit per train mile, 5*s.* 8½*d.* (against 3*s.* 6*d.*); length of line worked, 845 miles (against 790 miles); the ratio of working expenses to receipts, 46·98 per cent. (against 56·90 per cent.). The report states:—

"The Bill promoted by the Buenos Ayres Northern Railway Company, Limited, to authorise the purchase by the Central Company of the railway and undertaking of the Northern Company, referred to in the report submitted to the proprietors of this company on April 22nd, 1898, and subsequently approved by special resolution at extraordinary general meetings of the company, received the Royal Assent on July 25th, 1898.

"The directors regret to announce the death of Mr. Nicolas I. Bouwer, who had for thirteen years efficiently served the company as its representative in Buenos Ayres."

Mr. H. H. Loveday, the general manager, in his report dated September 7th, 1898, says:—"It is a source of great satisfaction to me to be able to send forward such a favourable report on the six months' working. I had hoped that our receipts would have been higher than they have been during the past two months, as there has been a good maize harvest, but owing to the low prices it is moving very slowly indeed. By the end of August, 1898, we had carried two-thirds of the maize crop, which was the heaviest that had been known; last year 90 per cent. had been carried in the same time; whereas this year it is calculated that we have not yet carried one-third. I hope by the time this reaches you that prices will have improved, and, if so, I am sure our receipts will be considerably higher than they are at the present time. So far, our prospects for the coming harvest are excellent. I am informed that there has been an increase of from 10 to 15 per cent. of land broken up for agriculture. The wheat is in splendid condition, although, I am sorry to say, the linseed in some districts is beginning to suffer for the want of rain. The locusts have not yet put in an appearance, and if they do, I am pleased to say that the Government appear to be prepared to deal as energetically with them this year as they did last."

### MEXICAN SOUTHERN RAILWAY.

The gross receipts for the year ending March 31st, 1898, amounted to 63,731*l.* (against 62,497*l.*); the expenses to 42,694*l.* (against 45,864*l.*); and the profit to 21,037*l.* (against 16,633*l.*). Adding balance brought forward 7,131*l.*, interest Mexican Government 6 per cent. silver bonds 45,177*l.*, interest 408*l.*, and transfer fees, &c., 77*l.*, the total net revenue was 73,829*l.*. Of this, interest on first debenture stock absorbed 24,000*l.*; interest and sinking fund on second debenture stock, 24,800*l.*; sundries, 598*l.*; and transfer to renewal and contingency fund, 5,000*l.*; leaving 19,431*l.* available for dividend. The directors recommend a dividend on the ordinary stock at the rate of 14 per cent. per annum, which will

absorb 12,500*l.*, and leave 6,931*l.* to be carried forward. Of the revenue receipts 39,760*l.* was derived from goods traffic, 19,812*l.* from passenger traffic, and 2,837*l.* from express. The revenue expenditure includes 2,657*l.* applied to special maintenance. The capital account shows an expenditure of 2,172,163*l.*, and receipts amounting to 2,200,000*l.*, as follows:—Ordinary stock, 1,000,000*l.*; 4 per cent. second debenture stock, 598,800*l.*; 4 per cent. first debenture stock, 600,000*l.*; redemption account, 1,200*l.*. The report states:—

"The year's working has resulted in an improvement in the revenue account to the extent of 4,403*l.*, made up of 1,234*l.* from increased receipts and 3,169*l.* from reduced working expenses. The gross receipts in Mexican currency show an increase of \$81,995; the comparative smallness of the increase in the sterling equivalent has therefore been caused by a further decline in the price of silver.

"The proceeds of the coupons of the \$8,000,000 silver bonds received as subvention from the Mexican Government have for the same reason amounted to the sum of 45,177*l.*, as compared with 49,704*l.*, the adjusted realisation for the previous year. The sinking fund for the redemption of the second mortgage debenture stock is now being applied, 1,200*l.* of this stock having been purchased and cancelled during the year under review.

"The directors have appointed an auditor in Mexico to examine periodically the company's accounts on that side independently of the local staff. Deloitte, Dever, Griffiths, and Co., for the year 1897-8, have so audited, as their certificate indicates. It is with deep regret that the directors have to record the decease of their valued colleague, the late Sir George Russell, Bart., M.P. Mr. Adrian Charles Chamier has been elected to a seat on the board on his retirement from the position of secretary, which he had filled from the time of the formation of the company. In his place, Mr. Thomas Linton, formerly secretary of the Severn and Wye and Severn Bridge Railway Company, has been appointed secretary."

### WEST FLANDERS RAILWAYS.

The report for the half-year ended June 30th states that the receipts from traffic amounted to 68,335*l.*, an increase of 2,819*l.*. The toll of 1,063*l.* paid by the Belgian Government for the running powers the company grants to it over the Deynze Thielt and Comines Ypres sections makes a total of 69,398*l.*. The expenses, amounting to 41,324*l.*, are heavier by 2,256*l.* than in the first half of 1897. When discussing the amount to be distributed as dividend the directors have had to consider the prospects of the whole year in the light of the rather disappointing traffics which have been announced during the last few months, and the necessity of appropriating suitable sums to renewal account and to the sinking fund for the redemption of capital. They have come to the conclusion that, in the best interests of the shareholders, they ought not to divide as much as last year, but revert to the rate paid in 1896—viz., 5*s.* 3*d.*, or 1·665 per ordinary share. This will allow an appropriation of 1,120*l.* to the renewal account and of 800*l.* to the sinking fund. The general revenue account shows a balance of 28,965*l.*, and, after providing for the payment of the preference coupon, for the interest and redemption of the four series of bonds, and the proposed dividend, a balance of 125*l.* will remain to be carried forward. Beyond the final touches to the alterations at Ypres Station, no works of any importance have been undertaken during the half-year, but the laying of steel rails has been carried on, and has brought up to 91 per cent. the proportion of steel rails on the company's system. The carriage of materials for the ports of Heyst and and Bruges has continued with few interruptions and calls for no particular comment.

### ASHBURY RAILWAY CARRIAGE AND IRON COMPANY, LIMITED.

The report for the year ended August 31st last states that the accounts for the year show a gross profit of 38,276*l.*, from which is deducted 2,996*l.* for interest paid on debentures and other loans, and 4,224*l.* for depreciation of buildings, machinery, tools, and wagons, leaving a net profit for the year of 31,056*l.*, to which is added the balance of 238*l.* brought forward from last year, making an available balance of 31,294*l.*. The directors recommend the payment of a dividend of 2*l.* 1*s.* on each old share and 6*s.* 6*d.* on each new share, being at the rate of 5 per cent. per annum, absorbing 11,592*l.*, writing off 5,000*l.* from plant and tools account, in addition to the ordinary depreciation, the placing of 10,000*l.* to the reserve fund, and carrying forward the balance of 4,702*l.*. As requested at the last annual meeting the directors have considered the question of making all the shares 1*l.* each—that is, substituting for each "old share" sixty shares of 1*l.* each, and for each "new share" eleven shares of 1*l.* each. They report that, to do this conveniently, it would be necessary to make a small call, say 1*l.* on each present old share, making the sixty shares 19*s.* paid instead of 18*s.* 8*d.*, and 7*s.* 6*d.* on each present new share, making the eleven shares 12*s.* 6*d.* paid instead of 11*s.* 9*d.* 11*d.*, as they would be otherwise. This is a matter for the decision of the shareholders.

Notice is given that all the 5 per cent. and 6 per cent. bonds issued by the Dutch Rhenish Railway Company will be redeemable at par on and after January 2nd, 1899. From that date the bonds will cease to bear interest. This notice is published in the name of the Minister of Finance, as representing the State of the Netherlands, which is bound to redeem the said bonds of the Dutch-Rhenish Railway Company, by virtue of an agreement ratified by the law of July 22nd, 1890 (Staatsblad No. 134).

## General News.

### RAILWAY MEN'S AGITATION.

Mr. Richard Bell, the general secretary of the Amalgamated Society of Railway Servants, on September 27th wrote to Mr. Ritchie, the President of the Board of Trade:—"I am instructed, by resolution, to appeal to you to institute a full inquiry, by special Commission, into specific cases of dismissal where evidence may be taken to substantiate the allegations made against the railway companies, as the committee are desirous, in the public interest, that the truth shall be ascertained, and believe that the only independent tribunal to which appeal can be made is the Board of Trade."

On the 20th inst. Sir Courtenay Boyle sent the following reply:—"Sir—I am directed by the Board of Trade to advert to your letter of the 23rd ult., addressed to the President, with further reference to the dismissal of certain members of the Amalgamated Society of Railway Servants, by the respective companies employing them. In reply I am to state that the Board of Trade have no power to appoint a Commission of inquiry such as is suggested, before which either of the parties would be bound to appear, nor does it seem to the Board that any useful purpose would be served by the appointment of such a Commission. The railway companies, to whom the Board have communicated the allegations, assert that in every case the men were dismissed for reasons entirely unconnected with the fact that they belonged to the Amalgamated Society, or formed part of a deputation to the directors. If, however, the society is prepared to submit evidence to the contrary effect the Board will make a further representation to the companies. I am to add that, while the Board would strongly deprecate the dismissal of any servant because he had formed part of a deputation such as is referred to, or because he belonged to a society, they must decline to take the responsibility of urging upon the companies the retention in their service of any person who, in their opinion, is not fit for the duties devolving upon him. To adopt any other course would be to transfer to the Board the responsibility which properly rests upon the companies of managing their great undertakings with proper regard to the convenience and safety of the public."

To this Mr. Bell has sent a reply, in which he says:—"I may state that there would be no difficulty in the way of our members appearing before a Commission of Inquiry and giving evidence (which has been obtained after careful investigation) to show that the real cause of their dismissal was chiefly owing to the representative position they occupied in placing before the directors and officials of their respective companies, on behalf of their fellow-workmen, their claims for the redress of grievances and improvements in the conditions of service. It would then be for the representatives of the railway companies against whom such allegations were made to produce evidence to prove their statements—i.e., that these men were dismissed for reasons entirely unconnected with the fact that they belonged to this society, or formed part of a deputation to the directors. If the companies have, as they state, other reasons which justified their actions, and state them to the Board of Trade so that we may be made acquainted with facts impossible to get from the present sources of our inquiries, and that these reasons prove to be legitimate, then the matter should be allowed to drop."

### PONTYPRIDD CAERPHILLY AND NEWPORT RAILWAY.

Mr. D. A. Thomas, M.P., in reply to an inquiry by the hon. member, has received the following letter from Sir Courtenay Boyle, secretary to the Board of Trade:—"I cannot find that we have received any notice from the Pontypridd Caerphilly and Newport Railway Company that after the end of this year they will cease running passenger trains on their system. I am afraid that if we had received such a notice we should have no power to take any action in regard to it, though this is not free from doubt, but I have very little doubt that having regard to the decision of the Railway Commissioners in the case of 'The Wensford Local Board v. the Cheshire Lines Committee' (Queen's Bench Division, vol. xiv., p. 456, 1896), that the Commissioners would have jurisdiction to hear and determine a complaint of the refusal of reasonable facilities if such an one was made to them. Mr. Justice Wills, in the case I have referred to, said:—"I am, however, clearly of opinion that under section 2 of the Railway and Canal Traffic Act, 1854, it is no longer competent for a railway company which has undertaken a particular description of traffic to deny the jurisdiction of the court to take into consideration the legality of its conduct in respect of that kind of traffic upon some particular branch of its line." What the decision would be upon an application, of course, it is impossible for me

to say, but subject to any legal advice which you can get I am disposed at the moment to consider that the best way of challenging the action of the railway company, if it be what you describe, is to make complaint to the Railway Commissioners."

### BRECON AND MERTHYR RAILWAY SHARES.

A correspondent writes:—"I have noticed recently that Brecon and Merthyr Railway ordinary stock has risen to 10l. per cent., and changed hands several times at this price. Now, do those investors or speculators who give this price know any of the facts in connection with the capital of this company? I fear not, or they would not, to my mind, give such an absurd figure for ordinary stock which cannot possibly hope to get the smallest fraction of dividend for very, very many years to come. If this company is about to be absorbed by any substantial and bigger undertaking, then there is just the possibility of holders getting 1l. or even 2l. over the present price; but how far off is this time? To my mind, it is extremely remote. For the guidance of those who—shall I say?—are bold (or stupid) enough to buy at the present price, allow me to give a few figures, according to last half-year's balance-sheet. After 346,673l. and 530,097l. A and B debenture stocks there rank the following, and opposite I have put the amount of interest required to pay the same:—"

	5 per cent. preference		Issued.	Interest.
5	"	1861	£62,550	... £3,127
5	"	1862	111,950	... 5,597
5	"	1863	50,000	... 2,500
5	"	July 28th, 1863	150,000	... 7,500
5	"	1864	11,000	... 550
5	"	July 29th, 1864	200,000	... 10,000
5	"	1865	221,478	... 11,073
				£40,347

"Now, after all this comes the 264,360l. of ordinary stock, so before these unfortunate shareholders and present buyers can expect to get one farthing dividend a net profit of some 40,000l. has to be earned. Referring to the takings of the first half of 1897—I leave out the first half of this year owing to the strike—I find the gross receipts were 41,070l. and the gross expenditure 23,778l., leaving 17,292l. as the balance of revenue, whilst it takes just over 17,500l. each half-year to pay interest on debentures, without even allowing for the fact that there are arrears on the B debentures at present. It is true that two further pits will be sending coal over the line shortly, but it will take a lot of twos to bring in 40,000l. net profit. No doubt the present price is due to the sentiment of the relationship of this company with the Barry and, as aforesaid, to new pits opening up, but intending purchasers had better consider the above facts before purchasing and waking up some morning to find their purchases are unsaleable at half present prices."

### ALAGOAS RAILWAY—NO INTERIM DIVIDEND.

The subjoined circular, dated October 25th, has been addressed by the secretary of this company to the shareholders:—"I am instructed to inform you that the Brazilian Government having, without the concurrence of this company, decided to substitute, during a period of three years from July 1st last 5 per cent. funding bonds at their nominal value in lieu of cash, in payment of the sterling guaranteed interest, the directors deemed it desirable in the interests of the company to protest officially against this breach of contract, holding the Government liable for any loss therefrom. The amount due on July 1st, on account of the sterling guarantee on the main line capital was 17,927l., and the company received bonds to that extent. These bonds realised 13,535l., or only 1,475l. in excess of the half-year's interest on the 6 per cent. debentures and 5 per cent debenture stock. The result of this action of the Government was a reduction of 4,392l. in the company's revenue for the half-year, and the directors therefore regret being unable on this occasion to distribute an interim dividend on the share capital of the company. The directors avail themselves of this opportunity to report to the shareholders that the working of the line in Brazil for the six months ending June 30th last showed a surplus of Rs.102:199 \$195, which amount was paid as heretofore into the Government Treasury."

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected COCOA, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homœopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months	20 7 0
Six Months	0 13 0
Twelve Months	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Oct. 31—Ashbury Railway Carriage and Iron Company (Annual), Manchester.
- Oct. 31—Mexican Southern Railway (Annual), Winchester-house, at 12.30.
- Nov. 2—West Flanders Railway (Half-yearly), 10, Moorgate-street, E.C., at 2.
- Nov. 4—Jamaica Railway (First Mortgage Bondholders), Winchester-house, at 12.30.
- Nov. 4—San Paulo Railway (Half-yearly), City Terminus Hotel, at 1.
- Nov. 11—Manitoba and North Western Railway (Bondholders), City Terminus Hotel, at 12.
- Nov. 17—Waterford and Central Ireland Railway (Half-yearly), Dublin, at 3.

Notice is given to the holders of 536,000l. 3½ per cent. debentures of the Bombay Baroda and Central India Railway Company, which expire on December 1st, that the directors, with the sanction of the Secretary of State for India in Council, are prepared to renew such debentures for a further term of seven years at the rate of 3 per cent. per annum interest, provided that holders intimate their acceptance of this offer and deposit their debentures at the company's office on or before November 22nd proximo, the coupons for interest due in December being first detached.

## THE MID-AFRICAN TRADE ROUTES.

It is significant of the age that the international rivalries, and, as a consequence, the international imbroglios of the present decade, have all hinged upon the desire to obtain control of the routes by which alone the territories as yet unincluded in the spheres of influence of European nations can be brought within the area of trade and civilisation. The varying conditions with which the nations hedge about the use of the routes when once acquired have intensified the struggle, and have given to it an importance which on a purely territorial basis it would not perhaps possess. Every route controlled by a power whose system it is to restrict by tariff the free course of commercial enterprise, is an outlet the less to the products of sister nations. The effect, in short, is to reserve for a minority what may be fairly claimed as the heritage of the civilised world as a whole. We, of all nations, are surely entitled to approach the subject without imputation of unworthy and selfish motives, for where the British flag flies their trade is free and open to all on even terms. It is thus that the control of trade routes, and consequentially the perfecting of these to stimulate the trade which passes over them, has become the leading feature in the foreign policy of Europe. "Empire-making by railway," the movement has been called. The phrase is elliptic, but we will not quarrel with it. Still it should not be forgotten that empire making by waterway, or even by camel and caravan route, is often the necessary precursor. This then is the true basis of what will be known to history as the Fashoda incident. Into the political arguments, the merits and demerits of the rival claims as a source of the present tension, we have no intention of entering. But apart from these, what can be discussed as a matter of genuine technical trade importance is the position of Fashoda and the surrounding country as the converging point for a vast system of potential trade. We are not among those who are dazzled by the conception of a transcontinental railway from the Cape to Cairo. Mr. Rhodes is too shrewd a man of business to duplicate for a thousand miles the finest natural waterway in the world by a railway which for many a long year could not earn enough to pay its coal bill. Let us not be misunderstood. What must be held and kept open to trade is the route. The railway will come when wanted, but its inception, premature as it is, is one of those master strokes of tactics by which Mr. Rhodes has known how to play upon the imagination of a nation which prides itself upon its freedom from imaginativeness. It is the old story of getting what you want by asking for twice what you expect to get. Berber to Suakin, for the trade of Dongola, Darfur, and Kordofan; Uganda to the Indian Ocean, to serve the Equatorial provinces; and the Nile from Khartoum to the Lakes for a gathering and a connecting link—these are the natural trade routes, across which no barrier of protective tariffs can be tolerated. But Fashoda and the Bahr el Gazelle are capable of more harm than this. The Bahr province is thrust like a mighty wedge between the Nile Valley and the great Congo Free State—a territory four times the size of France, and preserved for ever to free trade under international agreement. The natural outlet of this great country is towards the Atlantic by means of the Congo River, the cataracts of which, between Matadi and Stanley Pool, have this year been bridged by railway in the same way as Egypt has

avoided the bad places in the Nile between Wady Halfa and Berber. The upper portions of the Congo State are, however, nearer to the Indian Ocean than to the Atlantic, and the closing of the outlet in this direction by an intervening block of protectionist country would be a matter for very general regret. The so-called French Congo, lying, as this does, between the Ubanghi and Lake Chad, has at all times the free outlets of Nile and Congo, in addition to its own territorial access to the west. To claim as a natural extension the Bahr el Gazelle province would seem therefore a pretension incapable of being based on any application of the theory of equality of opportunity. The last aspect of Fashoda on a trade route footing is in many ways the most significant. We refer to its undoubted selection some years ago by the French as the terminus of the Abyssinian railway. Very little has been heard of this project, but from what is known it seems that the line, starting from Jiboutil on the Red Sea, was to proceed *via* Harrar, on the Somali hinterland, to Entoto, and thence to Kaffa on the Nile, south of Fashoda. Now this is an absolutely artificial route. It is doubtful if the line has ever been surveyed, and certainly the construction of not more than 20 miles in two years, which is about the present state of affairs, would seem to imply that moral effect has been aimed at rather than material business. It has been said that this work, ostensibly that of a private company, is being financed by the Orleans Railway of France, which would, of course, mean the French Government. It is not, however, likely that much more will now be heard of it. It is sincerely to be hoped that the whole controversy will settle itself in so sensible a manner.

### MR. BARROW AND THE BUENOS AYRES GREAT SOUTHERN.

Mr. Frank Parish's observations at last week's meeting of the Buenos Ayres Great Southern Railway Company in reference to the retirement of Mr. Samuel Barrow from the general managership of that line have excited a good deal of comment in Anglo-Spanish-American railway circles; indeed, we may go so far as to say that they have been received with general surprise and regret. As the readers of this journal are aware, the Leopoldina Railway Company, following a practice common with leading railway companies in this country and abroad, recently approached Mr. Barrow with an offer of the managership of their line on terms which were alike a compliment to his reputation as a railway manager, and a temptation to him, as a professional man, to forsake one lucrative post for another still more so. Of the wisdom of the step from the standpoint of the Leopoldina Railway Company—an undertaking with a capital of 7 or 8 millions sterling and a system of over 1,300 miles—there can be no question, when we bear in mind that for years this great concern has been languishing solely through lack of able management. That Mr. Barrow accepted the offer of the Leopoldina Railway Company need occasion no surprise, for, besides the inducements to which we have alluded was the compliment implied in the offer of a seat on the board—an honour to which any gentleman similarly placed could not be insensible—and beyond this the possibility of further kudos to be derived from rehabilitating a struggling undertaking, and thus adding to his already brilliant record as a railway manager. Now most of us, knowing all the circumstances, would have thought that the first to offer their congratulations to Mr. Barrow would have been the directors of the Buenos Ayres Great Southern Railway. The yeoman service rendered by him to that company is too widely known to need recounting here—indeed, it is acknowledged by Mr.

Parish himself, though in a lukewarm fashion, when he says—"He has placed us in such a position, by his organisation of our staff and everything, that his absence will not be felt so much as it otherwise would have been." But what do we see? Mr. Barrow's actions—alike legitimate and honourable—are made the subject of satirical and ungracious remarks in public meeting by the chairman of the company, and before the shareholders of the company which he is admitted to have served so well. It was surely out of place for Mr. Parish to criticise the policy of the Leopoldina Company, or to express an opinion as to whether the emoluments they were offering to their managing director were reasonable or the reverse. Nor need the legitimate ambition of a public man to attain the highest honours in his profession have been made the subject of a sneer. To say that no man is indispensable, as Mr. Parish went out of his way to do, is true enough, but there are occasions when it is not fitting to remind us of the fact, and none could have been less so than the Buenos Ayres Great Southern meeting last week, when compliments were passing on a wholesale scale, and past services were being recognised in a fashion no less lavish than they were well merited. "No doubt," said Mr. Parish, "Mr. Barrow felt that the Great Southern was his oldest and best friend, but there is no man's place that cannot be filled, and we shall certainly sustain no prejudice from the loss of him." How different all this to the eulogies which have been showered upon Mr. Barrow by Mr. Parish and his colleagues year after year. Only six months ago we were reminded by the honoured chairman of the Buenos Ayres Great Southern Company that "the constantly increasing nature of our business demands excessive work from Mr. Barrow and his officers, and never before in the history of this company has he been so heavily taxed as in the period under review," and in addressing the shareholders on October 21st, 1897, Mr. Parish said, "Mr. Barrow is also a man so well known to you that no praise on my part could increase the feeling you must have towards him from the proofs he year by year shows us of his good management. He is a man full of ambition, resolution, and thoroughly trained for railway work, and no amount of business will frighten him. I look upon him as our little Napoleon in the River Plate." What was true of Mr. Barrow twelve months ago is equally true of him to-day, and we feel quite sure that upon reflection Mr. Parish will be the first to acknowledge this, and to admit that his valedictory references to that gentleman on the 22nd inst. were as unjust as they were unkind.

### THE AMERICAN POOLING DECISION.

The Supreme Court of the United States has decided against the legality of the operations of the Joint Traffic Association under the Anti-Trust Law, and the Association will consequently cease to exist. After the similar decision in the Trans-Missouri case last year, opinions have been fairly evenly divided as to the upshot of the more important case, and the result has been, somewhat paradoxically perhaps, to strengthen the favourable opinion in America as to the future of railroad business. To follow this view, it is necessary to bear in mind that at no time since its initiation some four years ago has the Association ever really fulfilled its objects. Though a large number of roads nominally bound themselves to observe the rulings of their committee, defalcations were frequent, and the effect of such rate-cutting as prevailed was rendered more serious by the greater insidiousness due to the increased secrecy of the proceedings. If we are to have war, let it at least be open and above board, has been the view of many a president and manager who from policy or from conscience—if the latter word may be used without absurdity—felt himself unable to follow

the practice of his neighbours. Physical influence was to some extent withdrawn without the counter-acting advantage of moral or of legal weight, and, as the tables we published some weeks ago showed, the steady decrease shown in the remuneration of the railways for work performed has not been in the least degree arrested, much less reversed. While, therefore, it is true to say that the door is now open wide to unbridled competition, the situation is not without the redeeming feature of hope that before long the evil may commence to react upon itself. Spasmodic efforts in local legislatures—the Foraker Bill in the New York State, for example—are now shown by the highest authority to be unconstitutional. What is to be done, therefore, must be done by Congress itself. While to any one who has watched the manner in which the very Constitution has been set at defiance by the great trusts it would seem no difficult matter for the railway magnates to impose their will upon the country. Yet it would not appear impossible to baffle any charge of inconsistency by regulating pooling under Governmental authority as a veritable means of upholding anti-trust legislation. It is notorious that the Standard Oil and other great corporations have obtained much of their wealth by means of differential treatment in the matter of railway rates, and have then used their power to vary these rates still further in their favour. If this is not opposed to the spirit and letter of the Anti-Trust Law we do not know what is. The Interstate Commerce Commission has for some time been trying to get the control of rates into its own hands. This has been widely opposed, since it has been not incorrectly said that power to regulate must almost necessarily resolve itself into efforts to lower rates under the plea of adjustment. At the same time, were the claim of local legislatures to influence rates within the limits of their states disposed of once and for all by Congress on a basis which would render impossible such cases as that of the Nebraska Law—upset though this was by the Supreme Court—then it is not inconceivable that the primary distinction between interstate and intrastate traffic being removed, a general commission would be welcomed as a controlling agency. We have said on a previous occasion that railway control should be based on national, and not on parochial, lines. In a country where personal and interested motives are freely applied to official action, such a maxim is the more necessary. But maxims and copybook headings generally have a knack of being forgotten in the rough-and-tumble of business. It is the duty of the supreme Government to see that those which affect the welfare of the country are hung upon large-sized notice-boards, and made to be obeyed.

### THE SAN PAULO RAILWAY.

This great “coffee railway” continues to show fairly satisfactory results; for though it has had many difficulties to contend with, it has up to the present managed to surmount them, thanks to its great natural advantages. Its principal business is the carriage of coffee from the interior down to the port of Santos. To do this it has to mount the “Serra,” but on the Atlantic side—the direction in which most of its traffic is carried—it simply has to let the vehicles run down by their own weight for some miles by means of stationary engines and wire ropes. Such difficulties as the company has had to contend with have mainly arisen in connection with the depreciation of currency earnings, which is the bugbear of so many railways in Central and South America; and it is not a little remarkable that, whilst other railways in Brazil are eking out a precarious existence by the assistance of a Government

guarantee (paid in depreciated scrip) the San Paulo was able to pay  $11\frac{1}{2}$  per cent. on its ordinary shares for its last financial year to June 30th without any guarantee whatever. In fact the guarantee was renounced in 1889 before the great fall in Brazilian exchange came about, and with the rapid fall in the sterling proceeds of the company's earnings the situation became rather precarious in 1892-3 when a dividend of only 5 per cent. was paid, against 15 per cent. in 1888-9. By the terms of a new arrangement with the Government in 1894 the company was authorised to make a general increase in its tariff of 50 per cent., and this increased the net profits in currency from Rs.4,020,236 in 1893-4 to Rs.10,760,642 in 1894-5. In 1896-7 this latter figure was slightly exceeded in spite of the fact that expenses rose to 47·93 per cent. compared with 38·75 per cent. in 1894-5. But owing to the further fall in exchange the 1897-8 result was not so good. Between 1894-5 and 1897-8 the gross receipts in currency rose by nearly Rs.3,800,000, but the net receipts even in currency have declined owing to the advance in expenses. Last half-year the average rate of remittance was 6·3784d. per milreis against 7·9026d. in the first half of 1897. It is this fall which practically accounts for the decline in the dividend from 13 per cent. paid in 1896-7 to  $11\frac{1}{2}$  per cent. now declared for 1897-8. Interest on the new capital provided for the doubling of the line is at present being paid out of premiums received thereon. This work is being carried out as provided by the company's existing arrangement with the Government, and has to be completed by January, 1900. The total capital authorised therefor is  $2\frac{1}{2}$  millions, thus increasing the total capital of the company to  $5\frac{1}{2}$  millions. At present only 1,299,000l. has been called up, and 1,646,500l. has been spent on the new works, including 67,757l. for interest during construction. The company are authorised, under the new arrangement with the Government, to increase their tariffs to such an extent as to yield 7 per cent. on the total authorised capital. By exercising this power the company, after meeting its debenture interest and preference dividends on both the old and new capital, should be able to maintain a minimum dividend of about 9 per cent. on their ordinary shares, both new and old. Though the capital which will eventually rank for dividend upon earnings will thus be nearly doubled, it will be seen that a substantial dividend is practically assured. Further, the advance in the Brazilian exchange to the present rate of  $8\frac{1}{2}$ d. per milreis, against the average last half-year of only  $6\frac{3}{4}$ d., will make a very material difference in the sterling amount realised from its current earnings.

### CURRENT TRAFFIC RECEIPTS.

Bearing in mind the large increases already recorded in 1895, 1896, and 1897, the further growth in gross receipts displayed by most of our railways this half-year is a very pleasing feature. It is true that the rate of increase is slackening and that to some extent the expansion shown is the natural result of additional mileage open; but in the circumstances the gross results taken by themselves must be regarded as gratifying evidence of the continued expansion of railway business. According to our weekly traffic figures the increase to date is barely  $2\frac{1}{4}$  per cent., whilst at the corresponding date last year an increase was shown of  $3\frac{1}{2}$  per cent. In the subjoined table we give the traffic results to date of the leading English and Scotch railway companies according to our usual method of comparing “estimates” with “estimates,” and not with the “adjusted” figures:—

Company.	No. of weeks.	Aggregate "estimated" traffic.	1897.	1898.
Great Central .....	15	£697,867	£738,926	
Great Eastern .....	15	1,511,893	1,560,346	
Great Northern .....	16	1,678,497	1,769,240	
Great Western .....	15	3,151,790	3,045,060	
Hull and Barnsley .....	15	111,394	134,901	
Lancashire and Yorkshire .....	15	1,567,150	1,643,912	
London and North Western .....	15	3,908,331	4,005,508	
London and South Western .....	15	1,308,711	1,360,475	
London Brighton and S. Coast .....	16	984,457	1,021,755	
London Chatham and Dover .....	15	547,416	553,366	
Metropolitan .....	16	241,294	240,702	
Metropolitan District .....	15	113,251	105,399	
Midland .....	16	3,179,641	3,291,010	
North Eastern .....	15	2,479,887	2,626,104	
North Stafford .....	15	239,899	246,345	
South Eastern .....	16	660,737	686,918	
Taff Vale .....	16	239,752	140,771	
Caledonian .....	11	871,769	910,246	
Glasgow and South Western .....	11	365,074	378,497	
Great North of Scotland .....	11	108,026	112,431	
Highland .....	7	79,758	83,806	
North British .....	11	892,114	925,451	

In our next table we show how the above figures work out as compared with the companies' method of comparing estimated with adjusted figures:—

Company.	Increase or decrease comparing "estimates" with "estimates."	Increase or decrease as published.
Great Central .....	+£41,059	+£26,781
Great Eastern .....	+ 48,453	+ 35,203
Great Northern .....	+ 90,743	+ 59,210
Great Western .....	-106,730	-146,390
Hull and Barnsley .....	+ 23,507	+ 21,793
Lancashire and Yorkshire .....	+ 76,762	+ 68,426
London and North Western .....	+ 97,177	+ 83,165
London and South Western .....	+ 51,764	+ 58,414
London Brighton & South Coast .....	+ 37,298	+ 29,648
London Chatham and Dover .....	+ 5,950	+ 7,816
Metropolitan .....	- 592	- 1,854
Metropolitan District .....	- 7,852	- 7,800
Midland .....	+111,369	+ 58,967
North Eastern .....	+146,217	+135,860
North Staffordshire .....	+ 6,446	+ 4,010
South Eastern .....	+ 26,181	+ 32,699
Taff Vale .....	- 98,981	-103,735
Caledonian .....	+ 38,477	+ 26,933
Glasgow and South Western .....	+ 13,423	+ 12,466
Great North of Scotland .....	+ 4,405	+ 2,348
Highland .....	+ 3,548	+ 1,288
North British .....	+ 33,337	+ 30,933

Except the Great Western and Taff Vale companies, whose aggregate results were adversely affected by the South Wales coal strike, and the "underground" lines, all the above companies show good results—the Great Northern, Midland, North Eastern, and Lancashire and Yorkshire exceptionally so. It should be noted, however, that the Great Northern has an increased mileage open of 80 miles and the North Eastern an addition to its system of 20 $\frac{3}{4}$  miles. Of the Southern lines the South Western again shows the best result, though here again an additional 12 miles of line comes into play. This company's receipts for the last few weeks have included those of the Waterloo and City Electric Railway, worked by the South Western. It is a pity that these figures are not returned separately, as it is impossible to discover from the existing method of publication what the earnings of the new line are. The Great Central traffic publication does not appear to include the earnings from the partial opening of its London line. The public will, no doubt, appreciate its modesty in not disclosing these results, and the Extension stock-holders seem to appreciate it too, for, in spite of the assurance that the earnings from the new line will be earmarked on their account, the Extension stocks have fallen lately to new depths of depreciation. Bearing in mind that the figures of the Scotch companies cover a shorter period than the English, their gross results are very satisfactory. The Caledonian has an addition of 7 miles, the Highland one of 10 $\frac{3}{4}$  miles, and the North British one of 15 miles. However,

it is much too early to attempt to diagnose net results for the current half-year. We can only repeat our belief, expressed on former occasions, that they will be much less satisfactory than are the gross receipts.—[The above article was unavoidably crowded out of our last issue. The broad results and the arguments are not, however, affected by the returns which have been published since.]

## THE MEXICAN SOUTHERN.

Just a year ago—on October 23rd, 1897—we reviewed the first annual report of the Mexican Southern Railway Company following upon the rearrangement of the capital account. By this step it may be remembered the capital was reduced from 3,200,000*l.* to 2,200,000*l.*, the old ordinary stock being nearly wiped away altogether. The first consequence of this reduction was that a dividend of 1 per cent. was paid on the new ordinary stock for 1896-7. For the past year a still better result is shown, and a dividend of 1 $\frac{1}{4}$  per cent. on the ordinary stock is to be paid, whilst 5,000*l.*—equal to a further  $\frac{1}{2}$  per cent.—is being carried to a renewal and contingency fund. The bulk of the company's net profit is still derived from the interest on \$8,000,000 of Mexican Government silver bonds received as subsidy. Owing to adverse exchange the income thus earned in 1897-8 was 45,177*l.*, against 49,708*l.* in 1896-7. On the other hand, the profit from the operation of the railway has increased. For the past four years it has been as follows:—

Year.	Amount of net profit from railway.
1894-5 .....	£5,243
1895-6 .....	7,886
1896-7 .....	16,633
1897-8 .....	21,037

The steady increase shown above in the face of a falling exchange is highly encouraging. During the last fiscal year there was actually an increase in currency earnings of nearly \$82,000. In sterling, however, only a slight increase in gross receipts is to be noted amounting to 1,235*l.*, the remainder of the net improvement shown above being attributable to a reduction in expenses. In 1896-7 the ratio of expenses was 73 per cent. Last year it was reduced to only 66 per cent., as we foreshadowed last year would probably be the case. Since March 31st the gross earnings of the company in Mexican currency have been declining somewhat. Against this, however, may be set the improvement in the exchange which will favourably affect not only the gross receipts when turned into sterling, but should also increase the income yielded by the company's holding of Mexican Government Bonds.

## RAILWAY CAPITAL.

In its customary half-yearly review of railway capital expenditure, the *Financial Times* of Saturday last showed that the total capital outlay for the first half of this year was 7,096,303*l.*, against 5,758,510*l.* for the first half of 1897. This was the actual expenditure, excluding nominal additions, of the twenty-one leading English and Scotch railways. Our readers have been prepared to see the large increase in capital disbursements, and it will not surprise them to learn that an equally large increase is foreshadowed in the estimates of expenditure for the current half-year. In fact, taking the actual outlay already incurred in the first half of 1898, and the projected expenditure for the current period, we get a total of rather over 15 millions as the aggregate outlay for the year of these twenty-one companies. Now, as we showed last week, the outlay of *real* capital incurred by the *whole* of our railways in 1897 was only 14.1 millions—a sum considerably under the actual and prospective outlay of only

twenty-one companies for 1898. This fact is eloquent testimony to the prodigality of present capital outlay, a feature which is already telling its tale on railway dividends and the prices of the stocks. Bold and costly schemes for new lines and extensions have been entered upon with a light heart on the strength of the comparative prosperity of the last two or three years. The result has been seen in a greater frequency of new capital issues of late, and one further result will probably be to add largely to the weight of dead and unproductive capital outlay at a time when the companies will certainly not be in a particularly favourable position to meet new interest and dividend charges. Gross results are still showing elasticity, though net results last half-year showed a slight decline. The adverse effect upon dividends of this loss of profits is enhanced by reason of the new capital burdens now being incurred on a growing scale, as the above figures show. New capital expenditure, when upon entirely new lines, or upon the extension and improvement of existing lines, of necessity takes a long time before it becomes remunerative. Further, even under the most promising circumstances, capital spent upon railway enterprises is not so profitable as it used to be, and why outlay of this class is being so freely indulged in just now we fail to see. It certainly is not in the interests of the shareholders that it should be on so lavish a scale as has lately been the case.

### PASSING NOTES.

The traffic receipts for the week ending October 23rd, on thirty-three of the principal lines of the United Kingdom amounted to 1,714,392*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,685,252*l.*, with 19,034½ miles open. There was thus an increase of 29,140*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for seventeen weeks to date amounted on the same thirty-three lines to 31,382,721*l.*, in comparison with 30,680,863*l.* for the corresponding period last year; increase, 701,858*l.*

The inquest on the bodies of six of the victims of the accident on the Great Central Railway at Wrawby Junction was concluded yesterday at Barnetby. The jury returned the following verdict:—"We find that the deceased died from injuries received owing to a train in which they were travelling colliding with a derailed wagon forming part of, and the timber projecting from, a goods train, but whether such collision was caused accidentally or otherwise there is not sufficient evidence to show; and the jury further say that they unanimously and emphatically condemn the practice of shunting trains on lines parallel and close to the line on which an express is signalled to pass. The jury wish also to commend the admirable promptitude of Signalman Kidney, Driver Hulse, and Fireman Osborne in their efforts to avert disaster."

The Isle of Man Harbour Commissioners have published figures showing the full passenger traffic between Liverpool, Fleetwood, &c., and Douglas and other ports. At the end of August there was a decrease at Douglas of 11,123 as compared with last year. September was, however, phenomenally good, 44,090 persons arriving as against 37,000 last year. The total arrivals for the five months ending September this year were 310,357, as compared with 314,667 last year. The decrease on the season is therefore 4,310. Even this decrease is more apparent than real, because it mainly took place on daily excursion traffic between Blackpool and Douglas. In Ramsey the total arrivals for the season were 13,381, as against 12,928 last year, while at Peel there was a decrease of 333.

At Merthyr, on Saturday, the British Electric Traction Company brought before the Light Railway Commissioners the scheme for providing light railways connecting Merthyr, Dowlais, and Cefn. The Merthyr District Council and other local authorities supported the scheme conditionally, but opposition was offered by the Dowlais Iron Company, the Glamorganshire

and Breconshire County Councils, and a local omnibus proprietor. The Commissioners announced that they would be prepared to recommend to the Board of Trade that an order be issued subject to certain suggested minor amendments indicated.

The Highland Railway Company announces an issue of 150,000*l.* 3½ per cent. preference stock at par, being a portion of 450,000*l.* sanctioned in September last. The new issue is to be allotted to existing holders of 200*l.* and upwards of stock, but the circular states that smaller holders will receive new stock should they apply, provided the full allotments are not taken up under the above arrangement. The stock will bear dividend from the 1st prox., and will rank after the existing preference capital.

At a meeting of Taff Vale Railway servants, held on Sunday last, it was resolved:—"That this mass meeting of Taff Vale Railway men regret that the management has failed to appreciate the resolution adopted at our meeting held on the 2nd inst., and deprecate the violation of the 1890 agreement in face of the fact that the miners' strike was concluded on September 1st. We request that a copy of this resolution be forwarded to the chairman and directors and to Mr. Beasley."

In the published accounts of the railway accident at Wrawby Junction there was a statement to the effect that a railway insurance ticket for 1,000*l.* had been found among the wreckage on the line. The Railway Passengers' Assurance Company states that the ownership of the derelict ticket has been traced, and that the sum assured will be paid in due course to the family of the deceased.

The Bolton Corporation has accepted tenders for the construction of the proposed electric tramways. The scheme is expected to cost in its entirety nearly a quarter of a million sterling. The overhead trolley system has been decided upon, and seventy cars will be utilised, giving seven minutes' service on the various routes, which will embrace 30 miles of single track.

The works of the London and North Western Railway Company at Crewe, giving employment to nearly 8,000 men, are busier than they have been for years. For some time past many of the employes have been on overtime to the extent of several hours a day, but now instructions are given that in several departments the men must work till ten o'clock at night.

The *Bankers' Magazine* gives the aggregate value of 325 representative securities on the 20th inst. as 3,196,422,000, compared with 3,227,190,000 a month earlier, being a fall of 30,768,000*l.* The explanation is to be found in dearer money, the rise in the Bank rate, the monetary stringency in Germany, and the unsettled condition of foreign politics.

One hears a lot of nonsense talked just now about the dangers of suffocation in the event of a breakdown on the Waterloo and City Electric Railway. If the conditions are as certain cranks would have us believe, how comes it that a small army of workmen got on very comfortably in the tunnels during construction operations?

The North Staffordshire Railway Company propose applying for an Act of Parliament next session for powers to make a railway from the North Staffordshire line at Norton-bridge to Eccleshall and thence on to Gnosall, where it would connect with the London and North Western and Shropshire Union Line.

The Bideford Town Council have unanimously resolved to oppose the proposal to connect the Bideford and Westward Ho! line with the London and South Western line, the other side of the river, by a bridge, above the old Bideford Bridge.

We are pleased to have to announce that Mr. Godfrey Knight, assistant-secretary of the London and South Western Railway Company, has been appointed secretary, in succession to Mr. Macaulay, who has joined the board.

Mr. Richard Bell, the general secretary of the Amalgamated Society of Railway Servants, has declined to contest Rotherham

in the interests of labour generally and of the Railway Servants' Society in particular.

Shareholders in South Wales railway companies will learn with disgust that there is every probability of the Parliamentary struggle which has been going on for so many years being renewed next session, and that a host of fresh Bills are to be promoted.

At the half-yearly meeting of the Kilsyth and Bonnybridge Railway Company, held on Wednesday, a dividend was declared at the rate of  $1\frac{1}{2}$  per cent. per annum.

The completing portion of the Highland Company's line to Inverness has been passed by the Board of Trade and its opening is fixed for Tuesday next.

Letters of allotment to applicants for shares in the Knott End Railway Company have been posted. We are sorry for the poor allottees.

The directors of the Sidmouth Railway Company recommend a dividend for the past half-year at the rate of 2 per cent. per annum.

The death is announced of Mr. Hutton Riddell, banker, of Newark, chairman of the Trent Navigation Company.

Sir Allen Lanyon Sarle has been elected a director of the Eagle Insurance Company.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 4th prox.; the fortnightly settlement in other Securities commences on the 9th prox.*

### CITY, FRIDAY EVENING.

Although a further rise in the Bank Rate was talked of early in the week as a likely event, the meeting of the Bank directors yesterday passed off without that step being taken, and the MONEY MARKET in consequence, though still very firm, is much more steady. In the outside market five three-months' bills are quoted  $3\frac{1}{2}$  to 4 per cent., and the Bank of England is consequently getting plenty of the business. As regards loans, the rates range from  $3\frac{1}{2}$  to 4 per cent., according to duration. The Bank Return, issued yesterday, shows that the imports of gold, together with the return of coin and notes from circulation, have added 606,000*l.* to the reserve, which now stands at 21,238,000*l.*; its proportion to the current liabilities, however, is  $\frac{2}{3}$  lower at 48*per cent.* A decrease of 905,000*l.* in the Government securities may be accounted for partly by the repayment of deficiency advances; the net decrease in the public deposits only amounts to 600,000*l.* The effects of market borrowings are shown in an increase of 1,834,000*l.* in the "other securities," mainly owing to these operations; and the private deposits are 2,124,000*l.* higher on balance. Since the return was made up 221,000*l.* on balance has gone into the Bank.

Silver bars are now quoted at 28*d.* per oz., being  $\frac{1}{4}$ *d.* higher on the week. A year ago the price was 27*½d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 31-32*d.*; Calcutta, 1*s.* 3 31-32*d.*; Hong Kong, 1*s.* 11 3-16*d.*; Shanghai, 2*s.* 8*½d.*; Singapore, 1*s.* 11 11-16*d.*

The premium on gold at Buenos Ayres has fallen during the week from 149-30 to 146-00 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 7-35*d.* A year ago the premium was 183 per cent., and the value of the paper dollar 1*s.* 4-83*d.*

The Valparaiso 90-day exchange comes over to-day at 13*½d.*, a fall of 1-16*d.* on the week. A year ago it was 17*½d.*

The Rio de Janeiro exchange on London is 8*½d.*, being  $\frac{1}{4}$ *d.* higher on the week. A year ago it was 7*¾d.*

The Bankers' Clearing-house return for the week ending October 26th, 1898, shows a total of 135,780,000*l.*, as compared with 133,106,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£31,608,431	£31,928,171
Total Reserve .....	£21,238,156	£21,458,116
Proportion of Reserve to Liabilities...	48 <i>½ per cent.</i>	47 <i>½ per cent.</i>
Notes in Circulation .....	£27,170,275	£27,270,055
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	$3\frac{1}{2}$ per cent.	$2\frac{1}{2}$ per cent.
Consols (account) .....	109	111 <i>½</i>
French Rentes (account) .....	102 <i>f.</i> 17 <i>c.</i>	103 <i>f.</i> 20 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 35 <i>¼c.</i>	25 <i>f.</i> 17 <i>¼c.</i>
New York 60 days ditto .....	\$4-82 <i>½</i>	\$4-82 <i>½</i>

All things considered it must be confessed that the STOCK MARKETS during the past week have gone through a severely trying ordeal and have come out with comparatively flying colours. At the outset it looked as if we were in for a black week, and at one time on Tuesday Consols, which have been regarded as the barometer of the situation, were down to 106*½*. To-night they close at 109, which is precisely the figure ruling a week ago, and French Rentes which might have been expected to fare somewhat worse than the British Funds, are actually higher by 40 cents than they were at this time last week. In other departments there has been a continued recovery since Wednesday, though not quite to the same extent as in Government securities, and to-day the markets closed steady all round. Nevertheless, we think it dangerous to assume that we have heard the end of the Fashoda business, and it will occasion us no surprise if the market receives a rude shock before many days, or perhaps even hours, are over. The best advice which can be given to speculators is to stand aloof for awhile, even at the risk of being left to see their specialities jumping up before they get in. There are several shares—particularly in the foreign railway market—which, at the present moment, and under normal political conditions, would present unusual prospects of an important rise, but with the possibility of a fresh outbreak of the Anglo-French crisis, all ordinary calculations may be upset, and for that reason the greatest caution in buying should be observed. We shall leave the subjoined table of fluctuations to tell its own tale, and may mention as prominent amongst the movements which have taken place during the week beyond those shown therein, a rise of  $3\frac{1}{2}$  in City and South London, a further fall of 7 in Waterloo and City, a rise of 2 in Chatham second preference, an all-round drop in Indian railway issues ranging from 1 to 4 per cent., a fall of 2 in Calgary and Edmonton bonds, a rise of  $6\frac{1}{2}$  Chicago Junction railway, 2 in Antofagasta ordinary, 2 in Conde d'Eu debentures, and 2 in Cucuta debentures, and a fall of  $2\frac{1}{2}$  in Brazil Great Southern debenture stock,  $2\frac{1}{2}$  in Buenos Ayres Great Southern debenture stock, 1 in Buenos Ayres and Pacific first preference,  $2\frac{1}{2}$  in Recife and Sao Francisco debenture stock,  $\frac{1}{2}$  each in several Brazilian shares,  $\frac{1}{2}$  in Railway Investment deferred, and  $\frac{1}{8}$  in Stock Conversion and Investment Trust shares.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>					
Consols, $2\frac{1}{2}$ per cent. ....	—	—	Great Western .....	1	—

The will of Mr. William Isaac Carr, the senior partner in the firm of W. I. Carr, Sons, and Tod, of 2, Royal Exchange-buildings, has been proved, the net value of the personal estate being entered at 137,736l., and the gross value of the whole of his estate at 149,736l.—*City Press*.

Messrs. Thackeray and Co., of Cardiff, under date October 27th, report as follows:—Barry Railway undivided, 262½ (unchanged); Barry preferred, 123 (unchanged); Barry deferred, 141 (a fall of 1); Cardiff preferred, 113 (unchanged); Port Talbot, 9½ (unchanged); Rhondda and Swansea Bay, 4½ (a fall of ½); Rhymney undivided, 261½ (unchanged); Rhymney preferred, 121 (unchanged); Rhymney deferred, 145 (unchanged); Taff Vale, 73½ (a rise of ½); Vale of Glamorgan, 128 (unchanged). This market has been of a very uncertain character owing to the political situation. At close, however, there are signs of a recovery.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Baltimore and Ohio Railroad Company—Mercantile Trust Company's engraved certificates of deposit for 5 per cent. bonds of 1885, 4½ per cent. terminal mortgage bonds of 1894, sterling 6 per cent. bonds of 1872, due 1902, sterling 6 per cent. bonds of 1874, due 1910, sterling 4½ per cent. bonds of 1883, sterling 5 per cent. bonds of 1877, due 1927, in lieu of the certificates of deposit issued by Messrs. J. P. Morgan and Co., Messrs. Brown, Shipley, and Co., and Messrs. Speyer and Co.; London General Omnibus Company, Limited—further issue of 46,800l. 4 per cent. debentures of 100l. each, Nos. 1,501 to 1,968; Pittsburg and Connellsville Railroad Company—Mercantile Trust Company's engraved certificates of deposit for consolidated mortgage 6 per cent. bonds, in lieu of the certificates of deposit issued by Messrs. J. P. Morgan and Co., now quoted.

It is officially notified that Mr. Lionel Sparhawke Tatham and Mr. Robert P. Tewart have been declared defaulters upon the Stock Exchange.

## American & Canadian Railways.

### ATCHISON TOPEKA AND SANTA FE.

The directors of the Atchison Topeka and Santa Fé have issued a circular setting forth the details of the purchase of the San Francisco and San Joaquin Valley, and making out a strong case for the acquisition of the property. The line at present runs from Stockton to Bakersfield, 235 miles, and the extension to San Francisco, 90 miles, is now being built, whilst a company has just been formed to carry on the road from Bakersfield in the direction of Los Angeles. The Atchison system will probably be tapped at Mojave, so that San Francisco will have a fresh transcontinental outlet eastward, and the Atchison will have free access to the Golden Gate independent of the Southern Pacific.

At the third annual meeting of the Atchison Topeka and Santa Fé Railway Company, to be held on December 8th, the stockholders will be asked (1) to vote upon the ratification and approval of the sale and conveyance to this company of the railroads and branches, property, rights, privileges, and franchises of the following named companies (the stock and bonds of which are owned by this company)—viz., Kansas City Topeka and Western Railroad Company, Leavenworth Northern and

Southern Railway Company, the Southern Kansas Railway Company, the New Mexico and Southern Pacific Railroad Company, the New Mexican Railroad Company, the Rio Grande Mexico and Pacific Railroad Company, Silver City Deming and Pacific Railroad Company, the Wichita and Western Railway Company, St. Joseph St. Louis and Santa Fé Railway Company; (2) to vote upon the ratification and approval of leases to this company of the railroads and branches, and the properties, rights, privileges, and franchises thereto pertaining of the following companies (the stock and bonds of which are owned by this company)—viz., Chicago Santa Fé and California Railway Company; the Denver and Santa Fé Railway Company; the Pueblo and Arkansas Valley Railroad Company; and to ratify the lease of the portion, commonly called the "Mojave Division," of the Southern Pacific Railroad from a connection with the railroad of the Santa Fé Pacific Railroad Company at the Needles to Mojave in the State of California; (3) to vote upon the approval of the sale and conveyance to this company, or of leases to this company of the railroads and branches, property, rights, privileges, and franchises of the following named companies (the stock and bonds of which are owned by this company), viz.: Chicago Kansas and Western Railroad Company, Kansas City Emporia and Southern Railway Company, Florence El Dorado and Walnut Valley Railroad Company, Marion and McPherson Railway Company and Wichita and South Western Railway Company; (4) to vote upon the approval of the purchase by this company of stock for stock trust certificates representing the control of the San Francisco and San Joaquin Valley Railway Company, a corporation of the State of California.

### GREAT NORTHERN.

The operations of the entire system of the Great Northern Railroad Company, including the St. Paul Minneapolis and Manitoba, in the year ending June 30th resulted as follows:—

	1896-7.	1897-8.
Passengers .....	\$2,527,109	\$3,311,381
Freight .....	15,841,331	18,056,047
Mail, express, rents, &c. ....	1,067,621	1,210,116

Total gross earnings .....	\$19,436,061	\$22,577,544
Expenses and taxes .....	11,304,520	11,555,645

Net earnings .....

Subjoined is a summary of the income account of the Great Northern Railroad Company for the year ending June 30th:—

	1896-7.	1897-8.
Net earnings St. Paul Minneapolis and Manitoba Railway .....	\$6,318,445	\$8,737,166
Interest on bonds owned .....	93,823	69,418
Dividend on stocks owned .....	1,000,548	1,259,357
Profit on Treasury securities sold ..	—	419,844
Rent of leased lines .....	187,255	164,416
Interest and exchange .....	73,557	164,359
Bills receivable .....	15,838	15,919
Other income .....	148,520	388,151
Total .....	\$7,837,597	\$11,218,630
Rent St. Paul Minneapolis and Manitoba Railway .....	\$5,380,729	\$5,396,863
Divs. on Great Northern stock .....	1,250,000	1,500,000
Fund for improvements and renewals St. Paul Minneapolis and Manitoba Railway .....	—	1,500,000
Fund for Cascade Tunnel .....	—	750,000

Total disbursements .....

Balance—surplus .....

The balance-sheet of the Great Northern shows a share capital of \$25,000,000, and a funded debt of \$40,946,000. President James J. Hill, in his report, states:—

### NEW LINES.

"The St. Paul Minneapolis and Manitoba Railway Company has, during the year, and under the provisions of the lease to this company, completed an extension of the Langdon branch from Langdon to Hannah, North Dakota, 21.06 miles, which was opened for traffic September 9th, 1897. Also an extension of the Cavalier branch from Cavalier to Wallhalla, North Dakota, 16.13 miles, which was open for traffic August 27th, 1897. The line between Carlisle and Elizabeth, Minnesota, 3.52 miles, having been abandoned, the tracks and structures were removed during the year. The building of a direct line from Fosston, Minnesota, to Duluth or West Superior, has been under consideration for some years, during which period numerous surveys have been made. An excellent line was obtained, and active construction work was begun last fall by the Eastern Railway Company of Minnesota. At this writing the line has been opened for traffic, and is practically completed. As a portion of the new line, the Eastern Railway purchased the line of the Duluth Superior and Western Railway from the St. Louis river to Deer river, Minnesota, 99.94 miles, paying for same, including equipment, material, &c., \$3,385,400. From the St. Louis river to Saunders, Wisconsin, 6.18 miles of leased

track is at present used. In order to provide its own line and to avoid the heavy grades on the Duluth Superior and Western Railway, a line has been built from Cloquet, Minnesota, to a junction with the main line of the Eastern Railway at Nemadji river, 13 miles south of West Superior. The second, or double, track is now being extended to Nemadji Junction. The line purchased from the Duluth Superior and Western Railroad Company is being improved to the highest standard. Wooden structures in the track are being replaced by stone culverts and solid embankments, or with new steel bridges; 75lb. rail is being laid in place of the former 60lb. rail; existing passing tracks are being lengthened and additional ones built to provide for the heavy business which will pass over this line; coal and water stations are being erected at convenient points. From Deer river to Fosston, 99.66 miles, a new line has been built. The distance from Fosston to Nemadji Junction is 202.49 miles, is very heavy work, and is built in the most substantial and permanent manner. The maximum grade is four-tenths of 1 per cent., equated for curvature. The track is laid with 75lb. steel rails, and is fully ballasted. Passing tracks alternately 3,000ft. long and 6,000ft. long average about 6 miles apart. The necessary depots, coal and water stations, and other buildings have been erected. A division point has been established at Cass Lake, 105.03 miles from Carman and 169.49 miles from West Superior, with brick round house, turn-table, coal and water stations, &c., and over 5 miles of yard tracks. The line between Fosston and Cass Lake has been leased to the Great Northern Railway and will be operated as a portion of its Dakota Division. The line between Cass Lake and Nemadji Junction will be operated by the Eastern Railway Company of Minnesota as its Northern Division. This new line, in addition to materially shortening the line from all points west of Crookston to Duluth, will develop a large local business. The road runs through the largest body of standing pine east of the Rocky Mountains and a heavy lumber traffic may be expected. It also runs through a portion of the Iron Ore region of Minnesota, and a considerable ore traffic is now being handled, which will increase. A number of directors and large shareholders of the company have recently made a careful inspection of this new property and are confirmed in their opinion of the wisdom of its construction. Under arrangements made with this company, the Park Rapids and Leech Lake Railway Company began during the year the construction of a line from Park Rapids to Cass Lake, Minnesota, about 49 miles. The track has been laid from Park Rapids to Akeley, 18 miles, and will be completed to Cass Lake before winter. Since the close of the fiscal year the company has secured almost the entire stocks and bonds of the Spokane Falls and Northern Railway Company, Nelson and Fort Sheppard Railroad Company, Red Mountain Railroad Company and Columbia and Red Mountain Railroad Company, the four railroads composing what is known as the Spokane Falls and Northern System. This consists of about 217 miles of road from Spokane Falls, Washington, to Nelson, B.C., on the Kootenai River, with a branch from Northport, Washington, to Rossland, B.C., and handles large ore shipments from the Trail Creek, Rossland, and Slocan camps.

#### GENERAL.

"During the year the amount of wheat carried east-bound increased about 4,000,000 bushels, or 120,000 tons, as compared with the previous year. The amount of wheat carried from Eastern Washington to Puget Sound increased, as compared with the previous year, about 856,000 bushels, or 25,700 tons. Taking the entire wheat business, there was an increase in the tonnage moved of 145,700 tons, while the increase in the total revenue tonnage hauled was 617,700 tons. There was, therefore, an increase during the year in tonnage hauled other than wheat of 472,000 tons. While there has been an increase in business over the entire line, due to improved business conditions, the larger portion of this increase comes from the more recently built Western lines, as is apparent from the fact that while the tons hauled increased 617,700 tons, or 8.267 per cent., the tonnage hauled 1 mile increased 280,732,169 tons, or 16.94 per cent. The average rate received per ton per mile has been reduced more than 2½ per cent., equivalent to a reduction in revenue of \$465,100. On account of the completion of the new line between Fosston and Duluth, and the consequent decrease in distance between the wheat-fields and the head of the lakes, heavy reductions have been made in wheat rates since the close of the year, and a still further decrease in the average revenue per ton per mile may be looked for in the next annual report. It is estimated that this reduction in rates will amount to about \$1,000,000 during the coming year. The earnings from passenger trains show an increase during the year of 27 per cent., or \$897,662. Some of this is due to the Alaska gold excitement and to the heavy travel to the Pacific coast, encouraged by the extremely low rates in effect during the last half of the fiscal year. The

average revenue received per passenger mile has decreased from 2.591 cents to 2.222 cents, about 14½ per cent., equivalent to a reduction in revenue of about \$550,000. A careful examination of the statements in this report confirms the views expressed in our report of last year as to the gradual and permanent reduction in the rates paid by the public, and this necessitates the greatest economy in the operation of the railway. Your board of directors confidently expects that the permanent character of the improvements made and the better methods used in operation, together with the development of the new country served by the company's lines and the consequent increase of traffic, will enable the company to continue the gradual reduction in rates of transportation which has characterised its policy from the beginning. The country along the company's lines is, on the whole, prosperous, and the increase of new settlers will tend to advance the general prosperity."

#### JOINT TRAFFIC ASSOCIATION.

The United States Supreme Court on Monday decided against the legality of the Joint Traffic Association, which was formed in November, 1895, by thirty-one railways, representing the great trunk lines and their network of branches, for the purpose, as the articles of agreement stated, of establishing and maintaining reasonable and just rates, fares, rules, and regulations on State and Interstate traffic. The lower courts had decided against the Government, whose main contention was that the agreement was a combination to prevent competition, thus constituting a contract in restraint of trade and commerce. Justice Peckham announced the decision of the court, and said that the court distinguished no difference between that case and the *Trans-Missouri* case decided a year ago. The only new point involved was the constitutionality of the Anti-Trust Act. The court had reached the conclusion that as railroad corporations performed duties of a semi-public character, it was within the constitutional power of Congress to regulate them, as provided by the Anti-Trust Act. The only question, then, was as to the policy of Congress adopting such a measure; and as to the questions of policy the court had nothing to do. This question, which was very brief, was concurred in by Chief Justice Fuller and Justices Harlan, Brewer, Brown, and Peckham. Three Justices dissented—namely, Justices Gray, Shiras, and White. Justice McKenna took no part, as the prosecution of the Joint Traffic Association was begun while he was Attorney-General. The decision reverses that of the United States Circuit Court for New York and that of the Court of Appeals, both of which were favourable to the Joint Traffic Association.

The opinions expressed about the decision by leading railway men are very conflicting. President Fowler, of the New York Ontario and Western, says:—"The railroad rate question is one of vast importance to the people of the country; but the inviolability of the Supreme Court is of much greater consequence. Had the court reversed itself, the dissatisfied and suspicious portion of the community would have jumped to the conclusion that corporation pressure had in some manner done effective work since the decision rendered by the same court in the *Trans-Missouri* case. The pooling question, under the proper supervision of the Interstate Commerce Commission, is now open for Congressional action. A decision favourable to the railroads would have closed that door. An agreement, whether between individuals or corporations, must be open to no suspicion of illegality if it is to have adequate force. This doubt rendered the Joint Traffic Association contract ineffective, as we have seen that rates were not better maintained under it than before it was put into operation. I do not believe that the recent decision of the Supreme Court will lead to still greater demoralisation in rates. Having dropped the defective rudder, the men in the boat may now pull a stronger oar and steer a straighter course than they have been doing for some time past." Commissioner Blanchard, of the Joint Traffic Association, says that he regrets the decision of the Supreme Court, but that it must be observed. He does not think that any great damage to railway properties need be feared, and hopes that Congress may at an early date legislate in a sense more favourable to the railroads. General Traffic Manager Reeve, of the Grand Trunk, says the decision can have little or no influence now, in view of the fact that the association has been of no use since the decision against the *Trans-Missouri* Association was given. That decision practically condemned the Joint Traffic Association, although the managers decided to carry on an independent fight for the organisation. He believes the outcome of the decision will be that the American roads will be compelled to go to Congress for legislation to meet the present exigency; in other words, to get power legally to pool rates. With regard to the question of the possibility of rates being slaughtered meantime, Mr. Reeve says the rates cannot possibly be in a worse condition as regard freight than they are now. Cutting has been going on in the west for some time, and the situation is as bad as it can be. The

decision of the court cannot materially alter the present condition of affairs, and will have no effect so far as the two Canadian lines are concerned. Vice-President Shaughnessy, of the Canadian Pacific, expresses the opinion that the decision of the Supreme Court will break up the American traffic associations, but will have only a small effect on the Canadian roads. President Ripley, of the Atchison Topeka and Santa Fé characterises the decision as an outrage on the railways. Chairman Caldwell says that it will not affect the Western Passenger Association. Chairman Parker, of the Western Freight Association, says that the decision is a great disappointment.

### RIO GRANDE WESTERN.

This company is known on the London market by an issue of 6 per cent. first mortgage bonds, and the following statement of operations for the year ending June 30th may not be without interest:—

	1896-7.	1897-8.
Gross earnings .....	\$2,468,504 ...	\$3,362,288
Operating expenses .....	1,709,889 ...	2,179,549
Net earnings .....	\$758,615 ...	\$1,182,739
Other income .....	102,277 ...	83,179
Total net income .....	\$860,892 ...	\$1,265,918
Interest on bonds .....	\$115,859 ...	\$110,079
Rentals paid .....	608,000 ...	608,000
Miscellaneous .....	5,662 ...	2,770
Dividends on preference stock, 5 per cent. ....	— ...	324,778
Total disbursements .....	\$729,521 ...	\$1,045,627
Balance—surplus .....	\$131,371 ...	\$220,291

The balance-sheet shows a bonded debt of \$16,000,000, preferred stock \$6,500,000, and common stock \$10,000,000.

To the surplus of \$220,291 for the year 1897-98 was added the amount to credit of profit and loss June 30th, 1897, \$48,709, making a total balance at credit of profit and loss June 30th, 1898, of \$269,180.

The length of line at the close of the year was 564 miles owned and 18 miles leased—together 582 miles (against 561 miles at the close of the previous year); the number of passengers carried during the year was 38,128,379 (against 24,831,737); the average rate per passenger per mile, 1.74 cents (against 2.12 cents); the quantity of freight moved, 1,102,191 tons (against 727,611 tons); the average rate per ton per mile, 1.219 (against 1.456) cent; the ratio of operating expenses to receipts, 64.82 (against 69.27 per cent.

President W. J. Palmer, in his report, states:—"The accounts for the year are closed as above, but on August 23rd—since they were made up—the board of directors decided that of the above surplus there would be charged off and set apart to a 'betterment fund,' to be applied to outlays necessary to improve the structure and equipment, the sum of \$50,000; and that a dividend of 2 per cent. should be paid on the \$10,000,000 common stock, amounting to \$200,000. In order (not to deplete and) to further increase the cash resources available for additions to the property, it was deemed for the best interests of the stockholders to pay this dividend in preferred stock at par." Deducting the above payments, the balance at credit of profit and loss account June 30th, 1898, is reduced to \$19,180.

### MINNEAPOLIS AND ST. LOUIS.

The report of this company for the year ending June 30th shows the operations to have resulted as follows:—

	1896-7.	1897-8.
Total gross earnings .....	\$2,006,505 ...	\$2,246,581
Operating expenses and taxes .....	1,199,128 ...	1,367,916
Net earnings .....	\$807,377 ...	\$878,665
Other income .....	155,235 ...	167,865
Total net income .....	\$962,612 ...	\$1,046,530
Rentals .....	\$55,354 ...	\$55,162
Interest paid during year .....	580,540 ...	580,540
Miscellaneous .....	2,930 ...	—
Dividends .....	245,000 ...	265,000
Total disbursements .....	\$883,824 ...	\$900,702
Balance—surplus .....	\$323,788 ...	\$145,828

The dividends for 1896-7 were 5 per cent. on the first preferred stock and 3 per cent. on the second preferred. For 1897-8 the dividends were 5 per cent. on the first preferred and 3½ per cent. on the second preferred. The total balance at credit of income account June 30th, 1898, was \$306,702.

The balance-sheet shows a share capital of \$12,500,000 (common \$6,000,000, non-cumulative second preferred \$4,000,000, and cumulative first preferred \$2,500,000), and a bonded debt of \$10,000,000.

President E. Hawley, in his report, dated September 30th,

1898, says:—"The prospects for the coming year are most encouraging. The wheat crop in the section of the country traversed by the company's lines is very heavy, probably as large as in any preceding year. The crop of small grains and of corn will equal the average of any previous year. It is expected that the farmers will store from the present wheat crop as much as were taken from their warehouses to market in the spring months on account of the unusual prices then received; and in consequence the current crop will not move within the next twelve months, but will seek the markets in time and its existence will add to the general wealth of the communities served. Again, the yield is so large that after making allowance for the probable storage it may still be reasonably expected that the movement during the present year will equal that of last year."

### ST. LOUIS SOUTH WESTERN.

The seventh annual report of this company (late the St. Louis Arkansas and Texas) shows the following results:—

	1896-7.	1897-8.
Passenger earnings .....	\$785,018 ...	\$854,121
Freight earnings .....	3,668,482 ...	4,138,932
Mail express, and miscellaneous .....	290,046 ...	286,279
Total gross earnings .....	\$4,743,546 ...	\$5,279,332
Operating expenses .....	3,855,888 ...	4,173,328
Net earnings .....	\$887,658 ...	\$1,106,004
Sundry credits .....	3,584 ...	8,907
Total net income .....	\$891,242 ...	\$1,114,911
Taxes .....	\$121,485 ...	\$131,007
Interest on first mortgage bonds .....	800,000 ...	800,000
Other items .....	32,945 ...	26,613
Total disbursements .....	\$954,430 ...	\$957,620
Balance .....	Dr. \$63,188 ...	Cr. \$157,291

The balance-sheet shows the following paid-up capital:—Common stock, \$16,500,000; preferred stock, \$20,000,000; second mortgage income bonds (4 per cent.), \$8,000,000; first mortgage bonds (4 per cent.), \$20,000,000.

The length of line operated was 1,223 miles (in each year); the number of passengers carried 828,538 (against 803,644); the average rate per passenger per mile (2.30 cents (against 2.36 cents); the quantity of freight moved 1,773,333 tons (against 1,524,709 tons); the average rate per ton per mile 1.16 cent (against 1.19 cent); the ratio of expenses to receipts 79.05 per cent. (against 81.29 per cent.). President W. S. Fordyce in his report states:—"The gross earnings for the year were the largest in the history of the road. Traffic was somewhat retarded by the yellow fever in the south in the fall of 1897 and by floods in the spring of 1898. However, the revival of business and the good crops of 1897 more than offset these unfavourable conditions. The surplus earnings, together with other resources, have been applied principally in liquidating maturing equipment trust obligations and in the purchase of additional equipment. The work of improvements has been continued as far as the financial condition of your company would permit.

"Heavy expenditures were made to comply with the Federal law relating to safety appliances upon equipment. Three hundred standard box cars, 60,000lb. capacity, have been acquired under a car trust extended over a period of five years, with a cash payment of 20 per cent.; also 500 new improved stock cars have been leased on favourable terms.

"The Gray's Point Terminal Road will not be received from the contractors until about October 15th. The extension of the Paragould South Eastern Railway to Hornersville, in south-east Missouri, was completed in October, 1897.

"A contract with the Gulf Colorado and Santa Fé Railway (Atchison System), effective August 1st, 1898, gives us the use of that company's line of road from Wylie, Texas, to Dallas, Texas, with terminals at Dallas. The contract expires in ten years, and may be cancelled upon six months' notice. The terms (described in the report) are believed to be much more advantageous to your company than independent facilities.

"The prospects for crops in the country tributary to these lines are fully as good, if not better, than they were for last year, and general business is quite satisfactory."

### LATEST EARNINGS.

Third week of October.—Chicago Milwaukee and St. Paul, \$921,000—increase, \$98,000; Denver and Rio Grande, \$199,000—increase, \$26,000; Kansas City Pittsburg and Gulf, \$65,000—decrease, \$1,000; Missouri Kansas and Texas, \$370,000—increase, \$52,000; Missouri Pacific, \$583,000—decrease, \$3,000; Wabash, \$296,000, same as last year; Chicago Great Western, \$123,000—increase, \$4,000; Chesapeake and Ohio, \$253,000—increase, \$23,000; Louisville and Nashville, \$462,000—increase, \$51,000;

New York Ontario and Western, \$79,000—decrease, \$15,000; St. Louis South Western, \$153,000—decrease, \$11,000; Southern Railway, \$518,000—increase, \$40,000.

Second week of October.—Northern Pacific, \$709,000—increase, \$166,000; Cleveland Cincinnati Chicago and St. Louis, \$296,000—decrease, \$3,000; Norfolk and Western, \$236,000—decrease, \$24,000; St. Louis South Western, \$163,000—decrease, \$9,000. The gross earnings of sixty-seven roads in the second week of October show an increase of 4.41 per cent.

Month of September.—Chicago and North Western, gross, \$3,598,000—increase, \$37,000. Atchison Topeka and Santa Fé, gross, \$3,426,000—increase, \$2,000; net, \$1,056,000—decrease, \$9,000. Chicago Great Western, gross, \$552,000—increase, \$28,000; net, \$216,000—increase, \$29,000. Northern Pacific, gross, \$2,805,000—increase, \$294,000; net, \$1,719,000—increase, \$260,000. Southern Railway, gross, \$2,205,000—increase, \$259,000; net, \$785,000—increase, \$117,000. New York Ontario and Western, gross, \$357,000—decrease, \$4,000; net, \$105,000—decrease, \$9,000. Union Pacific, gross, \$1,723,000—decrease, \$44,000; net, \$821,000—increase, \$113,000. Mexican National, gross, \$506,000—increase, \$34,000; net, \$117,000—increase, \$29,000.

On 129 lines reporting earnings for the month of September, the total receipts were \$48,969,900 (on 96,161 miles), whilst for the same month in 1897 the receipts were \$46,179,100 (on 95,462 miles). Increase in receipts, \$2,790,800; increase in mileage, 699. On 128 lines reporting earnings from January 1st to September 30th, 1898, the aggregate receipts were \$377,398,000, as compared with \$339,913,000 for the corresponding period in 1897—increase, \$37,485,000.

Month of August.—Baltimore and Ohio, gross, \$2,492,000—increase, \$121,000; net, \$642,000—decrease, \$80,000. Union Pacific, gross, \$1,451,000—increase, \$12,000; net, \$620,000—decrease, \$87,000.

#### RAILROAD NOTES.

Track laying on the Crow's Nest Pass extension of the Canadian Pacific Railway has been completed to a point 15 miles beyond Moyie City, and is progressing at the rate of 3 miles per day. It is expected that the road will be completed to Kootenay Lake this autumn. The company has constructed a swing bridge across the Kootenay River to allow the passage of the side-wheel steamers that ply between Fort Steel and Jennings, Mont. Three thousand men are employed on the extension of the Columbia and Western from Robson, British Columbia, to Midway, and it is stated that work will be continued throughout the winter.

Central Pacific Railroad.—The Central Pacific Shareholders' Combined Protection Committees of 1894 and 1898 notify us of the following cablegrams which passed yesterday between the committees and their representative at New York:—(1) Morrison to Morshead. "Attorney-General advises (that he) expects proposition few days. Speyer party hopes marketing new bonds without reorganisation. Foreign stockholders should be notified." (2) Morshead to Morrison. "Shall contest board's right (to) issue bonds. Ground illegal appointment by Huntington and Banbury. Notify Government."

For the quarter ended September 30th the New York Central and Hudson River shows:—Gross earnings from operations, \$11,394,000—decrease, \$884,000; net, \$4,376,000—decrease, \$380,000; income from investments, \$1,090,000—increase, \$956,000, this largely representing receipts from the operation with the Lake Shore Railroad; first charges, \$3,839,000—increase, \$723,000, representing interest on the bonds issued to purchase the Lake Shore and Michigan Southern stock; surplus after payment of the dividend, \$153,000—decrease, \$147,000.

It is announced from Chicago that the Santa Fé road has made arrangements to light all the cars of its limited trains running between Chicago and Los Angeles, a distance of 2,265 miles, with electricity, evolved from the friction of the car axles. The electric equipment of each train will aggregate 4,928 candle power, and will include compact dynamos and storage batteries. It is said that this will be the first train in the world to carry a large supply of light generated by the car axles.

A further announcement respecting the dividend on the common stock of the Northern Pacific was made on Monday. It now appears that 1 per cent., payable in February, will be declared in December, as already stated, and that a further 1 per cent. will be notified in June, payable in August. It is believed that plans are at present being considered by the directors for reducing the company's big capitalisation.

It is announced that the managers of the projected exclusively coal road from the Pennsylvania coal districts to New York have made an arrangement to lease part of the Pennsylvania's terminal

at Jersey City. This is regarded as a severe blow at the coalers, as it shows that the talk of constructing this road by independent coal operators has some foundation in fact.

The Joint Traffic Association has passed a resolution ordering an advance of 2c. from the basis of 18c. to 20c. on all grain rates from Chicago to the Atlantic seaboard except for maize, the increased rates to become effective on November 1st. The rate situation is demoralised by the heavy grain shipments at cut rates through southern ports, which are favoured by the winter loadline regulations.

There has been a great demand recently for Chicago Burlington and Quincy stock for voting purposes at the next election. It is thought they will be used to effect, if possible, a plan for refunding the consolidated sevens, convertible into fives. It is definitely known that President Perkins is steadily opposed to refunding these bonds, and enough directors have so far supported him.

President Ripley, of the Atchison Topeka and Santa Fé Railroad, said that his company's trains will enter San Francisco from Chicago before next September. The trackage agreement over the Southern Pacific is as yet an undecided matter. He has no doubt of the approval of the recent purchase by the stockholders. The transfer of the acquired property will take place about January 1st.

The Canadian Government Railway System, as a name for the lines operated by the Government, no longer exists. The Railway Department has gone back to the old names of the Intercolonial Railway and Prince Edward Island Railway, and the new timetable issued by the Intercolonial bears that name, under which it was formerly known, instead of the Canadian Government Railway System.

The Canadian Pacific Railway Company declines to accept the award of the arbitrators disallowing the 10 per cent. differential rates for Transcontinental freight, and demands another hearing, on the ground that the decision of the arbitrators was based on a technical interpretation of the original resolution, and not on the broad grounds of the merits of the case.

The New York Stock Exchange has listed the following securities:—\$2,500,000 Union Pacific Central Branch 4 per cent. first mortgage bonds; 18,000 shares of Pullman Palace Car stock, which have been divided among the stockholders as a 50 per cent. dividend from the accumulated surplus.

The United States Court at Baltimore have dissolved the injunction issued at the instance of holders of the preferred stock of the Baltimore and Ohio Railway, and granted the trustees of the various mortgages the right to foreclose, thus clearing the way to reorganisation.

A \$3,000,000 equipment trust is being created by the Pennsylvania Railroad Company. The bonds will bear 3½ per cent. interest, and will be redeemable in ten yearly instalments. They have been sold to Kuhn, Loeb, and Co., of New York.

An interim report of the Kansas City Pittsburg and Gulf for the twelve months ended 30th June—the fiscal year closes 30th September—shows a deficit of \$150,000. The company has a considerable floating liability.

The annual statement of the Missouri Pacific Railroad, including the Iron Mountain division, shows gross earnings of \$11,036,000, a decrease of \$357,000, and net earnings of \$2,526,000, an increase of \$169,000.

For the quarter ended September 30th the Chicago Great Western shows:—Gross, \$1,469,000—increase, \$74,000; net, \$530,000—increase, \$51,000; surplus over charges, \$294,000—increase, \$27,000.

A report is current that the Northern Pacific Railroad Company will soon acquire the Pacific short line and the Sioux City and Northern Roads.

The projected Chicago and St. Louis Railway will be very damaging to the Wabash, the Illinois Central, and the Chicago and Alton.

The Canadian Pacific Railroad Company, it is said, will establish another trans-Pacific line of steamers almost immediately.

It is rumoured that the Chicago Milwaukee and St. Paul has purchased the Mason City and Fort Dodge Railroad.

## General News.

### THE ENGLISH RAILWAY COMPANIES IN IRELAND

Mr. H. G. Burgess, Irish traffic manager for the London and North Western Railway Company, and Mr. J. Epton, representing Mr. F. Harrison, general manager of the system, were in Limerick on Wednesday, and met several of the local merchants and traders in reference to the proposed alternative route from the south of Ireland to England *via* Rosslare and Fishguard. It was stated that their company do not propose to interfere in the question of the contemplated amalgamation of the Great Southern and Western and Waterford and Limerick railway companies, but that in the action the London and North Western Company had in view they would content themselves with safeguarding their interest on the English side of the Channel whether the amalgamation of the two Irish companies named took place or not. The Great Western Company of England and the Great Southern and Western Company, it was pointed out, were bound by their pledge to the hybrid committee of the House of Commons to establish a first-class service for passengers, goods, and live stock *via* Rosslare and Fishguard, giving the Great Western Company a shorter route to Cardiff, Swansea, and surrounding places than exists at present by that company's route. At present the London and North Western Company's central Wales line ends near Carmarthen, and what they now propose, in view of the creation of the new alternative route, is to apply in the next session of Parliament for running powers and other facilities over any lines the Great Western or other company may have or construct from any point to Fishguard. If this concession be obtained, the London and North Western Company, the merchants and traders were informed to-day, would have a shorter route to the places named and be in a position to give the best service to passengers, as well as for butter, bacon, eggs, and Irish traffic from the south of Ireland generally. The traders fully realised the benefits the new proposal would confer on them, and were stated to be ready to give it their strong support. Messrs. J. Epton and Burgess left in the evening for Tralee to meet the merchants and traders of the Kerry district. Addressing a deputation of merchants and traders at Ennis last week, Mr. J. L. WILKINSON, general manager of the Great Western Railway, said that the matter of taking a more active part in connection with the Waterford and Limerick Railway had been considered by his company twenty odd years ago, but they were satisfied for the time being to give financial assistance to the Irish company. That agreement was drawing to a close, and his directors now had carefully considered whether that agreement should be considered as in the past or whether they should make up their minds to do something better. They had made up their minds to a plan which would give a shorter route to Ireland than by Holyhead, by which the south and west of England and Wales would be brought into closer touch with Ireland. His company wanted to be able to make their service successful to be hand in hand with a really strong company on their side like the Great Southern and Western Railway which went to those places which the English people knew best. There had been a great improvement in the Waterford and Limerick Railway, but it was only fair to say that they had done a great deal of this by the assistance of his company, who had never been recouped in money for that assistance, and by the arrangement between them things had come to this, that they should either mend things or end them, and they had determined to mend them—(applause)—and if the people here co-operated with them he and his directors believed in the possibility of doing something which would justify the money they intended to spend, and add to the prosperity of the whole west and south of Ireland. (Applause.) They had not waited for Parliamentary sanction, but had an army of workmen at Fishguard doing what the Government had promised to do 100 years ago—to make a harbour of refuge, but the expenses had been found to be too much. His company were now facing this problem with the help of their friends on both sides of the Channel, and they could not be successful without bringing a great measure of prosperity to the Irish people. (Applause.) In reply to questions from one of the deputation, Mr. Wilkinson said the route would certainly not serve the north of England better than existing railways, but there would be a first-class service, but it would open up great markets in the south and west. Within 20 miles of Cardiff there were 1 million and a quarter of people entirely depending on food and provisions from the outside. Butter, fish, &c., sent in the evening would be there the next morning. As for the rates and fares, they would not be more than they were, and his directors had made up their minds that some rates and fares would be reduced. (Applause.) Mr. O'CONNOR, C.E., then proposed a hearty vote of thanks to Messrs. Wilkinson and Colhoun for the manner in which they had given their views. This was seconded by Mr. RYAN, who said he

believed all Clare, from Lord Inchiquin down to the lowliest man, was in favour of amalgamation.

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Tuesday, are shown hereunder:—

Making-up Price.			Stock.	Continuation rate.
Sep. 27.	Oct. 11.	Oct. 25.		
151	149	144	Caledonian	—

### THE TAFF VALE RAILWAY COMPANY.

A correspondent of the *Financial News* writes:—"Is it not time that the stockholders in this concern took some steps to save their property from the ruin which is fast overtaking it? The traffics up to the end of August showed large decreases, and no one was surprised, as it is generally recognised that nearly all the revenue is derived from the mineral traffic, and this was entirely disorganised by the lamentable strike. Since business has been resumed, however, and the Barry traffics are showing regular weekly increases, the Taff continues its monotonous record of falling traffics. Up to the present time the total decrease amounts to about 215,000*l.*, and if the present rate continue it will be well over 250,000*l.* by the end of the year. Now, owing to the strike, the average working expenses will not be less than 65 per cent., leaving a net loss of 162,500*l.* compared with last year. The total amount paid as dividend on the

ordinary stock last year was 175,238*l*. There will, therefore, this year be a balance of 12,738*l*. wherewith to pay a dividend on 5,000,000*l*. of stock, or rather less than  $\frac{1}{4}$  per cent. per annum. But this strike is exceptional. What of the future? The mineral traffic last year brought in 471,240*l*., against passengers 133,000*l*. This mineral traffic—the very life-blood of the concern—is being tapped by the Cardiff Railway Company, which is building a line from a junction with the Rhymney Railway Company between Cardiff and Llanishen to Treforest, where it can take over all traffic intended for the Bute Docks, which is about three-fourths of the total Taff mineral traffic, and thus secure the mileage from that place to the docks. Let shareholders go over the new competing line themselves, and see the progress that is being made, and they will, I think, agree with me that it is not only the dividend on the 5,000,000*l*. ordinary that is in jeopardy. This serious state of things calls for immediate action, and if shareholders combine, form a strong committee, and try to make terms with the other local lines, more especially the Cardiff Railway Company, the ruinous competition just commencing may be stopped, and a property which has in the past paid splendid dividends saved from financial extinction."

#### NITRATE NOTES.

The "making-up" prices of nitrate producing companies' shares at the Stock Exchange settlement on Tuesday show that almost the whole of the recent rise has been lost. This is not to be wondered at, for it is now pretty generally known that the negotiations for a new combination are "off"—quite off—for all Mr. Robert Harvey may say to the contrary. For our part, we are not disposed to believe that they ever had any solid foundation; it is much more likely that they originated with a few smart producers who wanted to engineer a little rise in prices on the strength of which they could sell forward their next year's output.

The board of the Taltal Railway Company, Limited, announce that an interim dividend of 1*s*. 3*d*. per share was paid in May last, and, after redeeming 2,300*l*. of the mortgage debenture debt, and transferring 2,500*l*. to the reserve for maintenance and renewals, &c., as well as providing for all other charges, the balance now available is 13,409*l*., out of which they recommend the payment of a further dividend of 2*s*. per share, making an aggregate of 3*s*. 3*d*. per share, or  $3\frac{1}{4}$  per cent. for the year, carrying forward the sum of 3,409*l*.

It is notified that Mr. Walter F. Mills, of the firm of Newson-Smith, Mills, and Co., chartered accountants, of 37, Walbrook, E.C., has been appointed liquidator of the New Julia Nitrate Company, Limited. Alas, poor Julia!

In the Court of Appeal on Tuesday an application was made on behalf of the Lagunas Nitrate Company, Limited, to have the hearing of the appeal in "Lockett v. the Lagunas Nitrate Company and others" postponed until after the hearing of the appeal in "Lagunas Nitrate Company v. Lagunas Syndicate and others." The Court dismissed the application, with costs.

The following, from the *Westminster Gazette*, largely expresses our own views upon the recent policy of the Lagunas Nitrate Company's board:—"The directors of the Lagunas Nitrate Company are good sportsmen, and we cannot help sympathising with their wish to get rid of the onerous obligations with which they were handicapped by their predecessors in office; but their attempts have so far been singularly unsuccessful. After a terribly exhausting dead-heat with the parental syndicate, about to be run off in the Court of Appeal, the company's application for a fresh trial of the commission case against Messrs. Lockett has just been dismissed with costs, Mr. Justice Smith's comments on the course adopted by the appellants being the reverse of complimentary. The shareholders who pay for all this fun will probably want to know at the meeting next month why the oficina has been closed since March instead of making a million quintals of nitrate at a profit sufficient to pay 10 per cent. on the capital at its present valuation. The while the Lagunas Company has been litigating in London and standing still in Tarapaca, the Syndicate has been making nitrate hand over fist for the benefit, not alas! of the shareholders but of the debenture holders and the Nitrate Railways Company. Under the now defunct combination-cum-pooling scheme, the two Lagunas were each to have a quota of 750,000 quintals. By the end of the year the Company will have produced 300,000 quintals and the Syndicate 1,500,000."

We offer a prize of one New Tamarugal ordinary, two Primitivas, a New Julia, and an allotment of New Pacha and Jazpampa shares for the solution of the conundrum: What is a

"Nitrate bank"? Our own answer would be: a bank in a nitrate district, run by a nitrate crowd; but Mr. William Fowler, the chairman of the Bank of Tarapaca, would scarcely agree with us. To suggest to the directors of that peculiar institution that it is a "nitrate bank" is very like shaking a red rag at a bull, and for our temerity in so dubbing it, as we did in these columns last week, we have incurred Mr. Fowler's wrath. We rather prided ourselves on the soundness of the criticisms we have occasionally bestowed upon the Bank of Tarapaca and its finances, and it is a severe shock to be rewarded for our pains by the assertion that we are "ignorant persons."

There is a cheery optimism about Mr. Robert Harvey which is refreshing and enjoyable. The San Pablo Nitrate Company, whose annual meeting was held yesterday, has paid no dividend for the last three years, its works have been shut down for a couple of years or so, and its 160,000*l*. of capital stands appraised in the market at 28,000*l*. A year ago Mr. Harvey told us that the result—i.e., the non-declaration of any dividend—was "as satisfactory as might have been expected." Now we are told that "the outlook, if anything, is not so bright." Verily, the man who can discover anything "satisfactory" about San Pablo, or can discern in its position anything but the blackness of night, is deserving of—well, shall we say, in Mr. Harvey's own words "half-fees in the future"?

The strike of nitrate and railway workmen in Tarapaca has fizzled out, and it is doubtful if the traffic receipts of the Nitrate Railways Company will be found to have been much affected. Anyhow, the traffic will only have been delayed, not lost, and if next Monday's return does not show a 10,000*l*. increase, we should get it a fortnight later.

#### MUSIC-HALL ARTISTS' RAILWAY ASSOCIATION.

The second annual general meeting of the Music-hall Artists' Railway Association was held on Tuesday at the Royal Theatre of Varieties, Holborn, Mr. Adderley Howard in the chair. The SECRETARY (Mr. C. Douglas Straight) read the report. The Executive Committee stated that the balance-sheet covered a period of twenty months. The committee offered their congratulations on the satisfactory position—numerically and financially—in which the association now stands, there being a balance of 205*l*. to credit, after payment of all liabilities. The membership roll consisted of over 3,000 members; the receipts from donations, subscriptions, &c., amounting to 731*l*., and the expenses to 526*l*., leaving the credit balance above mentioned. A sum of 110*l*. had been paid for insurance of members against accident. This had been considered by the committee as money well spent, and the arrangement a distinct boon to members of the Association. The idea of this special insurance was introduced to the committee by a gentleman who had worked with unceasing energy in the interests of the profession—Mr. Adderley Howard. It was proposed out of the balance of 205*l*. to devote a sum of 100 guineas between two music-hall and two railway charities, the money then remaining in the bank to be considered as a reserve fund, and only drawn upon in cases of emergency or necessity. Whilst the committee were grateful to the railway and steamship companies for the various concessions granted to the association, they did not purpose relaxing their energies in the direction of gaining still further concessions. Mr. Harry Carlton, who had occupied the position of honorary chairman of the association for two years, had been reluctantly compelled, through pressure of business engagements, to tender his resignation as a member of the executive committee. Mr. Carlton had worked with enthusiasm, and the tact and business capacity he had displayed in the chair had always been of great service. The CHAIRMAN stated that during the past twelve months upwards of 1,350*l*. had been saved to members of the association, and he thought there was every reason to be proud of it. He moved the adoption of the report and balance-sheet. They were all thankful for what the railway companies had done; they had not done all they might, and he hoped the association would soon obtain further advantages. Mr. Moss seconded the motion, which was unanimously carried.

#### ARGENTINE RAILWAY ITEMS.

The Argentine Congress has granted a concession to Señor Victor Picheu for the construction of a railway from Rosario to San Juan and Mendoza.

We understand that Mr. Frank Henderson, general manager of the Central Uruguay Railway of Montevideo, will succeed Mr. Samuel Barrow as general manager of the Buenos Ayres Great Southern Railway.

The La Plata Government has granted a concession to Messrs.

R. Christople, Doynel, and Co. for a network of light railways in the province of Buenos Ayres. The line is about 1,545 kilometres in length. The works to be finished within four years.

The Buenos Ayres railway companies have protested against the project of Messrs. Weir and Norton for a large goods station at Retiro, which scheme has already received the sanction of the Senate, and has been favourably reported upon by the Public Works Committee of the Deputies.

At an extraordinary general meeting of the Buenos Ayres and Ensenada Port Railway Company, Limited, held on Monday at the offices, Palmerston-buildings, E.C., the resolutions passed on the 8th inst. transferring the undertaking to the Buenos Ayres Great Southern Railway Company were confirmed.

The directors of the Entre Rios Railways Company, Limited, in pursuance of the power conferred upon them at the general meeting on the 19th inst., have decided to proceed with the conversion of the 5l. 5 per cent. preference shares (cumulative) and ordinary shares, into 5 per cent. preference stock (cumulative) and ordinary stock respectively, on November 17th.

The directors of the North West Argentine Railway Company, Limited, have given notice of their intention to redeem the preference debenture stock at its par value. The stock will be paid off on December 31st next, either in cash or by the issue in lieu thereof of 4 per cent. prior lien mortgage debenture stock, which will rank both for principal and interest in priority to the whole of the company's debenture stock.

Buenos Ayres dispatches received by last week's mail include the report of a fraud on the Central Argentine Railway Company, which is of greater proportions than was at first supposed. On the first examination the sum missing was found to be about \$5,000, but now it seems that it is about \$25,000, or 2,000l. gold. The fraudulent employé, who is still at large, to attain his object used to keep two sets of books—one for showing to the company's inspectors and the other for his own private use.

The *Review of the River Plate* says:—"Some of the railway companies are having quite a lot of fun out of the proceedings of inspectors, national and provincial, but especially provincial. The Southern Railway seems to have incurred the awful wrath of the provincial authorities through declining to allow a provincial technical inspector access to one of its engines. An outraged Provincial Government has promptly imposed a fine, and the company has intimated roundly that it will not pay the fine. Then we presume another fine will be imposed for disrespectful conduct, which again will be disregarded; and the fun will go on until the National and Provincial Governments make up their minds to come to a decent understanding. In another part of the province also there has been trouble, this time through the carelessness (alas that it should have to be said!) of a Government inspector himself. The Central Argentine Railway was fined because at one of its stations there was found to be no complaint-book, in which an incensed and neglected public might record its grievances; but it transpired that the imposition of the fine was unfair, as the complaint-book had been removed by a provincial inspector. He must have been a man of discrimination; but the company should not be fined for this."

### THE RECENT ARMY MANŒUVRES.

The Secretary for War (Lord Lansdowne) has directed a letter to be sent to the general manager of the London and South Western Railway Company, which states that he (Lord Lansdowne) has learnt with pleasure, from the reports submitted to him, the extent to which the officials of the line, by their zealous co-operation with the military authorities, contributed to the successful conveyance of the large number of troops engaged in the recent manœuvres. He asks the general manager to convey to the directors his appreciation of the services so performed, and to express a hope that fitting acknowledgments may be conveyed to all those in the employment of the company who contributed to so satisfactory a result. This expression the company duly conveys to its staff in a circular to which Mr. Owens adds that he is further desired by the chairman and directors to convey their best thanks to the officers and staff who were engaged in dealing with this traffic, for the energy and devotion to duty displayed by all, without which it would have been impossible successfully to have met the exceptional strain upon the resources of the company, and also expressing his personal recognition of the admirable manner in which this work was carried through.

### FOREIGN AND COLONIAL ITEMS.

The Beira Railway is now working as far as Lesips, 60 miles beyond Umtali.

The directors of the Porto Alegre and New Hamburg (Brazilian) Railway Company, Limited, have declared an interim dividend of 4s. per share on the preference shares.

For the half-year ended June 30th last the directors of the Great Indian Peninsula Railway Company propose a dividend on the capital stock of 8s. 9d. per cent., payable in January next, in addition to the guaranteed interest of the half-year.

M. Doumer, Governor-General of Indo-China, has arrived in Paris from Saigon. The principal object of his journey is to obtain the sanction of the French Government to employ the 2,500,000f. surplus revenue of Indo-China for the construction of railways in the colony.

The Egyptian Ministry of War has demanded a first credit of 350,000l. for the reorganisation of the Soudan. This sum is to be principally devoted to extending the railway from the Atbara to Khartoum, to forming a Soudan police force, and to effecting various other reforms.

The Brazilian Chamber of Deputies has rejected a Bill which conceded an extension of two years to the Leopoldina Railway Company for the conclusion of works on the branch from Santo Eduardo to Cachoeiro de Itapemirim, and relieved the company from the fines imposed since January 2nd last.

According to a cablegram from Sydney a deputation has urged the New South Wales Railway Commissioners to reduce the rates for the removal of starving stock from the drought-stricken districts. It is stated that since the year 1891 the number of sheep in the colony has been reduced from 62,000,000 to 44,000,000.

Mr. Guyon, of the Mashonaland Railway survey party, reports that the pegs are now only a few miles from Ballyhooley, where it is understood that the survey camp now is. Earthworks are being started as close to town as Graham and Whites, or, to give the farm its newer name, "Bromley." The rails are some 60 miles beyond New Umtali.

Mr. Cox, engineer of the Hankow-Peking Railway, Mr. Campbell, Assistant Chinese Secretary to the British Legation, Major Radcliff, and Mr. Norregaard, engineer, were on Tuesday attacked at Lukochiao Bridge, 10 miles from Peking, by a rabble of soldiery. The Chinese assailed the Englishmen with stones, inflicting severe injuries upon Messrs. Cox and Norregaard.

Sir Andrew Richard Scoble, K.C.S.I., M.P., has been elected chairman of the board of directors of His Highness the Nizam's Guaranteed State Railways Company, Limited, in the place of the late Mr. Ottiwell C. Waterfield; and Colonel R. A. Sargeant, R.E., some time Director-General of Railways in India, to a seat on the board.

The directors of the South Indian Railway Company, Limited, have decided to recommend the payment (on January 1st next) of a dividend out of surplus profits of 20s. per cent., which, with the guaranteed interest, will make a distribution of 2l. 10s. for the half-year, or at the rate of 5 per cent. per annum, the same as for the corresponding half of the previous year.

A correspondent sends us the following figures which show the latest estimate of the cost of the proposed railway to the summit of Mont Blanc:—Station at Les Houches, with *cafés*, restaurants, &c., 500,000f.; electrical installation (with the river Arve as motor power), 500,000f.; gallery of 10,000 metres, with materials, lines, and installation of a funicular, 5,600,000f.; the terminus, 3,000,000f.; cost of concession, 200,000f.; total, 9,800,000f., or 392,000l.

The German Colonial Council on Monday continued the discussion of the estimates for German East Africa, dealing especially with the question of the construction of a central railway and the taking over of the Usambara Railway by the empire, and finally adopted a motion, proposed by Herr Sachse, calling for the putting of the line from Tanga to the interior into working order and its extension to Muemba, and approving the views of the Colonial Administrations.

According to the latest statistics Europe possessed on January 1st, 1898, 204 electric railway lines, measuring a total length of 2,259 kilometres, an increase of 54 lines and 800 kilometres upon the previous year. Germany has 65 lines, France

44, Great Britain 24, Switzerland 23, and Austria 13. There exist 172 overhead and 8 underground conductors, whilst 8 lines have a middle rail, 13 are worked by accumulators, and 3 by a mixed system of overhead wires and accumulators.

#### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., chartered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, &c., may be had gratuitously.]

21,801. Emil Flechsig, 77, Colmore-row, Birmingham—A contrivance for coupling steam-heating hose pipe in two parts on railway carriages.

21,978. James Hacking, Penny Bank-chambers, Halifax—Improvements in safety appliances for railway station platforms.

22,033. Charles White and Frank Herbert Green—An apparatus for signalling guard and driver of a railway train when in motion, and locating the call.

22,057. James Pollitt, 4, Corporation-street, Manchester—Improvements in and connected with brakes for railway wagons.

22,075. Thomas Morgan, 1, Broad-street-buildings, Liverpool-street, London—Improvements in means for showing the weight or tare of railway and other vehicles.

22,082. The British Thomson-Houston Company, Limited—Improvements in trolley cars for electric railways (Henry Geisenhoener, United States).

22,085. Charles Henry Myers—Improvements relating to electric railways.

22,087. William Platts and George Heppel Cowen—Improvements in ventilators or air-extractors for railway carriages, steamships, public buildings, and other structures.

22,105. James Challis—A notice appliance for railway carriages.

22,130. William George Heys, 70, Market-street, Manchester—Improvements in electric railways and tramways (Jean Jacques Heilman, France).

**Victoria Station.**—Victoria Station will probably shortly undergo a very extensive enlargement. A Bill will be deposited in Parliament next session by the London Brighton and South Coast Railway Company empowering them to acquire the whole of the land lying between the present station and the south side of Buckingham Palace-road, from the Grosvenor Hotel up to Ebury-bridge. Under the new scheme the local trains will be worked on the east side of the present station, and the main line on the added portion. The street mainly affected by the plan is Buckingham Palace-road, the greater part of which will have to be acquired by the company. At the present moment Victoria has eight platforms; if the additions should be carried out it will boast no less than eighteen, a number exceeded by no other station in the kingdom, and equalled by two others only—namely, Edinburgh (Waverley station) and Liverpool-street (Great Eastern). Paddington has nine platforms, St. Pancras seven, King's-cross nine, Waterloo eleven, while the station at York can also boast of a similar number. Victoria Station, it may be mentioned, was built in the year 1860.

**Llanely and Pontardulais Railway.**—On Saturday a special meeting of the Llanely Harbour Commissioners was held at the Town-hall to further consider the Llanely and Pontardulais Railway Bill; Mr. E. Trubshaw presided. The CHAIRMAN read a resolution, passed at a meeting on the 3rd inst., that they should subscribe 1,000*l.* towards the measure, subject to the approval of details, and to counsel advising that such contribution was within their legal rights. He went on to say that the opinion of Mr. Wedderburn, Q.C., was that as the Commissioners were making a dock and had laid down short lengths of railway, they were quite right in sub-

scribing and becoming joint promoters. The chairman then moved that they should take up that position, their liability being limited to the extent of 1,000*l.* Mr. MAYBERRY seconded. Messrs. DAN WILLIAMS, HARRY D. EVANS, TREGONING, and LUDFORD opposed, and asked for the case submitted to counsel to be produced. The CLERK said he believed it was in the hands of the Parliamentary agents. The motion was carried.

**Light Railways in Essex.**—The Light Railway Commissioners on Tuesday held an inquiry at Kelvedon, Essex, into the Kelvedon Tiptree and Tollesbury Light Railway scheme. At the close of the inquiry the chairman said the Commissioners were prepared to recommend an Order in respect to the section of the railway from Kelvedon to Coggeshall, but as regarded the portion north of Coggeshall, they considered that no great public advantage or need had been proved, and the prospect of any remunerative return on the large amount of capital proposed to be expended on that section was extremely doubtful. Therefore, taking into consideration the opposition of the Colne Valley Company, and of the landowners along that portion of the line, they should feel it their duty to exclude it from the proposed Order. It must not be taken, however, that the promoters, if they should see fit to accept the Order in this shape, would be debarred from such small length of railway as might be necessary or desirable for the purpose of the station at Coggeshall, or other purposes connected with the Coggeshall section.

#### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS of RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

**WEST FLANDERS RAILWAYS,**  
10, Moorgate-street, London.

NOTICE is hereby given, that the ONE HUNDRED and SIXTH HALF-YEARLY GENERAL MEETING of the Proprietors in this Undertaking will be held at the Siege of the Company, Marché du Vendredi, D. No. 12, Bruges, on SATURDAY, the 5th day of November next, at Half-past Eleven o'clock precisely, for the transaction of the general business of the Company; and Notice is also hereby given, that 98 Three per Cent. Bonds, First Issue, will be drawn for reimbursement on the 1st July, 1899.

By Article 49 of the Statutes, the Accounts of the Company, with the vouchers in support of them, will be deposited at the Siege of the Company in Bruges during 20 days from immediately after the General Meeting for the inspection of the Shareholders.

A PRELIMINARY MEETING will be held at the Offices of the Company, in London, on WEDNESDAY, the 2nd day of November next, at Two o'clock precisely.

Dated this 21st day of September, 1898.

H. VERNET, President.  
C. A. VEZEY, Secretary.

By Art. 40 of the Statutes, every Proprietor of Shares "to Bearer" desiring to take part in it is required to deposit them with the Secretary of the Company, or with the Bankers appointed by the Board of Directors to receive them, ten days at least before the General Meeting, and Proprietors are reminded that unless the requisite number attend in Bruges, personally or by proxy, the Meeting will be invalid and the payment of Dividend deferred.

**BLAENAVON COLD BLAST PIG IRON**

(MADE WITH THE CELEBRATED **BLAENAVON CHARCOAL COAL**).

**No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.

**No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.

**No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.

**No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.

**No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.

**No. 6 Strong Forge.**—A still harder and closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1858.

June 30th, 1898.—Ordinary stock, 2,254,720*l.*; first preference stock, 8 per cent., 2,554,100*l.*; second preference stock, 6 per cent., 1,011,960*l.*; perpetual debenture stock, 6 per cent., 2,000,000*l.*; subvention money, 722,958*l.*; total receipts, 8,543,738*l.* Total expenditure, 8,349,206. Credit balance, 194,532*l.*

**REVENUE.**

The revenue account for the half-year ended June 30th shows gross earnings (in Mexican currency) as follows:—

	1897.	1898.
Passengers .....	\$522,810	\$552,351
Merchandise .....	1,120,746	1,284,607
Pulque .....	145,634	157,667
Sundries .....	81,701	82,265

Total receipts .....

The working expenses for the same period were as under:—

Maintenance of way and works .....	\$130,749	\$123,400
Locomotive expenses .....	518,809	641,391
Telegraph expenses .....	25,089	29,263
Traffic expenses .....	182,901	201,329
General expenses .....	90,881	84,818
General charges—Mexico .....	22,844	23,252
London .....	43,349	47,062

Total expenses .....

Net earnings .....

The above balance of \$926,375 realised 85,883*l.*, which added to profit on Vera Cruz pier and launch account 2,384*l.* (\$25,716); transfer fees, 152*l.*; and interest received, 6,428*l.*, gave a total net revenue of 94,847*l.* The sum at the disposal of the company, after payment of the interest (60,000*l.*) on the debenture stock, is 34,847*l.* This will suffice for the payment of a dividend for the half-year on the first preference stock at the rate of 2½ per cent. per annum, absorbing 33,522*l.*, and leaving a balance of 1,325*l.* to be carried forward to the credit of the holders of that stock.

**TRAFFIC, &c.**

The number of passengers carried was 396,805 (against 386,867); the average fare \$1.40 (against \$1.37); the quantity of goods carried, 443,161 tons (against 400,771 tons); the average freight per ton, \$3.30 (against \$3.19); the number of traffic train miles run, 438,779 (against 427,754); the length of line open, 321 miles; the ratio of working expenses, including general charges, 55.40 per cent. (against 54.23 per cent.). The report states:—

"The gross earnings in the half-year amounted to a total of \$2,076,890, which is \$205,999 more than the receipts of the corresponding half of 1897. Of this increase, \$128,059 was derived from passengers and national goods, and \$77,940 from foreign goods. The working expenses amounted to \$1,150,515, leaving the net balance for remittance \$926,375, a sum larger by \$70,107 than the balance for the same period in 1897. The increase in the working expenses, amounting to \$135,892, may be traced chiefly to the larger volume of traffic handled, and to the effect of exchange in increasing the cost in dollars of fuel and other supplies.

"The total volume of goods traffic in the half-year, exclusive of company's material (32,921 tons carried free), amounted to 443,161 tons, being larger by 42,390 tons than in the corresponding half-year of 1897. Foreign traffic was larger by 4,500 tons, and national goods by 37,890 tons. This latter figure is composed of increases from exports 3,671 tons, pulque 8,028 tons, and from other national goods 26,191 tons. The stone carried from Penula quarry for the construction of Vera Cruz Harbour amounted to 173,906 tons, or 10,524 tons more than in the corresponding half of the previous year. The total goods traffic train miles run during the half-year amounted to 254,682, the average load per goods train was 144 tons; if the stone traffic be excluded, this average is reduced to 130 tons, but still shows a satisfactory improvement upon the averages of former years, owing chiefly to the greater volume of national traffic presented for transit. There were increases in all three classes of the passenger traffic, 9,938 more persons having travelled than in the first half of 1897; the number of paying passengers was 396,805, which is larger than in any previous half-year.

**GENERAL.**

"The pools covering competitive traffic under the Mexican Traffic Association have continued in operation during the half-year, and the separate pools between the company and the Inter-oceanic Railway have been renewed until June, 1899. The pools between the four railway companies expire at the end of this year, and the question of a new agreement for 1899 is to be shortly considered. Pooling relations have generally continued to be harmonious, with the exception of those covering business originating in the Western Territory of the United States, dissatisfaction having been expressed by one of the companies concerned with the terms fixed for the pooling of this business under the arbitration referred to in the last report. It is hoped that the conference to be shortly held will result in an arrangement by which these differences will be adjusted to the satisfaction of all the companies.

"The average sterling value of the dollar in the half-year was 22.25 pence, against 24.07 pence in the corresponding period of 1897. The latest quotation represents a value of about 23.25 pence per dollar.

"The works for the improvement of the Harbour of Vera Cruz have been carried on by the Government contractors, Messrs. Pearson and Son,

with great activity during the half-year. The depth of water over the whole area of the harbour is now sufficient for the largest vessels, and although the full advantages to be ultimately provided are not yet available, sufficient progress has been made to indicate the value of the facilities which will be afforded to the shipping trade of the port when the works are completed. The work was begun at the close of 1896, and up to September 22nd last the company had hauled for the contractor 817,679 tons of stone from the quarries at Peñuela to Vera Cruz. According to the original estimate made when the contract was entered into, the work was expected to occupy five years, so it may be assumed that two years more from the end of 1898 will elapse before it is finished.

"The consideration of the details of the uniform classification for national goods, and its adoption by all the railways, is occupying the attention of the Government, and in order to render the wording of the company's concessions applicable to the proposed sub-division of the existing three classes, with their respective rates, into twelve or such number as may be advisable, it has been found necessary to alter the corresponding clause in the concessions relating thereto. The board will, therefore, seek formal authority from the shareholders to accept such modifications as may be required in this respect."

#### CITY OF DUBLIN STEAM PACKET COMPANY.

The profit and loss account for the half-year ending August 31st, 1898, shows:—*Cr.*, Balance from last half-year, 1,228*l.*; receipts of all the company's steamers on the Holyhead Liverpool and Belfast lines, and dividends on investments, 86,615*l.*; Post-office payments, 49,000*l.*; total, 136,843*l.* *Dr.*—Working expenses on the Liverpool Holyhead and Belfast lines, port charges, insurance, repairs, and establishment expenses at Dublin, Liverpool, and Holyhead, 83,513*l.*; charter money to Steamship Building Company, 7,627*l.*; interest on mortgage loan, 6,125*l.*; City of Dublin Junctions Railway guarantee, 1,500*l.*; mortgage loan sinking fund, 8,000*l.*; depreciation, renewal, and repairs funds, 23,129*l.*; balance, 6,949*l.*; total, 136,843*l.* The report states:—

"The company's trading lines have been satisfactorily carried on during the half-year; the directors have ordered a new screw-steamer for the Liverpool line from Messrs. Blackwood and Gordon, who have built the four screw-vessels already employed. The new vessel, which will be named the *Cork*, is to be delivered in April next; she will be similar in general arrangement to the other vessels, but will have accommodation for a considerably larger number of passengers than the *Kerry* and *Carlow*, without reducing the space available for cargo and live stock. The company have, in conjunction with the London and North Western Railway Company, come to an arrangement with Messrs. Tedcastle, M'Cormick, and Company, Limited, which will, it is hoped, prove to be satisfactory. The receipts from all classes of traffic on the Liverpool and Belfast lines show increases. A change has been made in the method of keeping the accounts by charging and crediting all expenditure and receipts to the last day of the half-year, instead of, as formerly, taking into account through rate receipts to July 31st only. This alteration has made the increase appear larger by several thousand pounds than it would otherwise have been, the month of August being a much better month for traffic than the month of February, which hitherto has been included in the corresponding periods; but even when this has been fully allowed for the increase is satisfactory. The receipts from mail passenger traffic show a considerable increase, but are, of course, subject to the same remark as in the last paragraph. The mail service has been well carried out during the half-year. In the session of 1897 strong representations were made by the Irish members of Parliament to the Postmaster-General urging upon him the necessity of accelerating the Irish day mail service on land, and making the hours of departure from Dublin and London more convenient than the very early hours then existing; and the Government appointed a Departmental Committee to investigate the matter; the committee held its first meeting in December last year in Dublin, examined witnesses from the companies and others concerned, and subsequently held sittings in London; the week after the last half-yearly meeting of this company two reports were issued, one signed by the chairman (Mr. Thomas Robertson) and Mr. Patrick O'Brien, M.P., and the other by the two remaining members of the committee; these reports differed materially, but the former was strongly in favour of the improvements asked for by the Irish members. It appeared from it that the London and North Western Railway Company had agreed to accelerate the day mail trains by half an hour, and that at the request of the committee the directors of this company had agreed to give an acceleration on the sea service of fifteen minutes without charge, thus making a total acceleration of forty-five minutes; and also that the Great Southern and Western Railway Company had agreed to start their down evening train to Cork later, and to arrive at the same time as before. After some weeks Mr. Hanbury, the Secretary to the Treasury, announced in the House of Commons that the Government were prepared to arrange for this acceleration, the services to start from Euston at 8.30 a.m., and from Westland-row at 8 a.m., but contingent on the Great Northern of Ireland Railway Company agreeing to expedite their down evening train to Belfast by fifteen minutes, and the City of Dublin Steam Packet Company agreeing to give their promised sea service acceleration of fifteen minutes, under contract conditions. Thus, while the London and North Western Railway Company were to receive a subsidy for their acceleration, and the Irish railways were to give their accelerations without remuneration, the City of Dublin Steam-Packet Company were, in addition to giving their acceleration for nothing, to be subject to penalties in the event of there being

any failure on their part to keep contract time. The directors however, determined—although they felt that such a proposal was hardly reasonable—not to allow any obstacle to stand in the way of this much-desired improvement, and agreed to the required condition. The improved services commenced on August 1st, and have since been satisfactorily carried on, and appear to be much appreciated by the travelling public. The directors hope that the company's increased responsibilities will be compensated for by increased traffic.

"As mentioned in the last report, the directors, in consequence of the refusal of the railway companies to issue the revised fares by the mail route between England and stations on the Great Southern and Western and Great Northern of Ireland railways, were reluctantly obliged to bring the matter before the Railway Commissioners. Knowing the delay that often takes place before an application can be heard, the directors were advised to apply to Mr. Justice Murphy for an injunction to restrain the London and North Western, the Great Southern and Western, and the Great Northern (Ireland) companies from continuing the undue preference which they were affording to passengers booking *via* the North Wall route over those booking by the mail route. The London and North Western company did not oppose the motion, which was heard on May 14th, and resulted in Mr. Justice Murphy deciding that he would not deal with the motion until the whole case was heard; but he directed that the hearing should be fixed for June 7th. It should be mentioned that the motion for the injunction was resisted by the Great Southern and Great Northern (Ireland) Railways; the London and North Western Company, who were willing that the proper fares should be issued and the question of division subsequently settled, took no part in the proceedings, and, a few days afterwards, the London and North Western Company served the Great Southern and Western, the Great Northern (Ireland), and this company with a notice stating that they, the London and North Western Company, would put the proper fares in operation on June 1st, and showing how these fares were to be divided, unless a formal objection was lodged within ten days. Neither the Great Southern nor the Great Northern (Ireland) Company lodged any objection to this notice, and on June 1st the object of this company's application was attained by the fares being put in operation and it became unnecessary to proceed further with it, and, by consent, all proceedings thereon were stayed a few days later. This company did not object to the amount of the fares, but they objected to the proposed division. The matter then came into the position originally proposed by the directors of this company—i.e., that the fares should be issued and the division subsequently settled either by agreement or by the Railway Commissioners. The directors very much regret that no agreement on the subject has yet been come to, and they are, therefore, reluctantly obliged to bring the question of division before the Railway Commissioners, and are arranging to do so at the earliest possible date.

"The *Connaught* has been sold during the past half-year, and the balance of her cost appears in the accounts added to the balance of the cost of the three other old mail packets, making in all 184,898*l.* still to be written off on this account.

"After providing for the interest on the mortgage loan, the charter money to the Dublin and Liverpool Steamship Building Company, the guarantee to the City of Dublin Junction Railway, and the mortgage loan sinking fund, the balance at the close of the half-year, including 1,228*l.* brought forward from the previous half-year, is 30,078*l.* Of this the directors have placed 10,000*l.* to the depreciation of the old mail steamers, 2,700*l.* to the renewal fund for the new screw cargo steamers, 5,000*l.* to the new mail steamers' repair fund, and 5,429*l.* to the depreciation of the older cargo vessels, and to writing off the cost of the Holyhead gas works, which were rendered useless owing to the employment of electricity instead of gas in the post-offices of the new mail steamers, leaving a balance of 6,949*l.* out of which the directors recommend the payment of a dividend at the rate of 2 per cent. per annum, free of income-tax, carrying forward 1,089*l.* to the next account."

#### WESTERN RAILWAY OF HAVANA.

##### CAPITAL.

The capital account shows a total expenditure of 990,369*l.*, whilst the receipts amounted to 990,000*l.*—viz., ordinary 10*l.* shares, 600,000*l.*; 6 per cent. mortgage debentures, 394,000*l.* (less 4,000*l.* purchased and cancelled).

In accordance with the provisions of the trust-deed, forty mortgage debentures have been purchased at a price below par, and cancelled under the operation of the sinking fund for the redemption of mortgage debentures.

##### REVENUE.

The accounts for the year ending June 30th, 1898, showed a gross revenue of 109,209*l.* (against 115,299*l.*), an expenditure of 66,297*l.* (against 59,933*l.*), and a profit of 42,912*l.* Adding transfer fees, interest, &c., 131*l.*; profit on exchange, 2,432*l.*, and balance brought forward, 1,538*l.*, the total net revenue was 47,013*l.*, which was disposed of as follows:—Extraordinary expenses (insurance damages, &c.), 19,352*l.*; service of debentures, 27,374*l.*, and taxes, composition of stamp duty, legal charges, &c., 512*l.*, together 47,239*l.*, leaving a balance at debit of net revenue account of 225*l.*

##### TRAFFIC, &c.

The number of passengers carried during the year was 253,422*l.* (against 318,156*l.*); the average receipts per passenger, 2s. 3d. (against 1s. 9d.); the number of train miles run, 289,742 (against 251,004); the receipts per train mile, 7s. 6½d. (against 9s. 2½d.); the expenses per train mile, 4s. 7d. (against 4s. 9½d.); the length of line open, 110 miles in each

year; the ratio of expenses to receipts, 60·71 per cent. (against 52·00 per cent.). The report states:—

"The continuance of the insurrection, followed by the outbreak of war between Spain and America, further devastated the country and paralysed business and enterprise to an unparalleled degree. Under these untoward circumstances, the results of the past year's working may be considered far from unsatisfactory. The property of the railway suffered further damages, although, fortunately, to a much less extent than in the previous year. The cost of working the line during the past year compares unfavourably with 1896-97, due to the condition of affairs existing in the country, and more especially to the fact that a great deal more work was done in the maintenance and restoration of permanent way. This, coupled with the extensive works executed under the heading of extraordinary expenses, has already put the line in good working order, and it is anticipated that a moderate further expenditure will suffice to complete the replacement of rolling stock, stations, &c., destroyed by the insurgents. This latter expenditure is amply provided for by reserve funds in hand; net revenue should, consequently, no longer be required to meet losses occasioned by insurrection and war. When a stable system of Government is established in Cuba a very marked development of the rich resources of the island may be looked for, and the board have every confidence that the railway will participate in the benefits accruing therefrom. The receipts for the sixteen weeks ended October 22nd, 1898, are 35,790*l.*, against 26,720*l.* in the corresponding period last year, both exclusive of receipts for Government services. This increase is a sure sign of the improvement in business already taking place. No progress has been made in the matter of the company's claim against the Spanish Government for compensation for damages to the property caused by the civil war. The claim, which is in the hands of the British Foreign-office, will be followed up. The board have deemed it expedient to again charge to revenue the extraordinary expenses which have been incurred in the repair of damages to the property, and these expenses, with the charges for the service of the mortgage debentures, have absorbed the net revenue. The capital account, as will be seen, is overspent 15,557*l.*, which up to the present has been met out of the reserve funds of the company. It is satisfactory to the board to be able to state that the relations between the company and the Government have continued on a harmonious footing, as also that the payment of accounts for transport of troops, &c., which formed a large part of the past year's business, has been received with great punctuality. Of these accounts \$64,784, outstanding on June 30th, has since been collected, and, consequently, are included in the gross receipts of the year under review."

#### SHARPNESS NEW DOCKS AND GLOUCESTER AND BIRMINGHAM NAVIGATION.

The directors' report for the half-year ending September 25th, 1898, states:—"The tonnages unfortunately show a further decrease in grain, caused as in the previous half-year by smaller imports of wheat from the Black Sea and the River Plate, the result of a bad harvest in Russia and an indifferent one in Argentina. The reduction made last year in dues on grain from North Atlantic ports has secured a few additional cargoes, but the large amount of American grain now carried by liners to competitive ports continues to tell against this company, and this question is engaging the serious consideration of your directors. The tonnages of timber are also less, but it was hardly to be expected that the extraordinary imports of 1897 would be maintained, and the present arrivals are encouraging. Your directors recommend the payment of the half-year's dividend on preference stock A and a dividend of 5 per cent. for the year on preference stock B, carrying the balance, 36*l.* 12*s.* 7*d.*, to the works reserve. The repair to the piers at Sharpness has been satisfactorily completed, and the deepening of the dock is still proceeding. Mr. Henry Waddy, in consequence of advancing age, has retired from the general managership. Your directors accepted his resignation with much regret, and have granted him a pension in recognition of his long and valuable services extended over sixty-one years. Mr. Corbett, for thirty-two years one of your most esteemed directors, generously resigned his seat in favour of Mr. Waddy, who has accordingly been elected a director. Your secretary, Mr. Hubert Waddy, has been appointed general manager, and will continue for the present to perform the duties of both offices."

#### MINAS AND RIO RAILWAY.

The report states:—"The directors submit herewith the accounts and balance-sheet, duly audited, for the year ending June 30th last. Taking the milreis at 27 pence, as usual, the receipts correspond to 226,410*l.*, and the ordinary working expenses in Brazil, including the general manager's salary paid in England, to 162,269*l.*, being an increase of 20,580*l.* in the receipts, and of 11,325*l.* in the expenses, as compared with the preceding year. In addition to the ordinary working expenses, the London charges, and difference in exchange on remittances for stores purchased in this country, there has been charged to revenue the further sum of 14,136*l.*, being balance of cost of new rolling stock required in 1895, material for a second telegraph line, and the remainder of the outlay incurred in enlarging the sawmill, leaving a surplus of 26,421*l.*, against 14,308*l.* last year. The increase in the working expenses is mainly attributable to the lower value attaching to the milreis, the effect of which was to add to the cost of coal and material used, extra work, repairing damage done by the heavy rains, accounting for the greater amount paid in wages. The funding scheme referred to in the circular issued to the shareholders in July was carried out, as announced, and funding bonds to the nominal amount of the guarantee payable for the half-year to June 30th delivered

to the company accordingly. These bonds have been sold at prices averaging a fraction over 77 per cent., the total realised amounting to 46,999*l.*, which, after providing for debenture interest and sinking-fund, admits of the payment of a final dividend on the share capital at the rate of 4 per cent. per annum, making, with the interim dividend paid in May, 5 per cent. for the year. The directors, therefore, recommend payment at that rate. The suspension of Messrs. Charles Hopkinson and Sons, reported in the circular before alluded to, is most deeply regretted by those responsible for the conduct of the company's business; the directors are, however, encouraged, by the favourable statement of affairs submitted to the creditors, to hope that a very substantial part, if not all, of the amount involved may ultimately be recovered; should a loss on realisation arise it will be charged against working capital. Messrs. Prescott, Dimsdale, Cave, Tugwell, and Co., Limited, who have opened a branch on the premises hitherto occupied by Messrs. Hopkinson and Sons, offered to at once advance a sum equal to one-fourth of the amount in the bank at the time of the stoppage. This offer the directors accepted, thereby relieving the company from the inconvenience arising from the lock-up of so considerable a part of the working capital. The vacancy created at the board by the retirement of Mr. G. H. Hopkinson has been filled up by the appointment of Mr. F. W. Slade. The general manager reports that, with the exception of a slight accident to a train, caused by a landslip during the heavy rains in January, the traffic has been conducted with regularity and safety.

## Meetings.

### WEST FLANDERS RAILWAY.

A preliminary meeting to the 106th half-yearly general meeting called for the 5th inst. at Bruges, was held on Wednesday at the offices, 10, Moorgate-street, E.C.; Mr. HENRY VERNET presiding.

The SECRETARY (Mr. C. A. Vezey) read the notice convening the meeting, and the report was taken as read.

The CHAIRMAN then said—Gentlemen, the report which you have received through the post, and which we formally lay before the meeting to-day, will at first sight appear to you a little disappointing, for after several years of rising dividends a small reduction on this occasion may have surprised you; but I think that if you consider the figures you will be inclined to take a more favourable view. The report shows that our income from traffic has been larger than in the first half of any previous year, the increase of gross revenue is 2,819*l.*, or 4·20 per cent. above that of 1897, and 6,937*l.*, or 11·40 per cent., above the first half of 1896, so that in the matter of receipts we have at all events not done badly. We are satisfied, moreover, that our lines, works, and stations, as well as our rolling stock, are in a far better condition of maintenance than they were some years ago. We naturally regret that, like most other railways, both in England and on the Continent, our company has found that the greater part of the improved receipts has been this half-year swallowed up by the increased cost of conducting the traffic, and that thus our gross increase of 2,819*l.* only produces a net increase of about 560*l.* On the point of expenses we should like to be able to offer you some comfort as to the future, but we do not yet quite see the end of the rise of salaries, although in the matter of wages we do not anticipate much increase. The aggregate of the latter must, however, vary with the extra mileage run by our trains, which necessarily entails more men or more overtime. The traffics of the current half-year do not, unfortunately, give much hope of equalling those of 1897. Passenger traffic is doing fairly, but goods are showing a considerable deficiency, and the beetroot crop, though late, cannot be expected to give even 50 per cent. of the traffic of last year, though other agricultural produce may partly compensate that loss. In view of this indifferent prospect, we have come to the conclusion that the first half-year must bear its full proportion of the appropriations to the renewals fund and to the sinking fund. In respect of the latter I may remark that the modest sum of 800*l.*, which we propose to appropriate to it, is about 130*l.* more than the amount represented by the difference of 6*d.* on the dividend, and shareholders must remember that the money thus set aside remains their property, and will benefit them ultimately. The board attach great importance to the sinking fund recently instituted and its value to the company must not be measured by the amount hitherto set aside, but it should be considered as a valuable provision for the future and as a sign that we are able out of our earnings to protect our shareholders' capital, and that we are determined to do so. I may add that such a provision was certainly intended by our statutes, although, in the infancy of railway organisation, it may not have been so clearly enjoined as it would be in articles drawn up in more recent times. However, if we cannot give you much reason to hope for increased dividends in the immediate future, nothing which is printed in the report or spoken here should be interpreted as an indication of reduced earning capacity of the railway, or as an abandonment of the prospect of progressive earnings hereafter. We cannot expect to see our traffics go up by leaps and bounds as they have been doing the last six or seven years, but you may feel assured that while doing our best for our staff, whose diligence we are always happy to acknowledge, our efforts will be directed to moderating the apparently inevitable growth of expenses. Gentlemen, with these remarks, I will simply move the resolutions. The first is:—

"That the report now read, together with the statement of accounts for the half-year ending June 30th last, be received and adopted."

Mr. T. J. REEVES seconded the resolution, which was carried unanimously.

The CHAIRMAN—The second resolution is:—

"That this meeting do approve of the resolution for the payment of a dividend on the ordinary shares at the rate of Fcs.6.65 or 5s. 3d. per share, to be proposed at the general meeting to be held in Bruges, November 5th, and payable on the 15th."

Mr. F. R. Y. RADCLIFFE seconded the resolution, which was also agreed to *nem. con.*

On the proposition of the CHAIRMAN, seconded by Mr. REEVES, Major R. H. C. Tuffnell was unanimously elected a director of the company in the place of his late father, Mr. T. R. Tuffnell; and on the motion of Mr. RADCLIFFE, seconded by Mr. C. JANSSEN, the retiring director, Mr. H. Vernet, the president, was unanimously re-elected a member of the board.

A hearty vote of thanks to the chairman and directors for their past services, proposed by Mr. HOUNSON, terminated the proceedings.

### TALTAL RAILWAY.

The annual general meeting was held on Wednesday, at Winchester-house, E.C.; Lieut.-Colonel Sir G. A. LEACH presiding.

The accounts for the year ending June 30th, 1898, showed a gross revenue of \$989,188 (against \$937,809), working expenses amounting to \$583,770 (against \$586,256), and a net revenue of \$405,418 (against \$351,552), equal at an exchange of 17½d. to 29,562*l.* Adding transfer fees 23*l.*, and balance brought in from previous year 2,177*l.*, the total net revenue was 31,762*l.*, and was appropriated as follows:—General charges in London, 2,250*l.*; debenture service, 7,000*l.*; transfer to reserve for maintenance and renewals, 2,500*l.*; sundries, 353*l.*; interim dividend of 1s. 3d. per share, 6,250*l.*; final dividend of 2s. per share, making 3½ per cent. for the year, 10,600*l.*; balance to next account, 3,409*l.* The length of line open was 131½ miles (being the same as in the previous year); number of passengers carried, 17,274 (against 18,214); quantity of nitrate carried, 1,864,467 quintals (against 1,660,914 quintals); total quantity of freight carried, 2,646,385 quintals, or 119,816 tons (against 2,466,520 quintals, or 111,672 tons); train miles run, 155,608 (against 153,574); receipts per train mile, \$6.36 (against \$6.11); expenses per train mile, \$3.75 (against \$3.80); ratio of expenses to receipts, 59.02 per cent. (against 62.51 per cent.). The paid up capital is 500,000*l.* in shares of 5*l.* each, and there are 5 per cent. debentures outstanding to the amount of 93,600*l.* The report stated:—

"The Nitrate combination referred to in the last report came to an end in October, 1897. Since then prices have remained very low, but, on the other hand, their low range has stimulated consumption, and the traffic has increased 203,553 quintals. Under this company's agreement with the Lautaro Nitrate Company, the existing traffic contract will continue a second period of ten years. There was a substantial increase in the gold ore traffic, but, unfortunately, this was more than counterbalanced by the decrease in the quantity of silver ore carried, owing to the mines not proving as remunerative as was expected. Copper ores again show an increase.

"The rate of exchange stood at 17d at the close of our financial year, but the average rate for the year has been rather over 17½d. The apprehension of war between Chili and Argentina, and a further issue of paper money by the Chilean Government, combined with other circumstances, have since caused a heavy fall in the rate of exchange, which for a short time touched 12½d., and is still below 14d. This fear being now happily to a large extent removed, it is to be hoped that the rate will again gradually improve."

The CHAIRMAN, in moving the adoption of the report and accounts, said the traffic over the line had somewhat increased during the past year, with the result that the board were able to recommend a declaration of a rather larger dividend than at the last meeting. It was only a small increase, but still it was a change in the right direction, and he hoped next year that the dividend might show a further improvement. The constant aim of the board had been to encourage traffic and develop the resources of the district, and, to some extent, their efforts had been successful. The growth in the traffic of the railway in the twelve months had been mainly in what he might call their staple industries—the conveyance of coal to the oficinas in the interior and the carriage of the manufactured nitrate from the oficinas to the port for shipment. In both these items the improvement had been at the rate of about 12 per cent. He regretted that the nitrate trade was still somewhat depressed, and prices were very low, but, on the other hand, the lowness of prices had stimulated consumption, which was, of course, in their favour, and as their principal customer—the Lautaro Nitrate Company—had one of the most extensive nitrate fields in Chili he thought they might reasonably expect that their traffic would grow rather than diminish. Their present traffic arrangement with the Lautaro Company would continue for another ten years. It was a matter of considerable regret to the board that the Julia Nitrate Company had again come to grief, owing, in part, to the failure of its water supply. Efforts had been made to reconstruct that company, but hitherto without success. There could be no doubt that the Julia Company possessed a valuable property, and he could not believe that it would be allowed to go to ruin. By the expenditure of some capital the water difficulty might, he thought, be overcome, and if the oficinas were again opened the traffic to the port must be carried over their line. There had been a reduction of 14 per cent. in the mineral traffic, which, however, was always more or less uncertain. The directors anticipated that during the past year there might be a falling-off in the gold-ore traffic, and an increase in the silver-ore traffic, but the reverse had been the case. The latest accounts from the principal silver mine in the locality—the Arturo Prat—were most favourable. It was reported that two good finds had been made, and if that proved to be true it would be

an important matter as regarded this railway, for not only would they have more mineral traffic to bring down to Taltal, where all the ore was treated, but on the prosperity of the mines depended to a large degree their upward traffic. It was a satisfactory feature that, although the traffic had increased, the working expenses had slightly decreased. The expenditure on capital account for the year had been very small. The railway had been kept in good order and had been well maintained, and their water supply, which had been always one of their difficulties, had been sufficient in quantity, though the quality remained bad, which rendered their locomotive repairs costly. It was to be regretted that the Chilean Government had given up its gold currency, which was so recently established. As the result of the issue of a large amount of paper dollars there had been a serious fall in the rate of exchange. It was to be hoped that as the war scare was passing away a recovery would take place in the rate of exchange, but that recovery must, he thought, be very gradual. Instead of dividing their profits up to the hilt the board had thought it desirable to strengthen the reserve fund and to carry forward a substantial balance (3,409*l.*) in order to be prepared for any contingencies which might arise.

Mr. W. R. HENDERSON, who seconded the motion, said that he recently visited the railway and had nothing to report regarding its condition or the working of it that was not satisfactory.

The report and accounts were then adopted.

A final dividend of 2s. per share, making the total distribution for the year equal to 3½ per cent., was then declared.

### CARRIZAL AND CERRO BLANCO RAILWAY.

The half-yearly general meeting of the English shareholders was held on the 27th ult., at Liverpool; Mr. STEPHEN WILLIAMSON presiding.

The CHAIRMAN said—Gentlemen, I regret the business of the company during the six months ending June 30th last, as shown in the report recently circulated amongst the shareholders, does not compare favourably with that of the previous half-year, when it was my pleasure to put before you an important increase in traffic. The comparison, however, with the corresponding period to June 30th, 1897, is slightly in favour of the present time in the gross receipts, which amounted to \$153,015, compared with \$151,485, or an increase of 1,530*l.*, but the working expenses, which amounted to \$88,237 (as against \$84,805), show an increase of \$3,432, so that the net revenue shows an adverse balance of \$1,902. There is no important feature in the traffic carried. The goods traffic proper shows an increase of \$3,480, but then there is a decrease of \$2,051 in miscellaneous items. The carriage of Manganese again gives an increase, but this time only a moderate one, amounting to 458 tons, against an increase of 1,965 tons to June 30th, 1897. The decline in the carriage of this commodity is mainly due to the advance in freights which prevented its free shipment, as the profit on this article is only small, and at the end of the half-year under review there was still a large quantity stored at the port waiting tonnage at suitable rates, so that even what had been carried over the line had not to a considerable extent found its way to the consuming markets. The manager recommended that \$5,000 be credited to the fund for repairs, which has accordingly been passed to that account, and an amount of \$8,000 has been credited to the sinking fund for the redemption of the 7 per cent. sterling loan. This originally stood at 8,000*l.*, but, deducting the amount redeemed on April 1st last of 3,500*l.*, the balance remaining is only 4,500*l.* The directors decided not to draw further bonds at present owing to the disturbed state of finance in Chili, which I will refer to later. The net result of the working for the half-year gives a total of \$41,390, to which must be added \$6,402, making a total of \$47,792, out of which the directors have declared a dividend of 3 per cent., or equal to 6 per cent. per annum, carrying forward to current half-year \$2,378. This dividend compares with 5 per cent. per annum for the corresponding period, or an increase of 1 per cent., but shows a decrease compared with that of second half of 1897, when a distribution of 3½ per cent., or equal to 7 per cent. per annum, was made. The directors have decided not to remit the amount for the dividend for the present, in view of the financial difficulties which Chili is, unfortunately, now passing through. The long protracted dispute with the Argentine Government with respect to the boundary question caused a short time ago a run on the National Bank of Chili, and forced the Government to have recourse to paper currency again. This was much to be deplored, seeing that the conversion scheme had proved so successful, and maintained a steady exchange for some time. The immediate result was a heavy fall in the exchange from 17½d. to 12½d., and a great dislocation of trade also resulted. Under the circumstances it is, no doubt, wise to defer the remittance of the dividend until a later date, when it is to be hoped the rate of exchange will have improved considerably. The directors do not expect the present condition of affairs will affect the company's receipts to any extent, as the freights are collected at a fixed exchange of 24½, and meanwhile the price of copper continues to improve, which should give encouragement to the mine owners.

### COPIAPO RAILWAY.

The annual general meeting of the English shareholders was held on the 27th ult. at Liverpool; Mr. HENRY STOKES presiding.

The CHAIRMAN said—Gentlemen, although the business proper of this meeting is to elect directors of the local board for the ensuing year, I propose, as customary, to briefly refer to the business of the company for the past year, which ended December 31st, 1897, the general report for that period having already been circulated amongst the shareholders. In the net result there is very little difference from that of the preceding

year, for, whereas a decrease is shown in the gross receipts, this was compensated for by a slight decrease in the expenses. The gross receipts amounted to \$643,557, compared with \$660,092, a decline of \$16,535; the expenses being \$458,549 against \$476,821, a decrease of \$18,272, and giving a net income for the year of \$185,008, against \$183,271. Respecting the traffic over the line the only features needing remark are, first, the decline in the carriage of silver produce of \$40,586, due to the low price ruling for that metal in the consuming markets, and the increase in the carriage of copper produce, amounting to \$29,731, the value of this commodity having been well maintained during the year. Turning to the working expenses, we find a decrease of \$15,575 in maintenance and renewal, owing to the reduced expenditure in new rails, the previous year having had to meet a considerable outlay on this account. Altogether the expenses work out at 71½ per cent., as against 72½ per cent., so showing but little relief from the high rate of working in the previous year. To the net income already stated of \$185,008 has to be added \$35,513 brought forward, making a total of \$220,521, out of which four quarterly dividends of 1 per cent. each have been paid, absorbing \$168,000, and leaving a balance of \$52,521 carried to the accounts of the present year. Respecting our claims against the Chilean Government, which year after year it has been my duty to bring before you, I am still unable to afford you any satisfaction. Some change has certainly taken place during the year under review with respect to the legal proceedings, but only that of moving the case to a higher court. This may probably, however, expedite the matter to some extent. Referring to the proposed extension of our line, which project I touched upon when I met you twelve months ago, you would find at the end of the general report an account of the definite survey made by the engineer of the company, Mr. Henry Budge, together with a plan of the district. The matter is under the consideration of the directors, but in view of the disturbed state of politics and finance in Chili at the present time I do not expect it can be practically dealt with for some considerable time. Turning for a few moments to the business of the present year, we have had the figures for eight months up to the end of August. I regret they compare very unfavourably with 1897, the net amount being \$113,983, against \$142,881. Two quarterly dividends of 1 per cent. each have been declared, and that for the second quarter becomes payable on the 4th of next month. For some considerable time affairs in Chili, both political and financial, have been in a most unsettled condition, owing to the long-protracted dispute with the Argentine Government, which has caused great disturbance in trade, and this company's business has suffered in consequence. Early in July last a monetary crisis unfortunately occurred, when, owing to a heavy run on the Bank of Chili, the Government were again forced to have recourse to paper currency, the immediate effect of which was to cause a fall in the exchange from 17½d. to 12½d., and only a small advance on the lower figure has up to the present taken place, standing now at 13½d. This is much to be deplored, seeing that the conversion scheme had been so successfully carried out on a basis of 18d., and a steady exchange having been since maintained. The directors are giving their earnest attention to the freights and fares, with the view to a revision being made to meet the altered circumstances.

#### MEXICAN SOUTHERN RAILWAY.

The annual general meeting was held at Winchester-house, E.C., on Monday; Sir George E. PAGET presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said the year's working had resulted in an improvement in the revenue account of 4,403½, made up of 1,234½ from increased receipts and 3,169½ from reduced working expenses. Including the balance of 7,891½ brought forward, the income for the year had been 73,829½; and after providing for interest on the first and second mortgage debenture stocks, with sinking fund on the latter, and other charges, the sum available was 24,430½. They had placed 5,000½ to a renewal and contingency fund, and they recommended a dividend on the ordinary stock at the rate of 1½ per cent. per annum, leaving 6,930½ to be carried forward. He felt that they must congratulate themselves on the result of the working of the past year. The working expenses had been 67 per cent., which might appear to some to be a high percentage, but he did not think that that was so on their line, taking all things into consideration. The gross receipts were very small—about 4½ per mile per week; and with regard to expenditure they had to meet a large outlay for coal, which cost them about 2½ a ton. The renewal of their sleepers was also a constant source of expense. His son, Mr. C. W. Paget, had been over the line twice, and he spoke very well of its maintenance, as well as of the condition of the rolling stock. The opinion expressed by his son coincided with that of their general manager, Mr. Morcom, as to the laying of the railway with steel rails. He afterwards referred to a line 18 miles long—the Carbonifero—which ought to be very profitable to them, and which they had arranged to work on a satisfactory basis. Nothing further had been done about the Ejutla branch, but he hoped that it would be made by private enterprise. He could not recommend the shareholders to find the money to construct it, but they would be ready and willing to work it on reasonable terms. The Government had also made a road of 33½ miles through a district which was largely planted with coffee, and from which they hoped to derive benefit. The hotel accommodation at Oaxaca was formerly very bad, and they had thought of building an hotel there, but he was glad to state that the latter had now been taken up by private enterprise. They could not report very favourably up to the present as regarded the current year's working, but they hoped for better results as the year went on.

Mr. ALEXANDER YOUNG seconded the motion, which was agreed to.

#### BUENOS AYRES GREAT SOUTHERN RAILWAY.

An extraordinary general meeting was held on Thursday, at the offices, 6, Finsbury-circus, E.C.; Mr. FRANK PARISH presiding.

The SECRETARY (Mr. H. C. Allen) read the notice convening the meeting, and the minutes of the last meeting, which were confirmed.

The CHAIRMAN then said—Gentlemen, this meeting has been called for the special purpose set out in the notice. It is a purely formal matter—to ask you to pass a resolution authorising the conversion of the different shares which were issued in exchange for the Ensenada property and assets and purchase of that railway into preference and ordinary stock, as set out, each of them, in the notice. Shall I read the notice again?

The SECRETARY—If you read the resolution it will be sufficient.

The CHAIRMAN—Then I move:—

“That the 66,000 new ordinary shares of the company, numbered 225,001 to 291,000 inclusive, and the 55,200 5 per cent. non-cumulative preference shares of the company, numbered 300,001 to 355,200 inclusive as issued, credited as fully paid up, to the Buenos Ayres and Ensenada Port Railway Company, Limited, upon the acquisition of the undertaking and assets of that company, be and the same are hereby respectively converted into the existing ordinary stock and 5 per cent. non-cumulative preference stock of the company, in accordance with the Article No. 4 of the special resolutions of the company of April 20th and May 5th, 1898.”

Mr. R. J. NEILD—I beg to second that resolution.

The resolution was put and carried unanimously, without discussion.

The CHAIRMAN—Gentlemen, I thank you for your attendance. I don't know that there is any occasion to explain anything further.

#### BURRY PORT AND GWENDRAETH RAILWAY.

The half-yearly general meeting of the Burry Port and Gwendraeth Valley Railway Company was held at No. 1, Great Winchester-street, E.C., on Monday; Mr. GEORGE HERRING presiding.

The CHAIRMAN moved the adoption of the directors' report and accounts. It would, he said, be seen that they had brought forward a scheme whereby their debentures were increased from 50,000½ to 80,000½. Of this sum 25,000½ was to be devoted to improvements and repairs, and 5,000½ applied to the payment of necessary expenses. They had also increased the second debentures from 40,000½ to 60,000½, and they hoped, in spite of that increase, to pay part, if not the full, interest on the debenture stock. The directors had now practically settled all the expensive litigation which had to so great an extent interfered with the payment of debenture interest. Major Pilkington had taken the vacancy on the board caused by the resignation of Mr. Cane. The board in obtaining new directors were glad to get those who, prior to the scheme of arrangement, did not feel inclined to join them.

Major PILKINGTON seconded the motion.

A SHAREHOLDER asked whether the new debentures under the scheme were terminable or perpetual.

The CHAIRMAN said they were perpetual.

The motion was adopted.

#### TONGOY RAILWAY.

The half-yearly general meeting of the English shareholders was held last week in Liverpool; Mr. A. C. MITCHELL presiding.

The CHAIRMAN said—Gentlemen, it is necessary to call the present meeting of shareholders to comply with the statutes, but there remains little to add to the report, which all shareholders would receive a short time ago. The remarks made by the directors fully explain the unfortunate position of the company and the causes. Each half-year's working but adds to the debit balance, and must soon end in a stoppage of the traffic. In view of this lamentable state of affairs, strenuous efforts are being made to persuade the Chilean Government to purchase the company's property, and in order that no delay should take place through insufficient authority, the directors requested that proxies might be sent to them as early as possible. No time was lost in attending to this request, and proxies were obtained representing over two-thirds of the holding on this register, and have been despatched to Valparaiso. I can only hope these efforts may prove successful, but must say I fear the condition of affairs in Chili renders it doubtful at the present time.

There was no formal resolution before the meeting.

#### SAN PAULO (BRAZILIAN) RAILWAY.

The half-yearly general meeting was held yesterday at the Cannon-street Hotel; Mr. M. R. SMITH presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said the report was on the whole satisfactory. During the six months the company suffered from a lower average rate of exchange than at any previous period in the whole history of the line; and this was accompanied by a decrease in the passenger and goods traffic attributable to the great commercial depression throughout the country. The fall in exchange, and the consequent rise in prices of all commodities, had contributed to increase the working expenses. He confessed he had felt somewhat anxious about their future; but the wise financial measures recently taken had put an entirely new phase upon the matter, and had had a most gratifying influence upon the exchange, which now stood at 8½d., as against its lowest point—5½d.—a rise of 50 per cent.; that meant that for every 100½ previously got at 5½d. they now got home 150½, and there was a distinct upward tendency. The directors, however, did not propose to divide the profits up to the last shilling, but to carry forward 32,000½ as a measure of prudence. He went on to explain that their new works

were proceeding satisfactorily. Their superintendent told them that they were to expect an average half-year; and if they got the present rate of exchange they would be likely to show a good return; while if it rose it was probable that in existing circumstances their prospects would brighten. The motion, having been duly seconded, was put to the meeting and carried.

## Directors' Reports.

### INTEROCEANIC RAILWAY OF MEXICO.

#### CAPITAL.

The capital account to June 30th, 1898, shows an expenditure of 4,861,764*l.*, whilst the receipts have been 4,920,876*l.*—viz., ordinary shares, 1,700,000*l.*; preferred shares, 7 per cent. cumulative, 1,000,000*l.*; 7 per cent. B debenture stock, 469,459*l.*; 7 per cent. A debenture stock, 735,392*l.*; 4 per cent. debenture stock, 599,886*l.*; prior lien debentures, 400,000*l.*; subvention, 16,139*l.*

The expenditure on capital account for the year amounted to 63,631*l.*, which includes rebate on 71,340*l.* 4 per cent. debenture stock sold during the year at an average price of 75*l.* 16*s.* per cent. net.

#### REVENUE TRAFFIC, &c.

The accounts for the year ending June 30th, 1898, show a gross revenue of \$3,033,209 (against \$2,539,448), and an expenditure of \$2,305,178 (against \$1,957,723), leaving a profit of \$728,031, equal to 65,500*l.* Adding sundry credits 178*l.* and balance brought forward 294*l.*, the total net revenue was 65,971*l.*, which is appropriated as follows:—Interest on prior lien debentures, 20,000*l.*; interest on 4 per cent. debenture stock, 22,389*l.*; sundries, 49*l.*; payment of 3 per cent. on the 7 per cent. A debenture stock, 22,062*l.*; balance to next account, 1,471*l.*

The number of passengers carried during the year was 1,075,943 (against 987,614); the quantity of goods carried, 540,804 tons (against 513,640 tons); the train mileage 1,326,486 (against 1,204,312); the receipts per train mile, \$2.29 (against \$2.11); the expenses per train mile, \$1.74 (against \$1.63); the profit per train mile, \$0.55 (against \$0.48); the ratio of working expenses to receipts, 76.00 per cent. (against 77.09 per cent.); the average length of line worked, 555 miles (against 549 miles); the length of line in operation at the close of the year, 555 miles (against 555 miles). The report states:—

"The large improvement in tonnage of building materials, lumber, and railway material is attributable to growing enterprise in the country. The most notable decreases are in coal and sugar; the sugar crop was not smaller than last year, the reduced quantity carried being consequent upon the diversion of some traffic to the Mexico Cuernavaca and Pacific Railway; this line is now open to the town of Iguala, some 40 kilometres south of Puente de Ixtla, the terminus of the company's Morelos line. The general movement of traffic for the last two years has shown a tendency to equalise, more than was formerly the case, the relative volume of up and down traffic, which is satisfactory, since it tends to reduce empty mileage. This is in part due to the improving export trade of Mexico.

"The condition of the permanent way has been materially improved, the number of sleepers put in being 292,271, costing revenue \$224,507.79; the sleepers included 61,980 of steel, and the total number put in exceeds by 59,684 those laid in the previous year. There was an increase of \$114,022 in the cost of coal and wood, of which \$48,270 represents an allowance credited to earnings since July 1st, 1897, to cover cost of haulage, at the rate of 1 cent per ton per mile for coal and 1 cent per cord per kilometre for firewood. The remaining \$65,752 represents an actual increased cost of 15 per cent., partly due to the larger number of train miles run, but more so to enhanced cost caused by the Spanish-American War (which affected freights), and to the strike of colliers in South Wales. The market price of firewood in Mexico increased almost proportionately to that of coal.

"In the last annual report the proprietors were informed that, including the extension of the pier rendered necessary by the Port Works at Vera Cruz, the funds at the disposal of the board would not suffice to meet disbursements on capital account, and that it would be necessary to ask the debenture stockholders to place under the control of the directors the special reserve of 100,000*l.* 4 per cent. debenture stock, created by the scheme of arrangement, for future necessities. On February 21st last a meeting was accordingly held, when the debenture stockholders consented to this request.

"The board had, a short time before the debenture-holders' meeting, decided upon the construction of a line of 39½ miles in length to connect the Morelos and Matamoros branches, reports received from the management in Mexico having satisfied them that this connection would prove most beneficial to the company. The new line should do much to stimulate the development of the district it will serve, which is reported to be very fertile, there being already considerable produce and several important sugar factories; there are also minerals and large timber forests which have never been worked. The accompanying map shows the intended connection (in red) and it also shows the Cuernavaca and Pacific Railway (in blue) with which it is proposed to make a junction at Zacatepec. Government and State subventions, contributions of land and cash from landowners, and materials which will be made available by taking up the last 10 miles of track on both the Morelos and Matamoros lines (dotted black on the map), will, it is estimated, reduce the cost to the company of this new line to 30,000*l.* It has been decided to take up the rails for the 10 miles beyond Zacatepec, as competition would prevent the profitable working of this piece of road; the 10 miles at the end of the

Matamoros line will also be taken up, the cost of its maintenance being very heavy owing to the nature of the soil, whilst the traffic of the district now served by this portion of the line will still be carried by the company. From Zacatepec the distance to Vera Cruz will be 87½ miles shorter over the new line than *via* Mexico, and 12 miles shorter than by the broad gauge route. The company will, therefore, be placed in an advantageous position to obtain traffic from the Zacatepec district destined for Vera Cruz or Puebla, the distances to the latter being—*via* Interoceanic new line, 143 miles; *via* Mexico and the broad gauge lines, 217 miles. The work of construction will not be commenced until all the formalities connected with the subventions and contributions have been completed. All the materials for the extension of the company's pier have now been shipped, and good progress is being made with the erection. Including the new line, the completion of the pier and new rolling stock (which the increasing traffic has rendered necessary), the balance of expenditure arranged to be incurred on capital account is estimated at about 65,000*l.*

"The improvements which the Government are carrying out at Vera Cruz are being actively proceeded with, and the depth of water is now sufficient for large steamers in almost every part of the harbour; the benefit which will eventually result to the trade of the port cannot be fully enjoyed until the works are more nearly completed.

"The pools between the four companies conducted under the Mexican Traffic Association agreement have continued in operation during the year, and as this agreement expires at the end of December next, a conference is shortly to be held to consider the terms of the new agreement for 1899. Pooling arrangements have not been altogether harmonious as regards traffic from the Western States of America, one of the companies being dissatisfied with the existing conditions, but it is hoped that the conference above referred to will result in a final adjustment of such differences. The separate pools between this company and the Mexican Railway Company have been renewed for one year from June 1st last.

"The last annual report informed the proprietors that the members of the Mexican Traffic Association had agreed to adopt a uniform classification of goods and a readjustment of the rates of carriage, but owing to certain formalities which the negotiations with the Government have shown to be necessary on the part of one of the companies, and which it is understood require time to complete, the application of the new classification has necessarily been delayed. The board have every reason to believe that these preliminaries will soon be completed and the formal approval of the Government obtained, thus removing the serious disadvantages which result from the present imperfect classification and corresponding rates."

**The Alleged Victimising of Railway Servants.**—Sir Courtenay Boyle, of the Board of Trade, writing to Sir Joseph Leese, M.P., who, at the request of the Accrington railwaymen, had drawn his attention to the alleged victimising of railwaymen who take a prominent part in the agitation, says the railway companies, one and all, deny that any dismissal or punishment has been inflicted on any servant because of his belonging to the society or taking part in deputations. The men now ask for a Parliamentary Commission, but this cannot be considered till Parliament meets. Parliament will hesitate to inquire into the discharge or removal to other work of a railway servant, except upon clear *prima facie* evidence that it was caused by improper motives; but if the men will furnish the Board of Trade with evidence showing a connection, or reasons for believing there is a connection between the action of any man in regard to the society and this punishment, the Board will carefully inquire into it.

**Glasgow Central Station.**—We understand that arrangements have now been practically completed for the extension of the Central Station of the Caledonian Railway. For some time past the railway company have been purchasing property on the south side of Argyle-street immediately to the east of Oswald-street, and they are now in a position to take the necessary steps to provide additional accommodation for their rapidly increasing passenger traffic. The intention is to throw a new bridge across the river to the west of the existing bridge, and to erect an addition to the present station on the ground which they have just acquired. From the new station, which would have its principal entrance in Argyle-street, the local traffic would be worked, and a remedy would thus be provided for the congested condition of the existing station. The scheme has already been under the consideration of a committee of the town council, and it is understood that a Bill for carrying it into effect will be brought before next session of Parliament.

**EPPS'S COCOA.**—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homoeopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

Nov. 8—Western Railway of Havana (Annual), 3d, Coleman-street, E.C., at 2.

Nov. 9—Sharpness New Docks, &c. (Half-yearly), Gloucester, at 1.

Nov. 11—Manitoba and North Western Railway (Bondholders), City Terminus Hotel, at 12.

Nov. 11—Mexican Railway (Half-yearly and Special), City Terminus Hotel, at 2.30.

Nov. 14—Interoceanic Railway of Mexico (Annual), Winchester-house, at 12.30.

Nov. 17—Waterford and Central Ireland Railway (Half-yearly), Dublin, at 3.

Nov. 25—Mediterranean Railway (Annual), Milan.

**Bulgarian Railways.**—Reuter's correspondent at Constantinople, writing under date October 28th, says:—"Some time ago the Bulgarian Government decided on the construction of a railway parallel with the Oriental Company's line from Sarambey to Mustapha-Pasha. As this new line would be extremely detrimental to the interests of the Oriental Railway Company, the latter entered into negotiations with the Bulgarian Government with a view to ceding its lease of the lines in Bulgaria to the Government. These lines have a total length of 309 kilometres, and connect Sarambey with Mustapha-Pasha and Tirnovo-Seymen with Yamboli. Negotiations are still proceeding, the parties not having come to an agreement regarding the price to be paid per kilometre, the Oriental Company demanding 4,600*l.* and the Government offering 4,000*l.* The difference is, therefore, only of 600*l.*, and it is believed that a settlement will soon be arrived at. Once this difficulty is adjusted, the Oriental Railway will take the necessary steps to obtain the consent of the Porte to the transfer of the concession, the Porte being, of course, proprietor of the railways in question."

## The Railway Times.

Established 1837.

NOVEMBER 5, 1898.

## SECOND CLASS v. FIRST.

A reason has been suggested for the invariably late appearance of the Board of Trade report upon the annual returns of the railway companies which our regard for the sincerity of the public departments, as some compensation for the leisureliness of their proceedings, makes us hesitate to adopt. It is that, by delaying the report on the previous year's working until the results of the succeeding half-year are published and digested the guarded prophecies which the Board of Trade allows itself are removed, at any rate partially, from the category of events requiring an "intelligent anticipation;" not that the report says much about the second-class which was not apparent on the face of the figures published some months before. The increase of 248,000*l.*, or 12.1 per cent. in the receipts of that class is recorded, and on that fact, and the increase of 2,389,000 in the number of second-class passengers, or 4.0 per cent. more than in 1896, Messrs. Bateman and Hopwood remark that "it would seem . . . that the movement in the "direction of the abolition of this class of traffic has "ceased, at least for a time." The italics are ours; but the qualification may well be noted as implying the recognition by the statisticians of the artificial means exerted to bring about the results quoted. This view is emphasised by the paragraph dealing with season-ticket receipts. "There was," says the report, "an increase "in the second-class season-ticket receipts last year, "it is true, but it only amounted to about 18,000*l.* in all; "and it seems clear, therefore, that the circumstances which "occasioned the increase in the receipts from the ordinary "passengers of this class did not operate as regards season- "ticket holders." The "circumstances" referred to are, of course, the enormous decrease in second-class fares made by nearly all the lines which still hold and practise the view that travelling society divides itself naturally into three classes. Society may divide itself into a dozen classes, but that is no reason why a dozen kinds of rolling stock should be maintained and run for them unless it can be proved that each class is so naturally defined that it is ready to recognise its definition by paying for the distinction; and what it should pay is a sum for its separate accommodation that will reimburse the expenses of maintenance and running plus something by way of profit to the companies equal to that which would be derived from carrying it in the next lowest class. There is no strain of socialism in the statement that it is not acting fairly by the third-class passenger to expect him to pay a greater proportion towards interest on railway capital than is paid by his first or second class brother. The logical conclusion of an argument on these lines would be the establishment of one class, and one class only; and to let those who desire additional space or freedom from uncongenial companions pay an extra fee to secure such advantages. This, however, is too drastic a proposition to receive much attention at the present stage, profitable to the railways though it would undoubtedly prove, and on many lines in America actually has proved. With the second-class, however, the position is otherwise. Public opinion has been educated, and with a growing desire to travel comes the growing necessity of looking at the expense involved, and the consequent resolve to perform the journey at the lowest cost. We yield to nobody in a desire to uphold the social system, but we cannot regard without suspicion such efforts

as have been made in the press to uphold the second-class on that basis. It is noteworthy that there has been no attempt to disprove the figures and facts quoted by us in September in support of our argument that the maintenance of an intermediate class is a source of positive loss to the companies. Columns of loose generalities have been penned to show that the public, by the large acceptance of the reduced fares, is showing its appreciation of what the companies are doing for it. Public appreciation is not to be despised, but it will not pay dividends unless associated with a fair price for a fair article. Charging "what the traffic will bear" is a phrase derived from the goods rate problem which has been imported into the present argument. The premise on which this principle claims to be based for passenger purposes is manifestly unsound. A ton of goods, with certain qualifications, costs much the same to convey from A to B, whatever its nature, within limits; while if the rate exceeds a certain figure the consignment will probably not be sent at all. At the same time, if the railway circumstances are such that the rate cannot be further reduced, and yet is too high to make the transaction profitable to the trader, the railway is simply saved the cost of transport, and all that is lost is the prospective profit. With passenger traffic the conditions are different. Carriages of each class are run on each train, with unimportant exceptions, irrespective of the intention of any particular individual to travel or not, and irrespective of his choice of class. There is thus a superficial advantage gained in inducing the individual to pay for the higher class, however little the increase of fare may be. But although this is charging what the traffic will bear in the sense that if more were charged the higher class would not be used, yet the case would be only parallel with that of the goods if the fare were fixed at a figure to give at least as much profit as the lower class, and, if this drove traffic into the latter (as it undoubtedly did), then the higher-class carriage should not run. When last discussing the question we proceeded on the assumption that all who now travel second would go third-class if the intermediate division were abolished. On the basis of the difference in fares we showed how small a margin was available to meet the expense of maintaining the second-class, with all the complications which ensue upon three divisions of traffic. Statistics taken from the reports of various companies were quoted to support this view, and it is obvious that the argument is strengthened by proof that some of the much-vaunted increase in second-class travel was actually due to abstraction from the first-class. For that is what the results of the first half of 1898 show to be the case. Here are the figures of the four companies whose policy has claimed the greatest measure of success:—

TABLE OF RECEIPTS, FIRST HALF, 1898.

Company.	First-class.			Second-class.	
	£	p.c.		£	p.c.
Lon. and South W..	13,300	9.0	.....	10,700	8.4
Lon. and North W..	5,500	2.3	.....	47,000	39.0
Lanc. and York. Ry.	2,000	6.6	.....	29,000	111.6
Great Western Ry.	1,000	0.8	.....	28,200	13.5

TABLE OF PASSENGERS CARRIED.

Company.	First-class.			Second-class.	
	£	p.c.		£	p.c.
Lon. and South W..	25,600	2.1	.....	112,600	5.4
Lon. and North W..	18,500	1.9	.....	491,800	32.6
Lanc. and York. Ry.	9,000	1.9	.....	691,600	91.6
Great Western Ry.	30,000	4.4	.....	275,700	10.3

These tables show conclusively that, side by side with an increase in the gross receipts of the second-class has gone a fall in the revenue of the first-class. Nor is this all. While the proportionate rise in second-class takings exceeds that in the number of passengers carried, and thus points to the

choice of that class by longer distance travellers, exactly the opposite tendency is found in the superior division. Reductions in the receipts are actually accompanied in some cases by increases in the numbers carried, and in every case the average first-class fare received is shown to be less than in 1897. If this does not point to a certain number of first-class passengers being tempted into the lower class by a fare which shows so great a financial advantage to the long distance traveller, we do not know how to explain it. The following table of average fares received exhibits this fact at a glance:—

RECEIPTS PER PASSENGER.

Company.	First-class.			Second-class.		
	1897. d.	1898. d.	Dec. d.	1897. d.	1898. d.	Inc. d.
L.S.W.R....	29.0	27.4	1.6	14.8	15.7	0.9
L.N.W.R....	61.8	59.2	2.6	19.6	21.6	2.0
L. & Y.R....	16.4	15.7	0.7	8.4	9.1	0.7
G.W.R....	45.4	43.1	2.3	18.8	19.4	0.6

There can be little doubt that, if continued, this process must lead to a crisis in the affairs of the first-class, similar to but more important than that which led the Midland to initiate the abolition of the second. At any rate the clear tendency is towards scaling down receipts, and that, be it remembered, at a time of growing expenditure. It would be rather amusing if after laughing at the description of "first and third" with no second on the Midland, the other companies were to come to "second and third" with no first! To disarm the criticism of those who might hazard the reply that the business of the first-class must languish in any event, we append a table showing the results of five lines, two of which, the Great Eastern and South Eastern, have allowed the second-class to take a normal course, while three—the Midland, Great Northern, and North Eastern—have in whole or part abolished it:—

TABLE OF RECEIPTS FIRST HALF 1898.

Company.	First-class.			Second-class.	
	£	p.c.		£	p.c.
Great Eastern Railway	+ 2,000	2.9	.....	— 700	1.5
South Eastern Railway	+ 5,000	5.3	.....	+ 7,600	9.0
Midland Railway	— 1,400	1.3	.....	—	—
Great Western Ry.	+ 2,600	3.4	.....	—	—
North Eastern Ry.	+ 4,800	7.3	.....	—	—

TABLE OF PASSENGERS CARRIED.

Company.	First-class.			Second-class.	
	£	p.c.		£	p.c.
Great Eastern Railway	— 1,300	0.2	.....	— 81,000	3.4
South Eastern Ry.	— 4,300	0.8	.....	+ 43,700	3.6
Midland Railway	+ 11,000	1.8	.....	—	—
Great Northern Ry.	+ 27,000	4.9	.....	—	—
North Eastern Ry.	+ 45,000	10.0	.....	—	—

This table certainly does not show that the first-class is losing its business when allowed fair play, and in several cases it appears that a higher average fare has been received than in 1897. Put in a nutshell, the action of the companies who seek to support the second-class is leading to a very pretty little competition with their own first-class. Bears may feed on their own fat, but they grow thin in time.

## ARGENTINE RAILWAY RESULTS.

With the appearance of the Central Argentine report for the period ending June 30th, 1898, we have before us the complete results of the leading Argentine railways to that date, and the present will, therefore, be a convenient opportunity to review them. The Buenos Ayres Great Southern results to June 30th last we reviewed in detail on Oct. 15th; and it will suffice if we merely include the main features of that company's working in our tables. The gross receipts of the leading companies for the period to June 30th covered by their last published accounts, compared with 1897, were as follows:—

Company.	Gross receipts.	
	1897.	1898.
Argentine Great Western.....	£331,789 ...	£335,432
*Buenos Ayres and Rosario .....	315,035 ...	417,500
Buenos Ayres Great Southern .....	1,400,677 ...	1,519,032
Buenos Ayres Western .....	686,371 ...	608,443
Buenos Ayres and Pacific .....	411,672 ...	358,334
*Central Argentine .....	398,177 ...	530,458

\* For half-year only; others for year.

The results shown by the three largest undertakings are very satisfactory, indeed, for both the Rosario and Central Argentine companies, though their figures only cover six months' working, show increases of 102,000*l.* and 132,000*l.* respectively. The Great Southern Company's addition of barely 119,000 for the year looks small beside these figures, but it must be remembered that it showed improvement in 1896-7, whilst the others then had a large falling off in traffic; and, moreover, the Great Southern's figure for last year was a record. In fact, the Great Southern was the only leading Argentine railway, except the Argentine Great Western, showing an increase in its traffic for 1896-7 and able to pay a higher dividend. The Buenos Ayres Western again shows a poor result, for its receipts in 1896-7 fell off by 26,452*l.*, and its net profit for that period actually declined by 61,796*l.*, working expenses having shown a considerable increase. Notwithstanding that poor showing the receipts for 1897-8 fell off by a further 77,928*l.*, and this, too, in spite of an additional mileage open of 107 miles. This result is mainly attributable to the poor maize traffic, which fell off by 66 per cent.—a loss arising from the partial destruction of the crops by locusts, and from increased competition for that traffic by the Great Southern Company's extensions. In this connection it is interesting to note that two of the directors of the Buenos Ayres Western are also on the board of the Great Southern Company. The Buenos Ayres and Pacific had to face a decline of 53,300*l.* in gross receipts, again largely due to the loss of grain traffic, which fell off by 66·41 per cent. The Argentine Great Western had a slight increase in gross receipts, but its net results were not so satisfactory. In our next table we show the net receipts for the same periods as before:—

Company.	Net Receipts.	
	1897.	1898.
Argentine Great Western .....	£165,268 ...	£148,729
*Buenos Ayres and Rosario .....	126,486 ...	201,151
Buenos Ayres Great Southern .....	866,599 ...	934,398
Buenos Ayres Western .....	355,774 ...	280,855
Buenos Ayres and Pacific .....	189,026 ...	160,645
*Central Argentine .....	171,595 ...	281,272

\* For half-year only; others for year.

The best result is shown by the Central Argentine, which has managed to add nearly 110,000*l.* to its net receipts out of a gross increase of 132,281*l.* Such a favourable result has been accompanied by a reduction in the ratio of expenses from 56·90 per cent. to 46·98 per cent. This enables the company to declare an interim dividend at the rate of 3½ per cent., whilst the substantial balance of 75,992*l.* is carried forward, against 1½ per cent. with 45,986*l.* forward a year ago. Since June 30th the traffics of the company have shown further increases and previous records broken. For forty-three weeks of 1898 the published increase is 184,457*l.*, representing an increase since June 30th of 52,000*l.*, so that there is likely to be a still further improved dividend this half-year. Next to the Central Argentine the Buenos Ayres and Rosario shows the best net result—a net addition of 74,665*l.* being secured in the past half-year, and the ratio of expenses being reduced from 59·85 to 51·83 per cent., nearly three-fourths of the increased gross receipts being retained as an addition to net profits. The Buenos Ayres Western was only able to make a very small reduction in its expenses so that the net decline of 75,000*l.* was nearly as large as its loss in gross revenue during 1897-8. The report frankly stated that the past

year had in many respects been "the most unsatisfactory since its formation." As a result the dividend paid was only 4 per cent. on the ordinary shares against 6 per cent. in 1896-7, whilst the deferred shares get nothing, against 1½ per cent. for 1896-7. Fortunately, there is some improvement indicated in the traffic returns of the current period, The Buenos Ayres and Pacific showed a net decline of 28,400*l.*, but the loss in gross receipts was much larger. a saving in expenditure of 24,956*l.* having been effected. Nothing, however, is paid on the preference stock (which is cumulative) against 3¼ per cent. paid for 1896-7 on account of arrears. With the improvement in traffics this stock should be a promising enough purchase at 86—its present price. The now familiar paragraph again appears in the reports to the effect that nothing has been settled with regard to the new central station in Buenos Ayres, the subject being still "under the consideration of the national Government." Meantime, severe losses are being sustained by several companies in consequence of the arbitrary conduct of the Government in causing the rails to be taken up between the Retiro and central stations after the destruction of the latter by fire in February, 1897. The Buenos Ayres and Pacific complains that its local passengers are now being carried by the tramways, and the Central Argentine also complains of loss of passenger and goods traffic in consequence of the Government's action. In the past few months two important absorption schemes have been carried through. First, the Buenos Ayres Northern, leased by the Central Argentine in perpetuity at an increasing rental, the maximum of which has now been reached, has been purchased; and, secondly, the Buenos Ayres and Ensenada Port, together with its satellite, the Buenos Ayres Ensenada and South Coast are being absorbed by the Buenos Ayres Great Southern, and are now being worked by the latter as from July 1st, pending completion of legal transfer formalities. On the whole, the past year has not been a particularly favourable one for the Argentine railways, and where improvements are shown in our tables they merely represent, for the most part, recovery of traffic lost in 1896-7. The one favourable point has been the decline in the gold premium, so that last half-year the sterling value of the paper dollar increased from 1*s.* 4*d.* to 1*s.* 6*d.* Latterly the gold premium has again declined to the lowest level which has existed since the Baring crisis in 1890, and the current rate is 142 per cent., against 185 a year ago. This improvement in the economic position, together with the better prospect of peace being maintained with Chili since the new Government came into office, seems to promise that the growth in traffics already shown by most companies will be maintained throughout the current period.

## THE OTTOMAN RAILWAY OUTLOOK.

On Saturday last the *Statist* called attention to the lugubrious outlook for the Ottoman Railway Company. Over a month before—viz., on September 24th—THE RAILWAY TIMES, interviewing the position of the undertaking, said: "Unfortunately, the position of the company is such as to render default one of the most likely occurrences of the next year or two," and we pointed out that the board had missed a fine opportunity for putting the company upon a sounder financial basis in the previous period of comparative prosperity, as we urged them to do as long ago as September, 1897. At the date of our article of September 24th the decline in traffic for the current half-year amounted to 28,759*l.* Now it amounts to 63,842*l.* for seventeen weeks, and by the end of the year the situation is likely to be much worse. At June 30th last a debit balance of 16,552*l.* was carried forward after meeting the fixed

charges of the company for the first half of the current year. The surplus profit for the whole year 1897 was only 59,960*l.*, so it is not easy to see how the company can possibly avoid having a considerable deficiency in the sum required to meet obligatory charges, and, of course, the prospect of anything whatever being available for the shareholders is quite out of the question. At the present date it looks as if the company is already some 20,000*l.* or so short in its fixed charges, and, at the recent rate of traffic declines, that deficiency is likely to be much augmented by the end of the year. The worst of it is that the company will probably find great difficulty in obtaining funds for the purpose of enabling it to meet its obligatory charges, even assuming that its present difficulties are merely of a transitory character, and that they are the result of poor crops in its districts. We pointed out on September 24th last, in reviewing the report to June 30th, that there was then being employed for current purposes 78,415*l.* of capital funds; in fact, the balance-sheet at that date was as sorry a document as one could possibly conceive for a company compelled to face a deficiency in its obligatory charges. In addition to the 78,415*l.* referred to, there was 6,000*l.* "due to bankers," and on the credit side we find such unsatisfactory items as the following:—

(a) Suspense account—amount expended on surveys, legal and other expenses in connection with projected extensions .....	£18,396
(b) Meander-bridge—to be charged to capital when completed .....	11,099
(c) New goods shed—expenditure to date to be provided for out of future issue of capital .....	9,272
<b>Total .....</b>	<b>£38,767</b>

Adding to this sum of 38,767*l.* the debit balance on revenue account of 16,552*l.* we get a total of so-called "assets" of 55,319*l.*, which are of a distinctly doubtful character. The "projected extensions" are presumably those which the company has failed to obtain concessions for from the Turkish Government. The "president" of the company is Lord Rathmore, a director of the London and North Western and chairman of the North London Railway and the "council of administration" includes several names well known in the City, but such a balance-sheet put forward by what is regarded as a substantial railway company is fortunately rare. We note that the *Statist* makes the ingenious suggestion that we should "calculate the dividend year as ending June 30th, as "by so doing the company would not distribute profits for "the December half-year which may be required to pay "fixed charges in the following June half-year, and so would "avoid showing a debit balance at June 30th," and proceeds to add—"In the present year the procedure adopted will "greatly increase the company's difficulties." How? So long as the deficiency of the June half-year is met out of the profits of each year, we do not see how the position will be improved by altering the date to which the company makes up its accounts, and there nearly always is a deficiency in the June half-year. As it happens, the position is such that the companies' difficulties are not increased by the existing procedure, as our contemporary argues. On its own showing, the deficiency for the year to December 31st, 1898, may be put at 40,000*l.* But for the year ended June 30th, 1899, it would be 51,000*l.*—that is, a deficit of 24,000*l.* for the current period, and a repetition next half-year of the deficit of 27,000*l.* shown for the June, 1898, half-year added thereto. In fact, the suggestion partakes of the intelligence which prompted an Irishman who, on reading an advertisement to "buy one of our stoves and save half your coal," bought two in order to save all his coal! We note that Ottoman Railway shares have fallen to 10, compared with 18 in September, 1897, when we first warned investors about the high price, and though the current

market value represents a discount of 50 per cent., we should not be at all surprised to see a considerably lower figure in the next few months. The various debenture issues have also suffered severely of late, as the following comparison of current values with those ruling in 1897 will clearly show:—

Debenture Issue.	Highest Price. 1897.	Present Price.
Kuyujak Assenting 6 per cent. ....	110	105
Seraikeny Assenting 6 per cent. ....	110	105
Seraikeny Non-Assenting 6 per cent. ....	110	105
Kuyujak Extension 5 per cent. ....	108½	101
Seraikeny Extension 5 per cent. ....	104	100
Tireh Extension 5 per cent. ....	99	93
5 per cent. 1886 .....	100½	86½
5 per cent. 1888 .....	100½	89½
5 per cent. 1893 .....	99	90½

## HOME RAILS AND THE WAR SCARE.

It would be surprising indeed if the quotations of Home Rails had not reflected the adverse effects of the threatening political outlook. As a matter of fact, in spite of some recovery from the lowest, prices in this section have tumbled considerably of late. Bearing in mind that all classes of securities from "Consols" downwards have suffered from the pending uncertainty in the political sphere, it must be admitted that the quotations for British railway ordinary stocks have stood their ground fairly well. There are other adverse influences besides present-day politics which tend to depress the prices of these stocks. Dearer money and an unfavourable outlook as regards dividends for this half-year had already begun to affect values before the Anglo-French crisis became a factor in the situation. The following table will show how current prices of leading stocks compare with the highest of 1898:—

Stock.	Highest 1898.	Present price.
Caledonian ordinary .....	161½	147
" deferred .....	59½	52
Great Central preferred .....	77	61
" deferred .....	24½	20
Great Eastern ordinary .....	124½	118½
Great Northern deferred .....	61½	55½
Great Western ordinary .....	179½	164½
Lancashire and Yorkshire ordinary .....	149½	147
London Brighton and South Coast deferred .....	186½	179
London Chatham and Dover ordinary .....	24	20½
" second preference .....	119½	113
London and North Western ordinary .....	205½	198½
London and South Western deferred .....	98½	89
Midland preferred .....	88½	8½
" deferred .....	95½	86½
North British deferred .....	47½	40½
North Eastern ordinary .....	181½	176
South Eastern deferred .....	117½	104½

On the average a decline of fully 15 per cent. is shown by the above table, and bearing in mind the fact that even the best prices of 1898 did not come up to the 1897 level in some cases, it will be seen that the total depreciation is very large. And the recovery from the lowest lately touched has been considerable also. Great Eastern ordinary, for instance, has been as low as 114, and Dover A has been under 102. Though the fall has been large, prices still remain high on any reasonable method of valuation, and further, the outlook for these stocks, apart from the transitory influences now at work, has not been so cheerless for years past. In spite of all this, the investment character of this market and the persistence with which railway investors cling to their holdings, despite an unpromising prospect, render a recovery probable whenever a better political situation is arrived at—that is, if war be averted. On the other hand, if war actually results, the drop already shown will be as nothing compared with what will then result.

## NITRATE SUBLIME AND RIDICULOUS.

Mr. Robert Harvey will, on Thursday next, have an opportunity of displaying his Fregolian versatility before Liverpool audiences, as within half-an-hour he is to preside at meetings of the Liverpool and Colorado Nitrate Companies. He will gladden the hearts of shareholders in the former with a dividend of  $7\frac{1}{2}$  per cent., and no doubt convince those in the latter that the millennium (minus a dividend) is at hand. For some occult reason the "Ramirez" (Liverpool) oficina made only 340,000 quintals of nitrate in the twelve months ending June 30th last, and, more curiously still, shipped only 80,000, which, together with iodine, seem to have yielded the very handsome gross profit of 7,293*l*. Why, it may be asked, were 480,000 quintals (24,000 tons) carried forward at December 31st, 1897, to be sold many months later at the same price as was then obtainable, less loss of interest? This is a conundrum even more difficult to solve than that of the "Nitrate Bank" in which Mr. Harvey is so important, albeit so unassuming a factor. At a guess we should say that the mysterious "freezing" of the profits is connected with those 166 estacas (1,150 acres) of prime nitrate ground "jumped" from the Chilian Government; it may have been policy to plead poverty so long as the claim was hanging over the company's head. Anyway the circle seems to have been squared, as "Ramirez" is now producing at the rate of  $1\frac{1}{2}$  millions of quintals per annum, and the shares will continue to stand at the head of the list. Under the circumstances, criticism of the balance-sheet becomes a work of supererogation, although we *should* like to know where the directors come in. Is it as stoppage expenses, alterations and improvements, depreciation, or loss on animals, all of which somewhat negative items are lumped together at 6,279*l*. 11*s*. 2*d*.? Surely "half-fees," a la "San Pablo," are not the order of the day, or can it be that the Messrs. Lockett, two of whom grace the board, remunerate their colleagues, and pay the office expenses and boy under a glorified "Lagunas" contract? Our curiosity in the case of the Colorado Company is the same, only more so, but we will not trespass on our readers' forbearance by prying into the secrets of that charnel-house. The directors decided to reopen the "Buen Retiro" oficina on September 20th, "in consequence of the improvement in the nitrate market." The selling price was then 4*s*. 10*d*. per quintal; it is now 4*s*. 8½*d*.! We are sorry for the shareholders, especially for those unlucky wights who paid the transfer fees, 1*l*. 12*s*. 6*d*.—the smallest and, at the same time, perhaps the most substantial item in the accounts.

## PASSING NOTES.

The traffic receipts for the week ending October 30th, on thirty-three of the principal lines of the United Kingdom amounted to 1,723,468*l*., which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,678,072*l*., with 19,034½ miles open. There was thus an increase of 45,396*l*. in the receipts, and an increase of 219 in the mileage. The aggregate receipts for eighteen weeks to date amounted on the same thirty-three lines to 33,106,189*l*., in comparison with 32,158,935*l*. for the corresponding period last year; increase, 947,254*l*.

The case of "Congreve v. the North Wales and Liverpool Railway Committee" was mentioned in the Chancery Division on Tuesday before Mr. Justice Romer. It appeared that the defendants had purchased a portion of the Burton estate, in Cheshire, belonging to the plaintiff, Captain Congreve, and one of the conditions of sale was that the railway company should make a station on the property. Litigation followed as the result of the non-performance of this condition, but ultimately the defendants

agreed to build a station. The plaintiff, however, apprehended that this station might be only a mockery and an illusion, as the railway company might simply run the trains through without stopping, and he now wanted an assurance that this trick would not be played. Ultimately it was arranged that the defendants should undertake to "use and maintain a station for the use of passengers and goods."

The Bristol Chamber of Commerce having approached the Great Western Railway Company upon the subject of the line of railway now under construction by that company between the Severn Tunnel and Avonmouth, Mr. Wilkinson, the general manager of the company, has very promptly and courteously replied by stating that the works are being steadily pushed forward with a view of bringing about the completion of the undertaking during the coming year, and he proceeds to say that there have been many circumstances, such as the acquisition of land, compensation, and other matters presenting considerable difficulties, which have had to be overcome before material progress could be made with the construction of the line.

At a public meeting, convened by the chairman of the Hay Urban District Council, and held last week at the Foresters' Hall, Hay, it was unanimously resolved:—"That this public meeting of the inhabitants of the town of Hay approves of the action which has already been taken by the urban district council with a view of urging forward the reopening of the Golden Valley Railway, and, feeling strongly the urgent importance of such reopening to the town and district through which the railway passes, and while appreciating the efforts the directors have already made, respectfully desires to urge them to renew such efforts in time for the coming session of Parliament."

At York Police-court on Monday, Mr. C. N. Wilkinson, as secretary of the North Eastern Railway Company, was summoned by John Covick, assistant-overseer, for having wilfully neglected to pay to the overseers of the parish of St. Mary Bishopil the Younger, York, the sum of 6,717*l*. odd, being the sum at which they had been duly rated and assessed for the relief of the poor of that parish by a rate made on April 28th. Mr. Dunnell, who represented the railway company, asked for an adjournment. He said that the 6,000*l*. was the difference between the rate on the old valuation and the rate on the new valuation. The adjournment was ultimately granted.

At the statutory general meeting of the London Steam Omnibus Company, Limited, on Monday, the chairman (Mr. E. H. Bayley)—presumably the gentleman of that name who used to be chairman of the London Road-Car Company—said he thought so well of the undertaking that he intended to considerably increase his holding in it. We hope Mr. Bayley will stick to his "intention," but for his own sake we sincerely hope he will not act upon it. However, if he wants shares, there ought to be plenty of them knocking about at waste-paper price.

The *British and South African Export Gazette* says:—"The London and North Western Railway Company have thought fit to withdraw their consent to accord a through rate and bill of lading to the Transvaal. This step, on which the action of the other British lines hinged, is highly to be deprecated, as tending to deprive home firms of any advantages which might accrue from the offer of the Netherlands Railway Company of the Transvaal."

The formal transfer of the Waterford Dungarvan and Lismore Railway to the Great Southern and Western Railway Company took place on Monday. The engines and rolling stock of the Waterford Dungarvan and Lismore line were despatched to Dublin, and replaced by engines and carriages of the Great Southern and Western Railway. The train service is the same as usual for the present, but will be improved as soon as circumstances permit.

One might as well be in the Turkish army as in the service of the Western of Minas Railway of Brazil. According to a contemporary, a hundred employes of that line recently assembled, "in a threatening attitude," in front of the company's offices, demanding *two years' arrears of pay!* "By the advice of a delegate," it is added, "the employes withdrew." It is comfort-

ing to know that they were satisfied with "advice" in lieu of money.

It is reported that the Great Northern Railway Company will shortly run its North expresses between London and York without a stop, saving considerable time by so doing. At first it was thought that an engine could be built with double tenders that could do the journey without taking in water, but it has now been resolved to have recourse to the water-trough system.

Mr. Murdoch Macdonald, C.E., who has for thirteen years been connected with the engineering department of the Highland Railway Company, has just received from Sir Benjamin Baker the appointment of assistant-engineer-in-charge of the great barrage works at Assouan on the Nile.

The will has been proved of the late Mr. Edward Davies, of Plas Dinam, Llandinam, Montgomery, a director of the Cambrian Railways Company and the Barry Railway Company, who died on January 1st in the present year, aged forty-five years. The personal estate is valued at 1,090,996*l*.

The National Light Railways Construction Syndicate, Limited, is the title of a company which was registered October 29th, by Aylward and Co., 16, Cliffords-inn, W.C., with a capital of 15,000*l*. in 1*l*. shares. The objects are sufficiently indicated by the title. Table A mainly applies.

At a meeting of employés of the Furness Railway Company, it was unanimously decided that a deputation representing each grade of the service should wait upon Mr. Pettigrew, of the locomotive carriage and wagon department, this week, and ask for an advance of 10 per cent. in wages.

The new Aviemore branch of the Highland Railway, which reduces the journey from Inverness to Perth by one hour, was opened to the public on Monday. The new line is at one part 1,300ft. above sea level. The gradients are as a rule steep, and the scenery is magnificent.

The Board of Trade have consented to order an inquiry under the Cheap Trains Act, 1883, in regard to the want of an early morning train on the Metropolitan Railway from the City, to meet the convenience of those engaged on the early morning papers and other work.

At a conference between the Irish Board of Works and the directors of the Lough Swilly Railway Company, concluded in Derry on Friday, arrangements were come to as to the Carn-donagh Railway, whereby the construction of the line will be at once proceeded with.

The Great Western Railway Company have made arrangements for the issue of winter tourist tickets to Torquay and Paignton, in addition to the places to which such tickets were issued last year. The tickets will be available for two months.

It is stated that an important contract has been completed between Messrs. Spiers and Pond and the South Eastern Railway Company, whereby the catering company takes over the supply of refreshments on the line.

It is expected that a large amount of work will be done during the coming winter in the work of deepening the south extension of the Alexandra Docks, Newport.

The death is announced of Mr. Latimer Clark, F.R.S., an electrical engineer well known in railway circles.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 4th prox.; the fortnightly settlement in other Securities commences on the 9th inst.*

CITY, FRIDAY EVENING.

The condition of the MONEY MARKET has ceased to cause any anxiety, and (for the present at all events) little fear prevails of any further rise in the Bank Rate beyond the present figure of 4 per cent. The discount market is steady,

with about 3 $\frac{3}{4}$  per cent. quoted for best three months' bills, and a trifle less for those at four and six months. Money is in fair demand at about 3 $\frac{1}{4}$  per cent. for day-to-day loans, and about 3 $\frac{3}{8}$  for short fixtures. The India Council to-day renewed loans for a fortnight at 3 $\frac{1}{2}$  per cent. The Bank Return issued yesterday shows a reduction of 1,153,000*l*. in the "other securities," caused mainly by the Bank's recent borrowing operations; but the decrease in the private deposits is only 491,000*l*., the bankers' balances having, apparently, been replenished by Government disbursements, which, together with the repayment of deficiency advances, have reduced the public deposits by 748,000*l*. This large expenditure, partly, no doubt, on Supply services, materially adds to the difficulty met with by the directors in their endeavour to maintain the value of money. The reserve is now 21,100,000*l*., a decrease of 138,000*l*., but its proportion to current liabilities has risen 1 $\frac{1}{2}$  to 49 $\frac{3}{4}$  per cent., the total deposits having been reduced materially. At the Bank bullion office yesterday 170,000*l*. in bar gold was bought, and to-day 160,000*l*. in bar gold and French coin was bought.

Silver bars are now quoted at 28 $\frac{1}{2}$ d. per oz., being  $\frac{1}{2}$ d. higher on the week. A year ago the price was 26 $\frac{1}{2}$ d.

Eastern exchanges are telegraphed as follows:—Bombay, 1*s*. 3 31-32d.; Calcutta, 1*s*. 3 31-32d.; Hong Kong, 1*s*. 11 5-16d.; Shanghai, 2*s*. 8 $\frac{1}{2}$ d.; Singapore, 1*s*. 11 13-16d.

The premium on gold at Buenos Ayres has fallen during the week from 146*00* to 141*70* per cent., making the paper dollar (nominally worth 4*s*. 2d.) now actually worth 1*s*. 7*69d*. A year ago the premium was 177 per cent., and the value of the paper dollar 1*s*. 5*19d*.

The Valparaiso 90-day exchange comes over to-day at 13 $\frac{1}{2}$ d., a rise of  $\frac{1}{2}$ d. on the week. A year ago it was 17 $\frac{1}{2}$ d.

The Rio de Janeiro exchange on London is 8 17-32d., being 1-32d. higher on the week. A year ago it was 7 11-32d.

The Bankers' Clearing-house return for the week ending November 2nd, 1898, shows a total of 170,141,000*l*., as compared with 176,278,000*l*. for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£31,872,547	£31,494,301
Total Reserve .....	£21,099,862	£20,715,441
Proportion of Reserve to Liabilities...	49 $\frac{1}{2}$ per cent.	47 per cent.
Notes in Circulation .....	£27,572,685	£27,579,060
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	3 $\frac{1}{2}$ per cent.	2 $\frac{1}{2}$ per cent.
Consols (account) .....	109 $\frac{1}{2}$	112 $\frac{1}{2}$
French Rentes (account) .....	101 <i>l</i> . 97 <i>c</i> .	103 <i>l</i> . 52 <i>c</i> .
Paris Cheque Exchange .....	25 <i>f</i> . 33 <i>c</i> .	25 <i>f</i> . 1 <i>c</i> .
New York 60 days ditto .....	\$482 $\frac{1}{2}$	\$482 $\frac{1}{2}$

The STOCK MARKETS as a whole, but with occasional intermissions, have been favourably inclined during the past week, though it must be said that business has been almost at a standstill, pending the official utterances which are expected from Lord Salisbury at the Mansion-house to-night respecting not only the Fashoda question, but the wider one of this country's position in Egypt generally. To-day the markets opened strong, then relapsed, and finally rebounded just towards the close, prices on balance for the day being higher nearly all round, one of the few exceptions being Mexican rails, which were very flat on the report, the ordinary at one time touching 16 $\frac{1}{2}$ , from which the recovery was only  $\frac{1}{4}$ . At about 17, Mexican ordinary is generally pretty safe to pick up, and but for the present political crisis there need be no hesitation on the part of speculative purchasers to do so now. As it is, however, it is far better to keep out of the markets altogether until the political horizon is very much clearer, even at the cost of coming in at a slightly higher level of prices. An actual outbreak of war would mean a terrible slump all round; a settlement of the Fashoda business

would be followed by only a very moderate improvement on present quotations.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>					
Consols, 2½ per cent.	—	—	Denver & Rio Grande Com.	—	½

Mr. Thomas Melville Ferns has been declared a defaulter upon the Stock Exchange.

The Stock Exchange Committee has ordered the under-mentioned securities to be quoted in the Official List:—Buenos Ayres and Belgrano Electric Tramways Company, Limited—40,000 A 6 per cent. cumulative preference shares of 5l. each, 2l. paid, Nos. 1 to 40,000; 27,500 B 6 per cent. cumulative preference shares 5l. each, fully paid, Nos. 1 to 27,500; and 260,000 5 per cent. debenture stock, in lieu of the preference shares and debenture stock of the Buenos Ayres and Belgrano Tramways Company, Limited, now quoted. Erie Railroad Company—\$793,200 additional voting trust certificates for 4 per cent. non-cumulative first preferred stock; and \$260,100 additional voting trust certificates for common stock. New Cape Central Railway, Limited—125,000 4 per cent. registered mortgage debentures of 100l. each, Nos. 4,001 to 5,250. New York Central and Hudson River Railroad Company—\$8,877,000 additional 3½ per cent. Lake Shore collateral gold bonds of 1998 Nos. 53,001 to 61,877 of \$1,000; and \$5,075,000 additional 3½ per cent. Michigan Central collateral gold bonds of 1998, Nos. 11,001 to 16,075 of \$1,000 each.

The Imperial Continental Waterworks, Limited, notifies that the 4½ per cent. first mortgage debenture bonds are now ready to be exchanged for scrip certificates, or allotment letters and bankers' receipts at the company's offices, 35, New Broad-street, E.C. The scrip certificates or allotment letters and bankers' receipts must be left three clear days for examination.

Messrs. Thackeray and Co., of Cardiff, under date November 3rd, report as follows:—Barry Railway undivided, 262½ (unchanged); Barry preferred, 123 (unchanged); Barry deferred, 141 (unchanged); Cardiff preferred, 112½ (a fall of ½); Port Talbot, 9½ (unchanged); Rhondda and Swansea Bay, 4½ (unchanged); Rhymney undivided, 261½ (unchanged); Rhymney preferred, 121 (unchanged); Rhymney deferred, 144½ (a fall of ½); Taff Vale, 74½ (a rise of ½); Vale of Glamorgan, 128 (unchanged). Notwithstanding the disquieting rumours which have been circulated, the market for local rails has been fairly healthy.

The new central station in Rio de Janeiro will, it is said, cover eight platforms and ten tracks. The roofing will have an area of 12,100 square metres, the old roof being only 2,000 square metres.

## American & Canadian Railways.

### SOUTHERN PACIFIC COMPANY.

The subjoined particulars are from the report of the Southern Pacific Company (an entirely distinct corporation from the Southern Pacific Railroad Company of California, some of whose securities also are known on this market), for the year ending June 30th:—

Gross receipts of proprietary companies	\$34,632,187	\$38,848,490
Gross receipts of leased lines, &c.	15,426,470	18,534,554
Miscellaneous receipts of S.P. Coy.	993,954	1,094,454
Total receipts	\$51,051,711	\$58,477,498
Expended for account of proprietaries, &c.	\$32,456,988	\$34,615,145
Expended in respect of leased lines, &c.	16,132,304	18,975,212
Miscellaneous expenses of S.P. Coy.	464,705	764,538
Total expenses	\$49,053,997	\$54,354,895
Net income	\$1,997,714	\$4,122,602
Betterments and additions	906,959	1,299,258
Surplus over all disbursements	\$1,090,755	\$2,823,344

The balance-sheet shows a stock capital of \$197,257,552, and a funded debt of \$156,983,601. The mileage of the various properties is as follows:—Proprietary lines—Main track, 5,599½; second track, 79½; sidings, 1,221½; ferries, 7; river and ocean lines, 3,440. Central Pacific (leased)—Main track, 1,359½; second track, 9½; sidings, 348½; ferries, 3½; river and ocean lines, 125. Oregon and California (leased)—Main track, 655½; sidings, 79½. On the entire system there was an increase during the year of 15 miles of main track, 4½ miles of second track, and 47 miles of sidings.

The Southern Pacific of California has a main-track mileage of 2,543 miles. This includes the Southern Pacific Company's line from Mojave, California, to the Needles, 242½ miles, which is leased to September 1st, 1979, to the Atchison Topeka and Santa Fé.

### PULLMAN'S PALACE CAR COMPANY.

The report of Pullman's Palace Car Company (whose securities are held to some extent in this country) for the year ended July 31st, 1898, shows the following results:—

	1896-7.	1897-8.
Earnings of cars	\$7,743,344	\$8,598,537
Patent royalties, manufacturing profits, rentals, interest, &c.	1,231,544	2,076,031
Total revenue	\$8,974,888	\$10,674,568
Operating expenses	\$3,511,869	\$3,776,315
Paid other sleeping-car associations	812,169	831,634
Other expenses	—	793,036
Dividends on capital stock	2,880,000	2,880,000
Total disbursements	\$7,204,038	\$8,280,985
Net surplus	\$1,770,850	\$2,393,883

During the fiscal year contracts have been made continuing the operation of cars upon the following:—Atlantic Coast Line, Union Pacific Railroad, Oregon Short Line Railroad, Oregon Railway and Navigation, Chicago Rock Island and Pacific Railway, St. Louis and San Francisco Railroad, Burlington Cedar Rapids and Northern Railway, Colorado Midland Railway, Chicago Burlington and Quincy Railroad, Mexican Central Railway. New contracts have been made with the Bangor and Aroostook Railroad Company, the Atlanta Knoxville and Northern Railway Company, and the St. Joseph and Grand Island Railway Company. The total mileage of railways covered by the cars of this company is 121,662. There have been built during the year, for the use of the company, twenty-three cars, costing \$367,739. Cars owned and controlled number 2,410, of which 371 are tourist or second-class. The number of passengers carried during the year was 5,356,912, and the number of miles run was 201,295,321. During the previous year the number of passengers carried was 4,852,398, and of miles run was 190,562,758. The value of the manufactured product of the car-works of the company for the year was \$10,368,256, and of other industries, including rentals, \$1,032,086, making a total of \$11,400,342, against \$4,681,618 for the previous year.

The share capital of the company is \$36,000,000, and there is no bonded debt. The only other liabilities are the "special dividend" of \$7,200,000 and the "surplus" of \$19,883,105, and the total of \$63,083,105 is represented by the following assets:—Cars and equipment, including franchises, \$22,153,504; investments in other car associations controlled and operated, \$2,896,468; car works at Pullman, &c., \$8,113,767; patents, United States and foreign, \$114,609; furniture and fixtures, \$75,000; real estate car works, &c., Chicago, St. Louis, Wilmington, Detroit, &c.,

\$1,573,295; securities, \$10,334,921; construction material and operating supplies, including cars in process of construction, \$4,099,948; cash and loans, \$7,609,562; balances of accounts, \$6,112,230.

The "surplus" has been written down during the year by \$10,013,737 in the following manner:—Loss on cars, sold or destroyed, \$56,888; depreciation of cars, \$1,000,000; depreciation of association cars, &c., \$262,504; depreciation in sundry properties, \$258,274; for franchises, patents, &c., \$1,190,760; Central Transportation settlement, \$1,195,930; special dividend, \$7,200,000—\$11,164,356; less appreciation in values of securities (\$1,150,619), \$10,013.

### KANSAS CITY PITTSBURG AND GULF.

The London agency of the Missouri Kansas and Texas Trust Company notifies receipt of the following special advice, dated Kansas City, October 27th:—"In view of the fact that statements recently published regarding the earnings and financial standing of the Kansas City Pittsburg and Gulf Railroad have given rise to misapprehension, the following data were furnished by the board of directors of the said railroad. The road, notwithstanding its unfinished condition, has up to June 30th, 1898, earned its full interest over and above operating expenses and taxes, and shown a surplus of \$17,993'96 in addition. For August, 1898, which is the last month for which figures are in hand net earnings, after deducting taxes, have amounted to \$100,506'86, which is \$4,653'53 in excess of one month's interest charged on entire bonded debt outstanding. During August the road was especially hampered through lack of equipment. Since that time 1,150 box cars have been ordered and are now in process of being delivered. If in August equipment had been ample to take care of business offered earnings would have been over \$100,000 greater. As to the floating debt, this on June 30th, 1898, amounted to \$298,027'98. It appears, however, that prior to June 30th, \$415,174'82 have been expended by the company on the property for construction and equipment in excess of sums realised from the sale of bonds. Not only, therefore, is the entire floating debt chargeable to such excess of expenditure, but there have been so expended for construction and equipment out of earnings \$117,146'84. The statement is not correct that the Kansas City Pittsburg and Gulf Railroad Company have had to issue bonds against construction of sidings, yards, and terminal tracks, for the purpose of paying its interest. No money derived from sale of bonds has been so applied. The earnings have been ample for the purpose. The road from its inception has been able from earnings to take care of its obligations. It can confidently be predicted that, with the large increase in equipment now in process of delivery, a material surplus will be earned hereafter over and above all charges.—Board of Directors of the Kansas City Pittsburg and Gulf Railroad, (signed) A. E. STILLWELL, President."

### CHICAGO BURLINGTON AND QUINCY.

The following are the most salient features in the report just issued by this company for the year ending June 30th:—

	1896-7.	1897-8.
Passenger earnings .....	—	\$8,153,042
Freight earnings .....	—	30,543,640
Mail, express, &c. ....	—	4,103,480
<b>Total earnings .....</b>	<b>\$35,526,186</b>	<b>\$42,800,162</b>
Expenses and taxes .....	22,661,769	27,810,886
<b>Net earnings .....</b>	<b>\$12,864,417</b>	<b>\$14,989,276</b>
Other income .....	383,429	534,161
<b>Total net income .....</b>	<b>\$13,247,846</b>	<b>\$15,523,437</b>
Rentals paid .....	—	\$410,566
Interest on debt .....	—	8,251,466
Dividends * .....	—	3,690,126
Carried to sinking fund .....	—	778,612
<b>Total disbursements .....</b>	<b>\$12,720,112</b>	<b>\$13,130,770</b>
<b>Balance—surplus .....</b>	<b>\$527,734</b>	<b>\$1,392,667</b>
* 4 per cent. 1896-7.	4½ per cent. 1897-8.	

The balance-sheet shows a stock capital of \$82,004,200, and a funded debt of \$125,934,900, with contingent liabilities for branch lines of \$2,801,000. The length of road owned and leased is 5,642½ miles, the length of line operated jointly with other companies 207½ miles, and the length of road operated by companies controlled by this company 1,439 miles—a grand total of 7,298½ miles. The per-centage of operating expenses to earnings was 64'98, against 63'79, per cent.

### MEXICAN CENTRAL.

A City of Mexico despatch says:—"The Mexican Central has received, in exchange for the relinquishment of various small lines, authority to build a continuation of its line from Guadala-

jara, or some point on the western division line to Colima, and thence to Manzanillo on the Pacific coast. The new line is subsidised heavily on the most difficult part at the rate of \$165,000 per kilometre. The line must be completed to the Pacific Ocean by 1905. The completion of this line will give a central inter-oceanic line between Tampico, on the Gulf of Mexico, and Manzanillo, which has an excellent port, and an extension of its western division will pass through a country where immense freighting business is now done by mules." On the same subject a Guadalajara despatch says:—"Louis Kingman, chief engineer of the Mexican Central, has gone to Boston, Mass., where he will confer with President A. A. Robinson and directors of the company in reference to the immediate construction of a new branch of that system from this city to the Pacific coast. Before leaving here Mr. Kingman stated that the road would be built very rapidly when construction is once commenced. Its route will be over the Sierra Madres, passing through the towns of Zapotlan, Sayula, and Colima. The Mexican Central has purchased the road owned by the Mexican National Construction Company, running from Colima to the coast."

### GRAND TRUNK OF CANADA.

The Grand Trunk Railway Company of Canada has issued the following statement of revenue receipts and expenditure for the month of September:—

<i>Grand Trunk Railway Company of Canada.</i>					
	Month of September.	Inc.	July 1 to Sept. 30.	Inc.	
	1898.	1897.	1898.	1897.	or dec.
Gross receipts .....	\$383,580	\$404,511	\$20,931	\$1,025,603	\$1,007,084
Working expenses .....	228,306	241,240	12,844	654,557	697,520
<b>Net earnings .....</b>	<b>\$155,184</b>	<b>\$163,271</b>	<b>\$8,087</b>	<b>\$371,046</b>	<b>\$309,564</b>
<i>Chicago and Grand Trunk Railway Company.</i>					
	Month of September.	Inc.	July 1 to Sept. 30.	Inc.	
	1898.	1897.	1898.	1897.	or dec.
Gross receipts .....	\$62,001	\$57,800	\$4,201	\$175,203	\$167,044
Working expenses .....	49,885	40,048	9,837	142,635	148,271
<b>Net earnings .....</b>	<b>\$12,106</b>	<b>\$8,752</b>	<b>\$3,354</b>	<b>\$32,568</b>	<b>\$19,673</b>
<i>Detroit Grand Haven and Milwaukee Railway Company.</i>

	1898.	1897.	1898.	1897.	or dec.
Gross receipts .....	\$18,946	\$22,118	\$3,172	\$55,661	\$59,190
Working expenses .....	12,443	13,715	1,270	38,410	40,415
<b>Net earnings .....</b>	<b>\$6,501</b>	<b>\$8,403</b>	<b>\$1,902</b>	<b>\$17,251</b>	<b>\$18,775</b>

### THE RATE QUESTION.

President Huntington, of the Southern Pacific Railroad Company, states that in his opinion the decision against the Joint Traffic Association will not disturb railroad conditions.

Casauncey Depew, as chairman of the board of control of the Joint Traffic Association, has called a meeting of the presidents and general counsel of the various roads to be held on November 4th, to consider what is to be done in view of the Supreme Court's decision.

President Ingalls, of the Cleveland Cincinnati Chicago and St. Louis and the Chesapeake and Ohio, formally announces the withdrawal of those companies from the Joint Traffic Association. He says that rates are now likely to be better maintained, because upon the presidents will devolve the task of protecting the revenue of their companies. While he cannot see much good from rate associations under the law as it now stands, he heartily favours the passage of a pooling Bill.

The full text of the opinion of the Supreme Court on the Joint Traffic Association case has been printed. The concluding paragraph is as follows:—"It is not only possible, but probable, that good sense and integrity of purpose would prevail among managers. While making no agreement and entering into no combination by which the whole railroad interest, as herein represented, should act as one combined and consolidated body, the managers of each road might make such reasonable charges for the business done by it as the facts might justify. An agreement of the nature of this one, which directly and effectually stifles competition, must be regarded under the statute as one in restraint of trade, notwithstanding that there are possibilities that restraint of trade may also follow competition that may be indulged in until the weaker roads are completely destroyed and the survivor thereafter raises rates and maintains them."

Some of the Trunk lines will advance the rate for wheat by 2c. on November 10th.

The Interstate Commerce Commission may not investigate the charges of rate-cutting against the Baltimore and Ohio, as the Chicago freight agents of the various lines who were summoned to appear before the Commission at Washington have been notified that they need not appear until November 21st.

President Ingalls, of the Cleveland Cincinnati Chicago and St. Louis and the Chesapeake and Ohio, in an interview says he has given positive instructions to the freight passenger officials of the Cleveland Cincinnati Chicago and St. Louis lines strictly

to maintain the rates of all agreed tariffs with competing lines. He expressed himself confident that the decision of the Supreme Court in the Joint Traffic Association case would lead to better rates than when that association was in operation. "The fact is," he said, "some roads that have so-called big railroad men at their heads have been hiding their heads under the Joint Traffic Association, and have been naming just such rates as they saw fit, regardless of all agreements. They will now be uncovered, and if there is any more rate-cutting, the presidents of the roads will be the responsible parties."

#### LATEST EARNINGS.

Third week of October.—Norfolk and Western, \$265,000—*increase*, \$47,000; Cleveland Cincinnati Chicago and St. Louis, \$300,000—the same as last year; Northern Pacific, \$668,000—*increase*, \$54,000. The gross earnings of sixty-four roads in the third week of October show an *increase* of 3·91 per cent.

Fourth week of October.—Chicago Milwaukee and St. Paul, \$1,291,000—*increase*, \$142,000; Denver and Rio Grande, \$301,000—*increase*, \$66,000; Wabash, \$401,000—*decrease*, \$17,000.

Month of September.—Pennsylvania Railroad.—For the lines east of Pittsburg and Erie (directly operated), gross *decrease*, \$69,500; net *increase*, \$72,800; for the lines west of Pittsburg and Erie (directly operated), gross *increase*, \$188,100; net *increase*, \$14,300; net *increase* on the entire system, \$87,100. St. Louis South Western, gross, \$628,000—*increase*, \$3,000; net, \$286,000—*decrease*, \$20,000. Wabash, gross, \$1,289,000—*increase*, \$86,000; net, \$369,000—*decrease*, \$29,000. Canadian Pacific, gross, \$2,396,000—*increase*, \$52,000; net, \$1,093,000—*increase*, \$33,000. Chicago Burlington and Quincy, gross, \$3,930,000—*decrease*, \$485,000; net, \$1,696,000—*decrease*, \$337,000. Chesapeake and Ohio, gross, \$1,022,000—*increase*, \$84,000; net, \$364,000—*increase*, \$40,000. Chicago Milwaukee and St. Paul, gross, \$3,692,000—*increase*, \$481,000; net, \$1,406,000—*increase*, \$253,000. Denver and Rio Grande, gross, \$805,000—*increase*, \$74,000; net, \$343,000—*increase*, \$51,000. Erie, gross, \$2,956,000—*decrease*, \$235,000; net, \$938,000—*increase*, \$49,000. Pacific Mail, gross, \$331,000—*increase*, \$60,000; net, \$91,000—*increase*, \$84,000. Mexican Central, gross, \$904,000; *increase*, \$24,000; net, \$189,000; *increase*, \$1,000. Central of New Jersey, gross, \$1,156,000—*decrease*, \$53,000; net, \$495,000—*decrease*, \$31,000. Louisville and Nashville, gross, \$1,941,000—*increase*, \$76,000; net, \$657,000—*increase*, \$1,000. Mexican Central, gross, \$905,000—*increase*, \$25,000; net, \$189,000—*increase*, \$1,000. Norfolk and Western, gross, \$1,019,000—*decrease*, \$4,000; net, \$360,000—*increase*, \$2,000. Southern Pacific, gross, \$5,230,000—*increase*, \$311,000; net, \$2,271,000—*increase*, \$69,000.

The gross earnings of 143 roads during the month of August were \$82,779,393—an *increase* of \$1,005,465, or 1·23 per cent.; and their net earnings \$28,446,533—a *decrease* of \$323,303, or 1·12 per cent., against a loss of 4·40 per cent. on 129 roads in July, the August decline being due to the light grain and cotton movement.

#### RAILROAD NOTES.

Messrs. Speyer and Co. have bought \$10,000,000 of 5 per cent. first consolidated mortgage gold bonds of the Southern Pacific of California Railroad, due in 1937, and guaranteed by the Southern Pacific Company. These bonds are part of about \$20,000,000 issued during the last few years by the company in exchange for underlying bonds and new construction. The bonds will be offered for public subscription in New York, London, Frankfurt, Berlin, and Amsterdam.

The directors of the Great Northern have decided to apply for a Canadian charter to enable them to extend the Spokane Falls and Northern into Dominion territory. The line at present terminates at the frontier, though it has an outlet into British Columbia through the Nelson and Fort Sheppard. The Great Northern, it will be remembered, acquired the road as recently as last June.

Chairman Coppel and a number of the directors of the Denver and Rio Grande have just returned from a trip of inspection over the property. Mr. Coppel says that the system has never been in better physical condition. Small expenses are required for improvements and there is more business than the road can handle, especially as regards local general traffic.

The Baltimore and Ohio, having lost for the present all chance of obtaining control of the Pittsburg and Western, is now endeavouring to arrange with the new proprietary company, the Lake Erie and Western, for running powers over the line.

The reorganisation plan of the Baltimore and Ohio South

Western, just about to be formulated, will raise \$4,000,000 in cash, reduce the fixed charges, and generally put the property in a condition to earn something on the new preferred stock.

The Temiscouata Railway Bondholders' Committee, Limited, Registered, October 26th, by Paines and Company, 14, St. Helen's-place, with a capital of 100l. in 1l. shares. Object sufficiently indicated by the title. Table A mainly applies.

President Ripley, of the Atchison Topeka and Santa Fé, says that the new Valley line to San Francisco will mean genuine competition. As regards the trackage rights over the Southern Pacific road nothing has been decided yet.

The management of the Union Pacific Railroad has decided to abolish the use of private freight cars on its system. It is expected that a good deal of saving will be effected by the change.

A director of the Chicago Milwaukee and St. Paul says that the increased earnings are due to the enormous grain movement, in consequence of which many roads are ordering more equipment.

The annual meeting of the Chicago Burlington and Quincy Railroad re-elected the old board of directors. Mr. J. M. Forbes, deceased, is succeeded by his son, Mr. Malcolm Forbes.

The board of the Pennsylvania Railroad Company announces a half-yearly dividend at the usual rate of 2½ per cent. per annum, payable November 30th.

Last week's eastbound all-rail freight tonnage from Chicago amounted to 86,000 tons, which compares with 59,000 tons in the corresponding week last year.

Messrs. Speyer and Co. are preparing the reorganisation scheme of the Central Pacific Railroad Company with the greatest possible despatch.

It is rumoured that the directors of the Missouri Kansas and Texas have decided to sell more common stock from the treasury this year.

The Delaware and Hudson Canal Company will abandon the Gravity Railroad Canal on January 1st next.

The Atchison Topeka and Santa Fé acquires San Francisco and San Joaquin Valley stock at par value.

## General News.

#### SCOTTISH PRIVATE BILL PROCEDURE.

The following circular has been issued to the members of the Scottish Private Bill Reform Association:—

Gentlemen—Last year your executive issued a report on the Private Bill Procedure Bill of 1897, which was introduced in the House of Lords by Lord Balfour of Burleigh, and while they pointed out that there were various points on which that Bill might be improved, they recommended it to your support, and invited you to use your influence, by petitioning and otherwise, to secure its passing into law. It will be remembered that this Bill was not carried further than the second reading, and was dropped before the end of the session. In March of this year a similar Bill, amended in various particulars, was introduced by the Government in the House of Commons. It met with but a doubtful welcome from many members of that body, from some of whom a different reception of it might have been expected; and the interests at Westminster, which have so often opposed attempts towards the reform of private Bill procedure, were again actively employed against it. The Bill was read a second time and remitted to a Select Committee, who heard evidence and submitted a report and an amended Bill. The exigencies of Parliamentary business prevented the Government from carrying the Bill into law, though it appears to your executive that a more strenuous endeavour on the part of her Majesty's Ministers, and on the part of the friends of the Bill in the House, might have been rewarded by success. While the measure was still before Parliament, a large and influential meeting of this association and other public bodies in Scotland was held under the auspices of the Merchant Company of Edinburgh. At this meeting resolutions were carried, and statements by representative men were made, which made it clear that the public opinion of Scotland was in favour of the measure being carried into law. There can be no doubt that the opinions then

expressed, embodied as they were in a memorial and a report printed by the Merchant Company, were appreciated and valued by her Majesty's Ministers, and were of good effect in convincing members of both Houses as to the evils complained of and the urgent need of reform. Your executive have good reason to believe that the Bill as amended by the Select Committee, or one upon similar lines, will be introduced in next session of Parliament, and they would invite you to use all your influence with the object of having it this time passed into law. The Select Committee of the House of Commons has reported in favour of local inquiry; and in favour of that local inquiry being held by a tribunal formed of persons not necessarily members of either House of Parliament. It proposes that a panel should be chosen by the Secretary of Scotland and representatives from the chairmen of county councils and the Lords Provosts and Provosts of burghs whose population exceeds 15,000; the panel to consist of twenty persons, chosen for their knowledge of affairs and impartiality; a reserve panel of ten would also be chosen, from which vacancies could be filled up. A new panel would be chosen every five years. When commissioners should be required to conduct an inquiry the Secretary for Scotland would nominate two members from the panel, and the Lord President of the Court of Session would appoint a sheriff, and these would form the Commission. As an alternative, it has been suggested that the Commission should consist of two members of the House of Lords and two members of the House of Commons, who should hold a local inquiry. Various objections are stated to this scheme, founded upon the difficulty, or, rather, practical impossibility, of securing the attendance of these members in, it may be, remote districts, and upon constitutional objections to the absence of members of Parliament from Westminster during the sitting of Parliament. Upon the whole, the scheme which provides that the inquiry should be held by a tribunal separate from Parliament seems to your executive the better plan. If the efficiency of the Commission were the only object desired, by much the best plan would be to appoint a Commission on the model of the Light Railway Commission, the members of which are chosen on the responsibility of the Executive Government of the day. This plan is also suggested in the report of the Select Committee, and it has the merit of being easily capable of extension and application, if so desired, to English or Irish business. Your executive would respectfully urge upon you the necessity of continued effort to influence and support those who in Parliament are endeavouring to secure this much-needed but strenuously opposed reform. The opposition to be overcome is powerful, being founded on the vested interest at Westminster; and the railway interest, though not directly affected by this Bill, is doubtful or hostile. It is hoped, however, that the next session will see the success and the end of the labours of this association, and that the result will be a workable scheme of local inquiry and administration, operating at once to the relief of Parliament and to the advantage of local enterprise.

J. A. RUSSELL, Kt., G. W. BAXTER, JOHN BLAIR, JOHN COWAN, C. B. DAVIDSON, J. HOWDEN, R. A. LOCKHART, JAMES POLLARD, R. ADDISON SMITH, J. B. SUTHERLAND, ROBERT WEIR, Members of Executive Sub-Committee.  
R. VARY CAMPBELL, Chairman.  
JAMES CLARK, 10, Drumsheugh-gardens, Edinburgh, Hon. Secretary.  
Edinburgh, October 29th, 1898.

### RAILWAY MEN IN PARLIAMENT.

The following letter has been addressed to Sir William Walrond and Mr. T. E. Ellis, the Conservative and Liberal Whips, and to the Liberal Unionist party, by the London council of the Amalgamated Society of Railway Servants, who have in hand the arrangements for securing the representation of the Railway Men's Union in Parliament. It states—"At the recent annual general meeting of the Amalgamated Society of Railway Servants a resolution was unanimously passed to the effect that the society should run its general secretary, Mr. Richard Bell, as a Parliamentary candidate on certain definite lines, and should guarantee the necessary expenses attendant thereupon. In order to give practical effect to the resolution, the London council of the society at their last meeting appointed a deputation to wait upon the Conservative, Liberal Unionist, and Liberal parties, with a view to ascertaining the position of these parties in the event of the society's nominee being accepted as a candidate by the section of the constituency in which any of the aforesaid parties may, by association, have a claim. Of course, composing the political element of the A.S.R.S. there are large numbers of all parties, who, however, are united on the question of the direct representation of railway men in the House, and I am instructed to respectfully ask you to receive, at your earliest

convenience, the deputation mentioned, so that our members may know how far your party may be prepared to assist railway men in what, I feel sure, you will agree is a just and laudable aspiration." The Middlesbrough branch of the society has sent out a circular to the other branches inviting them to take steps, if necessary, to assist the candidature of Mr. Bell by drafting into any constituency he may contest delegates for canvassing and propaganda purposes.

### OUR NITRATE COLUMN.

Some remarks upon the Liverpool Nitrate and Colorado Nitrate annual reports will be found in our leader columns.

The following nitrate "securities" have been struck out of the Stock Exchange Official List:—New Julia Nitrate shares; New Tamarugal Nitrate ordinary shares; Nitrate Provisions Supply shares; San Donato Nitrate shares; Santa Elena Nitrate shares. For some inscrutable reason the 5 per cent. debentures of the Rosario Nitrate Company (almost the only decent security enjoying a quotation) have been expunged from the list along with the trash enumerated above.

The case "Spencer v. Ellis" (Ernest Spencer, M.P., and Wellbore S. Ellis), heard in the Queen's Bench Division on Thursday, throws another side light on to the financial methods of the North crowd. Verily the nitrate chickens are coming home to roost.

The *Financial Times* says:—"The report of the Liverpool Nitrate Company is not satisfactory. With a capital of 110,000l. it has managed to make a net profit of 1,752l., which, with 18,746l. brought forward from the last account, admits of the payment of 7½ per cent., making, with the interim dividend paid in May, 12½ per cent. for the year, as against 15 per cent. for the previous twelve months. The results are only for four months' working, and heavy expenses have been incurred in keeping the works in proper order to resume work. This outlay, as well as the cost of important additions to the machinery, and depreciation, has been charged to revenue, but even then it is questionable whether it would not have been more prudent if the directors had refrained from paying a dividend, or, at any rate, still further reduced the rate of it. The current year begins with the very small margin of 1,248l. in the shape of a carry-forward, as against 18,746l. at the same date in 1897; and, although the directors announce that since June 16th last the nitrate produced shows a satisfactory profit, the outlook is by no means so bright as to justify dividing the available balance up to the hilt."

The following pungent criticism is from the *Westminster Gazette*:—"The only satisfaction to be gleaned from the results of the working of the two nitrate companies which have just issued their reports is that they might possibly have been worse, and even this satisfaction is tempered by the reflection that they could not have been much worse. Neither the Liverpool nor the Colorado worked for more than four months of the year, but there is hope that a more profitable period may be enjoyed, as the Colorado Company announces that in consequence of the improvement in the nitrate market, the directors decided to reopen the works and commence making nitrate on September 20th. All things considered, the Liverpool shareholders have little reason to be dissatisfied with the dividend, which is 7½ per cent., making 12½ per cent. for the year, as compared with 15 per cent. for the previous year. The Colorado shareholders are used to disappointments; they have often received nothing, while the best distribution ever attained was only 8 per cent. The Liverpool company, however, for 1894-5 paid as much as 30 per cent. Those palmy days would appear to be gone for ever, despite the hope that low-water mark has been touched in the past year."

In a note of admiration on the new premises of the London Bank of Mexico and South America, the *South American Journal* last week imparted the startling information that the entrance is on the ground-floor. This is the institution under whose auspices the Tamarugal Nitrate Company was brought out at the tail end of the "boom" about ten years ago; the board consists of minor stars in the nitrate milky way, and for aught we know to the contrary the bank would be only too glad to acknowledge the sobriquet indignantly repudiated by the Bank of Tarapaca and London. For all its imposing list of agencies, American, Asiatic, and European, nine-tenths of the latter bank's business appertains directly or indirectly to nitrate. Although the London office is not on the ground-floor, the shareholders come out that way.

The directors of the London Nitrate Company, Limited, have

declared a dividend of 8s. per share on the preference capital (being 4s. balance of arrears and 4s. on account of year 1897-8). Referring to this announcement, the *Pall-Mall Gazette* remarks:—"By dint of forcing its production and rapidly depleting the ground bought in 1894, the London Nitrate Company has managed to declare a 4 per cent. dividend on the 8 per cent. preference shares, after paying arrears of interest for the year ending June 30th, 1897. The above distributions represent 3½d. per quintal on the company's make in the twelvemonth covered by the accounts, and there are 30,000l. of debentures maturing at an early date!"

The Permanent Nitrate Committee, in its public circular for November, give the following statistics of nitrate of soda:—Total exports to Europe, October, 3,859,000 quintals. Loading for Europe, November 1st, 2,947,000 quintals. Imports, Europe, October, 60,160 tons. Deliveries, Europe, October, 38,670 tons. Visible supply, Europe, November 1st, stocks and afloat, 434,510 tons. Needless to say, these figures convey very little to the mind of the common or garden nitrate shareholder, but the *Pall-Mall* again comes to the rescue and lets light into the dark corners:—"Notwithstanding the short-lived strike which impeded shipping operations and temporarily curtailed the Nitrate Railways traffic receipts, the October shipments to Europe were, as we anticipated, on a formidable scale, reaching 175,000 tons, against 120,000 last year. Deducting 40,000 tons of so-called "deliveries," the visible supply at November 1st comes to 435,000 tons, against 500,000 a year ago, and the difference of 65,000 tons will practically be wiped out by the end of the month, as the quantity now loading (133,000 tons) will, in all probability, increase to 180,000 tons, against 115,000 in 1897. Numerous steamers have been chartered to eke out the sail tonnage, which, although relatively large, is insufficient to cope with the enormous quantity of nitrate ready for shipment; and even assuming the December shipments not to exceed 160,000 tons, it is evident that the total available for next season will be considerably larger than this year. Under the circumstances the wonder is, not that the nitrate market is stagnant, but rather that prices have not suffered a sensible decline. High freights and the fear of political disturbances have so far buoyed up the position, but the removal of those factors must almost inevitably bring nitrate of soda down to last spring's lowest level."

To the Editor of "The Railway Times."

SIR—I had serious thoughts of entering for the "Nitrate Bank" competition announced in your last issue, but, on making inquiries, I find that the value of the prizes offered is not commensurate with the risk of participation in what may be an illegal proceeding. New Tamarugal shares having been taken out of the Official List have, in sporting parlance, joined it; the furniture of Julia (in liquid.) was long ago seized for rent, and my Irish broker informs me that Primitivas could not be sold except if a buyer could be found—a contingency as remote as the reopening of the oficina. As regards the allotment of New Paccha and Jaz Pampa shares, I have no wish to unduly scrutinise the molar system of a presentation steed, but neither am I ambitious to incur a liability of 6s. per share. I shall be glad to reconsider my decision in the event of your being prepared to offer a fresh selection of prizes, always excepting San Pablos, San Donatos, Santa Elenas, Buenaventura Syndicates, Colorados, Araucos, Ripanjis, and, above all, Nitrate Banks.—Yours hypercritically, TARARA-PACÁ EH!

#### WREXHAM MOLD AND CONNAH'S QUAY.

In the Chancery Division of the High Court of Justice on Tuesday Mr. Justice Romer delivered his reserved judgment on the adjourned summons in which the applicants were the North and South Wales Bank. His Lordship said this was an extraordinary application. The applicants—the North and South Wales Bank—had already in these proceedings brought in a claim, as being a creditor of the railway company, which neither the railway company nor the debenture stockholders had discharged, and that claim was to be included as ordinary creditors. But the bank now appeared, and sought to establish that the 7,000l. odd was money borrowed by the company which the company had no power to borrow, and did not become liable to pay to the debenture-holders. The bank sought to establish that it was not directly a creditor of the company, and to assert thereby that it was in a better position than if the money had been voluntarily borrowed. It contended that the money was (1) applied in payment of interest on the debenture stock of the company; (2) that on the principle of the well-known cases that were cited before him, the bank was entitled to stand in the shoes of the debenture stockholders; and (3) that the bank was entitled to be considered as the assignee of the interest on the stock as if it had never been paid, and as having a charge on the undertaking of

the railway company, which gave it a right to call on the receiver, when he had the money in his hands for making the payment of interest due on the debenture stock, to pay the bank before paying the debenture stockholders their interest. At the present time the receiver had not, and might never have, any money in hand available for paying the ordinary creditors after paying the debenture-holders, and no one was concerned in considering whether the bank was an ordinary creditor. The real object of the present application was to obtain a decision of the court as against the debenture stockholders that the bank had priority over the interest of the debenture-holders. He did not deal with the two first contentions; but dealing with the third contention, he could not see on what principle he could hold, as against the debenture stockholders, that they were to be treated as ranking after the bank. No authority gave sanction to any such claim on the part of the bank. As to the past interest, the debenture stockholders never assigned it to the bank, and it did not matter to them, or form any matter of inquiry on their part, how the railway company got the money to pay that interest. He held that the bank was not to be regarded as a creditor whose debt was to be paid by the receiver in priority of the debenture stockholders. He proposed, therefore, to make this declaration—that the bank was not entitled, as against the debenture stockholders, to have any part of its claim paid out of money in the receiver's hands before the interest due and payable to the debenture stockholders. Beyond that it was unnecessary to make any further order except to order the bank, as it had substantially failed, to pay the costs, but this was not to prejudice the bank in respect of any moneys that might be in the hands of the receiver, after paying all interest of the debenture stock, and available for payment of the other debts of the railway company.

#### THE RAILWAYS AND THE RESERVISTS.

(Broad Arrow.)

The relations which should subsist between the army and the railways are important in more senses than one. As a leading factor in any scheme of home defence the subject was dealt with by "Signalman" in the October number of the *United Service Magazine*, under the heading, "The Railways and the Manœuvres," and a well-merited compliment was paid to the responsible heads of the railway service for their efforts towards obtaining a full understanding of military requirements. We are glad to note that this article has attracted some notice in the technical press. A weekly contemporary, *THE RAILWAY TIMES*, refers to the spirit of mutual consideration and forbearance which characterised the conduct of railway operations during the manœuvres, and deduces the advantages which must follow when the army and the railways may have to work together at a time of national emergency. The general managers of our railways are now vested with high military rank in the Volunteer Railway Staff Corps, and a genuine pride in their connection with the army is the best augury for the keenness and military efficiency of their subordinates. *THE RAILWAY TIMES*, with its unquestionable influence in managerial quarters, has, therefore, done good service in calling attention to the subject in its special sphere. There is, however, another point which we venture to suggest that our contemporary might do well to bring before the notice of its influential railway readers. We refer to the employment of Army reservists by the companies. The Army and the railways are probably the two greatest employers of labour in the country, and the organisation of both is attended by a special discipline and *esprit de corps* which marks them out as correlatives in a peculiar degree. Annually some 30,000 young men are required by the Army, and a rather smaller total is passed out in the same time into civil life. The railways, from a recent Board of Trade return, employ about 460,000 men, and, allowing for the highly valued and practically permanent nature of their engagements, the annual wastage may be put down at about 20,000. Some two or three years ago the Railway Companies' Association, through their then president, Sir Henry Oakley, undertook to do its best to give employment to 2,000 reservists annually. It was pointed out, and incontrovertibly, that, suitability of the men apart, the engagement of any large proportion of reservists would be to risk a dislocation of the railway service if these men were simultaneously recalled to the colours. Such an eventuality might be rare or never occur, but it must not be lost sight of. What has actually been done to give effect to the undertaking of the companies is quite unknown. We are aware of no official figures giving this information. Is it too much to hope that the present cordial relations established between the War-office and the railway service may afford an opportunity of reopening the subject on a more definite and detailed basis? Admitting at once that the majority of employments under the companies involve some technical training, it would appear from the Board of Trade return that no less than 100,000 of the employes are engaged on work of a strictly non-technical character, or that

which finds its exact counterpart in other civilian walks of life. Among this category may be placed draymen, outside porters, cleaners, goods-shed labourers, and others not concerned with the movement of trains. The vacancies occurring among these classes of railway employment cannot average much less than 5,000 a year, and this would on *prima facie* grounds seem to give some basis for the hope that it may be found possible to increase the 2,000 above referred to, and that without danger to the railways. Even, however, supposing the railway managers to give an appreciative ear to such a request, an organisation is certainly wanted to enable their willingness to be turned to account. Vacancies as draymen are best suited to ex-drivers of the artillery and Army Service Corps, and other branches of work doubtless require men of special adaptability, even if all are classed as unskilled. To enable the right man to offer himself for the right place is a matter the organisation of which should fall on the War-office, and not upon the railways. If a good working arrangement could be come to, we have no doubt but that our present energetic Inspector-General of Recruiting would be ready to take his part. If the railways are anxious to still further identify themselves with the Army—and on this there is no doubt as to their patriotic inclinations—we can earnestly and hopefully commend the matter to the attention of the lieutenant-colonels of the Railway Staff Corps. With their powerful aid and that of the technical press there is now more hope than ever of finding for our Reserve soldiers an area of employment which will carry on into private life the same principles of discipline and *esprit de corps* which have been inculcated during their service with the colours.

#### TAFF VALE RAILWAY SERVANTS.

A statement was issued on Thursday by Mr. Richard Bell, general secretary to the Amalgamated Society of Railway Servants, relative to the strained relations now existing between the Taff Vale Railway Company and their employes. The difficulty has reference to the agreement entered into between the Taff Vale Company, the Barry Company, and the Rhymney Company and their men in 1890, to the effect that the line grades should have a guaranteed week of sixty hours. This agreement was suspended during the coal strike, but whilst the Barry Company returned to it a fortnight after the conclusion of the strike, and the Rhymney Company returned to it three weeks ago, the Taff Vale Company have refused to reinstate the guaranteed week. Under these circumstances Mr. Bell says:—"It was decided to bring the difficulty with the Taff Vale Company to a crisis last Saturday, when a mass meeting of the men was held at Cardiff; but, in view of the last communication from the general manager of the company, it was decided to refrain from drastic measures until Sunday next. A meeting is fixed for that day, which I shall myself attend, and this, in all probability, will be the last opportunity the company will have of yielding to our just demands with a good grace. The last letter from Mr. Beasley, the general manager, I regard as a temporising document, and we have received it in a passive spirit because we are anxious to do nothing to disturb the arrangements made by the Government for filling their stocks of Welsh coal, and for the further reason that we are reluctant to cause renewed suffering to the many thousands of people connected with the railway and coal industries. Mr. Beasley's letter to the secretary of the men's movement is to the effect that he had consulted the directors with regard to the last letter from the men formulating their demands. He says he had already stated that there had not been full work for all the train men in the company's employ up to date, and that the indications of an immediate return to the normal conditions of working at the collieries were not then sufficiently favourable to justify the directors in guaranteeing full employment to all the men, but that they would be very glad when the output of the collieries was such as to enable them to fully employ every man in the service."

#### ARGENTINE ITEMS.

The Central Chubut Railway Company has applied to the Argentine Congress for leave to extend its line for a further 50 kilometres from Trelew.

The Argentine Congress has definitely sanctioned the concession for a railway from Rosario to San Juan in favour of Señor Victor Pechieu. The line and all appliances, &c., will become the property of the nation at the end of ninety-nine years, without any compensation.

The Argentine Government has approved the transfer made by the Santa Fé and Cordoba Great Southern Railway Company, Limited, to the Santa Fé and Cordoba Great Southern Railway Extension Company, Limited, of the concession for a line from Venado Tuerto to Rufino.

Mr. W. G. Delamain has presented a petition to the Argentine Congress for a concession for a line from Rosario which would pass through the provinces of Santa Fé, Cordoba, and Buenos Ayres, and would tap a very important district with each of the three branches of which it is made up.

La Capital Tramways Company, Limited, has now 14½ miles of tramways in Buenos Ayres operated by electricity, the section between Comercio and the Government House, Plaza de Mayo, recently under conversion from horse to electric traction, having been successfully inaugurated on October 27th.

Messrs. Castner, Curran, and Bullitt, exporters of the Pocahontas smokeless steam coal, of Norfolk, Virginia, U.S.A., have shipped in the first two months since the opened offices in Buenos Ayres about 20,000 tons of their coal to the various railway companies and other consumers. The reports are that the coal is to be favourably compared with the best grades of Cardiff.

The following decree with regard to the construction of a central station at Buenos Ayres was issued on September 29th by the Argentine Minister of the Interior:—"Considering (1) That there is no advantage to be gained by acceptance of the proposal made by the Rosario Railway Company, as it would stultify the solution, in a form practical for the State, of the problem how best to arrange about moving the rails of the Central Argentine Railway Company in the Parque 3 de Febrero, a task that is indispensable. (2) That what suits the public interests and those of the railways is to construct a single railway terminus at Retiro. (3) That the form and conditions in which the new central station and system of corresponding lines must be constructed has altered completely, and that it is necessary that Congress should pass a new law, such as would permit the work to be carried out in consonance with the true necessities both of the public and of the companies, or company, that may undertake its construction and working; it is resolved: Art. 1—Not to admit the petition of the Buenos Ayres and Rosario Railway Company for the construction of a new station at Retiro and of a new central station. Art. 2—To approve, *ad referendum*, the arrangement made with the Central Argentine Railway Company for raising their line from Parque 3 de Febrero, and for the construction of a new station in Retiro. Art. 3—To approve the draft agreement for the construction of a new central station. Art. 4—To apply to Congress for approval of the contracts herein referred to."

#### PASSENGERS' LUGGAGE ON TRAMCARS.

At the South Western Police-court, yesterday, an interesting point regarding the powers of tramway companies to charge passengers for luggage was discussed before Mr. Francis, on a summons issued by the London Tramways Company against Mr. J. C. Wallace, commercial traveller, giving an address in Woodstreet, E.C., for refusing to pay his legal fare.—The defendant was a passenger by one of the company's cars on the 13th ult. He had with him two business packages, and in respect to these the conductor demanded the payment of a 2d. fare, and the refusal to comply with this demand was made the subject of these proceedings.—Mr. HORACE PEEL represented the company. He said the matter was of some importance, and he had been instructed to ask for his worship's ruling. Dealing with the by-laws of the company, he (Mr. Peel) admitted that they did not specifically authorise a charge being made, but they did impose the compulsion of permitting each passenger to carry 28lb. of luggage, and he thought that this gave an implied authority to make a charge for luggage over that amount. Mr. FRANCIS—You could refuse to carry it. Mr. PEEL—If we have that power I submit we can make our own contract. Mr. FRANCIS hesitated to give an opinion on that matter off-hand. Mr. PEEL said the defendant refused to remove the luggage, and this fact, he thought, brought him under a contract with the company. The DEFENDANT said he had been a passenger by the tramcars for twelve years, and had never been asked before for the fare. Mr. FRANCIS, while offering no opinion, thought the defendant would have no answer to a civil claim. However, as the company wished for a decision, he adjourned the summons to consider the subject in dispute.

#### FOREIGN AND COLONIAL ITEMS.

The Government of Uruguay has paid the railway guarantees due on the 1st inst.

An interesting article on the Siberian Railway appeared in the *Times* of Saturday last.

Signor Angelo Luzzatti has been appointed official representa-

tive of Italian interests in all matters appertaining to concessions obtained in China by the Anglo-Italian Peking Syndicate.

The Pekin Syndicate, Limited, announces a new issue of 10,000 shares of 1*l.* each at 4*l.* premium, or 5*l.* per share, for the purpose of surveying the new railway from the Shansi district to Liang Yang, and also opening up to a greater degree the districts of Shansi and Honan.

A decree has been issued by the Uruguayan Government formally stating the rejection of the tenders presented to the previous administration by Messrs. Greenwood and Co. and Messrs. F. Pearson and Son, of London, for the construction of the port of Monte Video.

The Anglo-Foreign Banking Company, Limited, notifies bondholders of the Mersina Tarsus and Adana Railway Company (Société Anonyme Ottomane) that on and after November 15th the company will pay 3*l.* against coupon No. 18, due July 1st, 1895, on the bonds of 100*l.* each; and 7*s.* 6*d.* against coupon No. 6 due July 1st, 1895, on the bonds of 25*l.* each.

The directors of the Bombay and Baroda Railway Company propose the payment of a dividend in January next on the consolidated stock at the rate of 2*l.* 2*s.* 6*d.* per cent., in addition to the guaranteed interest, making in all a distribution of 4*l.* 12*s.* 6*d.* per cent. for the half-year, less English income-tax, as against a distribution of 3*l.* 12*s.* 6*d.* for the corresponding period of last year.

At the meeting of first mortgage bondholders of the Jamaica Railway Company, which was convened yesterday by the trustees, a resolution was passed unanimously by the bondholders present, who represented more than the necessary majority, that a petition be presented to the Supreme Court of Jamaica to wind up the company. Bankers are consequently released from the undertakings to hold bonds until after November 22nd.

It is stated in colonial quarters that Mr. Rhodes, on the occasion of his forthcoming visit to England, will lay the detailed plans of the Tanganyika Railway before the Colonial Secretary, and that the idea will then be discussed of carrying the line from Uganda northwards. Special plans for the Tanganyika line are in preparation in South Africa, showing the exact nature of the ground to be traversed, the projected bridges, and all other particulars.

Mr. Beckett, our Consul at Chiengmai (Zimmé), in Northern Siam, mentions in his latest report that the trade of Burma with the region is increasing, and is conducted mainly through the port of Moulmein and Raheng. The latter, with Chiengmai and Lakhon, are the chief distributing centres of Northern Siam. He thinks that if a railway were ever constructed from Moulmein to Raheng the greater part of Northern Siam would obtain its imports by this way in place of from Bangkok, and the trade would also increase largely. The cost of such a line would, however, be heavy, seeing that it would have to cross at right angles the numerous valleys and streams between the two places.

A special general meeting of the Mexican Railway Company, Limited, is called for the 11th inst. to consider and, if approved, pass the following resolution:—"That the board of directors of the company for the time being be and they are hereby authorised to obtain and accept in the name and on behalf of the company from the Government of Mexico, or any department of that Government, any modification of the concessions of the company which the board may from time to time deem expedient for the purpose of varying all or any of the provisions in said concessions relating to rates, fares, classifications, or subdivisions thereof, and that any such modifications may be accepted in such

form and contain such provisions as the board in their discretion may deem expedient."

**Hull Dock Accommodation.**—A meeting of the Parliamentary Committee of the Hull Corporation was held on Monday; Alderman Massey in the chair. From a statement made with reference to the proposed new dock, to be constructed jointly by the North Eastern Railway Company and the Hull and Barnsley Railway Company, it appeared that the chairman and Sir James Woodhouse, M.P., had attended a meeting of the Hull and Barnsley board in London, and at that meeting plans were discussed. It is proposed that the new dock shall have 56½ acres of water, and be constructed partly on land belonging to the Hull and Barnsley. Thirty acres of land now belonging to the Hull and Barnsley would be reserved for the purposes of that company. The chairman asked the committee to carefully consider the position with regard to policy. He would not ask for an opinion that day, but he hoped the committee would turn the whole question over in their minds. When the plans were finally deposited along with the Bill the committee would be in a position to take into consideration what action the corporation should pursue.

### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire. Manufactory and Chief Offices—Saltley Works, Birmingham.

## MIDLAND RAILWAY COMPANY.

### CONTRACTS FOR STORES, 1899.

The Directors of the Midland Railway Company are prepared to receive TENDERS for the supply of:—

1. Tyres, Axles, Plates, &c.—"Siemens-Martin" Steel.
2. Plates, Bars, and Sheets—Iron.
3. Wheel Centres—Cast Steel, for Engines and Tenders.
4. Gas and Water Mains.
- 4a. Malleable Iron Castings.
5. Steel, Pipes, &c.
- 5a. Screw Augers, &c.
6. Copper and Brass Tubes, &c.
- 6a. Engine Fittings—Brass.
7. Tin Plates, Block Tin, &c.
8. Iron Chains, &c.
9. Nails, Screws, Pins, &c.
10. Telegraph Instruments.
- 10a. Telegraph Stay Rods, Bolts, &c.—Galvanized.
- 10b. Telegraph and Signal Wire.
11. Shovels, &c.
- 11a. Locks, Riddles, Hinges, &c.
12. Lamps, Fittings, and Tin Wares.
13. Gas Tubes and Fittings—Iron.
14. Gas Fittings—Brass.
15. Glass.
16. Woollen Cloths.
17. Cotton Cord.
18. Bunting, &c.
19. Ropes, Twines, &c.
20. Canvas, &c.
21. Leather.
22. Saddlery.
23. Carriage Trimmings, Carpets and Rugs.
24. Brushes and Door Mats.
25. Hampers, Skeps, &c.
26. Ash Shafts, Break Blocks, &c.
27. Oak Chair Keys and Treennails.
- 27a. English Timber and Fencing.
28. Varnishes.
- 29a. Colours and White Lead.
29. Drysalteries, &c.
30. Emery, Emery Cloth, &c.
31. Soaps.
32. Fog Signals.
33. Lamp Wickings.
34. India Rubber Goods.

Contractors cannot be allowed to submit their own patterns, or tender to supply goods thereto, nor can the Company's Patterns be sent away for inspection, all being sealed, and exhibited at Derby only.

The patterns will be ready for inspection at the General Stores Department, Derby, on and after Monday, the 7th November, and Forms of Tender may be had on and after the same date on application to Mr. G. Morrall, Stores Superintendent, Derby, care being taken to give reference to the particular Contract (by the above numbers) for which it is proposed to tender.

The Tender, addressed to the Secretary of the General Stores Committee, Midland Railway, Derby, and endorsed "Tender for Stores," must be sent so as to be received not later than 9.0 a.m. on Tuesday, the 15th November, 1898, and must be made on the Forms supplied for the purpose.

The Directors do not bind themselves to accept the lowest or any Tender.

JAMES WILLIAMS, Secretary.  
Derby, November, 1898.

## THE CHESHIRE LINES COMMITTEE

are prepared to receive TENDERS for the supply, during the year 1899, of the under-mentioned STORES and MATERIALS, viz.:—

### GENERAL STORES.

1. Fence Rails and Sprags.
2. Oils, White Lead, Soap, &c.
3. Glass.
4. Waste, Sponge Cloths, Scouring Flannel.
5. Iron Bars, Sheets and Plates, Spike Iron, &c.
6. Telegraph Materials, Instruments, Wire, &c.
7. Wrought Iron Tubing, Point Rodding, Point Rollers and Standards, Lead Piping, and Sheet Lead.
8. Nails, Screws, Files, Grover's Patent Washers, &c.
9. Wrought Iron Bolts, Screw Spikes, Chain, &c.
10. Galvanised Sheets, Signal Wire, Pulleys, Stay Rods, Zinc Sheets, &c.
11. Leather.
12. Drain Pipes, Cement, Bricks, &c.
13. Fog Signals.
14. Rope, Twine, Brushes, Mats, Baskets, &c.
15. Black Lead, Coal Dust, &c.
16. Roofing Slates.

### PERMANENT WAY MATERIALS.

17. Fishplates.
  18. Creosoted Sleepers and Crossing Timbers.
  19. Oak Keys.
- Specifications, with Forms of Tender, can be obtained, on and after November 7th, 1898, upon application to Mr. S. Saxon Barton, Storekeeper, Cheshire Lines, Warrington; and intending Contractors are requested to particularise the stores for which they wish to tender.

Patterns will be on view from November 21st to November 30th, at the Committee's General Stores, Battersby-lane, Warrington.

Sealed Tenders, endorsed "Tenders for——," must be sent, addressed to the undersigned, "Cheshire Lines Stores Department, Warrington," so as to be delivered not later than 10.0 a.m. on Friday, December 2nd, 1898.

The Committee do not bind themselves to accept the lowest or any Tender.

GLEGGE THOMAS, Secretary.  
Central Station, Liverpool.

## CALEDONIAN RAILWAY COMPANY.

### EDINBURGH-STATION HOTEL.— CONTRACT FOR MASON WORK AND IRON AND STEEL WORK.

The Directors of the Caledonian Railway Company invite TENDERS for the MASON WORK and IRON and STEEL WORK of the new HOTEL to be erected at Prince's-street Station, Edinburgh.

The Drawings and Conditions of Contract may be seen at the Office of Messrs. Peddie and Washington Browne, Architects, 8, Albany-place, Edinburgh, on and after Monday, the 17th instant.

Copies of the Specification, Schedule of Quantities, and Form of Tender may be obtained from the Architects on payment of a deposit of Two Guineas per copy for the Mason Work, and One Guinea per copy for the Iron and Steel Work.

Sealed Tenders, addressed to the undersigned, and marked "Tender for Edinburgh Station Hotel," must be lodged with him on or before Monday, the 7th November, 1898.

The Directors do not bind themselves to accept the lowest or any of the Tenders.

J. BLACKBURN, Secretary.  
Caledonian Railway Company's Offices, Glasgow,  
11th October, 1898.

## Meetings.

### WESTERN RAILWAY OF HAVANA.

The annual general meeting was held at Winchester House, E.C., on Tuesday; Mr. J. W. TODD presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said:—When I had the pleasure to address you a year ago, I think, in commenting upon the work of the railway for the year 1898-7, I prefaced my remarks by saying that the deplorable situation of affairs in Cuba must have deterred our shareholders from forming any expectations of favourable results. I think, gentlemen, those remarks are even more applicable to the year 1897-8, the results of which we are here to-day to consider, as, besides the insurrection, there has been the war and blockade of Havana. Seldom are the capabilities of a railway tested by ordeals of such far-reaching severity, and, in my opinion, it is really wonderful that our line has held its own so well throughout, having not only earned the service of its mortgage debentures, but kept pace with many other pressing requirements. It is unnecessary for me to attempt to portray the baneful effects of the insurrection and war upon the country, viewed from a commercial aspect. You are all, doubtless, well acquainted with the very trying conditions which have prevailed in Cuba, and you will find details of the damages the property has sustained during the past year in the report of our manager, Mr. Ernest H. Pearson. I will pass on to make a few remarks upon the accounts now before you, but I consider it superfluous to take up your time with statistics which, I hope, you will find set out in sufficient detail in the statements of accounts. Our balance-sheet, I think, shows the company to be in quite a satisfactory position if we bear in mind the vicissitudes we have passed through. Perhaps the only items therein which may call for any explanation are sundry creditors and sundry debtors. The liability is composed chiefly of amounts owing for wages unpaid at June 30th; stores and sundries is 6,850*l.*; outstanding dividends, 3,576*l.*; taxes, 2,050*l.*. The asset is represented by freight accounts, &c., 2,108*l.*; and Government transport accounts, 12,159*l.*, this large amount having since been collected. In this respect I must say the Spanish Government has behaved remarkably well to us, having paid all accounts for services we rendered up to June 30th last. This, I may remark, compares favourably with other countries I have to deal with. Turning to the revenue statement, No. 3, I am certain the policy of the board in charging to that account the heavy cost of extraordinary expenditure will meet with your approval. The reserves your board have built up since the inception of the company have, you will confess, proved to be a prudent business precaution, and the sums now standing to the credit thereof reach a considerable amount. Latterly they have assisted to tide us over the severe and trying times without having to recur to the issue of fresh capital, which, had it been necessary, would have proved very disadvantageous. The reserves are now doing good service in several respects, and, in addition to providing for stores, will supply the means to meet what we hope may be during the current year the last of the extraordinary expenditure required to complete the restoration of damages. Thus we may look upon the present year (1898-9) as with a comparatively clean slate; and besides, we have, for what it is worth, the claim on the Government for compensation for damages which, as you know, amounts to some 51,000*l.*. Personally, I do not despair that some day we will recover some part of this claim, and whatever is recovered will be, of course, for the benefit of revenue. It is with satisfaction that, in spite of so much destruction to our property, we can now report the line to be in good working order; and as regards equipment, our motive power has already been restored to its full strength, and, in fact, the locomotive superintendent reports it to be in a more efficient state than before the insurrection. All that now remains to be done is to replace a few more carriages and wagons and rebuild some stations of minor importance. This work is now proceeding. As regards operating expenses, a comparison with those of the previous year is no criterion. Although in the aggregate the expenses appear higher, as a matter of fact the cost per train mile has never been lower than in 1897-8. A comparison with the year preceding the insurrection is more interesting. Thus we find—Gross receipts, 1894-5, 128,610*l.*; this year, 109,209*l.*. Receipts per train mile, 1894-5, 8*s.* 2*d.*; this year, 7*s.* 6*d.*. Working expenses, 1894-5, 79,964*l.*; this year, 66,927*l.*. Working expenses per train mile, 1894-5, 5*s.* 1*d.*; this year 4*s.* 7*d.*. Which certainly reflects credit on the management. Details of the expenditure on capital account are given on page 25 of the report. The replacement of timber trestle bridges by permanent iron structures is the most prominent item here. This important work is still proceeding, and when completed will enable further economies to be made in the working expenses. The capital account is shown to be overspent some 15,000*l.*, which has so far been met by the reserve funds, and the account will be adjusted as and when occasion arises. Concerning our future prospects we are not, I trust, unduly hopeful. I have confidence that the peace negotiations now proceeding will be brought to an early and favourable termination, and herald a new era of prosperity and freedom from political disturbances. This is all that the country needs to develop her resources, which offer a very wide field for new enterprise, and, as you are aware, our line serves one of the most fertile parts of the island, especially for the production of tobacco. Our manager in his report says:—"With peace in the country this important revenue-producing industry will be very widely extended." There can be no doubt about that, and we may confidently expect to see our revenue very materially increased from this source in the immediate future. The cultivation of the sugar-

cane will take a longer time to resuscitate. The insurrection aimed a very serious blow at this industry. Factories, mills, and costly machinery were destroyed wholesale, and new capital will be required to replace it all. However, given that, and with the confidence a stable system of Government will inspire, sugar production is sure to make rapid strides, and, in due course, we may expect to again be earning considerable revenue from this source of traffic. Prior to the insurrection we were transporting some 30,000 tons of cane and 20,000 tons of sugar annually, whereas last year we carried only about a tenth part of that quantity. It is possible that the day may be approaching when, in order to keep pace with the development of business enterprise in the island, some extension of our railway may be required. The time has not yet arrived to put before you any views we may entertain upon that subject. To-day I can only tell you that the board will be keenly attending to what they may deem to be the best interests of the company in this direction. As regards our prospects for the current financial year, you will have seen from the report that we have made a very fair start, the gross receipts for the first sixteen weeks showing an increase of over 9,000*l.*, or 33 per cent. To this there will be some 3,000*l.* to add for services rendered to the Government, but we continue the system of only crediting revenue with the proceeds of these accounts when encashed. It will be further gratifying to you to know that our working expenses are attaining a more normal ratio to receipts this year. Consequently, if no untoward circumstances arise, I hope I may not be too sanguine in expressing hopes of our being able to make some distribution of profits to our shareholders for the present year—1898-9: in fact, if things continue as at present we should even be able to pay an interim dividend. Before concluding, gentlemen, it affords me very much pleasure to be able to speak in the highest terms of the very able and indefatigable services rendered by Mr. Pearson, our general manager, who, I am pleased to mention, is present with us to-day. As you may well understand, the complicated situation in Havana has greatly augmented the duties and responsibilities of the important post he holds. I am happy to say that the tact and good judgment he has displayed in disposing of difficulties as they arose has won him a high place in the estimation of his board. I can also speak in eulogistic terms of the services rendered by all the other officers and staff of the railway. We must bear in mind that during the insurrection those of our staff whose duties called them up and about the line were constantly exposed to risks and dangers, and I am convinced that from the manager downwards no one has hesitated to do his duty. Consequently, I am glad of this opportunity to publicly express our hearty appreciation and thanks for this devotion to the company's interests. We deplore the loss of life which has unhappily attended the dastardly use of dynamite, especially that of the roadmaster, who had been in the company's employ for many years. When the general exodus from Havana took place, life out there became very irksome to those who remained, and, besides, during the time of the blockade it was very expensive to live there. I may mention that the board have made some slight recognition to the general manager and other officers of the staff as a proof of their appreciation of the trials and anxieties they have experienced. This will doubtless meet with your entire approval, and I am sure you will all cordially join in the special vote of thanks to the general manager, officers and staff to be proposed presently. I may mention that during Mr. Pearson's brief leave of absence Mr. A. P. Livesey has been appointed acting manager, and the board feel assured he will guard the company's interests to their satisfaction, and be well supported by the other officers and staff of the railway.

Mr. CHARLES SCHIFF seconded the motion, which was agreed to.

### MINAS AND RIO RAILWAY.

The half-yearly general meeting was held on Thursday at the Westminster Palace Hotel, S.W.; Mr. G. R. BYDER presiding.

The accounts for the year ending June 30th, 1898, showed that the gross receipts amounted to 226,411*l.* (against 205,830*l.*), of which 31,750*l.* was from coaching traffic, 140,474*l.* from merchandise, 37,207*l.* from live stock, and 14,079*l.* from parcels, horses, &c. The total expenditure amounted to 199,989*l.* (against 191,531*l.*), including 20,280*l.* exchange differences and 3,304*l.* general charges in England. The net earnings for the year were thus 26,422*l.* (against 14,309*l.*). The directors recommended the payment of a final dividend of 4 per cent. per annum, making 5 per cent. for the year. Length of line open 106½ miles. Ratio of working expenses to receipts 73.13 per cent. (against 74.95 per cent. in the previous year). The expenditure on capital account to June 30th, 1898, amounted to 1,743,216*l.*, whilst the receipts were:—Ordinary 20*l.* shares, 1,000,000*l.*; debentures outstanding, 554,200*l.* Extracts from the directors' report have already appeared in THE RAILWAY TIMES.

The CHAIRMAN, in moving the adoption of the report and accounts, said the past year had not been the best in the annals of the company, but had been characterised by some unpleasant incidents. One of them was the lamentable bankruptcy of one of their bankers, Messrs. Hopkinson, and the other was the partial repudiation by the Brazilian Government of their obligations to the railway, in so far as they had substituted bonds which were not worth par for cash. The former was a very heavy blow, and was accentuated by the fact that at the time they had the money banked with which to pay the interest on the debentures. The assets, so far, however, had realised extremely well, and there was a very fair prospect that there would be no loss upon the item. As to the Brazilian Government, he could not say that they had treated the company at all honestly. As a consequence, by their action the company had to go into market at once, and they did not get as good a price as

they would have done later. They only obtained 75½ per cent. for the funding bonds, and then had to find 26,000*l.* Since then better prices had been obtained, and he was of opinion that in the future the price would be a trifle higher. They could only hope that the new President would act more wisely, and that efforts would be made to economise the expenses of the country, which at the present time were ridiculously high, while at the same time corruption was rife. Turning to the accounts, he thought that, on the whole, they were satisfactory. They showed an increase of 10 per cent. on the receipts as compared with last year. They had been able to wipe off the whole of the new account for rolling stock, about 14,000*l.*, so that they might expect to be to the good next year. Notwithstanding that they had written off that amount, they still had a surplus of profits over expenses of 26,422*l.*, as against 14,308*l.* in the previous year. Although that looked very well, the principal amount had been made in the first six months of the year. He had some fears about the current year, because at the present moment there was great commercial inactivity in Brazil, partly owing to the bad coffee crop, and also to the amount of paper money out. For himself, he could not expect such a good result next year as was shown now. The principal increases of the year had been in coffee and live stock. On the other hand, there had been fewer passengers, especially in the first-class, owing to the abolition of the return-ticket system. The working expenses showed a considerable increase, which was attributable to the low rate of exchange current.

The Hon. P. J. STANHOPE seconded the motion, which was agreed to.

### MEXICAN RAILWAY.

The half-yearly general meeting was held yesterday, at the City Terminus Hotel, Cannon-street, E.C. Mr. WILLIAM NEWBOLD presided.

The CHAIRMAN then said—Gentlemen, you will have seen, by the statements and accounts which have been laid before you, that the business of the company during the six months under review exhibits a continued and steady progress both in volume and receipts, but we have again to deplore that the increased net profit from the traffic of our railway has been entirely lost to us by the increased depreciation in the sterling value of the dollars we receive for carrying it. As the report informs you the total traffic for the six months amounted to 476,082 tons, which was 33,842 tons more than in the corresponding period of 1897, but as there was a diminution of 8,548 tons of company's material the real increase of paying traffic was 42,390 tons, of which 4,500 tons consisted of foreign goods and 37,890 tons of national. The increased tonnage of foreign goods gave us \$77,940 more earnings, and that of national goods and sundries \$102,765 more. These amounts, with the greater sum received from passengers and luggage traffic (\$25,294), give an approximate total increase of receipts over those of the first six months of the previous year of \$206,000. The expenditure, on the other hand, was increased by \$135,892, which you will find in detail in the abstracts A to G. Of this sum the additional consumption of coal used by engines, owing to the larger traffic and greater cost per ton, accounted for some \$80,000, of which about \$47,000 was due to the increased consumption and the balance to the greater cost; this greater cost amounted to \$1.26 per ton, of which 90 cents arose from the fall in exchange, and 36 cents from the rise in price. The effect of the higher prices we had to pay for our fuel during the strike of the colliers in South Wales and the American war was felt only in the last month of the past half-year, but will be more noticeable in the coal account of the current six months. The increased engine mileage was largely attributable to the greater amount of local traffic. The through up and down freight trains generally left the terminal stations with full loads, making it necessary to send out engines, running part of the distance light, in order to clear the intermediate stations of loaded wagons which the regular freight trains were unable to haul. This increase of local tonnage, tending as it does to equalise the up and down traffic, although it may occasionally lead to an increase in the light running engine mileage, is a very gratifying feature; in former years, as you know, our traffic was too much one way. The average load of the goods trains of 144 tons was very satisfactory. The other increases in locomotive expenses, Abstract B, were caused by considerable repairs to engines and tenders, by the construction of a new special carriage to replace one of the old and worn-out vehicles of the same class, by rebuilding wagons previously condemned and now replaced on the line, by a new boiler for the pumping station at Cordoba, and by an overhead travelling crane in the locomotive shop at Apizaco. In maintenance of way, works and stations, although there was an increase of \$4,932 caused by the erection of two new turntables at Apizaco and Esperanza, and by an expenditure of \$3,332 in the extension of the goods warehouse at Orizaba, all the other items under this heading show decreases, arising chiefly from the economy due to the steel sleepers and good ballast. The total saving in Abstract A was \$7,349. The increase of \$4,174 in telegraph expenses (Abstract C) was due to a continuation of the work I referred to last May—the renewal of worn wires on the telegraph line leading out of Vera Cruz—about 8 miles of the line were rewired with double wires during the half-year. The principal increases in traffic expenses, Abstract D, appear under the headings of shunting expenses, and loading and unloading goods, and are due to the larger volume of traffic handled during the half-year. General expenses were less by \$6,063; although many of the items in this abstract show small increases, there was fortunately a diminution of \$10,346 in that of losses and compensations. Deducting the increased expenditure from the increased earnings, we have a net profit of \$70,107 more than in the corresponding half-year; but, as I have said, we have been deprived of this additional

profit by the further depreciation of silver, the average value of the dollar during last half-year was, as the report tells you, 22-25d. against 24-07d. in the corresponding period of 1897, and the consequence has been that the \$926,375 profit realised in sterling only 85,882l. 14s. 2d., which is exactly 1l. 6s. 11d. less than was obtained for the \$856,268 profit of the first six months of last year. The pier and launch profit was greater by 496l. 8s. 7d., and the interest and fees in London, which included a profit on a sale of 20,000l. Consols, gave an additional sum of 3,318l. In the early part of the half-year we had to realise a portion of our securities to meet payments for steel sleepers, &c., and we determined to sell 20,000l. of our investment in Consols, which were at a high premium; at the close of the six months we had more money in hand than we required for immediate use, and as our bankers, Messrs. Glyn, Mills, and Co., were then making an issue at 107 per cent. of 3 per cent. Nottingham Joint Station stock, the interest of which is secured in perpetuity by the joint guarantee of the Great Northern and Great Central Railway companies, taking priority of the interest and dividends of the two companies respectively, this stock appeared to us a desirable security for the company to hold—we consequently took 20,000l. of it. If the accounts had been made out as formerly in sterling at 4s. to the dollar, the loss on exchange would have appeared as 112,033l. 8s. 2d. Supposing the exchange had remained at 24-07d., as in the first half of 1897, the results of the half-year's working would have enabled the payment of a dividend at the rate of 3½ per cent. per annum. The increase in the passenger traffic during the half-year may be considered very satisfactory, in view of the fact that the war between the United States and Spain almost completely stopped travel by sea from American, Cuban, and Spanish ports to Vera Cruz from April 15th to June 30th last, and the same remark will apply to the increase in foreign goods traffic, as the war unquestionably diverted some of the American traffic to the all-rail routes. The continued expansion of the national goods traffic is a very pleasing feature in the report, indicating as it does the growing prosperity of the country; as the resources of Mexico become more and more developed it is natural to expect that the movement of national goods will increase in proportion. The stone we are carrying for the harbour works is, of course, a special traffic, the greater part of which will come to an end when the harbour is completed; but if we deduct the whole of this stone traffic in the two half-years we are comparing, we shall find in the first six months of 1898 that we still have an increase of national goods of 27,365 tons, and \$92,348 in earnings, over the corresponding period of 1897, and as the most we have received for the stone traffic in any half-year has been \$174,000, we have only to augment this increase by some \$80,000 to make up for the loss of the receipts derived from this special traffic, supposing it to cease altogether; by that time, however, some other special traffic may come to take its place. Although there was a trifling decrease in the tonnage of coal compared with that of the first half of 1897, it is quite possible that we may soon have to haul a much greater tonnage of this fuel, in consequence of the growing scarcity and increased cost of wood in the localities where it is largely consumed, and from the facilities which may be expected when the Vera Cruz Harbour is completed for the cheaper discharge and storage of coal. A considerable quantity of wheat was exported in the last six months from Vera Cruz, and the Consular report from Tampico tells us that 4,300 tons were exported also from that port during the same period, but I fear that we cannot look for a continuance of this trade unless the cost of production be considerably lessened, or the price in the United States and Europe be greatly increased. It was in consequence of the high prices which ruled in the early part of this year, owing to the corner in Chicago, that speculators were induced to make an experiment with Mexican wheat. I believe, however, that the results were not satisfactory, as the price fell rather too rapidly. Mexican wheat is of excellent quality, and the area of its production is practically unlimited; it has hitherto only been grown for consumption in the large cities of the republic, but it may be kept in mind that some of the best wheat lands in Mexico are situated in the Valley of Puebla, adjoining our line of railway, and should it be found that this grain can be exported to leave a profit, we may expect a fair proportion of the traffic. From the rapid development of the vast resources of Mexico which is at present taking place it is quite reasonable to expect that new sources of revenue for our railway may arise. I mentioned at our last meeting that we were watching with great interest the construction of any new railways which might act directly or indirectly as feeders to our line, and referred especially to the line from Mexico to Acapulco; the line was opened to Iguala, a distance of 237 kilometres from Mexico, on July 16th last, and the work of construction is now being pushed forward down the Cocula River to the crossing of the Mezcala River at some 64 kilometres from Iguala. Surveys have recently been made with the object of carrying the line down the Mezcala River to a port in the Pacific called Zihuatenejo, situated some 250 kilometres to the north-west of Acapulco. We are informed that the harbour of Zihuatenejo could be made one of the best natural ports on the Pacific Coast of Mexico, only inferior in size and area to Acapulco, and if united by railway with the capital, a large and productive business would, no doubt, be created. It is considered that the advantages of changing the route of the line down the Mezcala River are very great—the country along the river being exceedingly rich in mineral wealth, and the valleys capable of producing everything grown in the hot country zone—and if the Government, later on, requires connection by rail with Acapulco, it is stated that the line can be carried there along the coast over a comparatively easy country. I spoke also of another railway to the Pacific, for which a concession was granted last March; this line is now called the Peñuela Vera Cruz and Tehuantepec Railway, and we understand that surveying parties have been in the field, and the general direction of the road has been determined. The new railway would connect with the

Mexican Railway at Peñuela, run from there to Tuxtepec, and join the Isthmus line at a point some 150 kilometres from Salina Cruz on the Pacific. The branch to Vera Cruz would probably connect with the trunk line somewhere near Tuxtepec. If this line is built it will unquestionably bring traffic to the Mexican Railway, as the country traversed is very rich in tropical products, besides giving an outlet to the Pacific by an all-rail standard gauge route of about 800 kilometres from Mexico City. There are other railways in construction which, being far away from our road, only interest us in showing the general progress of the country. The total length of railways constructed in Mexico up to September 22nd last was 11,765 kilometres, about 7,353 miles, and of tramways 675 kilometres, about 422 miles. The map of the harbour of Vera Cruz, which you have before you, has the progress made with the progress made with the works since our last meeting marked upon it. Practically the whole of Messrs. Pearson's force has been employed during the last six months on the north-east breakwater, and, considering that this breakwater is being carried forward in nearly 50ft. of water, the progress made is as much as could be expected; the total length completed up to September 22nd last was 1,600ft. brought up to a height of 4ft. above sea-level. With this breakwater advanced as it now is the harbour is practically enclosed, and during the Northern season the water inside the harbour should present a tranquil state compared with previous years. The fiscal steel pier, which measures 590ft., by 74ft. in width, with 26ft. of water alongside at low tide, was completed and inaugurated for public use on July 30th last, and since that date it has been used by some of the largest steamers entering the port. The deep water quay, situated to the south of the Mexican Railway Company's new pier, measuring on the short side 984ft. long by 326ft. wide, is now being pushed on with energy, but it is a work of considerable magnitude, with a depth of 33ft. all round, and will take some time to complete. The dredging of the harbour to depths of 28ft. and 33ft. is practically completed, and the entire water area is now available for the largest craft. The destruction by fire of the large new wharf, constructed for the Government at Tampico, coupled with serious floods in the Panuco River, has very seriously injured that port, and diverted a considerable part of the trade to Vera Cruz. Mr. Consul Chapman, in his last Consular Report, says, with regard to diverted freight, "It should not be forgotten that freight was diverted from Vera Cruz to Tampico through the war in railroad rates, and that the Central Railway at Tampico had obtained the advantage over the Vera Cruz lines by making contracts in Europe for the carriage of through freight to Mexico at ruinously low rates, and that this war has affected the returns for 1895-6 and 1896-7. This struggle being now over, and the opposing companies having come to terms, the diverted freight is rapidly returning to its natural course." The new harbour will undoubtedly afford great advantages to Vera Cruz: you will see in the little blue print attached to the plan a number of piers projected in dotted lines; these are to be built by private companies, and concessions for them will be given by Government; one of them, next to the Government pier, has, we are told, already been taken by the Ward line of steamers, and it will probably be constructed in steel; this company is about to place a number of large 200 tons covered lighters in Vera Cruz to assist the quick discharge of their boats, the idea being to discharge from one side of the vessel on the pier and on the other side into lighters. Another steamship company, it is said, are contemplating the construction of a pier fitted with the most modern machinery for handling coal direct from ships alongside. This project is looked upon very favourably by the Government, and we have said that we will assist in the matter of sidings, and in every other way we can, as a pier built exclusively for coal would be of immense advantage, and serve to develop a trade which is likely in the near future to take very large proportions. The amount of coal and coke imported into Mexico in 1897 is stated in Mr. Consul Carden's report published last September to have been 460,000 tons, or over 35 per cent. more than in 1896. There is in this report a very lucid explanation of the effect of cheap silver on Mexico, and, as the question bears so largely upon our interests, I think it will interest those of you who have not read the report itself if I quote it. It is very short:—

"Five years, the Consul writes, have elapsed since the first heavy fall took place in the value of silver, and it is now possible to judge of its effect on Mexico from actual experience. In my report on the subject published in September, 1893, I endeavoured to show that the opinion, almost universally held then, that the fall must necessarily be disastrous for Mexico, was an erroneous one. In order to do this I discussed separately and at some length the probable effect it would have on different interests, and pointed out that while some would suffer, others, and perhaps the most important ones, would be benefited, and concluded by expressing the opinion that the ultimate effect on the country would be advantageous. As the subject is of interest in its bearing on other countries as well as Mexico, I will recapitulate in a few words the result of the experience of the last four years. The appreciation of gold to practically 100 per cent. premium has naturally entailed on the Mexican Government a very large disbursement in silver dollars to meet the service of the foreign gold debt, which now amounts to 1,305,000l. per annum; but it has not prejudicially affected the revenue from import duties as was generally thought would be the case. The revenue from this source has averaged in the last two fiscal years \$21,500,000, which is larger than the average of any two previous years. The general revenue of the country has shown a still larger increase, which far more than covers the loss entailed in the service of the debt." "The federal revenue, which in the fiscal year 1892-3 was less than 38 million dollars, has gradually increased, until in the year 1896-7 it amounted to 51½ millions." "Commerce has not suffered, as the purchasing power of the country has been largely increased by the stimulus to exportation afforded by cheap silver, and, therefore, cheap labour. Moreover, one effect of the depreciation of the Mexican dollar has been to reduce very considerably the rates

which the duties and expenses (which are payable in silver) on goods imported into Mexico bear to their original gold value. The total duties collected in Mexico in the past three fiscal years, converted into their sterling equivalent, represent only 30 per cent. of the total invoice values of the dutiable articles imported, which cannot be considered as excessive."

"The railway companies have, of course, felt the appreciation of gold very directly, as it affects them not only in the remittances they have to make abroad for the interest on their bonded indebtedness, but also in their purchases of material outside the country. The great increase, however, in the traffic receipts, a part of which at any rate must be attributed to the effect of the depreciation of silver in cheapening labour and encouraging agricultural enterprise has gone far to set off their losses."

Gentlemen, as after the termination of these proceedings we have to hold an extraordinary meeting to authorise the modification in our concession, which will permit us to put into execution the new classification and tariff as soon as the Government has given its consent, I will terminate my remarks on the history of our undertaking for the past half-year; and, though I can say nothing respecting the future of silver, the value of which influences to so great an extent the result of each half-year's working, I can point with confidence to the continued prosperity of the Republic under the enlightened Government of General Diaz and his able Ministers; to the development of industrial and agricultural enterprises; to the very large increase of the export of silver, both in coin and bullion, notwithstanding the extremely low price of this metal; and to the considerable attention which is now being given to gold mining—all of which must reflect on the traffics of the railways. Our earnings continue to show a steady increase—the telegraphed receipts for the current six months to Saturday last show an increase of 87,350*l.*—and we hope that the conference respecting the new pooling arrangement will lead to an agreement satisfactory to all the competing lines. I will now, with your permission, move the resolution; but if any shareholders wish to ask any questions before it is put to the meeting, I will answer them to the best of my ability. I beg to move:—

"That the directors' report to the stockholders, with the accounts and balance-sheet to June 30th, 1898, be received and adopted."

Mr. HENRY GOSCHEN—I beg to second that.

The resolution was then put to the vote and carried unanimously without discussion.

The CHAIRMAN—I have now to move:—

"That a dividend at the rate of 2½ per cent. per annum be and hereby is declared upon the amount of the first preference share capital stock of the company for the half-year ended June 30th, 1898, such dividend to be payable, less income-tax, on and after the 26th instant at the office of the company's bankers."

The Right Hon. WILLIAM LIDDERDALE—I have much pleasure in seconding that.

The resolution was put and unanimously agreed to.

#### EXTRAORDINARY GENERAL MEETING.

An extraordinary general meeting was then held; Mr. W. NEWBOLD again presiding.

The SECRETARY having read the notice convening the meeting,

The CHAIRMAN said—Gentlemen, I don't know that I need say much about this resolution. I informed you at the previous meeting that, with the object of adjusting rates on certain classes of goods, we have, conjointly with the other railways, been endeavouring to formulate a scheme which might be acceptable to the Mexican Government. A new and more uniform classification of goods, with a corresponding schedule of rates, has been prepared by co-operation of the experts of the four railway companies comprising the Mexican Traffic Association—that is, the Central, the National, the Interoceanic, and our own railway. The Mexican Central Railway, whose concession permitted the variations required, has already received the assent of the Government to the proposed modification, and the Minister is now engaged in the examination of the various alterations of our classifications and tariffs. As these are very voluminous much time has been taken up in their scrutiny; but our managing director in Mexico, Mr. Braniff, who has given great attention to the matter and has quite recently discussed the chief points with us, feels confident that it will now be speedily arranged. The Government has intimated to him that as our concession only allows three classes, and the modification having many more, it will require him to produce an authorisation for their increase before the new classification and tariff can be put into operation. It is for this reason that we now submit for your consideration and approval the resolution which you have just heard read, and which I will now propose, viz.:—

"That the board of directors of the company for the time being be and they are hereby authorised to obtain and accept in the name, and on behalf, of the company from the Government of Mexico, or any department of that Government, any modification of the concessions of the company which the board may from time to time deem expedient for the purpose of varying all or any of the provisions in the said concessions relating to rates, fares, classifications, or sub-divisions thereof, and that any such modifications may be accepted in such form and contain such provisions as the board in their discretion may deem expedient."

The resolution which you have just heard read, and which I will now propose, is:—

"That the board of directors of this company for the time being be, and they are hereby authorised to obtain and accept in the name and on behalf of the company from the Government of Mexico, or any department of that Government, any modification of the concessions of the company which the board may from time to time deem expedient for the purpose of varying all or any of the provisions in said concessions relating to rates, fares, classifications or sub-divisions thereof; and that any such modifications may be accepted in such

form and contain such provisions as the board in their discretion may deem expedient."

Mr. H. GOSCHEN—I have much pleasure in seconding that resolution.

The proposition was put to the vote and carried unanimously, without discussion.

The CHAIRMAN—We shall require, gentlemen, an extraordinary meeting to confirm this resolution. It will be held on Friday, the 25th inst. We purpose holding it at the offices of the company in New Broad-street. Notice will be sent to you of the date; but as we require a quorum of twenty people, I hope that some of you will attend, just to carry this matter through. It is rather urgent, and we want to send out this authority to Mexico at once. If any of you gentlemen can attend on Friday, the 25th, we shall be pleased if you will do so. That concludes the business of the meeting.

The proceedings thereupon terminated.

#### JAMAICA RAILWAY.

In accordance with the provisions of the trust-deed, dated January 1st, 1890, a meeting of the 4 per cent. first mortgage bondholders of the Jamaica Railway Company was held at Winchester House on the 4th inst.; Mr. HARRY H. DOBREE presided.

The CHAIRMAN explained that until one full year's default had taken place in the payment of the interest on the bonds, the trustees had no duties to perform beyond those of signing the bonds to be issued, and taking in charge all the bonds not issued. However, they had taken care to keep themselves well informed of what was going on in regard to the construction, opening, and working of the railway, and they had been tolerably well satisfied that a default would actually take place on July 1st last. They had prepared the way by sending out full powers of attorney to the manager of the Colonial Bank, Kingston, Jamaica, instructing him to give the Government of the colony notice that they wished him to take over the line, and he was in a position to do this on the day after the default had taken place. The bondholders would, therefore, see that there had been no delay, and no want of initiative on the part of the trustees. The Government for some time declined to give an answer, and it was not until December 14th, and then after very considerable pressure from various quarters, that there was a formal decline to take over the line. The trustees, in accordance with the Act, then instructed the manager of the Colonial Bank in Kingston to move the court to hand over the line to the trustees on behalf of the bondholders, having first made the same demand to the managers of the railway. Accordingly, the trustees obtained an order from the court, and the line was handed over to them on October 7th, and it was now in possession of their representative. Having read the clause in the Act which empowered the trustees to take the course they had adopted, the chairman went on to say that the bondholders had, at that meeting, to consider whether they would take over the line and work it at their own cost and risk, or whether they would move the court to wind up the company prior to a further petition being made to the Government to take over the railway and to issue 3½ per cent. Jamaica Government stock in lieu of the bonds they now held. He was there to hear the views of the bondholders, but no doubt many of the larger holders had decided on the course they intended to pursue, and in accordance with those views resolutions would be moved.—In answer to bondholders, the CHAIRMAN observed that the trustees expected to get a winding-up order early next year, and therefore they did not think that there would be any deficit in the amount available for back interest. The trustees had full power to act in accordance with the instructions of the bondholders, and they would exercise those powers to the fullest possible extent.

Mr. S. D. HOPKINSON inquired when the bondholders would be likely to get possession of the inscribed stock to which they were entitled. The CHAIRMAN replied that this would depend very much on the good will of the Government, but the trustees fully anticipated having that good will.

Mr. VICARY GIBBS, M.P., then moved a long resolution in accordance with the statement of the chairman, the operative part being as follows:—"Resolved that a petition be presented to the Supreme Court of Jamaica to wind up the company in accordance with the Jamaica Railway Company's law and the terms of the trust-deed to secure the 4 per cent. first mortgage bonds of the Jamaica Railway Company, and that the trustees for the said 4 per cent. first mortgage bondholders be directed and authorised to present such petition accordingly." In moving the resolution, Mr. Gibbs remarked that he fully anticipated that the Colonial-office, which controlled the Government of Jamaica, would do all in its power to see that the obligations entered into by the Colonial Government to the English bondholders would be promptly fulfilled. He had been in constant communication with Mr. Chamberlain on the subject, and had put before him most clearly the rights of the bondholders, and he (the speaker) had no doubt that every effort would be made by the Colonial-office to establish the rights of the bondholders as soon as possible.

Mr. WILLIAMS seconded the resolution, which was passed unanimously.

#### PEKIN SYNDICATE, LIMITED.

An extraordinary general meeting of the members of this company was held on Thursday at the Cannon-street Hotel, E.C.; the Hon. H. E. M. BOURKE presiding.

The CHAIRMAN stated that the issue of the shares announced at the last meeting of the company had been postponed owing to some doubts as to the general rights of the syndicate under the Shansi concession to make a railway outside the province. Her Majesty's Government had since announced that they had obtained from the Tsung-li Yamen the recognition of their right not

only to make branch railways to connect with the Pekin-Hankow line, but also to make an independent line from the syndicate's concession in Shansi to Siang Yang on a tributary of the Yang-tee-Kiang. The directors, therefore, advised that a proper survey of the proposed route be made before deciding on the amount of capital necessary for the undertaking. His Excellency Li Hung Chang had, under date June 30th, written to Lord Rothschild expressing his sympathy with the objects of the syndicate. He, therefore, moved that the capital of the company be increased to 1,540,000*l.* by the creation of 20,000 new ordinary shares of 1*l.* each.

Mr. DAVIES seconded the resolution, which was agreed to.

### METROPOLITAN DISTRICT RAILWAY.

The adjourned extraordinary general meeting was held on Thursday, at Westminster Palace-hotel, to confirm an agreement between this company and the London Tilbury and Southend Railway Company for the working of the Whitechapel and Bow Railway. Major Isaacs presided.

The CHAIRMAN said he was afraid they would consider the delays in connection with the agreement almost interminable, as he had again to ask them to sanction the adjournment of the meeting for fourteen days. The difficulties with which they were originally faced were fast disappearing, and the secretary had assured him that when they next met they would be in a position to seal the agreement. The points which had to be discussed between Mr. Forbes, on behalf of this company, and the representatives of the Tilbury Company were very technical, but he was pleased to say a settlement had now been nearly arrived at. He concluded by moving the adjournment of the meeting for fourteen days.

Viscount GORT seconded the motion, which was agreed to.

## Directors' Reports.

### BENGAL DOOARS RAILWAY.

The gross earnings for the half-year ending June 30th, 1898, were Rs.95,071, a decrease of Rs.17,023; the working expenses were Rs.63,334, a decrease of Rs.5,592; per-centage of working expenses on gross earnings, 66.62 per cent., an increase of 5.12 per cent.; the net earnings were Rs.31,727, a decrease of Rs.11,431, less Indian income-tax, Rs.826. Exchange, 1*s.* 4*d.*, an increase of 9.32*d.* The net earnings in sterling were 2,051*l.*, a decrease of 702*l.* The net earnings in India have been brought to account at an exchange of 1*s.* 4*d.* per rupee, giving a sum of 2,051*l.* To this has to be added 1,753*l.*, being the balance brought forward from last half-year, plus interest, leaving available for dividend 3,804*l.* The sum at credit of revenue account, as stated above, admits of an interim dividend of 1½ per cent. for the half-year, being the same as paid for the corresponding period in 1897. This will absorb 2,250*l.* and leave a balance of 1,554*l.* to be carried forward. The directors, in an interim report, state:—"The falling off in traffic is due almost entirely to the very much smaller quantities of rice and machinery carried. During the corresponding half-year of 1897 the rice crop was poor in the Dooars district, and large quantities were imported. For the half-year under review the local crops were good, and but little rice was imported. On the other hand the tea traffic has improved by about 10 per cent. For the current half-year the earnings up to October 15th have amounted to Rs.1,02,272, as against Rs.96,585 for the corresponding period of last year. Extensions.—The board have secured the services of Mr. Anderson, lately chief engineer to the Eastern Bengal State Railway, as engineer-in-chief of construction, and the remainder of the staff requisite has also been engaged. Work has already been commenced, and will be pushed on rapidly this cold weather."

## General News.

### EASTLEIGH (LONDON AND SOUTH WESTERN) RAILWAY INSTITUTE.

There was a most successful gathering at the Eastleigh Railway Institute on the 2nd inst., when the prizewinners among the students of the classes held at the institute received their awards at the hands of the general manager of the South Western Railway Company (Mr. C. J. Owens). In response to the request of the SECRETARY that he would make a few remarks, Mr. OWENS said he did not think he could do better than take as his "text" the admirable report which the secretary had read. It was one which must give great pleasure to the directors of the company who founded that institute, and to a great extent maintained it, not only that their employes might find amusement there, but also that they might take advantage of the opportunities which the institute might offer of improving themselves, and the report proved that to a great extent the employes were so using the institute. He regarded with especial pleasure the wonderful success which had been met with in the carriage-building class. He was very patriotic, and did not like to see foreign things coming into England at all, and when he saw things which bore the impress "Made in Germany" or "Made in America" he felt a little bit humbled. The success of classes such as they had for carriage-building at the institute showed

that men were earnestly and heartily devoting themselves to developing the art of carriage-building to the greatest possible extent. He did not admit that America was very far ahead in that respect at the present time. The English builders had very well adapted their means to the end, and in their modern railway carriages had given the British public what they wanted. If they were to impose on the British public the sort of carriages in which the Americans travelled he fancied there would be great complaints in many quarters. Still, they were progressing, and as an instance of that he would mention the new stock which Mr. Panter had put upon the line, and he (Mr. Owens) had been delighted to hear from travelling friends high encomiums upon the beauty of that stock. He advised the young men engaged in carriage building to work hard at it and make it a profession, and one of the best things for them was to make the most of institutions like the one in which they were assembled. He did not see classes for goods truck building on the list. He feared that there had been an impression that almost any one could make a goods truck. That was a mistaken idea. A big congress was to take place in Paris in 1900, and one of the most important subjects for consideration was the most economical size and form of the goods truck. The lighter they could make their goods truck in proportion to the tonnage of goods it would hold, the cheaper they could carry those goods, and the lower they could make their rates to the public. Again, the lower the rates were, the more trade would the public be able to do. There was a great deal to be done in the way of the goods truck, and he hoped that one of these days Mr. Panter would see his way to start a class which might help the company to something better than they had to-day. Having spoken in appreciation of the shorthand class, Mr. Owens remarked upon the importance of the instruction given in first aid to the injured. He thought they could not do better than extend these classes all over the system. He should like to see the line divided into three or four districts, and then they might have competitions in first aid between the districts, and so work themselves up until they were able to enter the great competition in London, and win the trophy for the South Western Company. The committee in their report had expressed their recognition of the labours of the teachers. Without the earnest hard work of the teachers, he did not think the amount of success would have been achieved which had been, as shown by the prizes which he had been enabled to hand to the students. To the young men in the works he would say, "Don't misapprehend the old saying, 'All work and no play makes Jack a dull boy.'" He had known a good many more men spoilt by too much play than by too much work. He wished the institution every possible success during the coming year. (Cheers.)

### GENERAL RAILWAY WORKERS' UNION.

A report prepared by Mr. A. Clark, the general secretary of the Railway Workers' Union, for presentation to the meeting of the executive council of the union, contains an interesting reference to the administration of the Workmen's Compensation Act as regards the men employed by railway carriers. Many of these men are members of the union. It is pointed out that "the information to hand shows that there is every appearance of the working of the Act giving considerable trouble and no end of legal difficulty," and that, owing to the loose manner in which the Act has been drawn, it is difficult to ascertain exactly what classes of railway workers are included in its provisions. Clause 7, section 1, for instance, provides—"This Act shall apply only to employment by the undertakers as hereinafter defined, on, or in, or about a railway," and the definition is that "railway" means the railway of any railway company to which the Regulation of Railways Act, 1873, applies." Thus "transport men, other than railway men, do not come under its provisions." It is further suggested that "considerable doubt also exists as to whether carters directly employed by a railway company who meet with an accident," while following their occupation, are always, "on, in, or about a railway," and so entitled to compensation under the Act. As several companies are excluding such workmen, "a test case should be tried, in order to get a decision on the true meaning or definition of that term." From this, and other causes, "it will be seen that the Act, which we were told could be easily understood and cheaply administered, is a cobweb of intricacies and legal subtleties, and is likely to prove slow and expensive in working." An elaborate calculation is made in the report of the effect upon the wages of railway men of the recent alterations by the principal companies in the conditions of employment. It is shown that to 357,359 men employed by the seventeen more important companies, there was paid in wages in the first week of December, 1896, a sum of 432,827*l.*, equal to an average payment of 2*s.* 2½*d.* per man. In the corresponding week of 1897, to 374,147 men employed by the same seventeen companies there was paid a sum of 460,005*l.*, equal to 2*s.* 7*d.* per man. The list includes the men employed in the

coaching, goods, locomotives, and engineer's departments. The figures of the lists of accidents supplied to the Board of Trade are appended, and it is shown that during the past ten years 4,749 railway men have been killed and 30,271 injured. "In every two days three railway men are killed, and every day 11·3 men are injured." The "accidents to shunters and guards have shown no tendency to decrease." Last year, "in shunting operations alone, ninety-seven men were killed and 2,400 injured." The report summarises the proceedings with regard to the proposed amalgamation of the union with the Amalgamated Society of Railway Servants.

### THE "VICTIMISATION" MYTH.

In continuance of the correspondence reproduced in "THE RAILWAY TIMES" of October 29th we give the following letter, which has been addressed to the general secretary, Amalgamated Society of Railway Servants:—

"Board of Trade (Railway Department), 7, Whitehall-gardens, S.W., October 31st.

"Sir—In reply to your letter of 22nd inst. on the subject of the dismissal of certain members of the Amalgamated Society of Railway Servants by the railway companies employing them, in which you request the Board of Trade to ask Parliament to appoint a Commission, by which the Board suppose you mean a committee, to inquire into the allegations made by your society, I am directed by the Board of Trade to state that the question of the appointment of such a committee must necessarily be reserved until after the reassembling of Parliament. In the meantime, I am to remind you of the offer made by this Department in their letter of 19th inst., that, if your society submits evidence to controvert the assertions of the railway companies as to their reasons for the dismissal of the men, the Board of Trade will make a further representation to the companies on the subject.—I am, &c., (Signed) "COURTENAY BOYLE."

To the above letter the secretary of the Amalgamated Society of Railway Servants has replied as follows:—"In further reference to your R12,339 of the 31st ultimo, in which you state that if this society submits evidence to controvert the assertions of the railway companies as to their reasons for the dismissal of the men the Board of Trade will make a further representation to the companies on the subject, I have to point out that we are not aware that the companies have assigned any particular reasons for discharging any of the members referred to, but have merely made a general assertion which was conveyed in your letter of the 19th ult. If the Board of Trade would ask the companies to furnish your department with the nature of the charges which led to the discharge of a particular member or members, then we should know what evidence is required (further than that submitted to your Department with my letter of June 3rd) to controvert the assertions of the railway companies."

### ARGENTINE ITEMS.

The Argentine Government has ordered the provisional opening to public traffic of the line between La Merced and Zubiria, on the Salta-Carril section.

The La Plata Government has granted concessions to Señor A. Varrailhon and J. E. Rey and Co. for networks of light railways in the province of Buenos Ayres.

Mr. J. W. Philipps, M.P., has been elected chairman of the board of the Buenos Ayres and Pacific Railway Company, Limited, in the place of Sir Gabriel Goldney, Bart., who has retired from that office while retaining his seat on the board.

The *Review of the River Plate* says:—"The fever for concessions, far from subsiding, rises higher and higher. Electric tramways, broad-gauge railways and narrow-gauge railways, from and to the most hopeless places, are projected, and concessions are actually being obtained, to be hawked about among possible buyers. The concession for a railway from Rosario to Mendoza and San Juan need not be regarded very seriously, even if it does meet with the cordial support of the people in Mendoza, who groan under the oppressive tariffs of the Argentine Great Western Railway. We doubt whether the proposed railway could pay, even if the high tariffs were continued; and there would be a bitter outcry if no reduction were obtained."

According to a report issued by the President of the National Railway Board the interest on capital earned by the Argentine railways during the last eight years has been as follows:—1890, 2·46 per cent.; 1891, 1·80 per cent.; 1892, 1·77 per cent.; 1893, 1·99 per cent.; 1894, 2·13 per cent.; 1895, 2·69 per cent.; 1896, 3·13 per cent.; 1897, 2·45 per cent. The total length of lines in the Republic at the present is 16,728 kilometres. There are 929 kilometres of line under construction, and opened provisionally

to public service. The total capital invested in the railways at the end of 1897 was \$523,549,918 gold, equivalent to \$35,377 gold per kilometre. The lines still to be constructed, for which concessions have been granted, amount to 5,780 kilometres of 5ft. 6in. gauge, 790 kilometres of 4ft. 8½in. gauge, and 4,820 kilometres of 1 metre gauge.

### ABERDEEN JOINT STATION.

A deputation appointed at a recent public meeting in Aberdeen waited upon the Joint Station Committee on Wednesday, and urged upon them the necessity for taking steps for the enlargement of the station. In reply to the deputation, Mr. William Ferguson of Kinnmundy, chairman of the Great North of Scotland Railway Company, said that the delay in connection with the extension of the station had been imperative on account of the great interests involved and the enormous cost which had to be faced, and the difficulties in so arranging the station as to meet the needs of the four railways which had to be accommodated in it. The engineers of the two companies who were proprietors of the station—the Caledonian and the Great North—had now, however, settled the principles on which the enlargement would be carried out. The proposed plans embraced the doubling of the running main lines to Ferryhill, which would involve the widening of Ferryhill arches. There would also be additional shunting lines, and large and ample extensions of the platforms for the arrival and departure of trains, and these would all be under cover. Waiting-rooms of ample dimensions would also be provided, and spacious booking, parcel, and other offices, and these too would be under cover. There would also be a covered stand for cabs. The plans, and especially the elevations, were not completed as yet, but the law officers of the two companies were preparing the necessary notices for obtaining an Act of Parliament to carry out their intentions. The Caledonian Railway Company were represented at the conference by Mr. J. Badenach Nicolson of Glenbervie, one of the directors; Mr. Barr, engineer-in-chief; and Mr. Charles Smith, superintendent for the Aberdeen district.

### MANCHESTER SHIP CANAL.

At the last meeting of the Liverpool Chamber of Commerce the following letter was read, which had been received from the High Commissioner for Canada:—"I beg to state that the contract was entered into under date June 25th last with the Manchester Liners, Limited, for a service (commencing in the month of July last, and to continue for three years) between Canada and the city of Manchester, sailing during the season of open navigation on the St. Lawrence in each year from the port of Montreal to the city of Manchester, calling on all voyages, both outwards and inwards, at Quebec, and during the balance of the year, when navigation is closed on the St. Lawrence, sailing from St. John, N.B., to the said city of Manchester, and return, calling on all voyages, both outwards and inwards, at Halifax, N.S. no calls to be made at any port or ports other than those mentioned, the vessels employed to be specially adapted and fitted therefor, each of not less than 8,500 tons deadweight capacity, and capable, when fully laden, of steaming 12 knots per hour, with adequate accommodation for 850 head of cattle, the service to be a fortnightly one, sailing from each of the terminal ports on such fixed dates as may be sanctioned by the Minister at regular intervals of fourteen days, the subsidy to be given for the service being at the rate of 8,000*l.* per annum."

The Cattle Trade at Southampton.—The London and South Western Railway Company are about to make extensive provision at Southampton Docks for the live and dead meat trade. In the first instance it is proposed to establish, immediately adjoining the new deep-water quays on the bank of the river Test, lairage, abattoirs, and cooling rooms for about 3,000 head of cattle, but as the company have, by the purchase of the "Mudlands," acquired a large area of land, this accommodation can at any time be greatly increased. Adjoining the live cattle wharves it is proposed to establish, on the most approved American principle, a cold installation, covering about 1,000,000 cubic feet, for the storage of foreign meat intended for the London and provincial markets, and the overtures which have been addressed to the South Western Company by importers justify the belief that a considerable expansion of business at Southampton will be the result of these additions to the facilities of the port.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homoeopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months ..... £0 7 0

Six Months..... 0 13 0

Twelve Months..... 1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

Nov. 14—Interoceanic Railway of Mexico (Annual), Winchester-house, at 12.30.

Nov. 17—Waterford and Central Ireland Railway (Half-yearly), Dublin, at 3.

Nov. 25—Mediterranean Railway (Annual), Milan.

Nov. 30—Italian Company of Sicilian Railways (Annual), Rome.

**A Level Crossing Question.**—In the Queen's Bench Division on Thursday, Mr. Justice Bigham heard an information filed by the Attorney-General at the relation of the Warwickshire County Council, for an injunction restraining the London and North Western Railway Company from continuing to violate a provision of the Railway Clauses Act. It appeared that there was a level crossing adjoining the Atherstone railway station, and the Lands Clauses Act provided that in the case of such a crossing trains should not pass over it at a greater rate of speed than 4 miles an hour. The defendants having violated that provision by running trains at express and other rates of speed over the crossing, the county council submitted that they were entitled to an injunction. For the defendants it was argued that the balance of public convenience was in favour of the present system. They further maintained that it was not imperative on his lordship to grant an injunction in a case like this, where there was no proof of public mischief. The county council, in reply, urged that the violation of the statute caused great inconvenience to foot passengers, because, owing to the speed at which the trains travelled over the crossing, the gates were kept closed for long periods at a time. His lordship reserved judgment.

## The Railway Times.

Established 1837.

NOVEMBER 12, 1898.

## THE AMERICAN RAILROAD POSITION.

It speaks volumes for the absolute incompetence of the Joint Traffic Association to maintain rates that the recent decision of the United States Supreme Court has been received with perfect equanimity by those interested in American securities on both sides of the Atlantic. In recent issues of THE RAILWAY TIMES we have shown by comparative statistics that there has been a long and decided fall in railway rates in the United States, and the perfect calm with which so important a decision as this has been received in railroad circles seems to point the further truth that the situation has not been materially affected by the existence of this and other traffic associations formed for the purpose "of establishing and maintaining reasonable and just rates, fares, rules, and regulations on State and inter-State traffic." Had the association really served the purposes for which it was formed we may be sure that the decision as to its illegality would have been followed by a demoralisation of rates even worse than that which already existed, and that market prices would also have suffered. It must be borne in mind that the Joint Traffic Association comprises the principal lines in the United States, and the only parallel in this country to its disappearance from the scene that we can suggest would be the disappearance of the rates' committees and the other machinery relating to rates for competitive traffic provided by our own Clearing-house system. The vital difference, however, is that the latter is effectual, whereas the American organisations for the maintenance of rates are ineffectual, and in some cases only serve the convenient purpose of providing a cover for the delinquencies of some of their more unscrupulous adherents. This view of the case is put forward by so eminent an authority as President Ingalls, who is stated to have said that "Some roads that have so-called big railroad men presiding over them have been hiding their heads under the Joint Traffic Association, and have been naming just such rates as they saw fit, regardless of agreements. They will now be uncovered. . . ." If they could now be spanked the situation would be further regularised, but, as so often happens in the States, the letter of the law, if not the spirit, shelters the culprits, as the recent decision clearly shows. Then the pronouncement in the Trans-Missouri case last year rendered the more recent judgment less of a surprise, whilst (as we pointed out a fortnight ago) the latter has led to the hope that Congress will duly consider the claims of the railroads to some protection against a further fall in rates. In fact, the *New York Commercial and Financial Chronicle* boldly asserts that it believes "a law can and will be passed after the fourth of March which will give the country what it needs." What the "country" needs does not, in the light of past experience of American legislation, by any means coincide with the interests of the railroads, though we quite agree with our contemporary when it argues that, broadly viewed, the interests of the country are in the long run bound up with, and dependent upon, just treatment of railroad interests. We are not at all sanguine about the results of Congressional action in the matter. If it took the form of giving authority to the railroads to enter into pooling agreements, some temporary relief might be secured, even though the agreements were subject to the supervision of the Interstate Commission. But the

cry for "permanent relief," so far as the rate situation is concerned, must ultimately depend upon the administrators of the railroads themselves, unless, indeed, the freedom of railroad administration is restricted by the conferring of absolute powers for fixing rates upon the Interstate Commission—an alternative which would lead to even greater evils. After all, the worst enemies of the railroads are the methods of the administrators themselves, and so long as railroad management in the States is largely irresponsible, and is divorced from the control of its bond and stock holders, so long will it remain financially unsuccessful. Owing to the "bearer" system of share holding, so common with American railroad companies, those installed in office can do very much as they please, and are certainly not haunted by any unpleasant anticipations of what would happen in the event of their failing to earn a dividend. Congress, we are afraid, cannot remedy this evil, though it might certainly penalise railroad managers and others who, acting *mala fide*, cut rates or otherwise departed from the spirit of any authorised "pool." Bearing on the point of the responsibility of the management for the financial outcome of their efforts it is rather surprising to read the following in the last issue of the *New York Chronicle*:—"The important systems in the country are few now, and their security-holders are in closer touch with the management and exercise a greater moral influence in the direction of a roads policy than they used to exercise." This may be true of the reorganised roads, for in the receivership period and in the process of reorganisation the voting power does, no doubt, get concentrated into the hands of the financial houses and their friends, who conduct the profitable business of setting bankrupt roads on their legs again. But we doubt if this species of control is fraught with much benefit to the average investor in American securities, and, of course, it is relaxed as soon as the reorganisers have disposed of their interests. In fact we are bound to say that the only saving feature in the rate situation to-day is the plenitude of freight at the present time; what will happen when traffic gets scarcer we would not care to guess, but the situation is not hopeful. Meanwhile the market for American securities has received a distinct fillip by the Republican victories at the Congressional elections, especially in New York State. There were fears that the Democrats might secure sufficient support to enable them seriously to hamper the policy of President McKinley. It is true that there has been little reference to free silver of late among even the Democratic party. Times are too good in America just now to make it worth while to raise this election cry; but, remembering their action prior to the last Presidential election, any progress made by that party must perforce be viewed with misgiving by the supporters of an untainted currency system. The Republicans have gained unexpected victories in the Senate, in which body they are assured of a fair majority, and in the House of Representatives, though they have not fared so well, it is expected that they will have a working majority.

### THE AMALGAMATED SOCIETY AGAIN.

One would have thought that after the snub direct administered to the Amalgamated Society of Railway Servants by the Board of Trade last winter, that body would have been very chary about running the risk of incurring another. With characteristic temerity the leaders of the society have, however, again invited an expression of opinion from the Board of Trade, and, as the copy of correspondence reproduced in these columns shows, they have got it. We

referred on the 22nd ult. to the alleged cases of "victimisation" of the society's members which were brought up at their late annual congress. The head and front of the companies' offending this time is that they dismissed certain men whose only fault is said to be that they belonged to the society—so the Amalgamated Society of Railway Servants have been pleased to say. There is a good deal to be said for the view that that fault is quite big enough to justify the alleged action of certain companies; but we think the true explanation of these supposed grievances is to be found, as we have pointed out before, in the arrogant way in which certain members of the society were pleased to treat their employers, acting under the belief that the society would back them up no matter to what lengths they might go. So long as a man does his duty, we are perfectly sure that it is a matter of indifference to the head officials of our railways whether he belongs to a society or not, though we cannot deny that in the light of the experience of the past two years a railway manager would certainly be inclined, and rightly so, to choose a non-union man, other things being equal. Mr. Bell appealed to the Board of Trade to appoint a special commission to inquire into the cases of alleged victimisation. Sir Courtenay Boyle replied of course that he was not empowered to appoint such a commission with the necessary powers, and he took the opportunity of pointing out that "while the Board would strongly deprecate the dismissal of any servant because he had formed part of a deputation, such as is referred to, or because he belonged to a society, they must decline to take the responsibility of urging upon the companies the retention in their service of any person who in their opinion is not fit for the duties devolving upon him. To adopt any other course would be to transfer to the Board the responsibility which properly rests upon the companies of managing their great undertakings with proper regard to the convenience and safety of the public." The Board had made representations to the companies on the matter, in reply to which they stated that the dismissals had no relation to the fact that the "pseudo-victims" belonged to the society, and at the same time the Board promised to make further representations "if the society were prepared to submit evidence to the contrary effect." Evidence to back up their loud accusations has never been a strong point with the Amalgamated Society of Railway Servants, and it was not forthcoming in this instance, but instead Mr. Bell has the boldness to suggest that the Board of Trade shall "ask Parliament to appoint a commission of inquiry to take evidence in connection with this important matter"! To this the reply is that the question of a committee must stand over until Parliament assembles, and Sir Courtenay Boyle repeats his offer regarding evidence. It seems improbable that much more will be heard of the matter, unless indeed the "railway party" in the form of Mr. Bell makes its appearance in Parliament next session—a contingency which will certainly not add to the lustre of that historic assembly. It is a truly piteous spectacle to observe how the officials of this society are making heroic efforts to restore themselves in the good graces of their misguided following. No wonder, if, as reported, nearly 25 per cent. of the membership at the end of 1897 has fallen out of its ranks.

### THE TIPPING OF RAILWAY SERVANTS.

The *Daily Mail* a few days ago published some remarks, "specially contributed," on this subject, which, if allowed to pass unnoticed, might not unnaturally lead to serious misconception in the public mind as to the position of the companies, and to a corresponding injustice being done to their normal relations with their workmen. In these days

of agitation, open or the reverse, it is imperative to scotch such mis-statements at the earliest moment. Our contemporary, after stating that at most of the important London stations men are "engaged by the railway companies, but "are paid no wages," makes the following astounding pronouncement:—"The practice," it is said, "of tipping railway servants has spread to so great an extent that the "railway companies have taken advantage of it to reduce "their wages-list by abolishing wages altogether for one "section of their workpeople." The section referred to is then defined as the outside porter class. Passing by the comprehensive nature of the opening paragraphs, which are subsequently boiled down to an infinitesimally small fraction of those whose work is connected with railway stations, we are in a position to give an unqualified contradiction to the statements of the *Daily Mail* above quoted. The wages of outside porters have not been reduced for the simple reason that at no time have these men been paid by the companies, by whom, moreover, they are *not* engaged, and for whose benefit they do not work. The outside porter is in no sense the servant of a railway company. He is licensed by the company at whose station he stands for hire, and he wears a badge to distinguish him from his unlicensed fellows. The companies undertake no obligations as regards these men, who perform work which lies entirely outside the professed undertakings of the railways. The license, in fact, is a means adopted by the companies, as in the case of privileged cabs, of permitting those only who are *prima facie* respectable to offer their services on and near railway premises to those who have ceased to be passengers. Beyond the elementary condition of good behaviour, the outside porters on their side have no obligations to the companies, and, unlike railway servants, can of course please themselves as to hours and as to discontinuance of work without notice. In short, the outside porter is not, and never has been, a railway servant, and the wonderful discovery that the companies are reducing or abolishing wages is a mare's nest of the first order. So far from this being the case, we will cite a little piece of history for the benefit of the *Daily Mail* reporter. Some years ago complaints appeared in the public press that the third-class, and from outward appearances less well-endowed passengers, did not get their fair share of attention from platform porters. This was ascribed to the lavish tips of the favoured few who were supposed to exercise a magnetic influence over every velvet-coated man in the station. To meet this, Mr. Ivatts, the author of *Railway Management*, suggested the formation of a special grade of "third-class" porters, to whom the acceptance of a tip or the merest inclination in the direction of any but a third-class passenger was to mean little less than summary execution. These men, to recompense them for the loss of tips, were to receive slightly higher pay than the ordinary porter. The railway managers at once saw that the adoption of this system must have the effect of practically giving by implication an official authority for the acceptance of tips by the ordinary porter, to make up the difference between his pay and that of his "third-class" comrade. So one company, to our knowledge, recognising the penalty of past laxity, increased the stringency of its rules and regulations, but, at the same time, increased the scale of pay all round. That does not look like taking advantage of public generosity.

## TWO MEXICAN REPORTS.

The report of the Mexican Railway Company for the first half of the present year, and that of the Interoceanic Company for the year to June 30th last have already appeared in our news columns. As both companies work under the

same conditions, to a large extent between the same points, and in accordance with a mutual understanding, it will be convenient to review their results side by side. In a sense, both reports are disappointing, for a large growth in gross earnings has in each case been accompanied by only a very slight improvement in net profits. The Mexican Company had an addition to gross receipts for the half-year of \$206,000, or nearly 10 per cent., but the net profit was only 1,880*l.* higher. Similarly, the Interoceanic had a gross increase for the year of \$493,762, or nearly 20 per cent., but the net profit in sterling advanced by only 9,200*l.*, and this notwithstanding a reduction in the ratio of currency expenses from 77 per cent. to 76 per cent. Both these results are, of course, due to the further depreciation last half-year in the sterling value of the Mexican dollar, which then realised only 22·25*d.* on the average, against 24·07*d.* in the first half of 1897. Since then a slight improvement has been shown concurrently with a recovery in the price of silver, which will of course benefit these and other Mexican railways. In both cases the enhanced cost of fuel figures very largely in the accounts. The Mexican has an increase of \$123,000 under the head of locomotive expenses, and in the case of the Interoceanic the additional cost of fuel was \$114,023. These increases are due to the Spanish-American War, which caused advance in freight charges, and also, such is the widespread injury effected by present-day labour struggles, to the strike in the South Wales coalfields. In both cases a very much larger amount of work was done, for which the increase in currency receipts did not fully compensate them, in consequence of its depreciation. An extraordinary example of the indirect effect upon rates which the fall in silver has had is afforded in the Interoceanic report. It is there stated that the average rate per passenger is less than  $\frac{1}{2}$ *d.* per mile. Even in the United States the average rate is 1*d.*, and, of course, the conditions in Mexico are such that there is much to be said for a higher rate there. So far as goods traffic is concerned, it is quite possible that the new and uniform classification to be adopted will give the companies some compensation for the reduction of their rates which has followed the decline in silver. A resolution authorising the adoption of this classification was passed at the meeting of the Mexican Railway yesterday, and, if the approval of the Government is obtained, this will be a distinct advantage. The pool between the Mexican and Interoceanic companies has been renewed until June 1st, 1899. Both reports, however, referred to the fact that no renewal of the larger pool covering traffic under the Mexican Traffic Association has been effected, and that it expires next month. It is to be hoped that the conference to be held shortly will lead to a satisfactory arrangement of this matter, though the statement that one of the companies is dissatisfied with the existing arrangement is not reassuring. The final outcome of these two companies is not encouraging, and serves once more to show that where one railway can flourish two will starve; for until the advent of the Interoceanic the old Mexican was a fairly flourishing property. Now it only manages to pay 2½ per cent. on its first preference stock, nominally entitled to 8 per cent., and nothing at all on three millions of second preference and ordinary stocks. The Interoceanic pays 3 per cent. for the year on its A debenture, nominally entitled to 7 per cent., and nothing at all on 3,170,000*l.* of junior stocks, representing 60 per cent. of its total capital. The Interoceanic had already had some relief afforded by a "scheme of arrangement" sanctioned not long ago, and in the past year 63,631*l.* was spent on capital account, though no details are given, and it is estimated that a further 65,000*l.* will have to be expended, though the company has apparently reached the end of its tether so far as raising

more funds is concerned. Incidentally it may be remarked that the 1,000,000*l.* of preferred capital, which is cumulative, has arrears due to it of 475,416*l.*

### PASSING NOTES.

The traffic receipts for the week ending November 6th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,685,269*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,607,220*l.*, with 19,034½ miles open. There was thus an increase of 78,049*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for nineteen weeks to date amounted on the same thirty-three lines to 34,791,458*l.*, in comparison with 33,766,155*l.* for the corresponding period last year; increase, 1,025,303*l.*

At a general meeting of the Pekin Syndicate, Limited—about which we have had something to say on several occasions recently—an amusing, though somewhat ancient, letter from Li Hung Chang was read for the delectation of those present, and for advertisement to the absent. In this letter the artful Li expresses a hope that the Pekin show will be run by men of integrity, and that “the speculative and jobbing element will be avoided.” For our own part, after watching the progress of this Pekin Syndicate from its inception, the only conclusion we can arrive at is that in itself it is a job and a speculation of the first water—and nothing else. The mystery to us is—How eminent houses in the City can allow their names to be bandied about in connection with and used as decoys for the unwary investor.

We hear so frequently of the alleged superiority of American methods of railroad operation that it is pleasing to come across one recent innovation in America which was first adopted in this country about thirty years ago. We refer to what an American contemporary terms the “track tanks,” that is the trough laid between the rails at certain points, by means of which engines travelling at a high speed can replenish their supply of water without the necessity for stopping, or even slackening speed. This device has been adopted by the North Western for many years with great success, and is now becoming quite common in America. It is a very costly system especially as regards the installation; in fact, it is one of the prices which the companies have to pay for high speed, and a reduced number of stops on express trains both here and in the United States.

A deputation from Peterborough Corporation (headed by the Mayor) waited upon the directors of the Great Northern Railway Company at King's-cross last week to discuss matters connected with a new central railway station for Peterborough, or the enlargement of the existing Great Northern Railway station. The conference lasted two hours, a large number of directors being present. The deputation expressed themselves in favour of a central station. The smaller scheme—which would be carried out solely by the Great Northern Railway Company—would not include the abolition of the level crossing. No decision was arrived at on the question, as other companies whose interests would be affected will have to be consulted before a central station can be proceeded with.

The plans which the Caledonian Railway Company are preparing in connection with their scheme for the extension of the Central Station provide for the inclusion of all the property between Argyll-street and the Clyde as far as a line drawn southward in continuation of the east side of Hope-street. The company already own all the property on that side of Hope-street, with the exception of St. Columba's Established Church, and their property there will also be included in the station. These extensions also include the erection of a bridge across the Clyde, which will be twice the breadth of the existing one, a bridge across Ann-street, and a bridge across Argyll-street, which will be a continuation westward of the present bridge, and one and a half times its breadth.

The deputation from the Amalgamated Society of Railway Servants who recently waited on the principal Government and Opposition whips with regard to a seat being found for the general

secretary of the society, on Tuesday reported the result of their interviews, at a meeting of the London Council of the society. After a discussion, the following resolution was carried:—“That the Executive Committee be requested at their next meeting to consider and report with a view to coming to an arrangement with the Liberal party consistent with the resolution passed at the annual general meeting at Leeds and with Mr. Bell's political opinions, and so endeavour to secure early representation in the House of Commons.”

The Trade and Navigation Returns for October show exports amounting to 19,863,019*l.*, an increase of 579,967*l.*, or 3·0 per cent., on the corresponding month of 1897, the imports amounting to 38,601,673*l.*, a decrease of 443,090*l.*, or 1·1 per cent. The value of the iron and steel exports was 1,837,328*l.*, against 2,161,693*l.*, an increase of 15·0 per cent.; and of coal and coke exports 1,699,394*l.*, against 1,460,852*l.*, an increase of 16·3 per cent. Imports for ten months ended October 31st amounted to 383,311,220*l.*, an increase of 14,629,754*l.*, or 3·9 per cent.; exports to 192,592,177*l.*, a decrease of 2,682,051*l.*, or 1·3 per cent., and re-exports to 50,553,983*l.*, a decrease of 61,690*l.*, or 0·1 per cent.

Drivers and firemen on the Glasgow and South Western Railway have instructions that in the case of a train becoming divided during the hours of darkness, they must, in returning on the right line for the broken-away part, throw their engine fire-door open and carefully examine the opposite line to see that it is clear, as the train may have become divided in more than one place. As an additional precaution, the guard must not allow the rear portion of the train to be taken forward until he has ascertained from the driver that he duly examined the line on which the vehicles are to proceed when he was returning and found it to be clear.

Half-a-dozen officials of the Glasgow and South Western Railway Company arrived at Kilmalcolm on Wednesday morning, and proceeded to West Kilbride, near Auchencloshie, from whence a survey was made of the beginning of the route for the proposed joint-line from Kilmalcolm to Largs. It is now a number of years since this project was last considered and an examination made of the ground likely to be needed by the railway company.

The Hamilton Motherwell and Wishaw Light Railways Company, Limited, is the title of a company which was registered November 3rd, by Ashurst and Co., 17, Throgmorton-avenue, E.C., with a capital of 20,000*l.* in 10*l.* shares. The objects of the company are sufficiently indicated by the title. The directors are to be elected by the signatories. Qualification, 200*l.* Remuneration to be fixed by the company.

The first passenger train over the London Extension of the Great Central Railway ran on Monday from Manchester to the Marylebone terminus. It contained only the general manager, Mr. W. Pollitt, and a party of the company's officials; but its journey indicates the near opening of the new line to London for passenger business. Excellent time was kept throughout the trip, the train drawing up at the London terminus punctually to the appointed time.

The Coatbridge and Airdrie Light Railway Order came up for confirmation before the Board of Trade, on Tuesday and Wednesday, when the Caledonian and North British railway companies appeared to oppose the Order, which is promoted by the British Electric Traction Company, and has received the approval of the Light Railway Commissioners. The decision of the Board of Trade is reserved.

Since the contest between the North British and North Eastern railway companies for powers to engine the London trains from Edinburgh to Berwick and *vice versa*, the latter company has joined hands with the Caledonian, and a considerable amount of traffic from Newcastle to Glasgow is now being conveyed *via* Carlisle, thence per the Caledonian Railway.

The Board of Trade has confirmed the Dudley and District Light Railways Order, 1898, authorising the construction of light railways in the borough of Dudley and the urban district of Stourbridge, in the county of Worcester; and in the urban

district of Rowley Regis and rural district of Kingswinford, in the county of Stafford.

The tunnels of the Central London Railway are now open from end to end, and one can make one's way through from Shepherd's-bush to the Mansion-house underground. The permanent way will soon be laid, and the stations are already being tiled. The great electrical installation at Shepherd's-bush is rapidly approaching completion.

The will has just been proved of the late Mr. Arthur E. Guest, a director of the London and South Western and Waterloo and City railways, and chairman of the Taff Vale Railway. The gross value of the whole of the testator's estate has been entered at 8,912*l.*, and the net value of his personal estate at nil.

The Southampton and New York service, which was suspended on April 16th, when the United States Government recalled the vessels and converted them into armed cruisers, was resumed on Saturday, when the *St. Louis*, Captain William G. Randle, sailed with 211 first, 100 second, and 165 steerage passengers.

Henry Ginglie, a commercial traveller, was fined at Marylebone Police-court yesterday, in the maximum amount of 40*s.* and ten guineas costs for travelling on the London and North Western Railway from Liverpool to London on September 16th without a ticket.

The Tyldesley, Atherton, and Leigh Rural District Councils and the Lowton Parish Council have approved the Lancashire Light Railway Company's scheme for connecting Liverpool and Bolton and the intermediate districts.

The Midland Railway Company proposes to obtain running powers over the Lancashire and Yorkshire into Halifax, and to connect Huddersfield with its system by making a junction line between Royston and Thornhill.

Mr. Henry Evans, goods manager of the Glasgow and South Western Railway, has been selected as chairman of the Goods Managers' Conference of the Railway Clearing-house for the ensuing year.

Theatrical companies, if they sign a risk note, are now allowed to travel at reduced rates, and carry so much luggage free of charge—3*cwt.* for first-class passengers, and 1*cwt.* for third-class passengers.

Under the management of the Belfast and Northern Counties Railway Company a new hotel for the accommodation of travellers was opened at the Belfast Station, York-road, on Monday last.

The new cycle holder "Transgrip," for the safe carriage of cycles by rail, will be exhibited at the National Cycle Show, Crystal Palace, this month.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 28th inst.

### CITY, FRIDAY EVENING.

Little or no change has taken place in the conditions of the MONEY MARKET during the past week. In connection with the Stock Exchange settlement there was a temporary demand for accommodation to-day, and a fair amount had to be borrowed from the Bank of England at 4 per cent. for three days. In the market call loans were dealt in at rates ranging from 3 to 3½ per cent., and the India Council renewed advances up to the 29th inst. at 3½ per cent. Discount rates were harder, three months' choice paper being quoted 3½ to 3¾ per cent. The German exchange was again unaltered. The Bank Return issued yesterday shows a further considerable reduction in the private deposits and "other securities," caused by the Bank having taken a good deal of money off the open

market during the week. The private deposits are 1,772,000*l.* lower, at 34,585,000*l.*, and are 2,263,000*l.* less than on October 27th. The decrease of 355,000*l.* in the Government securities is partly due to the repayment of deficiency advances by the Treasury. The reserve is 21,517,000*l.*, an increase of 418,000*l.*, although a good deal of gold coin has gone to Scotland. The proportion of reserve to liabilities has risen from 49½ to 52½. Since the return was made up 76,000*l.* on balance has gone into the Bank.

Silver bars are now quoted at 28*d.* per oz., being ½*d.* lower on the week. A year ago the price was 26½*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 29-32*d.*; Calcutta, 1*s.* 3 29-32*d.*; Hong Kong, 1*s.* 11 5-16*d.*; Shanghai, 2*s.* 8½*d.*; Singapore, 1*s.* 11 3-16*d.*

The premium on gold at Buenos Ayres has fallen during the week from 141.70 to 127.00 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 8 97*d.* A year ago the premium was 178 per cent., and the value of the paper dollar 1*s.* 5 12*d.*

The Valparaiso 90-day exchange comes over to-day at 13½*d.*, being unaltered on the week. A year ago it was 17½*d.*

The Rio de Janeiro exchange on London is 8 9-16*d.*, being 1-32*d.* higher on the week. A year ago it was 7½*d.*

The Bankers' Clearing-house return for the week ending November 9th, 1898, shows a total of 145,096,000*l.*, as compared with 138,117,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£32,020,436	£31,512,880
Total Reserve .....	£21,517,451	£20,939,835
Proportion of Reserve to Liabilities...	52½ per cent.	48½ per cent.
Notes in Circulation .....	£27,302,985	£27,373,045
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	3½ per cent.	2½ per cent.
Consols (account) .....	110½	113
French Rentes (account) .....	101 <i>f.</i> 92 <i>c.</i>	103 <i>f.</i> 67 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 33 <i>c.</i>	25 <i>f.</i> 18½ <i>c.</i>
New York 60 days ditto .....	\$4 82½	\$4 82½

A great deal—probably too much—is being made of Lord Salisbury's political utterances at the Guildhall on Wednesday, and prices yesterday and to-day have been put up in every department. The dealings are, however, largely professional, and it is safe to say that the general public is not being misled into the belief that the present is a good time to buy securities. Where everything is on the rise, as was the case yesterday, there is no need to particularise. As regards the week's movements, the subjoined table can be left to tell its own tale:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>					
Consols, 2½ per cent. ....	—	—	Grand Trunk of Canada ½	—	—

Applications have been made to the Stock Exchange Committee (1) to appoint a special settling day in and to grant a quotation to—Gill McDowell Jarrah Company, Limited—83,334 6 per cent. cumulative preference shares of 1l. each, and 83,334 ordinary shares of 1l. each. Great Northern and City Railway Company—4 per cent. preferred ordinary or class A shares of 10l. each, and 5 per cent. deferred ordinary or class B shares of 10l. each. And (2) to allow the following securities to be quoted in the Official List—Great Southern and Western Railway Company (Ireland)—2,311,020l. 4 per cent. debenture stock.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Atchison Topeka and Santa Fé Railway Company—\$4,476,000 additional general mortgage 4 per cent. 100-year gold bonds, Nos. M91,793 to M96,206, of \$1,000, and D49,251 to D49,374 of \$500 each; San Paulo (Brazilian) Railway Company, Limited—further issue of 21,956 5 per cent. non-cumulative preference shares of 10l. each, fully paid, Nos 78,645 to 100,000.

A telegram from the *Times* correspondent at Rio de Janeiro, dated November 5th, says:—"Judicial liquidation of the West of Minas Railway has been decreed on the petition of a German bank representing German creditors." This statement is very vague, but that the concern is in difficulties might be gathered from the recent announcement in these columns that the pay of some of the employés is two years in arrears.

A Royal Decree was issued on Wednesday appointing a Commission to study the effects of the various conventions between the Italian Government and the companies working the railways on the Mediterranean and Adriatic littorals and in Sicily, and to propose an improved organisation on the expiry of the twenty years, at the end of which the Government and the companies are authorised to terminate the present agreements. The Commission is presided over by Senator Gagliardo, and includes nine senators, nine deputies, and seven officials appointed by the Ministries of the Treasury, War, Public Works, Commerce, and Posts and Telegraphs.

**Guayaquil and Quito Railway.**—Mail advices from Ecuador state that the President of the Republic has received a telegram from the Guayaquil and Quito Railway Company of New York, announcing that Mr. Archer Harmann was about to start for Ecuador, and that the deposit of \$500,000 would soon be paid and the works begun as soon as Mr. Harmann arrived. The President sent this news, with a message, to the Senate on September 11th, recommending them to suspend their decision on the matter until the arrival of Mr. Harmann, and to listen to what he had to say. Meantime the deputies were discussing the matter in secret session. A later despatch, dated September 22nd, announces that the Senate had approved a resolution declaring the contract to be null and void. The United States Minister has protested against this to the Government, and the President had sent on this protest to the Senate, asking them to reconsider their decision. The general opinion appears to be that the advantage of the railway to the country would not compensate it for granting to the company such a heavy charge on the customs revenue.

**Hole and Corner Liquidations.**—Mr. Justice Wright on Wednesday made an announcement of some importance not only to liquidators, but to the shareholders and creditors of public companies that have gone into liquidation. His lordship, before proceeding with his list, said he wished to state publicly, for the information of liquidators in cases in which supervision orders had been made, that steps were being taken to require them to furnish reports of their proceedings. There had been something like 143 supervision orders since the registry was established down to the end of 1897. In the majority of these cases the supervision order had produced no results whatever, and now he was going to call upon all the liquidators of all the companies in succession to appear before him and make a report on affidavit of the state of the liquidation and of the funds in their hands. He made this statement in order that the liquidators in these cases might be prepared to furnish the information when called upon. Each of them in succession would receive a summons to attend the court for the purpose of making a report.

## American & Canadian Railways.

### GREAT NORTH WEST CENTRAL OF CANADA.

In the Chancery Division on Tuesday Mr. Justice North heard the debenture-holders' action, "*Bawtree v. the Great North West Central Railway of Canada*," which was brought in on two motions, involving a very complicated state of facts and questions in conflict of law. The plaintiffs were holders of debentures issued and payable in this country, secured by a covering deed of which the trustees are domiciled Englishmen, the company, who issued the debentures being a Canadian railway company with all its property in Canada. The defendants were the company, a Mr. Delap, the chairman of the company, the trustees for the debenture-holders, a debenture-holder in the same interest as the plaintiffs, and a Canadian company called the Provincial Trust Company of Ontario, who are the holders of judgment debts and claims against the railway company, and have taken proceedings in Canada to set aside the debenture trust and to enforce their claims against the property of the railway company in Canada. The plaintiffs alleged that the Provincial Trust Company were really only Trustees for Mr. Delap, and to this allegation a large amount of evidence was addressed. There was a motion on the part of the Provincial Trust Company to discharge an order for service of a concurrent writ on them out of the jurisdiction and a motion on the part of the plaintiffs for an injunction restraining the proceedings that had been taken in Canada to set aside the debenture trust, on the grounds that they were really the proceedings of Mr. Delap, a domiciled Englishman, and it would be just and convenient that all the proceedings should be carried on in this country. Mr. Justice North refused both motions. He considered that, even if Mr. Delap himself was the plaintiff in the Canadian proceedings, he could not be restrained from going on with them, he was not plaintiff in the English action, he had not chosen the English tribunal, and he had a right to bring his action in Canada, where the debtor was and where the property was.

### SOUTHERN PACIFIC OF CALIFORNIA.

Mr. Walter Morshead requests insertion of the accompanying notice, which has been sent by him to Messrs. Speyer Brothers:—

"Albany, Piccadilly, London W., Nov. 7th, 1898.  
 "Gentlemen—Referring to your proposed issue of \$10,000,000 of 5 per cent first consolidated mortgage gold bonds of the Southern Pacific of California Railroad, and the protest addressed to you on the 4th inst., I now beg to give you public notice that, if you make any attempt to issue such bonds on the security of, or so as directly or indirectly to affect the property or credit of, the Central Pacific Railroad, proceedings will be commenced in the English or American courts, as the case may require, for an injunction, and if necessary, damages on the grounds specified in the protest of the 4th inst. Copies of this notice with the protest will be sent to (1) the Hon. the Commissioners appointed by the July Act of Congress for the Settlement of the Government Debt who have recently accorded courteous interviews at Washington to the Hon. Charles Baker and myself as representing a body of English, Irish and American shareholders; (2) to the Stock Exchanges of London, New York, Berlin, Frankfurt, and Amsterdam; and (3) to the English, Irish, American, German, and Dutch press. (Signed) WALTER MORSHEAD,  
 "Holder of \$250,000 stock of the Central Pacific Railroad, and  
 "Chairman of the Central Pacific Shareholders' Combined Protection Committees of 1894 and 1898.  
 "Messrs. Speyer Brothers, 7, Lothbury, E.C."

### LATEST EARNINGS.

First week of November.—Chicago Milwaukee and St. Paul, \$849,000—increase, \$21,000; Denver and Rio Grande, \$196,000—increase, \$29,000; New York Ontario and Western, \$67,000—increase, \$4,000.

Fourth week of October.—Baltimore and Ohio South Western, \$229,000—increase, \$34,000; Louisville and Nashville, \$686,000—increase, \$84,000; Mexican Central, \$441,000—increase, \$82,000; Missouri Kansas and Texas, \$487,000—increase, \$6,000; Oregon Railroad and Navigation, \$225,000—increase, \$59,000; St. Louis and San Francisco, \$228,000—increase, \$11,000; Cleveland Cincinnati Chicago and St. Louis, \$428,000—increase, \$28,000. The gross earnings of thirty-four roads in the fourth week of October show an increase of 5·61 per cent.

Month of October.—New York Central and Hudson River, gross, \$4,252,000—increase, \$44,000.

Month of September.—Oregon Short Line, gross, \$655,000—increase, \$120,000; net, \$312,000—increase, \$114,000; Union Pacific Denver and Gulf, gross, \$331,000—increase, \$7,000;

surplus over charges, \$130,000—increase, \$17,000; Calgary and Edmonton, net, \$5,767—decrease, \$9,967.

### RAILROAD NOTES.

The *Toronto Globe* says:—"The Grand Trunk Railway, which is financially interested in the Central Vermont, will be benefited by the Bill which has been introduced into the Vermont Legislature for the reorganisation of the latter road. Messrs. C. M. Hays, general manager, and Charles Percy, treasurer of the Grand Trunk, are among the gentlemen provided for on the board of directors of the reorganised company. The majority of the stock is given the Grand Trunk, which in return guarantees the interest on \$12,000,000 first mortgage 4 per cent. twenty-one-year gold bonds. The unpaid interest on these bonds from February 1st to October 1st will be paid in cash, and bondholders will receive capital stock to pay interest due on these bonds before that date. The company formed under this Bill stands ready to buy the road as soon as the court decrees it shall be sold, and take the road and operate it. The road is now practically controlled by the Grand Trunk."

The Philadelphia and Reading, it is said, contemplates absorbing the Delaware River Railroad, a little 20-mile track which will give President Harris's Company an outlet on the Delaware opposite Wilmington. The line taps the Reading, through the West Jersey and Sea Shore—a corporation entirely controlled by the Pennsylvania—on the Grenloch and Camden branch and on the Williams Town and Mullica Hill branch, the latter of which joins the direct main line to Atlantic City. The total authorised capital stock of the Delaware Company amounts to \$250,000, of which \$225,000 has been issued.

The Board of Control of the Joint Traffic Association, which was formed in November, 1895, has decided to dissolve the organisation, owing to the decision of the United States Supreme Court at Washington on October 24th that the same was not legal. The Western Freight Association is also to be dissolved. It is stated that the Central Passenger Association will be reorganised with the omission of any rate agreements, and that the continuance of the Central Freight Association in some form is also probable.

Mr. Hawkins, chief engineer of the British Yukon Railway, states that the line will be working to the summit of the White Pass by December 1st, and to Bennett Lake by the opening of navigation in the spring. A thousand men, it is said, will be at work on the railway through the winter.

A denial is given to the report that the Northern Pacific Railroad will build a cut-off from Missoula, Montana, to Walla Walla, Washington. The president of the Northern Pacific says that surveys are certainly being made, but that nothing has so far been decided.

For the quarter ended September 30th the New York Ontario and Western shows:—Gross, \$1,089,000—decrease, \$62,000; net, \$376,000—decrease, \$47,000; surplus over charges, \$165,000—decrease, \$41,000.

Vice-President Shaughnessy, of the Canadian Pacific, on Saturday officially notified the interested roads that his company had accepted the adverse decision of the arbitrators in the differential case.

For the quarter ended September 30th, the Erie Railway shows:—Gross, \$7,806,000—decrease, \$740,000; net, \$2,684,000—decrease, \$72,000; surplus over charges, \$534,000—decrease, \$148,000.

The stockholders of the Union Pacific Denver and Gulf are bringing a suit against the reorganisation committee for the purpose of breaking up the reorganisation plan put forward.

Application has been made to the New York Stock Exchange to list \$1,777,000 of Northern Pacific 4 per cent. prior lien bonds, which have been issued in exchange for existing bonds.

President Ripley, of the Atchison Topeka and Santa Fé Railroad, says that his company will pay cash for the San Joaquin Valley Road, which will be operated separately.

The Great Northern offers to purchase the outstanding shares of the St. Paul Minneapolis and Manitoba at 125, payable in Great Northern stock at par.

Grain freight rates from Chicago and Lake ports to the seaboard have been advanced 2½c.

## General News.

### THE WELLINGBOROUGH ACCIDENT.

Lieut.-Colonel H. A. Yorke, R.E., has presented to the Board of Trade his report on the result of his inquiry into the accident that occurred on September 2nd at Wellingborough Station, on the Midland Railway, to the 6.45 p.m. express train from St. Pancras. It will be remembered that while the train was passing through Wellingborough Station, at a speed of about 60 miles an hour, the engine came in contact with a luggage trolley which had fallen from the down platform on to the down main line, with the result that it was derailed and wrecked in a disastrous manner. Five passengers and the driver and fireman were killed, and sixty passengers and five servants of the company—namely, two guards, two car-attendants, and a workman—received injuries which in many cases were severe. The report, which is accompanied by an elaborate plan, concludes as follows:—

"The cause of this calamity was a very simple one, and is clearly explained by the evidence. A few minutes before the train was due to pass through Wellingborough a four-wheeled luggage trolley fell off the platform on to the down line under circumstances which will be considered later on. Although efforts were made by two men to get the obstruction out of the way, the time available did not permit of this being done. The trolley was lying between and parallel to the rails, with its handle pointing northwards, at a spot about 40 yards from the southern end of the platform. The engine of the express, which was probably travelling at a speed not less than 60 miles an hour, struck the trolley and smashed it to pieces, bits of it being sent flying in all directions. The first mark showing that anything had gone wrong with the train was a bruise on a chair a few yards north of the spot where the trolley was lying. Three yards north of this chair wheel marks became clearly visible on the sleepers. These had the appearance of being caused by a pair of wheels, and were on the platform (or left) side of, and parallel to, the two rails of the down line, at a distance from them of about 1ft., one set of marks being between the left-hand rail and the platform, and the other on the 4ft. Some of the chairs also had bruises or abrasions on them, and a few of them were broken. These marks existed as far as the diamond crossing formed by the intersection of the down main line and the through road leading from the down sidings to the up line, a distance of about 140 yards from the first chair mark. Although the platform extended alongside the line for the greater portion of this distance it was not scratched or marked in any way, nor was the permanent way here seriously disturbed. None of the sleepers were broken or rendered unfit for use, and the only repair found to be necessary to this bit of road was the renewal of a few broken chairs. But at the crossing the damage to the permanent way became serious. The crossing itself and about 30 yards of the main line north of it were completely destroyed, and the road leading into the sidings and the sidings themselves were torn up and twisted out of shape for a distance of 100 yards towards the north.

"The position of the train when it came to rest was briefly as follows:—The engine was lying on its right side on the left side of the train, opposite to the space between the third and fourth coaches, with its bogie jammed into the left-hand leading corner of the fourth vehicle; the tender was on the right side of the train, lying on its left side with its wheels foul of the down main line; the first coach, a six-wheeler belonging to the Glasgow and South Western Company, had its two sides badly crushed, and was lying on its right side across the up main line; the second coach, which was completely smashed up, the sides being torn away and the roof turned upside down, was on the ground to the left of the siding; the third coach had its leading end broken away and sides damaged, and was standing on its wheels in the siding; the fourth coach, which had its left-hand leading corner smashed in and side damaged, was also on its wheels in the siding; and the fifth and last, which, though damaged in the frame, had its body apparently not much injured, was also on its wheels in the siding. All wheels were off the rails. The last four vehicles were the property of the Midland Company, and each was carried on two six-wheeled bogies.

"The position of the engine was remarkable. It had turned round and was pointing towards London—that is to say, in the direction opposite to that in which it had been travelling, and the front of it had collided with its own train, for not only was its bogie found jammed into the side of the fourth carriage, but the appearances showed that the damage to the third carriage was also caused by the same agency. Another fact worth noticing is that the first vehicle in the train, an ordinary six-wheeled saloon, though turned over and crushed on both sides, was not so badly damaged as some of the others. This coach

contained no passengers, but the guard who was travelling in it received serious though not fatal injury. The coach that suffered most was the second from the engine, the sides and interior of it being swept away. No doubt most if not all of the fatal injuries were incurred here. The under frame of this coach caught fire, owing probably to the escape and ignition of gas from the gas-holder. The driver and fireman were found on the ground somewhere between the engine and the front of the train. The former was killed on the spot, and the latter, though breathing when picked up, never recovered consciousness, and died within an hour.

"Some surprise has been expressed that so small a thing as a luggage trolley could cause the derailment and destruction of an express train drawn by a heavy engine of modern type, and travelling at a speed of 60 miles an hour. But though the case presents some remarkable features, the explanation of the disaster is, I think, simple enough.

"In the first place, the trolley was a fairly substantial one. Its actual dimensions are not definitely known, but approximately it was 6ft. long, 3ft. 8in. wide, and 2ft. high. It had four iron wheels and weighed about  $4\frac{1}{2}$  cwt. When the express struck it, it was, of course, broken up, and if when this happened a fragment of iron got under one of the bogie-wheels of the engine, on the outside of the curve, the derailment of two or more of those wheels is at once accounted for. The total weight on the engine-bogie was 14 tons, or  $3\frac{1}{2}$  tons per wheel, and a small object on a rail is capable of causing a wheel to rise sufficiently for the flange to clear the rail. It is proved by the wheel marks on the sleepers that the two wheels left the rails immediately after the trolley was struck. Had they been either of the coupled wheels of the engine, the injury to the sleepers would almost certainly have been greater, and the permanent way would have been disturbed. On the other hand, had they been wheels of any other portion of the train, the engine would have passed safely through the crossing before anything happened to the train. But as neither of these things occurred, it seems almost certain that the wheels that first left the rails were bogie-wheels, and, from the subsequent course of the engine, the probability is that they were the leading wheels. In spite of these wheels being off the rails, the engine and train evidently remained on the track for a distance of 140 yards, this being due chiefly to the fact that the wheels that were off did not strike the chairs or injure the rails; and it is possible, and not improbable, that if there had been no intersection of lines, the train would have remained on the metals till the driver had time to bring it to rest. But when the engine reached the diamond crossing the conditions were completely changed. The derailed wheels struck the crossing and caused the engine to turn instantly to the left—i.e., in the direction of the intersecting line—and, the crossing being simultaneously destroyed, the remaining wheels of the engine and those of the train would become successively derailed as they reached this spot. The effect of the bogie ploughing into the ballast would be to cause the engine to turn more and more to the left; this action being further assisted by the momentum of the train behind pushing against the rear of the engine, and also by the soft, sandy slope of the cutting, the base of which comes close to the sidings, and which would stop any forward progress. The tender, with its six wheels and rigid wheel base, not having the same tendency to turn to the left, parted from its engine, and it is evident from the relative positions of the different vehicles and from the manner in which both sides of the front portion of the train were crushed, that the three foremost carriages forced their way between the engine and tender, and in so doing caused the former to turn completely round to the left, while the tender was pushed away to the right. The driver and fireman, if they were still on the foot-plate, would necessarily be hurled from it when the engine and tender parted company, and they had no chance of escape. It may be mentioned that the regulator handle was found open when the engine was examined after the accident, from which it appears that the driver had not shut off steam. No evidence was forthcoming as to the position of the brake-handle, but, as steam was not shut off, it may be assumed that the brake had not been applied by the driver, though it operated automatically as soon as the train became separated. I do not suppose the driver had time to do anything. The distance from the spot where the engine struck the trolley to the crossing is, as already stated, only 150 yds. Assuming the train to have been running at 60 miles an hour, it would take about five seconds to traverse this distance, and the driver had probably hardly realised that anything was wrong before his engine struck the crossing, after which, even if he was not thrown down or hurt, he would, owing to the lurching and jumping of the engine, be powerless to do anything in the fraction of time that elapsed before he was killed. The wreck of the train occurred between the crossing and the point where the first vehicle was found, a distance of only 140 yds., and the work of destruction can only have taken five or six seconds. In short, it seems probable,

judging from the distance traversed—viz., 290 yds., that from the time the trolley was struck till all was over the interval was less than a quarter of a minute.

"Such is the outline of the event as it presents itself to me after investigation. Details cannot, of course, be filled in, but the connection between the fall of the trolley and the final catastrophe is, I think, clear.

"It is now necessary to consider how the trolley got upon the line. Postman Thomas George Smith arrived at the station at about 8 p.m. with a cartload of mails and parcels for the down train due at 8.22. He drew up his cart outside the iron gate which forms an emergency exit from the platform, and which is also generally used for moving heavy mails and baggage to and from the station. The gate was locked, as is usually the case. Smith entered the station through the booking-hall in search of a barrow or trolley on which to place the mail bags. He found one near the north end of the station. This was a low flat luggage or fish trolley with four wheels, and a handle and cross-head by which to drag it. As already stated, it measured approximately 6ft. in length by 3ft. 8in. in width by 2½ft. in height, and its weight was about  $4\frac{1}{2}$  cwt. Three little boys, of ages from ten to thirteen, who were waiting for newspapers out of a train shortly due, were sitting on the trolley at the time, and Smith says he dragged the trolley with the boys on it towards the gateway. The boys, according to their own admission and the evidence of an eye-witness, seem to have amused themselves by jumping on and off the trolley, sometimes pushing behind and sometimes sitting on it. When they reached the opening through the station buildings leading up to the gate the boys say they left the trolley and returned towards the booking-hall, while Smith turned the corner and drew the trolley up to the gate, outside of which was his mail-cart, the trolley being then in a position transverse to the platform, with its handle towards the gate and its rear wheels pointing towards the lines. Smith states that having with his left hand turned the handle of the vehicle away from him towards the wall on the left so as to lock the front wheels, he released his hold of it while he reached down the key of the gate which was hanging on a nail on his right. Having unlocked and opened the gate, he put out his left hand to take hold of the trolley again so as to draw it outside, but found it gone, and on turning round to look for it he saw it toppling over the edge of the platform on to the line. The fall of the trolley on to the line was witnessed by others besides Smith—namely, by a Mr. Smeatherst, who was standing on the down platform; by acting-foreman Richardson, who was at the south end of the up platform; by the driver of an up train which had just come to rest in the station; by ticket-collector Marchant, who was on the down platform; and by the three boys, who say they were standing near the door of the booking-hall on the down platform. All these persons were aware that the down express was signalled, and they all seem to have anticipated a disaster. Postman Smith and foreman Richardson at once jumped down on to the ballast and made an effort to get the trolley out of the way. They could not lift it back on to the platform, nor could they pull it across on to the up line, owing to the presence of the up train. They say they tried to turn it up on its side in the six-foot way with the intention of placing it in a vertical position between the two trains, but I very much doubt whether they would have been able to hold it there when the express passed through. Before, however, they could do anything towards removing the obstruction the express was seen to be entering the station, and they had barely time to escape with their lives, when it dashed into the trolley. Smith threw himself out of the way on to the down platform, while Richardson crawled between two of the carriages of the up train and got upon the up platform. What happened when the express struck the trolley has already been described.

"The only apparently doubtful point in the whole narrative is, as to what caused the trolley to run backwards from the gate. Postman Smith stated that he is sure that he locked the front wheels before letting go of the handle in such a way that 'it could not move unless some one or something touched it,' and he implied, though he did not actually say so, that the boys who were with the trolley when he drew it along the platform had meddled with it and started it rolling. He said that the boys followed him into the passage, and, though he admitted that he did not see them, he says he could hear them and feel them jumping on and off the trolley up to the moment when he released his hold of it. This is denied by the boys, who all said that they did not go into the passage at all, but turned back along the platform as soon as Smith turned the corner towards the gate. This denial does not carry much weight by itself, but it is borne out by the evidence of all the other witnesses of the occurrence. Foreman Richardson, driver Knighton (of the up train), ticket-collector Marchant, and Mr. Smeatherst all unhesitatingly stated that they saw no boys anywhere near the

trolley when it was passing across the platform towards the line. If the boys had anything to do with the movement of the trolley, they must have been exceedingly quick in getting out of the way and hiding themselves. But Smith's own suggestion regarding the boys is so very uncertain, and his suspicions, if they really exist, are based on such very slight foundation, that in the face of the evidence of the witnesses just referred to, it seems impossible to hold the boys in any way responsible for the movement of the trolley. And, anyhow, Smith had taken charge of the vehicle, and had made himself responsible for its safe usage, whether the boys were present or not.

"What, then, caused the trolley to move? The answer is, the slope of the platform. I have shown on the plan attached to this report a section of the down platform through the passage in which the trolley was standing. The platform itself between the buildings and the line has a total fall of 8'16 inches in a width of 16ft. 5in., or a slope of 1 in 24, and the passage has a fall also towards the line of 4'4in. in a space of 16ft. 10in. The inclination of the passage is, however, not uniform. Starting from the gate there is a difference of level of 2'04in. in 14ft. 1in., equal to a gradient of 1 in 82'35, and then a more rapid decline of 2'4in. as far as the spot where the passage joins the platform, this being equivalent to a gradient of 1 in 14.

"The trolley was standing in that part of the passage-way where the gradient is 1 in 82'35, and from the appearance of the place I was disposed at first to think that the slope was not sufficient to cause the barrow to move backwards by the action of gravity alone. But on trying an experiment with a trolley similar to the one that caused the disaster, which was placed by Smith at my request in the position occupied by the other, it was found that it immediately commenced to run back unless the handle, and thereby the front wheels, were turned round either to the right or left, through an angle of nearly 90 degrees. This was tested several times, and always with the same result. If, moreover, the handle was allowed to lean against the wall the thrust caused by the weight of the handle increased the tendency of the vehicle to move.

"The knowledge thus obtained seems to establish the initial cause of the disaster. Postman Smith says he 'turned the handle towards the wall' so as to lock the wheels, but he could not say for certain how far round he turned it. As he says he considered the passage as level, it is probable that if he locked the wheels at all he probably did it without giving it much thought, and I have no doubt that he did not turn the handle sufficiently far to have the intended effect. As soon, therefore, as he released his hold of the handle the vehicle began quietly to move backwards. Its motion at first would be slow, but it would soon gain speed as the rate of inclination increased, and, there being nothing to stop it, it went over the edge of the platform on to the line. The disaster was, therefore, due to a want of care on the part of postman Smith, in not properly securing the trolley before he released his hold of it.

"Both postman Smith and acting foreman Richardson deserve credit for their efforts to remove the obstruction from the path of the express, in doing which they had a very narrow escape from losing their lives.

"It is, perhaps, right for me to mention that the handling of the mails on the platform formed no part of Smith's official duties. All he had to do was to deliver them at the station, while the company, under their contract with the General Post-office, are responsible for dealing with them on the platform, for which purpose a porter is specially detailed at Wellingborough. Probably the same conditions exist at all stations. But, as is well known, the postmen are always willing to assist in loading and unloading mails into and out of trains, and railway companies are glad to avail themselves of these voluntary services, which facilitate the work, and enable it to be done in less time and with greater accuracy. The custom, therefore, suits the convenience of both parties, and is one to which no reasonable exception can be taken. But it seems to follow that when the companies accept the gratuitous services of the employés of the Post-office, they become liable for the actions of these men during the time they are performing railway duties. This view of the matter has, I believe, been endorsed by the Midland Railway Company, who have publicly accepted full liability for this most lamentable accident.

"Since this event I have received letters drawing my attention to cases which have recently occurred in different parts of the country, of luggage barrows and trolleys rolling off the platforms on to the rails, and from inquiries I have made it seems that such an occurrence is by no means rare, but, so far as I can ascertain, this is the first instance in which any accident to a train has been caused by this means. Attention having now been drawn in such a disastrous manner to this hitherto unsuspected risk, it is no longer possible to ignore it. There seem to be two ways of meeting it. The most obvious one is to make platforms level, or if, as is sometimes stated, it is necessary to give platforms a transverse

slope for drainage purposes, the inclination should, if possible, be away from the line instead of towards it. In stations which are completely roofed in, the drainage question disappears, and the platforms in these should undoubtedly be level. In stations which are either not roofed at all or only partially roofed, a slight inclination of the platforms inwards would, I submit, suffice to prevent any stagnation of water, for the removal of which gratings, gulleys, and drains could be provided at convenient intervals.

"The other remedy which suggests itself to me is to furnish every platform truck or trolley which has three or four wheels with a brake, and this course should, I submit, be adopted in all stations where the platforms slope towards the rails. The brake might be of such a nature that though the wheels would remain normally braked, the blocks would be at once released by the mere action of pushing or pulling the truck. I do not think that any difficulty need arise in designing a simple appliance of this description.

"Some companies at the present time fit their trolleys with chains and hooks with which to lock the wheels. This is effective enough, if used, but the arrangement is evidently unsuitable for busy times, when the trolleys are in constant demand. It is, perhaps, too early to express a definite opinion as to the best way to guard against a repetition of this disaster, but the matter is clearly one deserving of the careful attention of all railway companies.

"As regards Wellingborough, the slope on the down platform, amounting as it does to a fall of 8'16in. in a width of 16ft. 5in., is excessive, and far beyond anything that may be required for drainage; moreover, the height of the platform is only 2ft. 0½in. above rail level, which is much below the modern standard. The company not very long ago—i.e., at the time of opening the branch line to Higham Ferrers, raised and improved the up platform, though nothing was then done to the down side of the station. But I have been authoritatively informed that it is the company's intention immediately to raise and improve the down platform; and it is to be hoped when this is done that the arrangements will be such as to prevent any chance of a repetition of this accident.

"Suggestions have appeared in various quarters that this disaster would not have occurred if the engine had been fitted with a 'cow-catcher,' and it has, therefore, been argued that all engines should be so fitted. I do not think that the circumstances of the case support either the assumption or the argument based on it. 'Cow-catchers' are in general use in countries where railways are not fenced, and their function is sufficiently defined by their name. In England, Parliament has hitherto made it compulsory for all railways to be fenced, and 'cow-catchers' are, therefore, for the present superfluous, but all engines are fitted with fenders or lifeguards, which are fixed vertically over each rail, and are capable of pushing aside any large obstacle which they may encounter. Even if the engine of this express train had been provided with a 'cow-catcher,' the derailment would probably have occurred all the same. 'Cow-catchers' can hardly be fixed so as to be nearer the rails than 4in., and a piece of iron capable of derailing a train could therefore easily pass under it. In fact, a 'cow-catcher' in this case would probably have done no more than was done by the fenders, and would not have materially improved the chances of safety."

#### AN URUGUAYAN RAILWAY CONCESSION.

Mr. Justice Mathew, sitting for the trial of commercial causes, on Tuesday gave judgment in the case of "Houlder Brothers v. Bowen and others." This was an action brought by the plaintiffs, shipowners, against Mr. Bowen, railway contractor; Messrs. Mallmann and Co., financiers, of Monte Video and Paris; and Mr. Cassel to recover upwards of 100,000*l.* damages for an alleged breach of contract in regard to the shipping of a large quantity of railway material to Uruguay. The defendants denied liability. It appeared that in February, 1889, the defendant, Mr. Bowen, obtained by assignment a concession for the construction of a railway in Uruguay from Monte Video to Independencia. There was a proposed extension to Paysandu; but that was not ratified by the Legislature of the Republic. The railway which Mr. Bowen undertook to construct was about 435 miles in length, and the total outlay was estimated at something over 5,000,000*l.* It was also estimated that about 120,000 tons of material would be required for the construction of the railway, and Mr. Bowen entered into a contract with the plaintiffs to provide the necessary vessels to convey the material to Monte Video. In order to enable him to carry out the undertaking Mr. Bowen obtained financial assistance from Messrs. Mallmann and Co., Mr. Cassel, and Mr. Noetzelin, the arrangement entered into between the parties being that five-eighths of the profits under the contract should belong to Messrs. Mallmann and Co., Mr. Cassel, and Mr. Noetzelin, and that Mr.

Bowen should receive three-eighths. By his contract with the Government of the Republic Mr. Bowen was to be paid by Government bonds appropriated to the purpose, and, in regard to the bonds for the first 150 miles of the railway, Messrs. Baring arranged with the Uruguayan Government to take over these bonds at 85 per cent. of their nominal value. Shipments took place under the contract with the plaintiffs, and Messrs. Baring were asked to pay, under their arrangement, the amount of the certificates granted in respect of the shipments. Having paid about 45,000*l.*, Messrs. Baring began to raise difficulties as to the form of the certificates, &c. In the result, money could not be obtained, and the shipments had to be stopped. Messrs. Baring stopped payment in November, 1890, and the work on the railway came to an end, the Government of Uruguay taking over the materials on the spot at a certain price. The plaintiffs now contended that in consequence of the defendant Mr. Bowen having failed to ship the whole of the material for the railway, in accordance with the contract, they had sustained a loss of upwards of 100,000*l.*, freights having fallen from 3*s.* to 1*s.* a ton. Plaintiffs further said that they were entitled to judgment not only against the defendant Mr. Bowen, but also against Messrs. Mallmann and Co. and Mr. Cassel, who were partners in the transaction. Mr. Justice MATHEW, in giving judgment, said the first point he had to consider was with reference to the position of the defendant Mr. Bowen. It was said that the terms of the contract entitled Mr. Bowen to withdraw from it without liability of any sort. He could not adopt that construction of the contract. What the contract meant was that Mr. Bowen was bound to ship all the material required for the purpose of the concession, leaving it an open question whether the quantity would be 120,000 tons or something else. As to the position of Messrs. Mallmann and Co., it was perfectly clear to him that they were partners with Mr. Bowen. With regard to Mr. Cassel, it had been submitted on his behalf that he was merely an agent and not a partner of Messrs. Mallmann and Co. Mr. Cassel undertook to share profit and loss with Messrs. Mallmann and Co. in connection with this matter, and that stamped the whole transaction as a partnership. Under these circumstances he held that the plaintiffs were entitled to succeed as against all the defendants. He should be prepared to go into the question of damages at a future date. Stay of execution was granted with a view to an appeal.

#### TAFF VALE RAILWAY SERVANTS.

The general secretary of the Amalgamated Society of Railway Servants on Tuesday issued a statement with reference to the difficulty which has arisen between the Taff Vale Railway Company and their servants. The SECRETARY says:—"The men on the Taff Vale Railway decided on Sunday week to cease work yesterday unless the guaranteed sixty hours week was restored to them. That decision was arrived at in my absence. It cannot be said on this occasion by those who do not sympathise with the men that the latter have been led astray by agitators. In view of the critical nature of things—having seen the resolution passed by the men and knowing the genuineness of the agitation—I decided to attend the next meeting of the men. I did so on Sunday at Cardiff, and I then pointed out to the men that the course they had decided upon taking at their last meeting was *prima facie* illegal—namely, to leave work without notice. I showed them, however, that there were other methods by which we could secure our rights without taking the extreme step contemplated, and reminded them of the result of the action of the miners in recognising Mabon's Day by absenting themselves from work. Seeing that the law protects the employers in that instance, one would imagine that when the contract is broken by them the law would extend similar protection to the men. This I have submitted to the Taff Vale Railway men, who know that the employers are the aggressors, having broken the contract of 1890. Under these circumstances the men agree with me that before resorting to a strike we should sue the company for wages lost through their breach of contract. We estimate that the late lock-out amongst the colliers terminated on the last day of August, and we propose to sue for wages lost from September 1st up to date. We imagine that close upon 3,000 summonses will have to be issued. Of course, more than 3,000 men came within the terms of the settlement, but it does not follow that every one of them has been short of wages through the failure of the company to carry out their contract. The attitude of the railway company up to now has been one of stubborn resistance to our just demand. The Taff Vale Railway Company has absolutely declined to recognise the appeal of the second party to the contract, although the Barry Company and the Rhymney Company, who were joint parties to the agreement with the Taff Vale Company, have restored the guaranteed week. The two companies referred to restored the sixty hours' week immediately the trouble at the collieries terminated. They con-

sulted with their men with a view to the suspension of the operation of the agreement for a week or two longer, and the men readily agreed to their proposal. But, in accordance with the promise the companies then gave, the guaranteed week has been restored now for several weeks. The Taff Vale Company, however, failed to consult their men on the subject at all, and have absolutely refused to restore the guaranteed week. The directors of that company hold a meeting to-day, at which the subject will be discussed; but I am afraid we cannot expect to find them in a conciliatory frame of mind. The summonses will be taken out at Cardiff, and I trust that the law will be administered in the same manner for the workmen as it has been against them in connection with Mabon's day."

#### WORKMEN'S TRAINS.

Considerable activity has been displayed by the Railway Department of the Board of Trade in reference to the numerous complaints of an inadequate supply of workmen's trains throughout the metropolitan district, and several important inquiries are now about to be held. It will be remembered that Mr. Ritchie promised in the House of Commons, in reply to Mr. Lough, that if definite complaints of inadequate service were brought to his notice these inquiries would be held. In June last, in accordance with this invitation, a long list of new trains required to supplement the service of the principal lines coming into London was sent to the Board of Trade by the London Reform Union. This action was supplemented by the National Association for the Extension of Workmen's Trains, of which Mr. Alderman Dew is the hon. secretary, and several local authorities and organisations in the suburbs. Within the last few days the following letter has been received by the London Reform Union:—"Board of Trade (Railway Department), 7, Whitehall-gardens, London, S.W., Oct. 24th, 1898:—"SIR—I am directed by the Board of Trade to refer to your letters of May 28th and June 11th last, calling attention to the alleged inadequacy of the service of workmen's trains on certain railways, and I am to state that the Board assume that you will be ready to arrange for the representation of the workmen at inquiries under the Cheap Trains Act, 1883, into the matter. I am to add that the Board of Trade, before proceeding further, would be glad to receive a definite assurance on the point.—I am, Sir, your obedient servant, T. W. P. BLOMEFIELD. Thomas Lough, Esq., M.P., London Reform Union." A similar intimation has been sent to Mr. Alderman Dew with regard to a complaint sent by his association of the inadequate service on the Palace-gate branch of the Great Eastern Railway and some of the Great Northern lines. It has been decided to hold the inquiries before the Railway Commissioners. The London Reform Union have undertaken to furnish evidence in support of their complaint, and Mr. Alderman Dew's association will state the case for the new trains required from Palace-gate (Great Eastern Railway) and certain stations on the Great Northern. It is understood that the inquiries will be held in convenient local centres, and in the evening, so that the work-people interested may have every facility for giving evidence.

#### FORTH BRIDGE TOLLS.

In the Outer House of the Scottish Court of Session on Tuesday, the record was closed by Lord Low in an action brought by the Great North of Scotland Railway Company against the North British Railway Company and the Forth Bridge Railway Company for declarator that the receipts for the conveyance of through traffic passing on or over the system of the pursuers, or part thereof, and over the Forth-bridge, as far as divisible between the pursuers and the defenders by mileage fell to be divided on the footing of giving to the pursuers a share corresponding to their mileage proportion of the distance which the traffic has been conveyed upon the systems owned, run over, or worked by the pursuers and the defenders, the distance to be calculated as if the traffic had been conveyed *via* Burntisland, the Forth Ferry, and Granton, in all cases in which the route *via* the Forth-ferry is shorter than the route *via* Forth-bridge. The pursuers state that prior to the opening of the Forth-bridge in 1890 the receipts from through traffic were regularly divided in accordance with the rules of the Clearing-house, the pursuers in the case of all traffic with regard to which the route *via* the Forth-ferry was the shortest receiving their proportion as if the traffic had been carried *via* the Forth-ferry, by whatever route it might actually have been carried by the defenders. Since the opening of the Forth-bridge the defenders have refused to allow the Clearing-house to divide the receipts in accordance with these rules. They claim that they shall be allowed their mileage *via* the Forth-bridge route, even where it is longer than the Forth-ferry route; and, further, they claim that in addition to the actual mileage *via* the Forth-bridge they shall be allowed a bonus mileage of 19 miles in respect of the bridge, although the through rates and fares to be

divided contain no additional charge made against the public in respect of the bonus, and although the pursuers have not agreed to any allowance out of the existing rates and fares and charges in respect thereof. The defenders plead that there is no through route *via* the Forth-ferry, and that the questions raised are within the exclusive jurisdiction of the Railway and Canal Commissioners.

#### IRISH CATTLE EXPORTERS AND THE CARRYING COMPANIES.

An adjourned meeting of the Irish and English cattle exporters was held in Dublin on Thursday to consider the replies of the London and North Western Railway Company, City of Dublin Steampacket Company, and Messrs. Tedcastle and Co. to the resolution of the association passed a week ago, protesting against the increase of freights on cattle and sheep proposed by these companies. Mr. William Field, M.P., presided. The SECRETARY (Mr. C. J. Doras) read a letter from Messrs. Tedcastle and M'Cormick, in which they said that in fixing the rates they had given the fullest consideration to the exigencies of the trade, and were satisfied that a service such as theirs could not be satisfactorily maintained on a lower scale, especially having regard to the fact that the rates charged for some time past had not been remunerative. They trusted that the increased rate would not hamper the traders whose interests always had their best attention. The secretary of the London and North Western Railway wrote saying that he was sending forward the traders' letter for consideration to the authorities. The secretary of the Dublin Steampacket Company wrote also acknowledging the receipt of the resolution, and promising to send a reply as soon as possible. He (Mr. Doras) had himself waited on the managers of the London and North Western Railway Company and City of Dublin Steampacket Company, and he understood from them that their company did not see their way to alter the decision they had come to. He had, therefore, invited tenders from the different steamship companies, which he thought would go to Liverpool, Manchester, and London. The CHAIRMAN said that the matter had now arrived at a rather serious stage, because it appeared perfectly evident that the carrying companies had made up their minds that they would increase their rates. If they were to do anything they should follow the example of the carrying companies by combining amongst themselves. ("Hear, hear.") Although there had been competition amongst these companies in former times it was now quite clear that they had agreed to change their rates. On the other hand, more competition existed with the Dublin Cattle Market than in any market in the Three Kingdoms. It was, therefore, obvious that, unless the dealers were willing to pay the increased rates, they should adopt some system to defend themselves. He considered the cross-Channel rates as the dearest in existence—especially so when compared with the Transatlantic rates. The traders had no wish to depreciate the shares of these companies; but, as they wanted to make a living themselves, they thought they were entitled to genuine commercial fair play in this matter, and they were determined not to pay these increased rates if they could possibly avoid it. The method of carrying the cattle was also a great grievance. It was worse than the method of the carriage in the ocean steamers, notwithstanding the cheaper rates in the latter. These companies now chose the busiest time of the year to raise their rates so as to increase the difficulties of the traders in competing with foreign competitors. They had no desire to cause friction with the carrying companies. They were only acting on the defensive in these matters. He was sorry to see that the shares in some of these companies had fallen, owing, apparently, to the action of the traders. He thought they should appoint a deputation. They were not going to cave in. If they could get a better means of conveying their cattle they would leave these boats idle. The secretary said that the managers of the other companies seemed determined not to yield to them. A deputation was then appointed to wait on the managers of the three companies to lay the views of the traders on the subject before them.

#### NORTH EASTERN RAILWAY ASSESSMENTS.

At the Flaxton Petty Sessions on Monday the North Eastern Railway Company appeared in answer to a summons issued at the instance of the overseers of the parish of Strensall, near York, for arrears of rates. Mr. R. H. V. Wragge appeared for the overseers, and Mr. Dunnell represented the railway company. Mr. WRAGGE stated that a revaluation of the railways had been made. The North Eastern Railway Company objected, and had only paid on the last effective rate, with the result that they were 131*l.* odd in arrear for the half-year ending September 29th. Mr. DUNNELL, on behalf of the company, contended that their appeal was still pending, and asked for an adjournment of the

case. The Bench, after retirement, granted the order. Summonses had been issued by the parish of Huntington, and the facts being the same an order was also made in this case.

At the York Police-court on Thursday, Alderman Gray, Mr. J. S. Rowntree, and Alderman Coning on the bench, four summonses were down for hearing against the North Eastern Railway Company for arrears of rates in connection with the recent York assessment. The summonses were taken out by the overseers of Holgate, Dringhouses Within, Holy Trinity, and All Saints', North-street. The summons by the Holgate overseers was taken first, and Mr. WRAGGE, for the plaintiffs, stated that the arrears amounted to 547*l.* 16*s.* 3*d.* The rate for the parish of Holgate was made on May 31st, and the amount due from the defendants on that rate was 718*l.* 11*s.* 3*d.* The amount was demanded, and the defendants paid 170*l.* 14*s.* 7*d.*, leaving the balance now claimed. A person who objected could either pay the amount of the old assessment and wait until Quarter Sessions compelled him to pay the remainder or he could pay the whole amount and obtain a rebate if he appealed to Quarter Sessions. The Assessment Committee sent in their valuation in January last, and on June 22nd the North Eastern Railway Company objected to the new assessment. In consequence of this objection the Assessment Committee offered to reduce the sum of 149,353*l.* which was the total assessment of the railway in the union, to 135,000*l.*, which was a reduction of about 15,000*l.* On October 26th the Assessment Committee met, and Mr. Lee, Surveyor to the North Eastern Railway Company, appeared in the same manner as other objectors, and was told that his application for a reduction would be regarded as in reference to the current half-year's rate. He submitted that it was impossible for the North Eastern Railway Company to assume that the next quarter sessions were not those held in October. Mr. DUNNELL, for the North Eastern Company, applied for an adjournment until November 21st. He disagreed with Mr. Wragge that the Assessment Committee had finally determined the company's objection to the new valuation. The question was one which involved thousands of pounds, and was really one to be decided at quarter sessions. Until the company had failed to obtain relief from the Assessment Committee they could not give valid notice of appeal, and he understood that this matter was never decided until October. It was not until October that they withdrew the offer they had made. If the defendants failed to obtain such relief as they thought they were entitled to, notice of appeal would have to be given. The Bench ultimately adjourned the hearing of the summonses until the 21st inst.

#### RAILWAYS IN CHINA.

Reuter's agent at Peking, telegraphing on Thursday, says:—"An edict issued to-day appoints Hu Yu Fin director of the Northern railways and member of the Tsung-li-Yamen. This appointment is regarded as distinctly favourable to British interests, since Hu Yu Fin took a notable part in the negotiation of the late loan for carrying out the Shan-hai-kwan Railway extension. He is one of the most enlightened Chinese public officials, and earned universal respect during his term of office as Prefect of this city, a post which he now vacates."

The dispute as to the construction of the New-chwang Railway, the Central News says, has been settled, and British firms will share in the making of this important line. British business men have for some time past been displaying much activity and enterprise in other parts of the Chinese Empire, and their labours will, it is expected, have substantial reward before long. A London syndicate has obtained the contract for building a part of the Burmah-Yunnan-Yangtse Railway, and its members recently applied to the Government of India for the services of trained engineers to explore the country beyond the Kunlun Valley, along which the Yunnan line will run. The idea is that the line should be commenced simultaneously at both termini, one part working from the Burmese frontier and the other from the Yangtse. Mr. Bagley, late chief engineer of the Ta-lien-wan Railway, will be in charge of the party operating from Burmah, and he will be accompanied by the two officers who have been lent by the Indian Government, Captain H. R. Davies and Lieutenant Jones, R.E. Captain Davies has travelled a good deal on the Burmese frontier in Yunnan, and has been engaged in survey work. The party will also be accompanied by Lieutenant Pottinger, who has had great experience as an explorer in the Maru country along the Chinese border provinces.

#### THE "TRANS-SAHARAN RAILWAY" AGAIN.

Writing in the *Journal des Debats* of Tuesday last on the strategic necessity of a Trans-Saharan Railway and the facility with which it could be constructed, M. Paul Leroy-Beaulieu says:—"At present our African Empire, which covers an enormous space on the map, exists only in name. It is composed of

three parts, completely isolated one from the other, and none of which is capable of helping the others. Algiers and Tunis constitute the real head of our African Empire, and all the rest must be connected with it by railway. The Trans-Saharan Railway, which is indispensable both strategically and colonially, would enable us to keep the British in a respectful attitude. Until it is constructed we shall always have to give way to the British. With it we shall be able to resist, for it would enable us to seize upon a guarantee. In effect, Sokoto and all the Central Soudan would then fall into our hands within a few days after a rupture with Great Britain. Instead of crying over the Fashoda incident, instead of mutually reproaching and abusing one another, we have but one thing to do, or, rather, two. Immediately occupy Touat, which would be a moral compensation for our retreat from Fashoda, and decide upon the immediate construction of the Trans-Saharan Railway, and set to work without losing another day on the first section of 1,000 kilometres from Biskra to Amguid. Before another eight years are past a train would be able to go from Biskra to Zinder, or some other place on the border of Lake Tchad. Otherwise we may just as well abandon straight away this empire which we cannot defend." The first serious project of this railway was enunciated by M. de Freycinet twenty years ago, when, as President of the Council, he proposed a Trans-Saharan mission to study the engineering difficulties of the line. Now that M. de Freycinet is Minister of War, his authority will count for much. It will be remembered also that the mission of Colonel Flatters, for the rescue of which an expedition has been prepared, was really formed with the view of studying the technical questions arising out of the project of the Trans-Saharan Railway. This was seventeen years ago.

#### NITRATE NOTES.

We shall be greatly obliged if some of our readers will furnish us with spare copies of the following documents, which we shall be pleased to return if requested to do so:—Lagunas Syndicate balance-sheet of 1891, Lagunas Syndicate annual report and accounts for 1892, original prospectuses of the following companies:—Arauco, Bank of Tarapaca and London, Colorado Nitrate, Consolidated Nitrate, Liverpool Nitrate, San Donato Nitrate.

Representatives of the press were refused admission to the annual meeting of the Amelia Nitrate Company held on Thursday. Our comments on this company's report and balance-sheet for the past year are held over until our next issue.

It is now nearly eighteen months since the Nitrate Railways Investigation Committee (of which Mr. James Head was chairman and M. de Wandre an active member) reported that "the directors may have rendered themselves personally responsible" for losses occasioned by speculating in exchange. Mr. Head and M. de Wandre have since joined hands with the directors they so severely censured in their report, and we do not now hear mention of legal proceedings against any of their colleagues for the recovery of the large sum involved in the findings of the Investigation Committee.

It is a long while since we heard anything of our old friend the Arauco Company, Limited (very limited), but it has just turned up in the *Financial News*' mining columns, of all places. Here is our contemporary's paragraph:—

Arauco Company.—Gross traffic on railway for September, \$64,000. This is exclusive of the coal raised from the company's property, but includes the coal traffic.

Why railway traffic returns should be published as an item of mining news we leave our contemporary to explain, and anyhow we are thankful for evidence that the Arauco Company is still alive if not flourishing. In dismissing this subject we must beg of our readers not to worry us with questions as to why a railway and coal company figures in a column of nitrate notes.

The *Westminster Gazette* gives its readers the following Nitrate Railway tip:—"Some who follow the position closely and understand the subject are very keen on Nitrate Rails just now. Take a few recent figures. To September 15th the decrease on the year's traffic was 27,410t., and the price stood at 5½. The last return, to the end of October, shows an increase for the two preceding weeks of 3,028t., reducing the decrease of the forty-two weeks of the year to 12,115t. only. Despite this big rapid improvement the price has remained practically unaltered round about the 5½. The enthusiasts want to know why and declare that the psychological moment is at hand. The company, they say, will pay at least 5 per cent. on its ordinary and preference, while even the deferred may get within measurable distance of a pittance."

In the last issue of THE RAILWAY TIMES reference was made to the forced production by the London Nitrate Company, the more unaccountable at a time when so many oficinas are shut down altogether and all complain of unremunerative prices. An explanation is forthcoming in the following paragraph of the report to be presented to the shareholders at the meeting on the 16th inst.:—"Notice has been given to the holders of debenture bonds of the intention of the directors to pay off 15,000t. of these bonds on December 31st next." Wherefore this desperate hurry to pay off debentures with twenty months to run at the low rate of 5 per cent.? The tail wags the dog, and it is almost too much to expect that the long-suffering Nitrate shareholder will even express surprise at the proceeding.

If Mr. Robert Harvey's remarks at the Colorado Nitrate meeting on Thursday are accurately reported, the shareholders were treated to another dose of the piffle which seems to fill these poor deluded and never-despairing creatures with delight. Listen to the oracle (according to the *Financial Times* report):—"If nitrate improved slightly in price, they would have a fair balance next year; if it maintained its present price, they would show a small profit; and if a combination for the limitation of the output was formed, they would show a very much better balance-sheet, and should be able to resume dividend-paying again." Wonderful! And again:—"Although it would not be safe to say that a combination was a certainty, it looked much more probable now than at any time during the last twelve months." No, it would not be safe to say that "a combination is a certainty," and to say that it looks "more probable now than at any time during the last twelve months" is not saying much.

Further words of wisdom—so profound as to be unintelligible to the common or garden mind—fell from Mr. Harvey's lips at the Liverpool Nitrate meeting on Thursday. "Our company is in the happy position," quoth the cheerful chairman, "that we can make a fair profit without a combination, and with one we can make the same profit with one-half the output. . . . A decision must be come to soon either one way or the other, and whether it is for a combination or not I think we shall be equally well off." Marvellous logic, truly! The company will be "equally well off," no matter whether for the "same profit" it has to produce two quintals or one.

Surely the painful experience so far of the Lagunas Nitrate Board against the Lagunas Syndicate ought to be a sufficient warning to a responsible board of directors not to go to law with their shareholders' money when any reasonable compromise can be obtained from the vendors.—*Daily Mail*.

The Anglo-Chilian Nitrate and Railway Company's gross traffic receipts during October were 14,500t., and for the corresponding period last year 11,500t.—increase 3,000t.

For a few good examples of the Queen's English (as made in Germany), commend us to the annual report just issued by the Amelia Nitrate Company, Limited. But a circular issued on Thursday by the board of the Great Boulder Proprietary Company runs it pretty close.

We were under the impression that ever since the official collapse of the nitrate combination a year ago, the producers had been doing their level best to fix up a new *convenio*, one proposal being no sooner shelved than another took its place. We must have been mistaken, however, as the Amelia report just issued says that, "after a long delay, serious efforts are now being made" to check "the uncontrolled output of nitrate during the past year and still continuing." [The phraseology is not ours please.] In spite of their distress, the producers have evidently been negotiating *pour rire*, but now they really mean business "we shan't be long."

The seriousness of the nitrate position is our only excuse for checking the smile ever ready to appear at the mere mention of the unpronounceable name of the Amelia director whose absence from Europe automatically removes him from the roster. We wonder whether M. Quætfaslem will also disappear from the board of the Lagunas Company, and whether his sorrowing colleagues will consider it unnecessary to fill the vacancy.

Pity the sorrows of an ex-Nitrate director. It may be remembered that two or three years ago Messrs. Robert Harvey, Richard Lockett, and a few other members of the North family were hoofed from the board of the Lagunas Nitrate Company, and they have enjoyed little peace since. A year or so ago Mr. A. R. Robertson, in company with several more of the old crowd, received his *congé* as a director of the Nitrate Railways Company.

This Mr. Robertson is chairman of the Great Boulder Proprietary Gold Mines, Limited (one of the late "Colonel" North's flotations), and he enjoys as colleagues Mr. Gamble North, a brother of the late "colonel," and Mr. George M. Inglis, whose name has long been familiar in nitrate circles. Judging from some lively passages which are just now appearing in the papers, some of the old nitrate tricks have been played on the Great Boulder Company, and, in consequence, there are ructions between the board and the shareholders which look like ending in more trouble for the surviving members of the North crowd. The *Pall Mall Gazette*, in referring to the subject, says:—"The preliminary skirmishing having come to an end, the pitched battle is about to be fought between the board of the Great Boulder Proprietary Gold Mines and the Shareholders' Provisional Committee over the notorious milling contract. Both sides are armed with proxies, counsel's opinions, and other modern weapons, and the encounter promises to be a highly interesting one. Curiously enough, three of the five directors whom it is sought to remove from office are 'Nitrate' men, the very head and front of whose offending is the perpetration of a contract somewhat akin to that under which the Lagunas Company is groaning. That the shareholders have a serious grievance against the present board does not admit of the shadow of a doubt, and their only chance of redress is in striking while the iron is hot. The committee have, we understand, received from Australia such an amount of support as will, with the English proxies, ensure the passing of the resolutions to be submitted at the meeting." The *Colonial Goldfields' Gazette*, in a powerful article on the actions of the Great Boulder directors, says:—"To enter secretly into a contract of vital importance to one's shareholders, and then conceal it from them for many months, until determined press criticism has rendered concealment no longer possible, may, perhaps, be in accordance with the methods of the nitrate world, but, unless we are much mistaken, the Great Boulder directors will find to their cost that such tactics will not satisfy mining shareholders." In the journal just named there is also an interesting letter from a correspondent signing himself "Nitrate Onlooker," from which we take the following:—"A committee was appointed on January 5th, 1897, to inquire into the administration of the Nitrate Railways Company, and one of several grave charges which it had to investigate was that brought against certain members of the board of receiving commissions on the company's contracts. Mr. A. R. Robertson was examined on this subject before the committee on May 27th, 1897, and I append a copy of questions and answers taken from the official shorthand notes of the proceedings:—

Question.—Do you personally think it a proper thing for directors of a company to take commissions from that company?

Mr. Robertson.—Has that got anything to do with this inquiry? I think so.

Mr. Robertson.—Then I must refuse to answer that.

Most right-minded people would naturally suppose that the question put to Mr. Robertson was very pertinent to the inquiry, but what I want to ask is, whether a man who cannot give a straight answer to such a question as this is a fit and proper person to preside over the board of a company like the Great Boulder Gold Mines?"

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Wednesday, are shown hereunder:—

Making-up Price.			Stock.	Continuation rate.

### FOREIGN AND COLONIAL ITEMS.

Mr. Carl Meyer has joined the board of the Pekin Syndicate, Limited.

The new Murghab Railway from Merv to Sary-Jazy will be opened for passenger traffic on Sunday next.

The eastern section of the Siberian Railway has been completed as far as Nertchinsk. It is expected to be carried to Chita by next February and Irkutsk in 1900, when the whole of the Siberian Railway will be completed.

The directors of the Southern Brazilian Rio Grande do Sul Railway Company, Limited, have declared an interim dividend at the rate of 3 per cent. per annum, free of income-tax, or 6s. per share, on the shares of the company, payable on the 23rd inst.

For the half-year ended June 30th the Delhi Umballa Kalka Railway Company, Limited, will pay a dividend at the rate of 4 per cent. per annum (free of Indian income-tax, but subject to English income-tax) being the same as for the corresponding period of 1897.

The accounts of the Bengal and North Western Railway Company, Limited, for the half-year ended June 30th, have been received from India, and, subject to audit, the net revenue admits of the payment of a dividend for the six months of 3½ per cent., free of Indian, but subject to English income-tax.

The French Minister of Public Works has issued a circular to the leading railway companies requesting them to increase their carriage stock so as to cope effectively with the traffic anticipated in connection with the great Paris Exhibition of 1900. The Minister expressly insists on the necessity of increasing the number of corridor carriages.

The extension of the Soudan railway to Khartoum, a distance of 180 miles, has been definitely decided upon, and the orders for the necessary bridges (between fifty and sixty in number) are being placed with British firms. The principal one will be that spanning the Atbara, near its confluence with the Nile, and this will be over 1,200ft. in length.

According to the *St. Petersburg Journal of Commerce and Industry*, the Railways Department has proposed the re-establishment of the former railway tariff for the transport of kerosene

from Batu and Batum, which in November, 1897, was temporarily reduced from 19 to 12 kopeks per pood. The question, which nearly affects the Russian kerosene trade, will be laid before the Tariff Committee, which is to meet next Friday.

At the London Bankruptcy Court on Thursday, a first meeting of creditors was held under the failure of J. R. Pilling, described as of Effingham House, Arundel-street, Strand. The debtor stated that for the last seven years he had been managing director of the Syria Ottoman Railway Company. His accounts showed total liabilities 141,000*l.*, of which 51,394*l.* are expected to rank, with an estimated surplus in assets, subject to realisation, of 2,096*l.* A trustee and committee of inspection were appointed.

The Nicaraguan Congress has approved the provisional agreement between General Zelaya, President of Nicaragua, and the Americans, Messrs. Cragin and Eyre (representing a syndicate, headed by W. R. Grace), for the construction of an interoceanic canal, empowering them to negotiate with the Maritime Canal Company, whose concession terminates on October 9th, 1899. The United States Minister at Managua is, however, endeavouring to preserve the *status quo* regarding the Nicaragua Canal. He is to give diplomatic expression to the objections which the United States Government entertains to the new concession.

The secretaries of the Central Uruguay Railway Company of Monto Video, Limited; the Central Uruguay Northern Extension Railway Company, Limited; the Central Uruguay Eastern Extension Railway, Limited; and the North Eastern of Uruguay Railway Company, Limited officially announce that on and after Monday the 14th inst. the offices of the companies will be temporarily removed from 6, Finsbury-circus, E.C., to 128, Palmerston-buildings, Old Broad-street, London, E.C., pending the completion of their new offices in River Plate-buildings, now in course of construction.

#### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., chartered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, &c., may be had gratuitously.]

22,229. Adam Dobson, 10, Chichester-street, Belfast—Improvements in pistons for steam and other engines.

22,232. Alexander Mein—Improvements in platform trolleys.

22,234. Leonard Thackray Taylor, 19, Burlington-road, Wittington, Manchester—The underseat hat-holder, to be applied to all seats, chairs and forms; also for railway carriage hat-holders.

22,266. William Allday and Edmund Allday—Improvements in brakes for railway and other trucks and vehicles.

22,289. Frederick George Wright, 12, Park-lane, New Swindon—Improvements in joint chairs or fish-plate chairs for railway permanent way.

22,313. Max Bernstein—Improvements in railway brakes.

22,357. Charles Henry Strauss and Benjamin Julius Rosten—Railroad switch.

22,368. Henry Atkinson, Regent-street, Belle Vue, Wakefield—An automatic anti-detonator fog-signalling apparatus for use on railways.

22,427. George Perry—An improved brake apparatus for use on railway and tram lines.

22,449. Adamson George Wild—Improved combined brake-pipe and electrical coupling for railway trains.

22,486. Thomas Wilson—Improved means of electric communication between the passengers, guard, and driver of railway trains.

22,502. Llewellyn Wynn Williams—Improvements in and

relating to pulleys and pulley frames for carrying wire for operating railway signals and for like purposes.

22,508. Henry Joseph Brown and George Robert Coucher, 11, Francis-street, Waterloo-road, London—Improved coupling and instantaneous door-locking apparatus to be applied to railway carriages.

22,578. Egbert Rushton and Richard Edward Griffen, Cleethorpes—A new or improved method of bonding or connecting rails used for electrical traction and the like.

22,608. Charles Wood and Frederick Edwards—An improved system of and apparatus for automatic railway signalling.

22,693. Athol Edward Maudslay, Littlebourne, Twyford, Winchester—Improvements in and relating to railway trucks and barrows.

22,709. William Higgins, Stanislaus Reuschel, and Frederick Welstead—Improvements in locking railway carriage doors.

22,727. John Donnelly, Longport, Stoke-on-Trent—Improved appliances or means for controlling the lowering of railway wagon doors and to assist in raising or closing same.

22,789. Henry Calder Lobnitz—Improvements in fish-plates for railway rails.

22,841. Thomas Brown, 186, Wellington-street, Bradford—An improved brake for locomotive or other engines or any wheeled vehicle, by means of which the force required to bring the vehicle to a standstill may be utilised to set it again in motion.

22,990. Reuben Thomas Preston, of the firm of J. Stone and Co., Gavin Ralston, and Charles Ernest How—Improvements in brakes for railway wagons and similar vehicles.

William Robert Renshaw, 47, Victoria-street, Westminster, London—Improved brakes for railway or other vehicles, to be worked from either side.

23,155. Henry Harington Leigh—Improvements in electric rail brakes and electromagnets therefor.

23,178. Walter Thomas Johnson, 23, Cowcliffe-hill, Huddersfield—An automatic window-lift for railway and other carriage windows.

23,233. Jasper Wetter—Improvements relating to electric railways and tramways provided with sectional conductors or surface contacts.

23,253. Emile Frederic Le Maire—Improved means of and apparatus for opening and closing sliding doors of railway rolling stock.

23,303. Christopher Dutchburn—Improvements in car couplers.

23,311. Edward Tyer—Improvements in apparatus for ensuring safety on single lines of railway.

#### SPECIFICATIONS PUBLISHED.

25,662. Waldron—Mounting and carrying of gyrating cars on railway or other tracks for public amusement, and the arrangement of such tracks. 1897.

25,938. Preston and Platt—Combined brake and continuous automatic brake for railway wagons and similar vehicles. 1897.

30,653. Foure and Thuile—Railway coaches. (Date applied for under International Convention, November 8th, 1897.)

17,984. Warwick—Electric railways and tramways. 1898.

#### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS of RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

ESTABLISHED 1774.

Patterns and samples can be inspected, on application to the General Stores Department, Broadstone Station, Dublin, on and after the 1st instant, between the hours of 10 a.m. and 4 p.m.

Contractors cannot be allowed to tender to supply goods to their own patterns, nor can the Company's patterns be sent away for inspection.

Forms of Tender can be obtained on prepayment of 6d. for each form.

The Directors will not consider any Tender unless furnished on the Company's forms; nor any Tender in which any alteration of the form has been made.

The Tenders to be sent in by post, sealed and endorsed on the envelope "Tender for Stores, Form No. ..." and addressed to "The Chairman, Broadstone Station, Dublin," so as to reach him on or before 10 a.m. on Tuesday, the 6th December.

The Directors do not bind themselves to accept the lowest or any Tender.

By order,

GEO. WM. GREENE, Secretary.

Broadstone Station, Dublin, 9th November, 1898.

# BURMA RAILWAYS COMPANY, Limited.

The Board of Directors of the Burma Railways Company, Limited, is prepared to receive TENDERS for:-

- LINSEED OIL.
- RED and WHITE LEAD.
- FILES.
- LAMPS and LAMP FITTINGS.

Specifications and Forms of Tender can be obtained at the Company's Office, 76, Gresham House, Old Broad-street, E.C.

For each Specification a fee of 10s. will be charged, which will not be returned.

Tenders to be delivered not later than Noon on Monday, 28th November, 1898.

The Directors do not bind themselves to accept the lowest or any Tender.

By order of the Board,

A. G. BEGBIE, Managing Director.

10th November, 1898.

# TAFF VALE RAILWAY COMPANY.

NOTICE is hereby given, that WARRANTS for Dividends on the Preference Stock of the Company up to the 30th June, 1898, will be POSTED on the 30th instant to such persons as are registered in the Books of the Company on the 16th November as the holders of such Preference Stock.

H. CLARKE, Secretary.

Cardiff, 10th November, 1898.

# GREAT EASTERN RAILWAY COMPANY.

REDEMPTION OF 5 PER CENT. DEBENTURE STOCK, 1867.

NOTICE is hereby given, that, in accordance with the terms of issue of the 5 per Cent. Debenture Stock, 1867, and the provisions of the "Great Eastern Railway (General Powers) Act, 1878," the Directors of the Great Eastern Railway Company have resolved to REDEEM such an amount of the said STOCK as will be equivalent to the amount of the Sinking Fund for that purpose in their hands, and that the Drawing of such Stock for the above purpose will take place at the Office of the Company, Liverpool-street Terminus, on TUESDAY, the 6th day of December, 1898, at Twelve o'clock Noon, precisely. Holders of the Stock may be present at the Drawing, and the Stock to be redeemed in accordance with such Drawing will be paid off on the 2nd January, 1899, at a premium of Twenty Pounds per Cent., together with the interest due on it up to the 31st December, 1898, from which date all interest will cease.

The Transfer Books for this Stock will be closed on the 23rd November instant, and will not be reopened until after the Drawing has taken place.

By order,

CLAUD J. HAMILTON, Chairman.

W. H. PEPPERCOENE, Secretary.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities: it is a very superior Forge Iron.
- No. 5 Common Forge.—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plates, and BB. Merchant Bars.
- No. 6 Strong Forge.—A still harder and closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

MOTTLED.—Used for Chilled Rolls in tempering; and for other similar purpose

\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4071, Session 1898.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 samples including Blaenavon	7.140	23,257	7,102	91,061
Average of 5 samples of Blaenavon only...	7.175	25,498	7,468	108,281

**THE TORBAY and DART PAINT COMPANY, Ltd.****Meetings.****MILLARS' KARRI AND JARRAH FORESTS, LIMITED.**

An extraordinary general meeting of Millars' Karri and Jarrah Forests, Limited, was held on Monday, at Winchester-house, Old Broad-street, E.C., for the purpose of considering and, if thought fit, passing the following resolution:—

"That the capital of the company be increased to 500,000*l.* by the creation of 150,000 second or B preference shares of 1*l.* each, and that, subject to the rights of the holders of the existing preference shares, the said second or B preference shares shall confer the right to a fixed cumulative preferential dividend at the rate of 6 per cent. per annum on the capital paid up thereon (which dividend shall be payable on May 1st and November 1st in every year), but no other right to participate in the profits of the company, and shall rank subject to the existing preference shares both as regards capital and dividends in priority to the ordinary shares of the company."

Sir GEORGE E. PAGET presided.

The SECRETARY (Mr. J. W. Richardson) having read the notice convening the meeting and the resolution set forth above,

The CHAIRMAN said—In the short report which was issued with the notice the directors have already stated concisely the position of the company and their reasons for recommending an increase of capital. You may, however, like to have some further particulars in addition to those contained in the report, and these I will endeavour to give you as briefly as possible. In the first place, with reference to the balance of the ordinary share capital of the company, which was issued in May last, I may state that out of 50,000 shares offered 49,163 were applied for by the shareholders, and allotted to them in proportion to their previous holdings of ordinary shares, the small balance remaining over being afterwards sold. The instalments due from the shareholders both for the capital and premium on this issue have all been paid up, and a special settlement and official quotation have been granted by the London Stock Exchange; so that in every respect the issue is now on the same footing as the original issue of ordinary shares. The amount of premium realised was about 50,000*l.*, and the policy which was adopted when the company was initiated—viz., that of holding back the issue of the 50,000 shares—has therefore been amply justified. I think that it is a matter for congratulation to the shareholders that, in spite of having received this 100,000*l.*, we should now be in the position of requiring to increase the capital of the company. The business of the company has, however, developed so rapidly that we must either restrict our operations or augment our capital. One of the principal branches of the company's business is supplying the timber now so extensively used for street paving. This business is constantly increasing. At the present moment we have no less than sixteen cargoes of this material either afloat or loading, the whole of which is already sold. There are, however, other branches of the business which are equally important, and are capable of as great a development as the paving business. I refer more particularly to the supplying of the timber for sleepers, piles, bridge-building, and general engineering purposes. From very exhaustive tests which have been made both in England and on the Continent it has been conclusively proved that karri and jarrah—more particularly karri, which is the stronger timber of the two—are superior in almost every respect to the timbers commonly used for these purposes. With regard to sleepers, I may mention that we continue to receive repeat orders from several of our colonies, and we have supplied a number of trial orders to railways at home and abroad which we anticipate will lead to large contracts. For piling our timber has been specified by several engineers, and where it has already been used it has been highly appreciated on account of its strength and immunity from defects. The great length in which karri can be obtained gives it a special value for engineering works in deep water. I may mention that we are at present shipping karri piles 90ft. long and 18in. square; but even these dimensions by no means represent the maximum size in which we can supply this magnificent timber. In order to fully develop our trade it is, however, absolutely necessary to have good accommodation for storing and converting the timber in this country, and it is necessary, also, to keep a very considerable stock ready for inspection and delivery to our customers. You will observe from our report that we have entered into possession of the freehold property at Purfleet, and the necessary work are already in hand. The board found it impossible to conduct the business satisfactorily and economically in the docks or at any of the existing wharves in the upper reaches of the river; in the one case the charges are prohibitive, and in the other the lack of water makes it necessary to lighten the cargoes to and from the wharves at a large cost. It was, therefore, decided to try to find some position on the river where a deep-water wharf could be constructed and direct railway communication obtained, and we were fortunate enough in finding at Purfleet exactly what we wanted. The property acquired comprises about 34 acres of level land, rectangular in shape, with 1,000ft. of frontage on the river, and bounded on its northern side by the London Tilbury and Southend Railway. The pier for which the contract has been let is so designed as to allow of engines and trucks proceeding direct alongside the vessels. It will have accommodation for several vessels to load and discharge at the same time, and vessels of the largest size will be able to lie alongside always afloat. In order to get sufficient frontage for the accommodation of several vessels simultaneously we had to purchase more land than is necessary for the company's own requirements; but when the shipping and railway facilities are completed, we look forward to letting or otherwise dealing with the spare land to the great advantage of the company. We have already been approached by more than one firm with a view to our letting a portion of the land and

handling for them their import and export traffic. Should our anticipations on this head be realised, our Purfleet estate should prove a valuable source of income, in addition to affording us unique facilities for conducting our own business. It is intended to erect machinery of the latest type, which will enable us to supply at once from stock any size of scantlings required by our customers. Now, with regard to the development of our properties in Australia, you will see from our report that at the Denmark (Karri) estate an additional mill is at work, and on the Mornington (Jarrah) estate one small mill is running and two large mills are in course of construction. The latest reports from Australia inform us that they will be able to commence exporting Jarrah from Mornington at the end of January. When this estate is in full swing, it is estimated that our total output of timber will be 100,000 loads per annum, which represents a turnover of over 500,000*l.* sterling, and when you consider that at the commencement of last year, on the business being taken over by the company, the output was only 42,000 loads per annum, you will see at once that such a result as this can only be accomplished by means of a considerable capital expenditure, and that a large working capital is also necessary to enable us to handle to the best advantage the largely increased trade of the company. Our customers principally consist of Government departments, municipal bodies, and railway companies, who do not pay until some time after the delivery of the goods; so that a long period must elapse between the cutting of the timber in Australia and the collection of the proceeds. It will give you some idea of the amount of working capital required in a business of this magnitude when I tell you that at June 30th last the timber in transit and delivered to customers, but not at that date paid for, exceeded in value 150,000*l.* There is another matter to which I may refer—that is, the question of shipping. At the present moment, owing to various causes, freights are exceptionally high, and we have found some difficulty in obtaining sufficient tonnage. It may, therefore, not be inopportune to mention that the board is considering whether it would be worth our while to purchase some ships specially adapted for our requirements. After full consideration, and with due regard to the interests of both classes of shareholders, we have come to the conclusion that the best method to raise the required capital is by the creation and issue of 150,000*l.* second, or B, 6 per cent. cumulative preference shares, which shall be preferential as to capital as well as dividend, and rank subject to the existing 6 per cent. preference share capital of 100,000*l.* After the issue of these shares the capital of the company will be 500,000*l.*, consisting of 250,000 ordinary shares of 1*l.* each, 250,000*l.*; 250,000*l.* 6 per cent. preference shares of 1*l.* each (i.e., original issue 100,000*l.* and proposed issue 150,000*l.*), 250,000*l.*—500,000*l.* To which may be added premium received on ordinary shares, 50,000*l.*, making a total of 550,000*l.* The fixed assets of the company on the completion of the works at present in hand will stand approximately as follows:—Original price paid for properties, &c., 250,000*l.*; additional expenditure on plant, railways, workshops, &c., 1897, as per balance-sheet, 54,565*l.*; ditto to June 30th, 1898, 30,790*l.*; estimated further expenditure, say, 75,000*l.*; total capital expenditure, 410,355*l.*; which would leave available for working capital about 140,000*l.* in addition to reserve fund. The profits for last year (1897), after carrying 21,974*l.* to reserve and depreciation funds, were 48,147*l.*, whereas the amount required to pay the annual dividend on 250,000*l.* preference share capital is only 15,000*l.* The directors propose that the new shares shall be issued at a premium and that they shall be offered to the public, but that existing shareholders, both preference and ordinary, shall have a preferential allotment. The statement which I have made will, I have no doubt, enable every shareholder to support the resolution which you are called upon to consider. It is a proposition which has received the unanimous assent of the board, and, as the board and their immediate friends hold a very large proportion both of ordinary and preference shares in the company, we are, at any rate, assured that the interests of the general body of shareholders are identical with our own. I now formally move the resolution.

Mr. STAMFORD S. YOUNG seconded the motion.

In answer to shareholders,

The CHAIRMAN said that he could not state at what premium the new shares would be issued. They would get the best premium they could, but when they issued the shares they would, if possible, endeavour to give a little advantage to the shareholders. The output for the six months to June 30th last was 33,371 loads. The rate of the output had not increased in that half-year much as compared with the output of the whole of last year (61,000 loads), but they anticipated that the output for the second half of the year would be rather better than that of the first half. They had expended revenue for capital purposes. The 150,000*l.* was wanted for working capital. They had spent 150,000*l.* on timber, the money for which had not at present been received. He did not think it would be wise, but extravagant, to issue the new shares at par if they could get a premium for them.

The resolution was carried unanimously.

### INTEROCEANIC RAILWAY OF MEXICO.

The annual general meeting was held at Winchester-house, E.C., on Monday; Mr. W. J. STRIDE presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said that he had again the pleasant task of reporting an increase in the receipts over the large increase shown in the accounts for the year 1896-97. This year the increase in gross receipts was 19.44 per cent., every source of income showing an increase with the exception of animals, which gave some \$500 less than last year. The increase for 1896-97 was 15.31 per cent.; so that the progress was even more satisfac-

tory than it was for that year. The increase in passengers had been consistent from the commencement of working by the company, but more pronounced during the year under review. Unfortunately, owing to the low value of Mexican currency, the average sterling rate was so low as to leave little margin of profit. Any additions to the rates would have resulted in decreased receipts, as it would have caused many to use other means than the railway for travel. Turning to the expenditure, the chairman said that the proprietors might feel some disappointment that the per-centage of expenditure only showed a reduction, as compared with last year, of 1.09 per cent., although the earnings had increased 19.44 per cent. The explanation was given in the directors' report, the following being the chief causes:—Nearly \$50,000 more had been spent on sleepers, the board deeming it of first importance to have the track thoroughly well kept up so as to enable punctual and safe travelling. It was satisfactory to note that not a single accident of any kind had happened during the year to a passenger train, nor had any passenger been injured in the slightest degree. This was an excellent record when it was remembered that nearly 1,100,000 passengers had been carried and 540,000 tons of goods handled. The company now had 261 kilometres of track laid with metal sleepers, leaving about 630 kilometres sleepered with wood, which aggregated about 950,000. The company's engineer was hopeful that, having regard to the better condition in which the track was now situated, as compared with previous years, some reduction in the cost of sleeper renewals might be looked for. The total amount expended on sleepers this year was \$224,507, as compared with \$176,892 during the previous year. The fuel bill was naturally heavier than in the previous year, owing to the increased train miles, the increase therein being 14½ per cent., as compared with an actual increase (after deducting haulage) in the cost of fuel used of 15 per cent. This could not be considered an unreasonable increase, having regard to the fact that during the year the cost of coal and wood was higher than in 1896-7; in fact, during May and June the difference in the cost of coal was about 25 per cent., mainly owing to the coal strike in Wales. The scale of wages had been somewhat increased in order to ensure continuity of service, the company's men having previously been paid less than on other railways. The wages of skilled workmen throughout the Republic had been steadily increasing of late, and it had been found very difficult to retain the services of good men. Therefore it was preferable to pay a higher wage for a good man than have an inferior class of workmanship. Carriage and wagon repairs accounted for an increase of \$21,000. A large proportion of the rolling stock had now seen many years' service, and as it would be false economy to allow the same to run down no reduction under this head could be expected in the future. With regard to traffic expenses, there was an increase of \$147,000, part of which was accounted for by charges which did not appear under this head in the last year's accounts. There was also an item of \$38,816, expenses of the express service, which was inaugurated on September 1st, 1897, and which was fully justified by receipts. The charges at Vera Cruz also considerably increased in consequence of additional business, the increase being \$21,506 in wages, \$7,831 expenses of the mole, and \$12,647 expenses of the consignment department. The Spanish-American war, to some extent, affected traffic, and also, as stated in the report, enhanced freights. Notwithstanding all this, the net profit enabled a distribution of 3 per cent. on the A stock, as against 2½ during the previous year. Had exchange maintained an average of 24 9-16*d.*, as in the previous year, instead of only averaging 22½*d.* the profit in sterling for the year would have been about 5,000*l.* greater. It was satisfactory to note, as showing the effect of the depreciated exchange, that the dollar had lately been improving in value. A considerable amount of work had been carried out during the year as charged to capital account. As to the additional wooden sleepers for 50 kilometres, it was found on several places of the road, where the traffic was heavy, the 40*lb.* rail still in those parts of the road required extra support, and, consequently, the number of sleepers was increased from fourteen to sixteen to the rail of 30*ft.* for a distance of about 40 kilometres; between Puebla and San Marcos, where the rails were 50*lb.* to the yard, the number had been increased to 15; this expense, being a betterment, had been charged to capital. Ballasting—This was work left undone by the contractors, and was principally on the Morelos section, and distinct from the ordinary maintenance. Where 50*lb.* rails were substituted for 40*lb.* rails, the value of the extra weight was charged to capital. The total amount spent on new works during the year was \$479,000, or about 45.364*l.*, and to complete the schedule of works, including the new branch line, the amount still required was about 65,000*l.*, of which 30,000*l.* was for the new line, additional to the aids which were promised, and about 8,400*l.* to complete the company's pier extension at Vera Cruz, which it was expected would be finished by the end of the year. The greater part of the balance of expenditure would be incurred at Vera Cruz, where a new station was to be built on a new site. The increase in traffic made the expenditure on rolling stock imperative, and if the increase continued it would no doubt be necessary later on to further increase the rolling stock. The pooling arrangements had been continued, and to a certain extent worked satisfactorily. There had been a rift in the lute, and the matter had again been referred to conference, and it was hoped that an amicable arrangement would be arrived at. Regarding the new classification, the Mexican Railway were now complying with the requirements of the Government, and any further long delay was improbable. A material benefit should follow the introduction of this classification. It could apply only to national goods, and it was proposed to provide twelve classes instead of four in operation at present. Dealing with prospects, the Chairman said the harvest promised to be plentiful. Last year the exports of the country were much larger than in the preceding year, but the imports fell

off considerably, which must be attributed partly to the abundant crops, which made the country more independent of imports, and partly to the steady decline of the silver dollar. Under these circumstances, an increase in import trade might be expected, if only to replace the stocks which had been used. As to the immediate prospects, the gross receipts of the company from July 1st to the 15th inst. showed an increase of \$95,470, compared with the corresponding period of last year; but the net profit for the first three months of the year was not quite so good as in the first three months of last year owing to heavy expenditure. The heavier expenditure during the three months mentioned had been due to exceptional causes, and must certainly not be taken as a basis in estimating the expenses of the whole year.

Sir G. E. PAGER, Bart., seconded the motion.

The CHAIRMAN, in reply to questions, said that they would build the new branch line themselves, and it would be done at the cheapest cost possible.

The resolution was carried unanimously.

## WATERFORD AND CENTRAL IRELAND RAILWAY.

The half-yearly general meeting was held in Dublin on Thursday; Colonel J. N. CAHILL presiding.

The accounts for the half-year ending September 29th, 1898, show gross receipts amounting to 24,024*l.* (against 23,199*l.*), and expenditure amounting to 12,942*l.* (against 12,389*l.*); net receipts, 11,082*l.* Adding the balance brought forward, 725*l.*, and interest received, 12*l.*, the total net revenue was 11,819*l.*, which was absorbed as follows:—Prior charges, 6,703*l.*; dividend on new preference stock, at the rate of 4 per cent. per annum, 4,430*l.*; balance to next half-year, 686*l.* Length of railway owned, 59½ miles; ditto worked, 6½ miles. The capital account showed an expenditure of 1,232,771*l.*, whilst the receipts had been 1,232,078*l.*, as follows:—Original stock, 250,000*l.*; ditto issued for amalgamation of Kilkenny Junction Company, 314,447*l.*; new preference 6 per cent. stock (issued in substitution for 196,855*l.* preference stock, and extinguishing arrears of interest of 246,114*l.*), 221,495*l.*; loans, 2,433*l.*; debenture stock, 3 per cent., 443,556*l.*; sundries, 97*l.*

The traffic receipts of the Central Ireland Railway for the half-year ending September 29th amounted to 621*l.*, and the working expenses to 435*l.*, leaving a profit of 186*l.* applicable towards the usual dividends of 4½ per cent. per annum on the Central Ireland stock held by the Great Western Railway Company, and 5 per cent. on the balance in the names of other parties, both payable out of the separate earnings of the Central Ireland Railway, supplemented by the Great Western rebates, in accordance with the Waterford and Central Ireland Railway (Transfer) Act, 1877. The receipts on capital account for this undertaking had been 66,616*l.*—viz., Central Ireland stock, 27,480*l.*; Great Western rebate (credited to this account), 39,136*l.* The expenditure had been 66,216*l.*, leaving a credit balance of 400*l.*

The CHAIRMAN, in moving the adoption of the report and accounts, said—I have but few remarks to make. The working for the half-year has yielded a satisfactory result, inasmuch as we are paying an increased dividend, and carrying over a somewhat larger sum than in the corresponding half-year of 1897. Holders of Central Ireland stock will for the future have to depend on the earnings of the line for dividends, as the balance of rebates which remained over after the construction will be exhausted by payment of the dividend at the rate of 3½ per cent. per annum, which is recommended in the report. Your board have been in communication with the Great Southern and Western board with the view to carrying out the amalgamation with their company, and an agreement has been concluded on the lines sanctioned by the extraordinary general meeting of May 19th last. We have decided to apply to Parliament next session for a Bill to extend the time for purchase of lands and for completion of the Central Ireland Railway. Under the Central Ireland Act of 1896 the time for the purchase of land would expire on May 21st next, and the board consider it desirable that the powers obtained under the Act should not be permitted to lapse. The Bill will later on be submitted to you for your approval at a special meeting, of which due notice will be sent you.

Mr. L. A. WALDRON seconded the motion, which was adopted.

## Directors' Reports.

### DELHI UMBALLA KALKA RAILWAY.

The accounts for the half-year ending December 31st, 1897, show a gross revenue of 59,820*l.* (against 41,345*l.*), an expenditure of 29,833*l.* (against 20,940*l.*), and a net profit, after deducting 627*l.* Indian Income-tax, of 29,310*l.* Adding balance brought forward 220*l.*, transfer-fees 14*l.*, and interest 136*l.*, the total net revenue was 29,460*l.*, which was appropriated as follows:—Interest on debenture stock, 6,000*l.*; sundries 2*l.*; dividend 2*l.* 15s. per cent., 22,000*l.*; balance to next account, 1,678*l.* Length of line opened, 161½ miles.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of 60,765*l.* (against 44,039*l.*), an expenditure of 30,052*l.* (against 22,172*l.*), and a net profit, after deducting 646*l.* Indian Income-tax, of 30,066*l.* Adding balance brought forward, 1,678*l.*, transfer-fees, 15*l.*, and interest, 93*l.*, the total net revenue was 31,851*l.*, which was appropriated as follows:—Interest on debenture stock, 6,000*l.*; exchange adjustments, 17*l.*; dividend, 2*l.* per cent., 16,000*l.*; balance to next account, 9,835*l.* Length of line opened, 161½ miles. The capital account shows a total expenditure of 1,112,583*l.*; whilst the receipts have been 1,120,071*l.*—

viz., ordinary stock, 800,000*l.*; 4 per cent. debenture stock, 300,000*l.*; sundries, 20,071*l.* The report states:—

The receipts for the year to June 30th, 1898, were Rs.4,81,107 more than for the year 1896-7, but this is in a great measure attributable to exceptional circumstances—namely, the carriage of troops and stores for the frontier military operations during 1897-8, and pilgrim traffic on the occasion of the solar eclipse in January, 1898. The dividends paid for the past three years are as under:—1895-6 at the rate of 3*l.* 7s. 6d. per cent. per annum; 1896-7, at the rate of 3*l.* 15s. per cent. per annum; 1897-8, at the rate of 4*l.* 15s. per cent. per annum. The contract with the Secretary for India for the construction of the Kalka-Simla Railway was, as authorised by the stockholders, signed on June 29th last. As provided by clause 8 of the articles of association of the company, the proprietors were given the option of subscribing the capital required, and have applied for a considerable portion of the issue. The balance of the capital will be offered to the public for subscription, and negotiations are now proceeding with the object of putting the issue before the public at the first favourable opportunity. Mr. Robert Steel, C.S.I., has been elected a director.

## American & Canadian Railways.

### THE CANADIAN RATE DISPUTE.

Subjoined is a copy of a letter by Sir William Van Horne, President of the Canadian Pacific Railway, to Sir Charles Rivers Wilson, President of the Grand Trunk Railway, in reply to the latter's communication of October 17th, which has already been published:—

“November 3, 1898.

“Dear Sir Rivers—I have received your letter of October 17th. There is at the present time but one question at issue between the Canadian Pacific and the Grand Trunk—the question of passenger rates in Canada. The North Bay arrangement is not an issue, and it has no bearing upon the rate difficulty. This arrangement was terminated by written notice from your company nine months ago, and since that time we have been carrying our traffic over our own line. When your company is disposed to offer us inducements to do otherwise we will be glad to consider them. While the matter of passenger rates between Eastern Canada and the Canadian North-West can hardly be more than a traffic question with the Grand Trunk, involving more or less earnings, it is a matter of very great importance to the Canadian Pacific beyond all traffic considerations. It is a question affecting the settlement of the Canadian North-West, and as such it is of great consequence to the entire Dominion of Canada, as well as to this company. The settlement of the Canadian North-West was a problem to which the Canadian Pacific Company earnestly addressed itself from the beginning, and in pursuance of this object it has maintained an extensive system of agencies in Canada and in Europe, and has expended vast sums of money, and the Dominion Government has likewise expended large amounts of money with the same object in view. Prior to the completion of our own line to the North-West, settlers from Eastern Canada and immigrants from Europe had to be sent by the way of Chicago, and large numbers of them were diverted by the agents of the American lines over which they had to pass, and were induced to settle in the Western States. As evidence of this I need only point to the petition of the Grand Trunk and its Western American connections to the Interstate Commerce Commission at Washington, for the suspension of the long and short haul clause of the Interstate Commerce Act, at the time they were seeking to free their hands for the attack which they were making on this company. In that petition the following representations were made:—‘That prior to the completion of the Canadian Pacific Railway between the Provinces of Ontario and Manitoba the petitioners' lines enjoyed the whole of a large passenger traffic between these provinces, much of which traffic was composed of settlers who were seeking homes in the North-West. Many of the passengers so carried by the United States lines found inducements to settle in Minnesota and other North-Western States. With the low rates established by the Canadian Pacific Railway on the completion of its through line north of Lake Superior the United States lines could not compete, therefore, without demoralising their intermediate rates or sustaining great loss of needed revenue, and, as a result, the entire traffic in question was diverted to the Canadian Pacific Railway.’ In order to prevent this diversion of settlers the Canadian Pacific Company, after the completion of its through line to Manitoba some thirteen years ago, put into effect passenger rates from \$3 to \$5 less than the corresponding rates by the longer route through the United States by way of Chicago. So long as proper safeguards were provided against these rates being made use of by settlers destined to the adjacent North-Western States nobody could question the propriety of this, or the right of the Canadian Pacific Company to carry its own settlers at any rates it might

see fit and there has never been any complaint on this score. The difference in passenger rates was accepted and maintained by the Grand Trunk and its American connections until early in the present year, when all rates became demoralised and continued so until quite recently. The transcontinental rate difficulties were settled some weeks ago; but the Grand Trunk refused to restore the passenger rates between Eastern Canada and the Canadian North-West to their ante-bellum basis, and the Canadian Pacific refused to restore other local Canadian rates until this should be done. This is the issue, and the only issue. It can hardly be claimed that the present attitude of the Grand Trunk in this matter is due to the wishes of its Western American connections; for we are in receipt of the following recommendation from the Western Passenger Association:—"As leading up to a complete and satisfactory settlement of questions in dispute, the other interests represented at this conference respectfully recommend that the Canadian Pacific and Grand Trunk roads will, at the earliest practicable date, restore what is known as the antebellum basis of rates (those in effect prior to February, 1898) to points east of but not including, Kootenay, and at the same time restore to regular normal tariff the reduced local rates now in effect within the Dominion of Canada; this to be a temporary measure, its continuance being contingent upon the reaching of satisfactory adjustment of questions in dispute, the understanding being that with this in view a conference of interested parties shall be held as promptly as possible." As this recommendation is precisely in line with what we have repeatedly proposed within the past two months, our unconditional willingness to accept it has been communicated to the chairman of the Western Passenger Association, and to your general manager. A proposal to submit the subject of a dispute to arbitration usually seems fair, but there are subjects which nobody would so submit, and the question between us, which involves the protection of our settlers from the American lines, is one of these.—I am, dear Sir, yours very truly,

(Signed) W. C. VAN HORNE, President.  
"Sir Charles Rivers Wilson, G.C.M.G., President Grand Trunk Railway Company of Canada, London."

#### ST. JOSEPH AND GRAND ISLAND.

Although the present management of this undertaking only dates back to March 1st, 1897, figures for the year 1896-7 are given for purposes of comparison. The fiscal year ends June 30th:—

	1896-7.	1897-8.
Passenger earnings .....	\$125,233 ...	\$156,654
Freight earnings .....	733,832 ...	986,880
Mail, express, &c. ....	80,922 ...	88,974
<b>Total earnings</b> .....	<b>\$939,087 ...</b>	<b>\$1,232,508</b>
<b>Total expenses</b> .....	<b>\$676,948 ...</b>	<b>\$747,678</b>
<b>Net earnings</b> .....	<b>\$262,139 ...</b>	<b>\$484,830</b>
<b>Other income</b> .....		<b>853</b>
<b>Total net income</b> .....		<b>\$485,683</b>
<b>Interest on bonds</b> .....		<b>\$70,000</b>
<b>Taxes</b> .....		<b>76,197</b>
<b>Miscellaneous</b> .....		<b>40,844</b>
<b>Dividends</b> .....		<b>274,880</b>
<b>Total</b> .....		<b>\$461,921</b>

The balance-sheet shows a share capital of \$13,567,600, and a bonded debt of \$3,500,000. President William L. Bull, in his report, says:—"The development alluded to in the last annual report has been carried on unceasingly and is still in progress. The changes at Hanover have been completed and are proving to be worth all that was predicted for them. Three new locomotives of the most approved modern type were purchased during the year, and additional equipment is now in course of construction. Renewal of the steel on a proper yearly proportion of our track has been continued, and more than the average number of ties have been purchased and put in place, and all these from earnings of the road. An especial effort has been made to diversify the business along the line, and the results are gratifying. Special mention may be made of the establishment of important packing houses at St. Joseph, largely increasing our stock business, and of the development of the merchandise movement along our entire road. The amount of wheat grown in the territory served by the railway was larger during the last year than ever before in its history, and we hope to see the results before January 1st in an increased grain tonnage. On account of the rapidly growing tendency of freight to seek Gulf ports, contracts have been made with the Atchison Topeka and Santa Fé and the Kansas City and Northern Connecting roads, securing trackage rights and an entrance into Kansas City on terms which are considered very advantageous for your road. It is expected that this line will be open for business in August next, and that soon after it will be in full operation. There has been no increase in the funded debt or

share capital of the company during the current year, and it has no floating debt whatever."

#### VICKSBURG SHREVEPORT AND PACIFIC.

This is one of the several concerns forming the system of the Alabama New Orleans Texas and Pacific Junction Railways Company, Limited, but apart from this it is known in the London market by a small issue of prior lien bonds, which are quoted in the Stock Exchange Official List. The following brief summary of its report for the year ending June 30th may therefore be of interest:—

	1896-7.	1897-8.
Gross earnings .....	\$572,929 ...	\$640,174
Operating expenses and taxes .....	425,880 ...	450,426
<b>Net earnings</b> .....	<b>\$147,049 ...</b>	<b>\$189,748</b>
<b>Sundry credits</b> .....	<b>1,656 ...</b>	<b>1,143</b>
<b>Total net income</b> .....	<b>\$148,705 ...</b>	<b>\$190,891</b>
<b>Interest on bonds</b> .....	<b>410,499 ...</b>	<b>410,499</b>
<b>Deficit</b> .....	<b>\$261,794 ...</b>	<b>\$219,608</b>

The balance-sheet shows, among other liabilities—common stock, \$1,601,500; funded debt, \$7,767,235; first mortgage interest due and unpaid, \$2,082,316; third mortgage interest due and unpaid, \$716,475.

#### WEST VIRGINIA AND PITTSBURG.

This company is known in the London market by an issue of 5 per cent. first mortgage gold bonds, which are quoted in the Stock Exchange Official List. The following brief summary of its report for the year ending June 30th may therefore be of interest:—

	1896-7.	1897-8.
Total gross earnings .....	\$384,487 ...	\$391,067
Total operating expenses .....	195,911 ...	218,067
<b>Net earnings</b> .....	<b>\$188,576 ...</b>	<b>\$173,000</b>
<b>Other income (net)</b> .....	<b>48,391 ...</b>	<b>—</b>
<b>Total net income</b> .....	<b>\$236,967 ...</b>	<b>\$173,000</b>
<b>Interest on bonds and equipment notes</b> .....	<b>\$202,731 ...</b>	<b>\$201,336</b>
<b>Taxes and miscellaneous</b> .....	<b>28,441 ...</b>	<b>32,101</b>
<b>Total disbursements</b> .....	<b>\$231,172 ...</b>	<b>\$233,437</b>
<b>Balance</b> .....	<b>Cr.\$5,795 ...</b>	<b>Dr.\$60,437</b>

The balance-sheet shows a bonded debt of \$4,011,620, common stock \$2,500,000, and preferred stock \$900,000.

#### MANITOBA AND NORTH WESTERN RAILWAY.

A meeting of the first mortgage debenture-holders of the Manitoba and North Western Railway Company of Canada, Limited, was held on the 11th inst., at the Cannon-street Hotel; to hear from the trustees a statement as to the position of affairs. Colonel F. D. GREY (joint trustee with Sir J. R. Heron Maxwell) presided. The CHAIRMAN said that in 1885 the company, under powers derived from the Canadian Parliament, made an issue of mortgage bonds to the amount of 540,000*l.*, being 3,000*l.* per mile on 180 miles, the length of the first division of the road. These were the bonds they held. Later on a further section of the line was completed, in which they were only indirectly interested. The Legislature of Manitoba made the company a grant of 6,400 acres of land for every mile of the railway finished. Thus, on completion of the first section, 1,152,000 acres, less 74,000 which had, previous to the bond issue, been sold by the company, were included in their mortgage as additional security. So fast as eligible purchasers offered, the sale of these lands proceeded, with the primary object, of course, of encouraging settlements whence to derive a paying traffic for the line, but also to enable the trustees, meanwhile, to supplement any deficiency in the net revenue of the railway to meet the interest on the bonds. In 1893 immigration was practically at a standstill, and default in the payment of the interest on the bonds was made on June 1st of that year. The trustees were precluded by the trust-deed from taking any legal steps until after the lapse of six months from the date of default, but they immediately called the bondholders together, and at the meeting a committee was appointed to represent them. Meanwhile the Messrs. Allan commenced an action against the company, with the result that, on June 8th, Mr. Montagu Allan was appointed as receiver. As it was clear that this appointment would interfere with the rights of the bondholders, steps were taken to protect their interests, and an action was commenced by the trustees in the courts of Manitoba, on July 3rd, 1894. These proceedings received the bondholders' sanction at a meeting held on the 23rd of the same month. Since, however, the committee could render no effective service without funds they appealed to the bondholders to lodge their bonds against certificates on which they should be authorised to borrow money up to a certain extent, and securities representing six-sevenths of the entire bond issue

were lodged with the committee. The objects of the action commenced were, first, for the appointment of a receiver on behalf of the first mortgage bondholders; and, secondly, for the sale of the line. Mr. Nanton was appointed receiver on their behalf in April, 1895, and in the first court a decree was obtained ordering the sale of the railway. This decision was successfully appealed against, but it was pointed out that, by another form of procedure, the desired object could be obtained. Consequently, on March 14th last, Mr. E. Coates (chairman of the committee) and Mr. Hendrie, suing on behalf of themselves and all other first mortgage bondholders of the first division of the railway, issued a writ against the railway company and the trustees to administer the trusts of the mortgage deed securing their bonds. A defence to the action had been put in by the railway company and the trustees, that of the trustees being merely an admission of the facts, and a submission to the direction of the court. Messrs. Allan had been joined by the plaintiffs as defendants to this action, and it was still pending. The land question, he was glad to be able to say, was now in course of being settled on terms which were on the whole satisfactory. As to the matters with which the trustees were officially concerned, this was all he had to inform them, but he might as well mention that clients of Messrs. Coates and Co. in Canada had offered to purchase *en bloc* the certificates issued by the committee, thus obtaining the bonds represented by such certificates, and that such offer had been accepted by the owners of the said certificates. The committee consequently deemed that their duties had come to an end, and that it was incumbent on them to retire. As Mr. Coates was no longer a bondholder, it might be that the action now pending would not be continued by him. At any rate, some of the bondholders—the outstanding one-seventh—might desire to be represented at the proceedings, and, therefore, the trustees had thought it right to call them together, so that, if thought desirable, they might combine and take such steps as were necessary for the purpose. The trustees had instructed Messrs. Ewart, Fisher, and Co., their solicitors in Manitoba, to represent the matter properly to the court, but at the same time they might consider independent action advisable. He could only say that the trustees, their solicitors, and secretary would be glad to give information and assistance to any one whom the bondholders might appoint to represent them. A long discussion ensued, in the course of which Mr. GARDINER, a member of the committee, said their functions had come to an end, and they therefore wished to take this opportunity of resigning their position. He regretted that the whole of the bondholders did not benefit by the offer to purchase which was made. During the five or six years of worry and litigation the door had always been kept open to the bondholders to come in, and they had even by circular and advertisement been asked for their support. The committee had done their best for their constituents, and now they must leave those who did not take advantage of their services to take what steps they considered necessary in their own interests. It was ultimately agreed that the bondholders who had not supported the committee—the one-seventh—should hold a private meeting immediately after the adjournment of the present one, and discuss the question as to whether they would raise the necessary funds to prosecute their interests.

#### TEMISCOUATA RAILWAY.

The following circular has been sent out to the bondholders of the Temiscouata Railway Company:—

"Winchester-house, Old Broad-street, E.C., Nov. 15th, 1898.

"Sir or Madam—The last interest coupon upon the main line bonds payable by the Quebec Government having now been cashed, and default on the bonds being therefore imminent, it will shortly be necessary for the committee to take steps to prepare to enforce the bondholders' security and rights. To this end it is essential that the main line bondholders should at once deposit their bonds with the committee, giving the latter full power to act in such a way as they may think fit, and to the same extent that each bondholder could himself. To facilitate the arrangements which the default on the main line bonds will necessitate, the committee has been advised that it is desirable to register itself as a limited company, under the name of the Temiscouata Railway Bondholders' Committee, Limited. This has accordingly been done, and you are requested to send your bonds at once to the Trustees', Executors', and Securities Insurance Corporation, Limited, as agents for the committee, at the above address, who will give a receipt for the bonds lodged, which will subsequently be exchangeable for the certificate of the Temiscouata Railway Bondholders' Committee, Limited. . . . In making this deposit you will incur no pecuniary liability, but without possession and control of the main line bonds it will be impossible for the committee to take action to safeguard the bondholders' interests in view of the default now imminent. In the case of bearer bonds that have

been registered, it will be necessary to unregister the bonds before they are transferred to the committee or the latter issue their certificate. The committee will be prepared to effect this unregistration on behalf of any bondholder, merely charging him the nominal sum which has to be paid by the holder for this purpose. In due course after the deposit by any holder of a registered bond, the document or documents required to unregister it will be sent to him for signature. As soon as sufficient bonds have been deposited, application will be made to the Stock Exchange for a quotation of the committee's certificates. The interest on the St. Francis Branch bonds, payable by the Quebec Government, having still some time to run, the committee do not yet require the deposit of those bonds.—Yours faithfully,  
"H. R. Boyce, Secretary."

#### BALTIMORE AND OHIO.

The Baltimore and Ohio is negotiating for the control of the Wheeling and Lake Erie.

It is expected that the new general manager of the Baltimore and Ohio Railroad will be the nominee of Mr. James J. Hill.

It is announced that the Baltimore and Ohio committee has completed the sale of the entire issue of 4 per cent. bonds under the reorganisation plan. The reorganisation plan will be ready for publication in a fortnight.

A demurrer, and an answer to the amended and supplemental petition of the holders of the Baltimore and Ohio Railroad first preferred stock, who are endeavouring to block the reorganisation plans, was filed in the United States Circuit Court on Saturday by the Mercantile Trust and Deposit Company. The Trust Company demurs to that part of the petition which recites the syndicate agreement, and alleges that the reorganisation plan is "not only constructively, but actually, fraudulent." In answer to the petition, it is stated that "the only material issue raised, or that can be raised by the petitioners, is whether the receivers properly made default in payment of the interest upon the main line mortgages. If such defaults were proper and necessary, owing to the financial condition of the railroad, it is entirely immaterial that the directors, or the reorganisation committee, or the managers, have made, or are intending to make, or carry out, any plan for the disposal of the property and assets of the Baltimore and Ohio Railroad after the same shall have been lawfully sold under a decree of this court, or that they expect thereafter to have any interest therein."

A Reuter's telegram from New York, on Thursday, says:—"The managers of the New York City Reorganisation Committee have purchased the first preferred stock of the Baltimore and Ohio Railway, which was pooled with the Mercantile Trust and Safe Deposit Company of Baltimore city by the Johns-Hopkins University, State of Maryland, and others, thus removing the last obstacle to the reorganisation of the Baltimore and Ohio Railway."

#### MOBILE AND BIRMINGHAM.

This company is known in the London market by two issues of bonds, and, consequently, the following abstract of its accounts for the year ending June 30th will not be without interest:—

	1896-7.	1897-8.
Freight earnings .....	\$252,264	\$265,191
Passengers .....	70,938	60,124
Miscellaneous .....	35,178	34,979
Total receipts .....	\$358,380	\$360,294
Total expenses .....	289,283	281,947
Net earnings .....	\$69,097	\$78,347
Other income .....	252	246
Total net income .....	\$69,349	\$78,593
Interest on prior lien bonds .....	\$30,000	\$30,000
Interest on first mortgage incomes .....	24,000	24,000
Wharf addition at Mobile .....	—	21,248
Total disbursements .....	\$54,000	\$75,248
Balance—surplus .....	\$15,349	\$3,345

The balance-sheet shows the capital to be as follows:—Common stock, \$900,000; preferred stock, \$900,000; first mortgage 4 per cent. bonds, \$1,200,000; prior lien 5 per cent. bonds, \$600,000.

President Bush in his report states that the plan of charging a fixed sum each month to working expenses for the renewal of trestles and ties has been strictly adhered to, and, after paying for the actual work done, there remained at the end of the fiscal year \$21,564 to the credit of renewal of trestles fund and \$1,380 to the credit of renewal of ties fund, together \$22,945, which is available for future requirements. Quarantine against Mobile was declared September 13th and raised November 25th, 1897. Owing to the stringency of the regulations at various points, not a train was run for eleven days, and for forty-one days freight and passenger traffic was continued only on a portion of the line.

The interruption to traffic, of course, caused serious loss and additional expense. The loss in passenger earnings (\$10,813) was not recovered during the fiscal year; but this was rather more than made up by increased freight earnings. There is reason to believe that without these interruptions the gross earnings would have shown a considerable increase over those of the preceding year.

### CENTRAL TRAFFIC ASSOCIATION.

The New York correspondent of the *Financial News* telegraphs—"The Central Traffic and Passenger Association has decided to maintain its organisation in spite of the Supreme Court decision. It held a meeting at Chicago on Wednesday, and adopted a new agreement in which every article of the old agreement which could be construed as clashing with the court's decision was eliminated. Thirty-six roads were represented at the meeting. The purpose of the Central Passengers Association, as reorganised, is set forth as follows in the new agreement:—"To secure promptly to each of the parties authentic information in relation to the tariffs and rate-sheets of the respective parties and the changes therein, and the due filing and publication thereof, to aid in securing compliance with the Federal and State laws regulating Interstate commerce, and to enable the parties to mutually confer, advise, and act in relation to the subjects above stated, and the proper methods to secure the purposes aforesaid." The most important section of the agreement, dealing with the question of rate-making, provides that each line shall file with the commissioner of the association a notice in writing of any rate change at least three days before the new rate becomes effective. Each road will fix and determine its own rates, and file with the commissioner all its rate-sheets for the general information of the members of the association."

### LATEST EARNINGS.

Second week of November.—Denver and Rio Grande, \$184,000—*increase*, \$6,000; New York Ontario and Western, \$76,000—*decrease*, \$6,000; Chicago Milwaukee and St. Paul, \$818,000—*increase*, \$32,000.

First week of November.—Baltimore and Ohio South Western, \$148,000—*increase*, \$29,000; Chesapeake and Ohio, \$233,000—*decrease*, \$8,000; Chicago Great Western, \$114,000—*same* as last year; Mexican Central, \$280,000—*increase*, \$48,000; Missouri Kansas and Texas, \$321,000—*increase*, \$18,000; Missouri Pacific, \$278,000—*increase*, \$21,000; St. Louis South Western, \$149,000—*increase*, \$24,000; Wabash, \$278,000—*increase*, \$40,000; Northern Pacific, \$664,000—*the same* as last year; Cleveland Cincinnati Chicago and St. Louis, \$290,000—*increase*, \$11,000; Norfolk and Western, \$261,000—*increase*, \$35,000; Oregon Railroad and Navigation, \$205,000—*increase*, \$5,000; Louisville and Nashville, \$471,000—*increase*, \$76,000; St. Louis and San Francisco, \$147,000—*increase*, \$5,000; Southern Railway, \$501,000—*increase*, \$50,000. The gross earnings of thirty-five roads in the first week of November show an *increase* of 5.64 per cent.

Month of October.—Illinois Central, gross, \$2,378,000—*decrease*, \$61,000; Chicago Great Western, gross, \$544,000—*increase*, \$15,000; net, \$204,000—*increase*, \$24,000; Tennessee Coal, Iron, and Railroad, net, \$67,000—*increase*, \$18,000; net surplus, \$20,000—*increase*, \$18,000; Baltimore and Ohio, gross, \$2,396,000—*increase*, \$12,000. The gross earnings of 128 roads during the month of October amounted to \$56,213,787, showing an *increase* of \$2,628,854, or 4.91 per cent.

Month of September.—Illinois Central, gross, \$2,385,000—*increase*, \$38,000; net, \$711,000—*increase*, \$30,000. Missouri Kansas and Texas, gross, \$1,258,000—*increase*, \$12,000; net, \$581,000—*increase*, \$7,000. Central Pacific, gross, \$1,485,000—*increase*, \$32,000; net, \$655,000—*decrease*, \$75,000.

### RAILROAD NOTES.

The Circuit Court of Cincinnati has annulled the leases of the Memphis division of the Louisville and Nashville Road to the Nashville Chattanooga and St. Louis Road. The New York correspondent of the *Financial Times* cables:—"Mr. J. S. Rogers has won his suit against the Nashville Chattanooga and St. Louis respecting the leasing of the Memphis and Paducah division from the Louisville and Nashville. The division comprises the old Paducah Tennessee and Alabama and Tennessee Midland, and was let to the Chattanooga at an annual rental of 5 per cent. upon its cost and 5 per cent. additional on the cost of all improvements and betterments. The lease required the confirmation of a three-quarters' vote of the entire capital stock of the Chattanooga, and this, Mr. Rogers contended, it never received. The lease will now be annulled, and the result may very likely prove to be of considerable importance to the companies concerned."

It is understood that in consequence of negotiations which are

in progress for the readjustment of the debt of the Central Pacific Railroad Company the principal of the \$2,995,000 5 per cent. Central Pacific first mortgage extended bonds, series A, due December 1st, 1898, will not be paid at their maturity; but it is intended that until such principal shall have been paid, or a readjustment of the company's affairs arranged, interest at the rate of 5 per cent. will be paid on such bonds. It is further understood that a notice will shortly be issued by Messrs. Speyer Brothers that they are prepared to buy, at par, New York terms and accrued interest, Messrs. Speyer and Co.'s certificates issued for the above-mentioned bonds from such holders as may prefer to encash same.

It is rumoured that Morgan interests are selling their holdings of Northern Pacific on account of the continuance of the road's differences with other lines. We should say, if the Morgan shares are being sold at all, it is because the present is a good time to unload a few on to the public.

It is reported from St. Paul that the Northern Pacific Railroad intends to build a direct line from Winnipeg to Duluth, in order to capture a large portion of the export wheat traffic of the Canadian North-West, which is assuming immense proportions.

Messrs. J. P. Morgan and Co. are offering a limited amount of Elgin Joliet and Eastern 5 per cent. gold bonds, due 1941, at 102½. These bonds have been issued to cover outlays for construction and the acquisition of new property.

The Illinois Central Railroad Company has asked the Omaha City Council for an entrance into that city, for which the road has caused surveys to be made. The Union Pacific Railroad Company has opposed the application.

For the quarter ending September 30th, the Lake Shore and Michigan Southern shows:—Gross, \$5,091,000—*decrease*, \$127,000; net, \$1,819,000—*decrease*, \$214,000; surplus after charges, \$934,000—*decrease*, \$159,000.

The projected deal between the Kansas City Pittsburg and Gulf and the Chicago and Alton has, it is said, fallen through. No wonder; the whole thing looked a case of a very little tail wagging a very big dog.

Last week's east-bound all-rail freight tonnage from Chicago amounted to 98,000 tons, against 46,000 in the corresponding week last year, the increase being stated as due to the low freight rates.

The directors of the Pacific Mail Steamship Company have declared a half-yearly dividend of 1½ per cent., which is an *increase* of ½ per cent. on previous semi-annual distributions.

Mr. Edgar H. Booth has been elected secretary of the Denver and Rio Grande Railroad, to succeed Mr. William Wagner, who has resigned.

The Chicago Burlington and Quincy Railroad Company has declared a quarterly dividend of 1½ per cent.

It is announced that the Atchison Topeka and Santa Fé has secured a dock terminal at San Francisco.

## General News.

### THE BUENOS AYRES AND PACIFIC WRANGLE

We gather that a letter or circular has been sent out to the Buenos Ayres and Pacific stockholders by Mr. J. C. F. Lee, one of the directors. We have not seen a copy of the letter ourselves, and reproduce the comments of some of our contemporaries, without expressing our own views on the controversy which has arisen between Mr. Lee and his colleagues:—  
(Daily Mail.)

An interesting and useful letter has been addressed to the shareholders of the Buenos Ayres and Pacific Railway by Mr. J. C. F. Lee, the deputy-chairman. This letter, which is too long to quote, gives a clear account of the attitude that he adopted in the recent controversy over the extra expenditure advocated by his opponents; and the shareholders are, doubtless, by this time happy to think that Mr. Lee saved them a lot of money, even if he did not quite please some of his fellow-directors.

(Westminster Gazette.)

Mr. J. C. F. Lee, who was unable to attend the last meeting of the Buenos Ayres and Pacific Railway Company through illness, has issued a circular letter to the shareholders, replying to the allegations then made against him in connection with the large

expenditure on permanent way. He points out that the charge that he spoke at the meeting on November 12th of last year on his own account, and without the sanction of the board, is not true, and in support of this he quotes his own words, as well as those used by the chairman, which practically amount to the same thing. Mr. Lee further contends, and, apparently, with justice, that had it not been for his persistent opposition the company would have been committed to the whole of the 66,000*l.* which Mr. Harrison Hodgson recommended should be spent. He asks the shareholders to compare the general manager's more moderate claims as stated to the last meeting with the demands the same gentleman made in March.

(*Financial Times.*)

Holders of securities in the Buenos Ayres and Pacific Railway Company will perhaps not be surprised to learn that the relations between certain members of the board of directors are not quite so harmonious as might be the case. The proceedings at the last annual meeting revealed a spirit of discontent among a section of the proprietors which, rightly or wrongly, found expression in a motion to the effect that "the report be received but not adopted." It cannot be said that this hostile proposition met with any great amount of support, but the mere fact that it was brought forward, taken in conjunction with the general tone of the discussion, was sufficient evidence that things were not running so smoothly as might be desired. The breach has now been widened by the issue of a circular by Mr. J. C. F. Lee, a prominent member of the board, complaining that at the meeting held towards the close of last month, which through illness he was unable to attend, his colleagues treated him in a very unfair and ungenerous manner. The dispute has arisen in regard to the increasing expenditure on renewals of permanent way, and in order to appreciate the point at issue it is necessary to go back to the annual meeting of 1897, when attention was drawn by certain shareholders to the fact that the burden was becoming more weighty year by year. To Mr. Lee fell the task of replying to the criticism. In his own words, "the chairman [Sir Gabriel Goldney, since retired] had asked me as deputy-chairman to make the replies for him," and there can be no doubt that he was regarded by the meeting as a spokesman who represented the views of his colleagues as well as his own. This was the gist of his speech:—"I think this renewal has taken place far in excess of the needs, and I think we should have been justified in coming before you and asking you to sanction the whole of this expenditure being placed to capital account . . . because the traffic, although considerable and growing, has been safely carried on on a 50*lb.* rail. But I may tell the meeting that we have stopped that expenditure, which we have been more or less compelled to incur, and we do not mean to go any further with it, except, as the chairman has said, for the purpose of safety." This certainly does not read like an expression of Mr. Lee's personal opinion, and the obvious impression that it represented the views of the whole board is strengthened by the fact that Sir Gabriel Goldney had already announced that "as a necessary corollary of the decreased receipts lately we have suspended the outlay for the present, except what was necessary for safety." If these assurances did not accurately represent the decision of the management they should have been immediately disclaimed; but so far from this being the case, it was not until last month that Mr. Lee—and presumably Sir Gabriel Goldney as well—was thrown overboard. At the meeting held on the 25th ult. Mr. J. W. Phillips, M.P., a very recent acquisition to the directorate, explained that "Mr. Lee, I believe, last year made a speech without the authority of the board . . . a speech . . . for which the board by their silence may or may not assume responsibility. I have nothing to do with that. If they had taken a prudent course they probably would have got up and disavowed Mr. Lee. . . . Mr. Lee made a very ill-advised statement." The belated disavowal hardly strikes one as being either convincing or dignified. Having regard to the circumstances which prevented Mr. Lee's presence, the delicate situation might have been handled more gracefully, and it would have been in better taste had the task been performed by an old member of the directorate instead of by a new comer, who had to preface his remarks by saying that "I was not at the last meeting; I have only recently come on the board." But the repudiation of Mr. Lee seems to convict his colleagues either of shabby conduct in 1898 or sheepish silence in 1897, and we shall see which alternative they now prefer to choose. The problem which has given rise to the quarrel is, of course, absolutely technical in character, and doubtless much may be said on both sides. Mr. Harrison Hodgson, M.I.C.E., who had inspected and reported on the permanent way of the undertaking, recommended in March the making up and renewal with 70*lb.* rails of the 40 kilometres to complete the relaying of the Mercedes section, and, in addition, the relaying of certain portions of the salt region with 50*lb.* rails taken up from the Mercedes section. Mr. Lee states that he strongly opposed the carrying out of this work,

which was estimated to cost 66,000*l.*, and for justification he points to the statements contained in the last report and made at the recent meeting. Mr. W. C. Huxtable, the general manager, assured the directors in his annual statement that "the permanent way continued in a good working condition, but we have found it necessary to continue supporting the road with additional sleepers." Subsequently he assured the proprietors by word of mouth that the line was never in a better condition for business than it was at the present time. He also said: "I think, with regard to what the chairman has said, that the outlay of 15,000*l.* or 16,000*l.* a year will be sufficient to renew gradually the line, and keep it in a safe and proper manner." This view certainly does not coincide with that apparently held by Mr. Hodgson, who in the previous March wanted wholesale renewals carried out in hot haste. We do not doubt that from many points of view Mr. Hodgson's recommendations were absolutely sound. The better the permanent way the more economically and efficiently can the traffic be handled. But, in view of the financial position of the company, it is certainly desirable that any large expenditure should be postponed for the present so far as is consistent with safety. This, we take it, fairly represents Mr. Lee's attitude, and, judging from his circular, he does not find the slightest reason for quarrelling with Mr. Huxtable's programme as outlined at the meeting. But whatever may be said on the other side—and we trust that in common justice both parties will have a fair hearing—we cannot help thinking that Mr. Lee has a genuine grievance in the treatment that was meted out to him on an occasion when he was unable to be present to defend himself.

#### MIDLAND RAILWAY.
